Calcutta.

M. C. MCALPIN,
Under-Secy. to the Govt. of Bengal.

REVENUE DEPARTMENT.

NOTIFICATIONS.

No. 1200L.R.—The 2nd March 1906.—In exercise of the powers conferred upon him by section 101 (2) (*a*) of the Bengal Tenancy Act, VIII of 1885, as amended by Act III (B.C.) of 1898, the Lieutenant-Governor is pleased to order that a survey shall be made and a record-of-rights prepared in respect of all lands comprised in estate Nayabasan and Rohini Manbhandar, tauzi No. 1981, lying in parganas Nayabasan and Rohini Manbhandar, thana Gopiballabpore, district Midnapore.

Midnapore.

The particulars to be recorded in the survey and record-of-rights shall be the following:—

(*a*) the name of each tenant or occupant;

(*b*) the class to which each tenant belongs, that is to say, whether he is a tenure-holder, raiyat holding at fixed rates, settled raiyat, occupancy raiyat, non-occupancy raiyat, or under-raiyat; and, if he is a tenure-holder, whether he is a permanent tenure-holder or not, and whether his rent is liable to enhancement during the continuance of his tenure;

(*c*) the situation and quantity and one or more of the boundaries of the land held by each tenant or occupier;

(*d*) the name of each tenant's landlord;

(*e*) the money-rent payable at the time the record-of-rights is being prepared, or if a produce rent, the fact that produce rent is paid and the customary terms according to which it is paid;

(*f*) the mode in which that rent has been fixed--whether by contract, by order of a Court or otherwise;

(*g*) if the rent is a gradually increasing rent, the time at which, and the steps by which, it increases.

(*h*) the special conditions and incidents, if any, of the tenancy;

(*i*) if the land is claimed to be held rent-free, whether or not rent is actually paid, and, if not paid, whether or not the occupant is entitled to hold the land without payment of rent, and, if so entitled, under what authority;

(*j*) the name of each proprietor, with the character and extent of his interest, and the situation, quantity, and one or more of the boundaries of each proprietor's private lands, as defined in Chapter XI of the Act;

(*k*) the customs of the villages regulating the methods of irrigation, and the duties and rights of both landlords and tenants with respect to the use and maintenance of the means of irrigation.

No. 1213L.R.—The 28th February 1906.—Mr. J. A. Hubback, Officiating Joint-Magistrate, now employed as an Assistant Settlement Officer, Bihar, is allowed combined leave, under article 233 of the Civil Service Regulations, for six months, viz., privilege leave, under article 260 of the Civil Service

Bihar.

Regulations, for three months, with effect from the 8th May 1906 or any subsequent date on which he may avail himself of the leave, and special leave under article 316 of the Civil Service Regulations for the remaining period.

Sonthal Parganas.

No. 1219L.R.—The 3rd March 1906.—In continuation of Government Notification No. 322T.R, dated the 21st April 1904, published at page 605, Part I of the *Calcutta Gazette* of the 27th idem, and in exercise of the powers vested in him by section 9 of the Sonthal Parganas Settlement Regulation, III of 1872, as amended by section 4 of the Sonthal Parganas Rent Regulation, II of 1886, the Lieutenant-Governor is pleased to declare that a revision of settlement shall be made of the areas specified below, situated within the undermentioned estates in the Sonthal Parganas:—

NOTIFICATONS.

No. 1225.—The 5th March 1906.—It having been decided to withdraw from the acquisition of 1·06 acres of the land which was required to be taken up under the Railway Department Declaration No. 62R., dated the 23rd April 1901, published at pages 531 and 532, Part I of the *Calcutta Gazette* dated the 24th April 1901, in connection with the new Loco motive Yard of the East Indian Railway at Howrah, the declaration under notice is modified as follows:—

Howrah.

(*i*) Read the area to be taken up as 89 bighas 15 cottahs (corresponding to 29 acres 2 roods 27·1 poles) in the place of 92 bighas 19 cottahs and 2 chitaks (corresponding to 30 acres 2 roods and 36·8 poles).

(*ii*) Also omit the last line in the details respecting plot No. 3 in sheet No. 3 showing 3 bighas 4 cottahs 2 chitaks in mauza Bamongachi, and also read the grand total as 89 bighas 15 cottahs in the place of 92 bighas 19 cottahs 2 chitaks.

(*iii*) Omit the detailed boundaries of plot No. 3.

No. 1212 Agri.—The 2nd March 1906.—It is hereby notified for general information that the Lieutenant-Governor has been pleased to sanction the following revised rules for the admission of students to the Bengal Veterinary College and of animals into the Veterinary Hospital attached to it, in supersession of those published under Notifications Nos. 1471T.—R. and 2960Agri., dated the 7th July 1902 and 3rd November 1903 respectively:—

Revised Rules.

THE BENGAL VETERINARY COLLEGE.

THE Bengal Veterinary Institution, consisting of a Veterinary School and Hospital, which was established on the Belgachia-Dum-Dum Road (about five miles from Government House) in 1893, has now been raised to the status of a College. The College is under the management of a Committee appointed by Government, consisting of Government officers and native gentlemen.

2. The College at Belgachia consists of a large building, in which are three lecture-rooms, a museum, library, and reading-room, pharmacy, lecturers' room, and a photographic room. A Veterinary Hospital is attached to the College, consisting of four horse and three cattle wards, Bacteriological Laboratory, *post-mortem* and dissecting-room, shoeing forge, two operation sheds, and storerooms. Special isolation wards for the contagious and infectious cases are provided in the College Annexé, so as to prevent any chance of communication between the infectious and non-infectious cases. There is also a hostel attached to the College, which has been expressly provided for the benefit of the students of this College. It consists of eight large and three small rooms, with quarters for the Manager, and has sufficient accommodation for 50 boarders.

3. Full clinical and other facilities will be afforded to meet the educational requirements of veterinary students in the Bengal Presidency. Students may also be admitted from any other part of India. The special objects of the College are to train thoroughly practical and competent men for veterinary service under Government, Native States, Municipalities, District Boards, and private employers.

4. Government has undertaken to bear the cost of the establishment, which consists of a Principal, an Assistant Principal, five Lecturers, a Hospital Surgeon, 1 Hospital Overseer, and a considerable working staff.

5. The rules for the admission of students to, and regulation of their studies in, the Bengal Veterinary College, and for the admission of animals into the hospital of the Bengal Veterinary College, contained in the following notification, are issued provisionally, and are liable to be modified hereafter, if found necessary.

Rules for admission of students to, and regulation of their studies in, the Bengal Veterinary College.

1. The course of study for the diploma of qualification will extend over at least three years. Each year will comprise nine teaching months, and will be divided in accordance with the terms of the Calcutta Medical College.

2. New students are required to join on the 15th April, in order to give them time to settle down and acquire some practical knowledge of the work before the lectures commence on the 1st July.

3. Each candidate for admission as a student is required to produce a certificate—

(*a*) Of age.

(*b*) Of good morals.

(*c*) Within three months of his admission to the College, showing that he has passed either—

(*i*) the Entrance Examination of the Calcutta University, or

(*ii*) that he has completed the High School Course, or,

(*iii*) an equivalent examination to either (*i*) or (*ii*).

3 (*a*). A special examination will be held by the College staff for youths desiring admission who are not in possession of the above certificates but whom the Principal may consider likely to turn out useful Veterinary Assistants.

The examination will consist of the following subjects—

(*a*) Reading aloud.
(*b*) Dictation.
(*c*) Geography—Europe and Asia.
(*d*) Arithmetic—Simple and Compound Proportion with Vulgar and Decimal Fractions.
(*e*) A common sense paper.

4. He will also have to produce a certificate from a Civil Surgeon as to his constitutional fitness, or undergo an examination by the College Medical Officer for the same.

5. The Principal of the Bengal Veterinary College will decide as to whether the candidate is physically fit.

6. There will be no restrictions as to caste or nationality of candidates.

7. Candidates shall be between 18 and 26 years of age. They must be not less than 5 feet 4 inches in height and 30 inches round the chest. Exceptions will be considered by the Principal in the cases of candidates who are under 20 years whom he considers likely to develop to the above standard.

8. All applications for admission as a student are to be made in writing to the Principal of the Bengal Veterinary College, who will decide on the advisability of admission in all doubtful cases.

9. Government will allot annually not less than 30 stipends each of the monthly value of five rupees:—

There will be three classes of stipends—

(*a*) For first-year students, or Class "A," tenable for eleven and-a-half months, from 15th April to 31st March following.

(*b*) For second-year students, or Class "B," tenable for twelve months, from 1st April to 31st March following.

(*c*) For third-year students, or Class "C," tenable for twelve months, from 1st April to 31st March following.

10. The stipends will be held conditionally on the good behaviour and satisfactory progress of the holders.

11. The stipends will be awarded by the Principal after such examination or other test of the fitness of the candidates as he may think right to prescribe.

12. The Principal may stop the whole or part of the stipend of any District Board or other student for indifferent progress or misbehaviour, and shall make a note of such occurrences in the student's monthly progress report.

13. Annual examinations will be held in March for the first and second-year students, in order to determine their qualification for promotion to Classes "B and "C." The stipends mentioned in rule 5 (*b*) and (*c*) will be allotted in accordance with the results of the annual examinations.

14. It shall be within the discretion of the Committee of Management to decide how many stipends are to be awarded to each class in any year,

15. A student already in the enjoyment of a stipend or scholarship shall not be eligible to compete for a Government scholarship.

16. The stipend of a student who fails at a yearly examination shall be stopped altogether, or for such period as the Principal deems desirable.

17. The Principal will report to the Committee as to the desirability of retaining any student who has failed at the annual examination.

18. All students shall be bound to conform to the rules of the College and to attend during the hours of instruction, unless specially granted leave of absence.

19. A student absenting himself without leave from the riding class or from a lecture will be liable to fine, or such other punishment as the Principal may desire to inflict.

20. The students may be divided into batches for attendance during the vacations in order that the work of nursing and dressing the sick may not suffer. The stipend of any student who fails to attend in his turn will be paid to his *locum tenens*.

21. In addition to the Government stipends, the Sheo Baksh Bogla Veterinary Scholarship of Rs. 9-8 per mensem will be available. It was founded by Dr. Kenneth McLeod, late Professor of Surgery at the Calcutta Medical College, in 1892, in recognition of Raja Sheo Baksh Bogla's liberality in connection with the establishment of the first Veterinary School and Hospital in Bengal, and is subject to the following conditions:—

(1) that the candidate must possess the necessary educational qualifications required under paragraph (*c*) of rule 3 for admission of students;

(2) that in awarding the scholarship, preference be given to an inhabitant of the district of Jessore;

(3) that in the event of more than one candidate possessing the necessary qualification coming forward, preference be given to the candidate who has attained the largest number of marks in the examination;

(4) that the scholarship be tenable for a period of three years in connection with the Bengal Veterinary College.

22. The Principal will select such candidates as he may consider fit to fill the vacancies in the list of Government stipends and to obtain the Sheo Baksh Bogla Scholarship according to the prescribed conditions. He will report his nominations to the Committee.

23. *Studies.*—The following will be the curriculum of studies:—

FIRST YEAR.

(1) *Anatomy (up to Arthrology)*—

Text-Books.—Lectures on Anatomy sanctioned by the Principal, Bengal Veterinary College.
Strangeway's Veterinary Anatomy.

(2) *Elementary Chemistry*—

Text-Books.—Lectures on Chemistry sanctioned by the Principal, Bengal Veterinary College.
Roscoe's Chemistry (Primer Series).

(3) *Elementary Botany (including Poisonous Plants)*—

Text-Books —Lectures on Botany sanctioned by the Principal, Bengal Veterinary College.
Bentlay's Botany (Primer Series).

(4) *Materia Medica.*—

Text-Books.—Lectures on Materia Medica sanctioned by the Principal, Bengal Veterinary College.
Tuson's Veterinary Pharmacopœia.

Text-Books.—Dhakmarvala's Handling of Domestic Animals.

(6) *Pharmacy (Theoretical and Practical)*—

Text-Books.—Tuson's Veterinary Pharmacopœia.

During this year students shall be practically instructed in nursing and dressing, the handling, casting, and securing of animals, and the names of the various instruments and appliances used in ordinary practice.

SECOND YEAR.

(1) *Anatomy, the whole, including Comparative Anatomy*—

Text-Books.—Lectures on Anatomy sanctioned by the Principal, Bengal Veterinary College.
Strangeway's Veterinary Anatomy.

(2) *Physiology*—

Text-Books.—Lectures on Physiology sanctioned by the Principal, Bengal Veterinary College.
Ahby's Physiology.

(3) *Hygiene (including Breeding and Rearing)*—

Text-Books.—Lectures on Hygiene sanctioned by the Principal, Bengal Veterinary College.
Meyrick's Stable Management.

(4) *Principles of Horse-shoeing*—

Text-Books.—Hunting's Horse-shoeing.

(5) *Theoretical Veterinary Medicine and Surgery*—

Text-Books.—Lectures on Veterinary Medicine and Surgery sanctioned by the Principal Bengal Veterinary College.
Adam's Diseases of the Horse.
Steel's Diseases of the Ox, amplified by all information brought up to date in the Agricultural Ledgers, Veterinary Series.

(6) *General Nursing and Instructions in the use of Instruments and Appliances.*—[Subjects (5) and (6) will be taught during the year, but no examinations will take place.]

During this year students shall also attend hospital practice and receive clinical instructions. They should also attend at the Forge and Pharmacy, carry out dissections and perform operations on the dead subject.

THIRD YEAR.

(1) *Equine Medicine and Surgery*—

Text-Books.—Lectures on Equine Medicine and Surgery sanctioned by the Principal, Bengal Veterinary College.
Adam's Diseases of the Horse.

(2) *Bovine Medicinice and Surgery including Obstetrics*—

Text-Books.—Lectures on Bovine Medicine and Surgery sanctioned by the Principal, Bengal Veterinary College.
Steel's Diseases of the Ox, amplified by all information brought up to date in the Agricultural Ledgers, Veterinary Series, and Journals.

(3) *Operative Surgery*—

Text-Books.—Cadiot's Exercises in Surgery

(4) *Therapeutics (including Toxicology)*—

Text-Book.—Lectures on Therapentics sanctioned by the Principal, Bengal Veterinary College.
Wallis Hoare's Veterinary Therapeutics.

(5) *Soundness of Horses and Aging of Domesticated Animals*—

Text-Books.—Moore's Guide to Examination of Horses for Soundness and Brown's Primer on Dentition.

During this year the students will be required to perform the duties of clinical clerks and dressers, to perform operations on dead subjects and afterwards on living animals, and to conduct *Post-mortem* examinations. They will carry out practically all the duties appertaining to their profession.

24. The examinations to be passed for diplomas are three in number, corresponding to the years of professional study and to the subjects taught during these years. These examinations, which shall be entirely *viva voce*, will be conducted under special regulations by a Board appointed for the purpose.

25. The following are the subjects for the examinations with the maximum number of marks that will be awarded for each of them:—

Examination at the end of the first year's study—

	Marks.
(1) Anatomy up to Arthrology... ...	100
(2) Elementary Chemistry	100
(3) Elementary Botany, including Poisonous Plants	100
(4) Materia Medica	100
(5) Handling of Animals	100
(6) Pharmacy (Theoretical and Practical) ...	100
Total ...	600

Examination for those students who have passed the first examination and have gone through the second-year course of study:—

	Marks.
(1) Anatomy, whole, including Comparative Anatomy	100
(2) Physiology	100
(3) Hygiene, including Breeding and Rearing	100
(4) Principles of Horse-shoeing ...	100
Total ...	400

Final or Diploma Examination for those students who have passed the second examination and have gone through the third-year course of study:—

	Marks.
(1) Equine Medicine and Surgery ...	200
(2) Bovine Medicine and Surgery ...	200
(3) Operative Surgery	200
(4) Therapeutics, including Toxicology ...	100
(5) Soundness of Horses and Aging of Domesticated Animals	200
Total ...	900

This examination will be of a general nature, calculated to test the knowledge acquired by the students during the whole of their three years' course.

26. In the first and second-year class examination 33 per cent. in each subject will be required to ensure a "Pass," except Botany in the first-year class, in which 20 per cent. will be required, with an aggregate of 50 per cent.

27. In the Final or Diploma Examination 50 per cent. in Equine and Bovine Medicine and Surgery and Operative Surgery and 33 per cent. in "Therapeutics" and "Soundness of Horse and Aging of Domesticated Animals" will be required for a "Pass," the aggregate of all subjects being 50 per cent.

28. For admission to any examination by the Board, a candidate must have studied at the College for such time as may be prescribed, and have attended at least three-fourths of the year's lectures and have done practical work in each of the various classes. He must also have obtained from the Principal permission to appear for examination. Lists of the students who have passed the examination successfully will be published as soon as possible after completion of the examination.

29. A diploma as Graduate of the Bengal Veterinary College will be awarded to students who have gone through a full course of study at the College, and have passed the final examination. Special certificates of proficiency will be awarded to students who have passed the final examination, and who have, during their period of study, been elected clinical clerks, prosectors, and monitors, and have performed their duties satisfactorily.

30. Strict discipline will be maintained within the College. Infringement of rules and regulations by students will be punished by fines, rustication, expulsion, or such other punishment as may be considered advisable by the Principal after due enquiry. Each student, when his name is enrolled on the College books, will receive a copy of the rules and regulations, and on entering the College he will be required to acknowledge by signature his acceptance of such rules and regulations as are in force when he enters, and also such as may be authoritatively introduced from time to time.

31. All officials and servants of the College will be under the control of the Principal for discipline and the due performance of their duties.

32. The officers of the College, in accepting their appointments, will be considered to accept the rules and regulations then in force and such modifications as may be made from time to time under due authority. Each officer will be held responsible for the exact performance of the duties in his branch of the College work, and for the results of his teaching

33. The Principal and Assistant Principal will exercise general supervision over all departments and be in immediate charge of the hospital wards, pharmacy, library, and other parts of the College. The officers engaged in instruction will every month make a report to the Principal of the attendance of the students at their classes, and of the individual progress as shown at monthly oral examinations.

34. The Hospital Surgeon will be in immediate charge of the forge building, and will be held responsible for the condition of the feet of all animals in hospital.

35. Clinical clerks will be selected from the senior and more experienced students, and each in turn placed in charge of one of the wards of the hospital to superintend the medical treatment, nursing of the patients, and proper record of cases. Satisfactory performance of the duties of clinical clerk will be recognized by the award of a certificate on graduation.

36. Every student who is not a clinical clerk will perform the duties of dresser. He will be responsible that all instructions as to the nursing and medical treatment of the animals under his charge are carried out by himself.

37. Two students to act as prosectors may be appointed by the Lecturer on Anatomy every session. To them will be entrusted the preparation of all "subjects" required to illustrate his lectures, the hanging of diagrams, placing of specimens on the

lecture table, etc. Satisfactory performance of these duties will also be recognized by the award of a special certificate.

38. The Principal will furnish a monthly report during the terms to each person or body of persons by whom the students are supported at the College as to their regularity of attendance, progress, and conduct while on the College premises. The progress of each student will be judged from the monthly examinations.

39. Damage to property in the College (as writing on or defacing the doors or walls) is strictly prohibited. The Principal will periodically inspect all the buildings of the College, and enquire into any damage that may have been done.

40. Tables of the times and subjects of the lectures will be posted on the Notice Board at the commencement of each term, to which both teachers and students will adhere.

41. A library and reading-room will be established in the College to assist the students, and for professional reference. It will be conducted under special rules, which will be posted up in the room, and which will be strictly observed.

42. Models, mounted specimens, diagrams, and expensive instruments, not frequently required, will be kept in the museum. They will there be on view for purposes of study, but in no case be removed, except by the teachers when reqired for use in the lecture-room or hospital.

43. The museum will be under the charge of a Curator, who will be responsible for order and discipline in the museum.

44. The records of the College will be kept by the clerk, under the immediate supervision of the Principal or Assistant Principal.

45. The records of the hospital will be kept by the Hospital Surgeon under the immediate supervision of the Assistant Principal.

46. The class-rooms and library of the College will be available for students' meetings at the discretion of the Principal. No students' society, bearing the name of the College, may be formed without his consent.

47. The dissecting-room will be open during daylight to all students, but advanced students only will be allowed to dissect there under the supervision of the Instructor on Anatomy whose duty it will be to distribute "parts" and subjects and record attendance and work.

48. Dissections will be carried on throughout the cold weather session between 1st November and 28th February, and no student shall, on any pretext whatsoever, be exempt from this most important part of his duties. The strictest discipline, cleanliness, and order are at all times to be preserved in the dissecting-room.

49. A small plot of ground will be arranged on the premises as a botanical garden in such a way as to render it of value to the students in obtaining practical acquaintance with medicinal, dietetic, and poisonous plants. It will at all times be open to the students, and the gardener will so far as possible supply them with plants for the practical study of botany.

50. *Post-mortem* examinations are to be made in the case of all animals dying in the hospital, except when the owner has expressed a wish to the contrary. The result will be recorded in a book kept specially for the purpose.

51. The isolation wards will, when occupied, be placed in charge of a special clinical clerk, fully instructed as to the measures necessary for the protection of the attendants and the prevention of contagion.

52. The pharmacy and drug-store will be in the immediate charge of the Assistant Principal. No student or attendant will be allowed to enter into this part of the hospital without special permission. The Hospital Surgeon will be responsible for the proper preparation of medicines, and that neither waste nor mistakes in dispensing be made.

53. Menial servants of the College, as sanctioned by Government, are to be mustered monthly in the presence of the Principal and then receive their pay. They will hold their posts during good behaviour and satisfactory performance of their duties. Their work will be explained thoroughly to them before they join, and they will be constantly in attendance daily for such hours as may be determined from time to time.

Rules for the admission of animals into the Hospital of the Bengal Veterinary College.

1. Accommodation is available for 250 head of cattle and 50 horses as patients in the hospital.

2. Animals manifestly suffering from any incurable disease will not be admitted into the hospital without the special sanction of the Assistant Principal or Principal in each case.

3. For the purposes of convenience and accounts, the animals admissible as patients will be dealt with in five classes, as follows:—

Class I.—Horses and ponies belonging to well-to-do owners.

	Rs.	A.	P.	
(*a*) In-patients	1	0	0	per diem.
with a minimum charge of	12	0	0	
(*b*) Out-patients, ...	5	0	0	each case.
(*c*) Charge for examination and written opinion as to soundness	16	0	0	

Class II.—Horses and ponies belonging to persons of small means and to hackney-carriage drivers.

	Rs.	A.	P.	
(*a*) In-patients, horses	0	6	0	per diem.
with a minimum charge of	5	0	0	
In-patients, ponies	0	4	0	per diem.
with a minimum charge of	3	0	0	
(*b*) Out-patients, horses and ponies ...	1	0	0	each case.
(*c*) Examination for soundness and verbal opinion—				
Horses	5	0	0	
Ponies	5	0	0	

Class III.—Cattle.

	Rs.	A.	P.	
(*a*) In-patients, if fed by owners	Free			
(*b*) In-patients, if fed by hospital—				
Well-to-do owners	0	6	0	per diem.
with a minimum charge of ...	1	8	0	
Cartmen, gwalas, and pack-bullock drivers	0	1	0	per diem.
with a minimum charge of ...	0	6	0	
People who are in the opinion of the Superintendent unable to pay ...	Free			
(*c*) Out-patients—				
Well-to-do-owners	0	8	0	each case.
Others	Free			

Class IV.—Dogs.

	Rs.	A.	P.	
(*a*) In-patients	0	4	0	per diem.
with a minimum charge of	3	0	0	
(*b*) Out-patients, for a course of treatment ...	1	0	0	
(*c*) Charge for examination	5	0	0	
(*d*) The property of poor people	Free.			

Class V.—Sheep and Goats.

	Rs.	A.	P.	
(*a*) In-patients	0	2	0	per diem.
with a minimum charge of	0	8	0	
(*b*) Out-patients for a course of treatment ...	0	4	0	
(*c*) The property of poor people	Free.			

4. The fees mentioned in rule 3 include feeding, nursing, operations, and general treatment.

5. Animals, if not taken away after a week's notice has been given to the owner to the effect that the patient may be removed, will, if able to travel, be sent to the Pinjrapole at Sodepur, by permission of the Committee of the Pinjrapole Society.

6. Out-patients (*i.e.*, animals brought to the hospital and taken away after inspection and advice) in Classes II and III will receive advice and medicine *gratis* between the hours of 7 and 11 A.M. Urgent cases will be admitted at any hour.

7. Patients in Class I must in each case be accompanied by a syce, who must remain with the animal. Animals in the other classes must be similarly attended to if the Principal or Assistant Principal considers it necessary.

8. With regard to feeding, nursing, and treatment, all patients will be looked after with equal care, irrespective of their classification.

9 All accounts must be settled and charges paid before any animal is removed.

10 Owners of animals may visit the College to see their animals at any time in the day, but will not be allowed to interfere in any way with the treatment of patients.

11. All important operations will be conducted on patients with the aid of chloroform or other anæsthetic.

12. A few horses may be shod in the forge attached to the College. The uniform rate will be Re. 1-8 for shoeing and 12 annas for removals.

13. All animals sent to the College for treatment, etc., receive every care and attention, but the College does not hold itself responsible for any unavoidable accidents or deaths.

14 Advance of money must be made by the owners for treatment when necessary.

Rules for the Management of the Bengal Veterinary College Hostel.

1. The Hostel has been expressly provided for the benefit of the students of the Bengal Veterinary College, who must live in it after being admitted as students, and abide by the rules in force.

2. *Fees.*—Each student on joining the Hostel will be required to deposit "caution money" to the amount of Rs. 5, which will be ultimately returned to the student if he has not rendered himself liable to forfeiture of the whole, or any part of it.

The charge for board and light shall be at the rate of Rs. 8 per month. In addition to this, each student shall be charged Re 1 for the ground floor and Rs. 2 for the second floor per month. A student occupying one of the single rooms on the ground floor shall be charged Rs. 2 per month.

3. *All payments must be made into the Manager's office before the 15th of the month for which the money is due : a fine of Re, 1 for every three days' delay will be imposed. If the payment be not made, the defaulter's name will be removed from the books.*

4. Students taking admission after the 15th of the month shall get full deduction of the monthly charge for board and light only for the period prior to their admission, and when withdrawing from the Hostel on or before the 15th of the month, shall get a similar deduction for the period subsequent to their withdrawal. Every withdrawal requires the previous sanction of the Principal.

5. A student absenting himself from the Hostel for more than 15 consecutive days with the written permission of the Principal shall be entitled to remission of the monthly fee at the rate of 3 annas per day.

6. *Accommodation and furniture.*—Each of the large rooms is furnished with six beds, one table, six *chairs*, eight wall cupboards with padlocks and a hanging lamp, and will accommodate six students. Every student must bring his own *clothing* and *bedding*, *but* no extra furniture can be admitted without the permission of the Principal.

7. The unauthorized removal of an article of furniture from its proper place shall be punished with fine, and a student wilfully damaging any article will have to replace it or pay for its repair.

8. *Meals.*—There shall be a uniform course of dietary, consisting of rice and such other articles as are used in ordinary native families. There shall be a fixed scale, which will not be exceeded, except with the sanction of the Principal. Arrangements for the daily meals shall be made by a Mess Committee composed of two students, in consultation with the Manager and in accordance with the sanctioned scale. Two of the boarders will be taken *weekly* in rotation to assist in making the bazar purchases and in using the required quantity of each article.

9. Students must go to the dining-rooms for their meals *between 10 and 11* in the morning and *8 and 9* in the evening. Those failing to do so will be treated as absent.

10. *Conduct.*—A certain number of students will be appointed monitors monthly in rotation. Students will have to pay strict obedience to the rules and to behave well in matters not provided for by the rules. All breaches of discipline or cases of misconduct will be reported by the monitor to the Manager, and, in serious cases, by the latter to the Principal.

Students may be removed from the Hostel for laziness or misconduct.

11. A conduct register of each student will be kept by the Manager, who will have no power to cancel or alter any entry once made and signed.

The students will have their names placed in the conduct register, and be fined or otherwise punished for—

(*a*) disobedience of orders or infringement of rules;
(*b*) absence without leave;
(*c*) neglect of study;
(*d*) insubordination or disrespect to the authorities;
(*e*) assaulting or abusing a servant of the Hostel;
(*f*) want of cleanliness or tidiness in their rooms;
(*g*) misconduct not provided for by the rules;

12. Students shall not crowd round or follow a visitor or inspecting officer while in premises. They should remain in their places, unless called out, and should pay the customary marks of respect to official visitors.

13. *Sickness.*—Students falling *seriously* sick may be removed to the *North Suburban Hospital at Chitpur*, where they will receive gratuitous medical treatment, and if attacked with small-pox, cholera or other infectious diseases, they will be promptly removed from the Hospital to the *Campbell Hospital at Sealdah.*

14. *Attendance.*—The roll shall be called by the monitors twice a day, viz. (1) at 6 A.M. from March to October, and 6-30A.M. from November to February, and (2) at 8-30 P.M., and also by the Manager once a day. Any one found absent will be called upon for an explanation. Any student staying away from the Hostel premises after nightfall shall be reported to the Principal, *and must give a satisfactory explanation.*

15. The gate will be closed at 8-30 P.M., *when* visitors shall leave the premises. The roll shall be called immediately afterwards. Every entry and departure after that hour shall be recorded in a book by the Durwan, who will immediately report it to the Manager. The gate will be locked for the night at 11-30 P.M., and will not be unlocked until the next morning after roll-call.

16. *Outsiders.*—The Hostel is intended solely for the students of the Bengal Veterinary College; no outsiders shall, therefore, be allowed to live in it, *except those connected with the College.* Relatives and friends of the students only will be allowed to visit the Hostel from 5 to 8 P.M. No visitor shall be allowed to have a meal in the Hostel.

17. *Hours for reading.*—There shall be stated hours for reading, during which no student shall go to another's room, or in any way interrupt others in their studies.

18. *Exercise.*—Football and other games may be played on the recreation ground, and students taking part in these shall pay a monthly subscription of one anna to the Secretary of the Hostel

Football Club. The arrangements for all games shall be regulated by the Club.

19. There will be riding school held every day throughout the year, Sundays excepted, and all students must attend them regularly. The students in Classes "B" and "C" will form one division, and those in Class "A" will form another, and each division shall attend on alternate days. *All students will be obliged to attend their classes.*

20. *Menial servants.*—All the servants shall have their duties specified. Any complaints of neglect of duty, or of insubordination or misconduct, shall, in the first instance, be made to the Manager. The Principal shall be the final authority in punishing a servant Under no circumstances shall a servant be assaulted or abused by a student.

These rules are subject to modification hereafter, if found necessary.

No. 1199L.R.—The 2nd March 1906.—Under section 3 of the Bengal Survey Act, V (B.C.) of 1875, the Lieutenant-Governor is pleased to order that a survey shall be made of all lands comprised within the external boundaries of Estate Nayabasan and Rohini Manbhandar, bearing tauzi No. 1981, and lying in parganas Nayabasan and Rohini Manbhandar, thana Gopiballabpore, district Midnapore, and that the boundaries of estates, tenures, mauzas and fields be demarcated on the lands so to be surveyed.

Midnapore.

R. W. CARLYLE,
Offg. Chief Secy. to the Govt. of Bengal.

DECLARATION.

No. 892L.A.—The 16th February 1906.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken by Government at the public expense for a public purpose, viz., for a road for carting materials to the site of Masan Syphon on the Tribeni Canal in the village of Kandilla, pargana Majhowa, zilla Champaran, it is hereby declared that for the above purpose a piece of land measuring, more or less, one bigha of standard measurement, bounded on the north by parti land already acquired and Lal Babu of Bela's field, west by land acquired by Government for approach canal of Masan Syphon and Lal Babu's field, south by land already acquired for approach channel of Masan Syphon and Lal Babu's field, east by site for stacking materials already acquired by Government and Lal Babu's field, is required within the aforesaid village of Kandilla.

Champaran.

This declaration is made, under the provisions of section 6 of Act I of 1894, to all whom it may concern.

A plan of the land may be inspected in the office of the Executive Engineer, Champaran Division, at Motihari.

R. W. CARLYLE,
Offg. Chief Secy. to the Govt. of Bengal.

DECLARATION.

No. 1224L.A.—The 5th March 1906.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken by Government at the expense of the Ranaghat Municipality for a public purpose, viz, for site of a public latrine at Ranaghat, in the town of Ranaghat, pargana Mamjoan, zilla Nadia, it is hereby declared that for the above purpose a piece of land measuring, more or less, 1 cottah 5 chitaks of standard measurement, bounded on the north, south and west by the waste (*patit*) land of Babu Gopeswar Pal Chowdhury and others, and east by the said waste (*patit*) land of Babu Gopeswar Pal Chowdhury and others and Narikel Bagan Public Lane, is required within the aforesaid town of Ranaghat.

Nadia.

This declaration is made, under the provisions of section 6 of Act I of 1894, to all whom it may concern.

A plan of the land may be inspected in the office of the Collector of Nadia.

R. W. CARLYLE,
Offg. Chief Secy. to the Govt. of Bengal.

DECLARATION.

No. 1231L.A.—The 5th March 1906.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken by Government at the public expense for a public purpose, viz., for a Provincial Agricultural College in the district of Bhagalpur, it is hereby declared that for the above purpose two pieces of land measuring, more or less, 342 acres, equivalent to 1,034 *b.* 11*k.* of standard measurement, viz., 647 *b.* 4 *k.* of local measurement, one piece bounded on the north by the land of village Sabour up to the abandoned old railway embankment, on the south by the railway land near Sabour station, on the east by the land of Sabour, Alinagar and Khankita, and on the west by the land of Sabour; and the other piece bounded on the north by the railway land near Sabour Station on the south by the land of villages Sultanpur and Mirzapur, on the east by the land of villages Mirzapur and Chandheri

Bhagalpur.

and on the west by the land of villages Sultanpur and Sabour, are required within the villages of Sabour, Alinagar, Khankita, Chandheri, Mirzapur and Sultanpur, pargana Bhagalpur, in the district of Bhagalpur.

This declaration is made, under the provisions of section 6 of Act I of 1894, to all whom it may concern.

A plan of the land may be inspected in the office of the Collector of Bhagalpur.

R. W. CARLYLE,
Offg. Chief Secy. to the Govt. of Bengal.

JUDICIAL DEPARTMENT.

No. 1401A.

APPOINTMENTS AND TRANSFERS.

NOTIFICATION.

Examination of Compounders at the Campbell Medical School.

IN accordance with the Government of Bengal Notifications Nos. 4042Medl., dated 2nd November 1896, and 337T.—M., dated 9th June 1897, notice is hereby given that the next half-yearly examination of Compounders will begin at 11 A. M. on Tuesday and Wednesday, the 24th and 25th April 1906, at the Campbell Medical School.

2. Every candidate must produce a certificate of training and a certificate of age and previous education, as required by Rule 9—*vide* Government of Bengal Notification No. 4042Medl., dated 2nd November 1896, published in the *Calcutta Gazette* of the 4th

November 1896, and circulated by the Inspector-General of Civil Hospitals, Bengal, to all Civil Surgeons, Superintendents of Medical Schools, Lunatic Asylums and Calcutta Hospitals with his Circular No. 60, dated 5th December 1896.

3. Male candidates must forward to the Superintendent of the Campbell Medical School, at least one week before the 24th April 1906, an examination fee of Rs. 5. Female candidates will be examined free of charge. No certificate or free will be received on Sundays or public holidays.

4. Should any candidate fail to pass the examination, he will forfeit his fee.

NOTE.—The attention of candidates is drawn Rules 9, 10 and 12 (*a*) and (*b*), and of the persons granting the certificates to Rules 11 and 14 (3) and (4) and to the Certificate Forms C and D, in the Schedule of the Government of Bengal's aforesaid Notification N. 4042Medl., dated 2nd November 1896.

J. C. S. VAUGHAN, M.B. (EDIN.), *Major*, I.M.S.,
Supdt., Campbell Medical School.

CAMPBELL MEDICAL SCHOOL, CALCUTTA, *the 19th February 1906.*

NOTIFICATION.

Examination of Compounders at the Temple Medical School, Patna.

IN accordance with the Government of Bengal Notifications Nos 4042Medl., dated 2nd November 1896, 337T.—M., dated 9th June 1897, and 288Medl., dated 17th January 1902, notice is hereby given that the next half-yearly examination of Compounders will be held at 10 A M. on Monday, the 2nd April 1906, at the Temple Medical School, Bankipore.

2. Every candidate must produce certificates of training, age, and previous education, as required by Rule 9 of Bengal Notification No. 4042Medl., dated 2nd November 1896, published in the *Calcutta Gazette* of the 4th November 1896, except in those cases provided for in Rule 10.

These certificates must comply with the conditions laid down in Rule 12 of the above resolution.

3. Male candidates must register their names and submit their certificates, together with a fee of Rs. 5, at least one week before the 2nd April 1906 at the office of the undersigned.

Female candidates will be examined free of charge.

[*Exception.*—The students belonging to the Compounder class of a Vernacular Medical School will be exempted from paying this fee on producing a certificate from the Superintendent that they have already paid the school entrance fee.]

4. Should any candidate fail to pass the required examination, he will forfeit his fee.

5. Candidates will have to pass a test in English before being allowed to appear for the rest of the examination.

This test consists of reading and writing from dictation, the reading of prescriptions and labels.

They will, if successful, be then examined in Materia Medica, Pharmacy, the compounding and mixing of drugs, etc.

6. No candidate for the Compounders' examination shall be permitted to appear for examination more than three times.

B. C. OLDHAM, MAJOR, I.M.S.,
Superintendent, Temple Medical School, Patna.

The 12th February 1906.

The 2nd March 1906.—Babu Radhika Prasad Lahiri, Clerk of the Calcutta Training School (class IV), is allowed leave of absence for six months, under article 336 of the Civil Service Regulations, with effect from the 6th February 1906.

Babu Surendra Nath Banerji, Clerk and Deputy Keeper, Government Art Gallery (class IV), on privilege leave, is appointed to act as Clerk of the Calcutta Training School, during the absence, on leave, of Babu Radhika Prasad Lahiri, or until further orders.

Babu Mohadev Prasad, a Clerk in the office of the Inspector of Schools, Bhagalpur Division, is appointed temporarily to be Head Clerk in that office and substantively *pro tempore* to class VIII of the Subordinate Educational Service, in the resulting vacancy arising from the retirement of Babu Nilmadhab Chakravarti.

Maulvi Mohsin Ali, Sub-Inspector of Schools, Midnapore (class VI), was granted by the District Board of Midnapore leave of absence for three months, under article 260 of the Civil Service Regulations, with effect from the 26th July 1905.

This cancels the notification, dated the 5th September 1905, granting one week's leave, under article 260 of the Civil Service Regulations, to Maulvi Mohsin Ali, with effect from 25th July 1905.

In supersession of the orders of the 21st December 1905, Babu Surendra Nath Banerji, Clerk and Deputy Keeper, Government Art Gallery, and Officiating Head Clerk, Sanskrit College, is allowed privilege leave for two months and fifteen days, under article 260 of the Civil Service Regulations, with effect from the 12th February 1906.

A. PEDLER,
Director of Public Instruction, Bengal.

NOTIFICATION.

THE Final Commercial Class examination will be held in the Presidency College, Calcutta, on the 5th April 1906 and subsequent dates.

There shall be separate papers in (*1*) (*a*) English, including Grammar and Composition; (*b*) English Correspondence, including Commercial Correspondence, and (*c*) Letter-drafting and Précis-writing; (*2*) Bengali; (*3*) (*a*) Arithmetic, including Commercial Arithmetic and (*b*) Mental Arithmetic; (*4*) (*a*) Commercial History, (*b*) Commercial Geography.

Candidates are required to pass in all the above papers.

Candidates shall also be examined, and shall be required to pass, in either Shorthand-writing, or Type-writing, or Book-keeping. A candidate may offer two of these subjects, and failure to pass in one of them will not disqualify him.

Candidates are warned that if the answer-papers are not legibly and neatly written or prepared, they will not be examined, and examiners are requested to reject papers which show carelessness, or slovenliness, or really bad work.

The examination will be held on the dates and hours and in the order noted below :—

5th April	11—1-30	...	Shorthand or Book-keeping.
	2—4-30	...	Type-writing.
6th April	11—1-30	...	English.
	2—4-30	...	Commercial Correspondence.
9th April	11—1-30	...	Précis-writing.
	2—4-30	...	Bengali.
10th April	11—1-30	...	Arithmetic.
	2—4-30	...	Mental Arithmetic.
11th April	11—1-30	...	Commercial History.
	2—4-30	...	Commercial Geography.

A. PEDLER,
Director of Public Instruction, Bengal.

The 7th March 1906.

RULES FOR GRANTS-IN-AID TO SCHOOLS IN BENGAL FOR INDIAN PUPILS (SANCTIONED IN BENGAL GOVERNMENT ORDER No. 1413 T.—G., DATED THE $\frac{\text{20TH JULY}}{\text{2ND AUGUST}}$ 1905).

1. An allotment from Provincial revenues is assigned annually by Government to be expended in grants-in-aid to schools not under Government management, provided they fulfil the conditions prescribed in the following rules and are conducted in accordance with the general rules laid down by the Department.

2. The allotment is distributed by the Director of Public Instruction, on the recommendation of the Divisional Inspectors, to schools which are certified to be eligible under these rules, reference being had to the requirements of each locality, as compared with others, and to the funds available. In determining the amount of the grants, special consideration shall be shown to schools which have a highly-qualified and well-paid staff and which levy fees at comparatively high rates.

Ordinary grants are given in aid of ordinary recurring expenditure.

Special grants are given in aid of non-recurring expenditure of a special character.

Temporary grants are given in certain cases in aid of boarding-houses and hostels in accordance with the principle that such establishments should generally be made self-supporting in so far as recurring expenditure is concerned.

3. Any school to which a grant-in-aid is given, together with all its accounts, books and other records, shall at all times be open to inspection and examination by any officer appointed by the Government for the purpose, and to this end the records and accounts shall be placed in such custody that they shall be always accessible on the visit of any inspecting officer. Such inspection and examination shall have no reference to religious instruction, but only to secular education.

NOTE.—The following books shall be kept by all aided schools :—

(*a*) An admission register.

(*b*) Attendance registers for teachers and scholars, together with a summary of such attendance, and a book for keeping copies of "D" forms for preserving the monthly abstract of attendance.

(*c*) A register showing whether boys attending the school live with parents or recognised guardians or in hostels or messes, and, if in the last, whether such institutions are under proper supervision.

(*d*) A cash-book and a book containing copies of "C" forms for preserving the monthly abstract account and also acquittance-rolls showing the payment of all teachers and all scholarship-holders.

(*e*) A visitors' book.

(*f*) A diary, stoutly bound and containing not less than 200 pages.

(*g*) A book in which all transfer certificates received, and all declarations of guardians on scholars first entering school are duly kept, and a guard-book in which details of all transfer certificates issued from the school and signed by the head-master are kept under the care of the head-master.

(*h*) A book containing the proceedings of the Managing Committee of the school, if any such Committee exists.

(*i*) Service-books of teachers, which shall be kept up to date.

(*j*) A catalogue of library books, and also a book in which the dates of issue and return of such books shall be entered.

(*k*) A correspondence book or file.

(*l*) A conduct register, in which all corporal punishment inflicted upon students shall be recorded.

(*m*) A book showing the results of class examinations and at departmental examinations, as also at the University Entrance or other similar examinations.

The head-master shall, from time to time, make entries in the diary, showing the visits of the Managers and Inspectors, the curricula and progress of the various classes, and other important facts concerning the school or its teachers and students, such as appointments, dates of joining, dismissal or resignation, or absences due to illness of teachers, instructions to staff, serious infringement of discipline, use of school buildings for purposes other than school, etc., which are likely to be required for future reference. Such communications from the Inspector of Schools as he may direct to be inserted in the diary must be copied *verbatim* therein. An entry shall be made at least once a month by the head-master showing the progress of the various classes in their different subjects of study, but no reflections or opinions of a general character are to be entered.

The only persons authorised to make entries in the diary are the head-master, the Inspector, and the Assistant Inspector of Schools in the case of high schools, while in the case of middle schools the Deputy Inspector may also make entries. The diary shall be kept in the custody of the head-master, but shall be open at all times to the inspection of the Managers as well as of inspecting officers. No entry once made may be erased or removed, nor may it be altered otherwise than by a subsequent entry.

At the commencement of each school session, the names of all teachers who are to form part of the school staff for the year, and the distribution of the work among them, shall be entered in the diary and signed by the head-master. Any subsequent change in the staff, or in the distribution of the work, should similarly be recorded.

4. Inspecting officers will interfere as little as possible with the local management of the school, but shall satisfy themselves that the instruction is efficient, and that the conditions on which the grants were made are fulfilled; and aid will be withdrawn from any school in which such conditions are not fulfilled.

5. Grants are given on the principle of strict religious neutrality, and no preference will be shown to any school on the ground that any particular religious doctrines are taught or not taught therein.

6. Grants will be made to such schools only (with the exception of training schools, girls' schools, night schools for adults, and schools for aborigines and low castes) as realize some fee, however small, from all their scholars. Exemption from this rule may be allowed in exceptional cases by the Director of Public Instruction.

7. No grant shall be made to a high school unless provision is made for (*a*) instruction in drawing, drill, gymnastics, and, if required, in manual training also; (*b*) employment of graduates and trained teachers; (*c*) employment of teachers who have passed the oral examination in English for teaching all the subjects taught through the medium of English; (*d*) instruction in any subjects which may be required by the local conditions of the place in which the school is situated; and (*e*) spending a portion of the grant on purchase of educational and other appliances for practical teaching of various subjects; nor shall a grant be admissible unless the medium of instruction in classes below the fourth be in accordance with the requirements of the scheme for vernacular education sanctioned in Government Resolution No. 1, dated the 1st January 1901.

8. The managers of any school applying for a grant must appoint a Secretary to conduct their correspondence with the Department, and all their names must be stated.

9. The managers shall be responsible for the due expenditure of the school funds in accordance with the conditions of the grant.

10. In respect of any school for which application is made, full information must be supplied on the following points, on which the grant will depend, and must be given in the shape required in Form A appended to these rules :—

(*a*) The pecuniary resources, permanent and temporary, on which the school depends for support.
(*b*) The proposed monthly expenditure in detail.
(*c*) The average number of pupils under instruction.
(*d*) Class of children attending the school, together with their races and creeds.
(*e*) A rough statement of social position or calling of parents of the pupils.
(*f*) The names and social standing of the persons who will form the Committee of Management, and the classes they represent.
(*g*) The class of school and course of instruction.
(*h*) The number, qualifications, and salaries of the teachers.
(*i*) The fees to be charged in each class.
(*j*) The amount of aid sought.
(*k*) The treasury at which the grant, if sanctioned, is to be payable.
(*l*) The existence of other schools of whatever class within a distance of four miles of the school applying for a grant. In the case of towns like Calcutta, the four-mile limit will not be observed, but in such cases information as to neighbouring schools must be fully given.
(*m*) The nature and size of the school-house and of the rooms contained in it, and also a description of the surroundings of the school. If possible, a rough map of the school and its immediate surroundings should be sent in, showing whether the school has a garden or play-ground and whether there are any arrangements for the residential accommodation of either masters or pupils.
(*n*) The nature of the provision which has been made for the sanitary arrangements of the pupils and teachers, and the sanitation of the school buildings and its compound.

11. An application for a grant shall be made either directly to the Divisional Inspector or to the District Deputy Inspector, who shall forward it, with his remarks, to the Inspector. The Inspector shall consult the District Magistrate, and, if they agree as to the rejection of the application, shall reject it; otherwise it shall be forwarded to the Director of Public Instruction for sanction or orders as the case may be with the opinion of the District Magistrate and his recommendation.

12. Grants shall not exceed in amount the sums to be expended from private sources except in special cases, under special orders of Government. Municipal contributions will be reckoned for this purpose as receipts from public sources.

13. Aided schools are divided into the following classes :—

High Schools—In which the pupils are educated up to the standard of the Entrance Examination of the Calcutta University or up to the standard of the "B" and "C" classes, or to similar standards.

Middle Schools—In which the pupils are educated up to the Middle Scholarship standard.

Primary Schools—In which the pupils are educated up to the Upper or Lower Primary Scholarship standard.

Girls' Schools—Including agencies for *zanana* instructions.

Training Schools—For the training of masters and mistresses.

Special Schools—For instruction in special subjects or for special classes of pupils, such as music schools, schools for the deaf and dumb and for the blind.

14. Grants are of two kinds—Annual grants and special grants.

Annual Grants.

15. For high schools the grants shall not exceed one-half of the income guaranteed from private sources, except in the districts of—

Birbhum,	Chittagong,
Dinajpur,	Tippera,
Rangpur,	Noakhali,
Bogra,	The Patna Division,
Darjeeling,	The Bhagalpur Division,
Jalpaiguri,	The Orissa Division,
Mymensingh,	The Chota Nagpur Division, and the
The island of Dakhin Shahbazpur in Backergunge,	thanas of Khatra, Raipur and Simlapal in Bankura,

in which the grants may equal two-thirds of the income so guaranteed.

16. For middle schools, in which the expenditure is more than Rs. 40 a month, the grants shall not exceed two-thirds of the income guaranteed from private sources, except in the places mentioned above, in which the grants may equal the income so guaranteed.

17. For primary schools, and for middle schools in which the expenditure does not exceed Rs. 40 a month, as well as for girls' schools, training schools and special schools, the grant shall not exceed a sum equal to the full amount of the income guaranteed.

18. The amounts laid down are maximum grants, but it must be understood that the maximum grant will not in all cases, and as a matter of course, be sanctioned.

19 No grant shall be made, or, if made, shall be continued, unless the buildings are well constructed and contain sufficient accommodation for the scholars in attendance. The rooms also must be properly furnished, lighted and ventilated, and the surrounding premises properly drained. (General directions on these points have been issued by the Department.)

20. Grants will be sanctioned ordinarily for a term of three years; but the Inspector may, at any time during its currency, recommend the revision of any grant. Notice of a proposed reduction, or suspension, if considerable, shall be given to the managers, who may, if considered necessary by the Inspector or Director, be allowed an opportunity of stating any objection that they may have.

21. When a grant is sanctioned the managers shall sign an agreement, on stamped paper, to the effect that they will conduct the school in accordance with the conditions of the grant.

22. The sanction of a grant shall be conveyed in the following form:—

Office Memorandum of the Director of Public Instruction.

(1) A grant of Rs. a month is sanctioned from the 190 , for the school at , in the district of , on the following conditions:—

(*a*) That Rs. a month at least be regularly contributed from private sources.

(*b*) That the following scale of expenditure be maintained, subject to any alteration that may be sanctioned by the Inspector:—

		Rs.
Head-master	...	...
Second master	...	...
Third master	...	...
Servants } In case of girls' schools only		...
Contingencies }		
Total	...	

(2) The grant shall be payable every month.

(3) The monthly bill (in Form B annexed) must be sent to the Inspector for countersignature, and must be accompanied by an account (in Form C) for the month preceding that for which the bill is drawn and by a certificate that all salaries for the previous month have been paid in full.

After countersignature the bill will be paid at the treasury.

[NOTE.—Where the sanctioned scale contains an item for prize or library, separate accounts should be kept and vouchers should be filed of the prize or library fund expenses.]

(4) The monthly bill and the certificate must be signed by the Secretary of the school.

(5) The bill shall be countersigned on the distinct understanding that the salaries and other charges, certified by the Secretary to have been paid, have actually been paid.

(6) Salaries for service in any month shall become due on the first day of the following month.

(7) The appointment and dismissal of every teacher shall be notified to the Department. No appointment shall be confirmed until it has received the sanction of the Department; and the Department shall have the power to enquire into any case of dismissal of a teacher.

(8) The grant shall be liable to be reduced or withdrawn if the payment of any teacher's salary is delayed for more than two months after it has become due.

(9) The grant shall be liable to be reduced or withdrawn if the school is unfavourably

reported on as regards the attendance or proficiency or discipline of the scholars. With the monthly bills for grant-in-aid a statement of the attendance of pupils in all the classes for the previous month shall be submitted in Form D.

(10) The grant shall be liable to be reduced or withdrawn if the managers keep their accounts in a negligent or untrustworthy manner, or if they send up incorrect accounts, or if they fail to transmit punctually the periodical returns required by the Department, or if the Department is otherwise dissatisfied with the management.

(11) The grant shall be liable to be reduced or withdrawn, if the teachers are inefficient or if they are absent from duty otherwise than in accordance with the rules of the Department, or if they keep the school registers in a negligent or untrustworthy manner.

(12) Holidays shall not exceed 65 days in the year, exclusive of Sundays, except under peculiar circumstances and with the sanction of the Inspector.

(13) Free studentships shall not ordinarily exceed 5 per cent. of the total number of pupils on the rolls, exclusive of scholarship-holders. Managers of high schools may, with the sanction of the Inspector, admit an additional number (not exceeding 12) of Muhammadans as free students up to the limit of 8 per cent. of the total number of pupils on the rolls.

(14) The Department shall have power to define the subjects of instruction to be given, and to have a voice in settling the fee-rates, in controlling expenditure, in enforcing discipline, and in regulating attendance.

(15) The Department shall have power to direct the Managers to purchase such articles as furniture, teaching appliances, black-boards, maps, library books, etc.

(16) Every new election to the Committee of Management shall be notified to the Inspector under the signatures of the Secretary and of the member or members elected.

(17) Every change of Secretary shall be notified to the Inspector under the signatures of the new Secretary and the members of the Committee of Management.

(18) All receipts, from whatever sources or for whatever purposes collected, shall be entered in the account book of the school, which shall be open to inspection and examination by any officer appointed by Government for the purpose. All receipts collected by the head-master should be remitted on the same date, as far as possible, to the Secretary with a challan to be signed by the Secretary after the receipt of the money.

(19) No part of the previous balance of the school shall be spent without the sanction of the Inspector, except for payment of the sanctioned establishment, in order to make up any deficit in the private contributions in any particular month.

(20) The surplus funds of the school shall be placed in the Postal Savings Bank at the end of each quarter, and the savings bank account should be made out in the joint names of the Secretary and one of the members of the Managing Committee, who will be selected for the purpose by the Committee.

(21) No new building shall be constructed for the school until the plan and estimates have been approved by the Inspector.

22. Government may claim a fair share of any balance at the credit of a school at the time of its abolition, as well as of the sale-proceeds of any school-house or furniture towards the erection, enlargement, repairs or purchase of which a grant may have been given by Government.

Special Grants.

23. Grants may be given to managers of schools in aid—

(*a*) of erecting, enlarging or furnishing school buildings;
(*b*) of attaching boarding establishments to high schools;
(*c*) of executing extensive repairs; and
(*d*) in special cases, of paying off debts incurred in erecting or enlarging school buildings.

NOTE.—(1) Expenditure in the purchase of buildings may be treated as expenditure in the erection of buildings.

(2) The sum to be allotted annually for building grants to schools shall be fixed provisionally for a term of years. It shall not, in ordinary circumstances, be reduced, though it may be increased for any year during that term.

(3) Every application for a grant shall be submitted to the Department not later than on the 31st December, if the grant is to be admissible for sanction during the following financial year. If found to be in accordance with the rules, and in other respects deserving of support, it will be included in the list of "approved applications." If not so included, the reasons shall be notified to the managers.

(4) The total sum allotted for the year will be divided between schools for different sections of the community (Europeans, Hindus, Muhammadans, Native Christians, etc.), in some proportion to the requirements of each community, as indicated by the amount of the "approved applications" received from each, regard being also paid to preferential claims as explained in note (5).

Grants not required by one section of the community may, towards the close of the year, be reappropriated to meet the wants of another section.

NOTIFICATION.

Junior Scholarship for 1906.

IT is hereby notified for general information that, in accordance with the Resolution of Government, dated the 30th October 1889, as modified by Government Notification No. 2916, dated the 9th September 1902, five junior Scholarships of the second grade and 11 of the third grade have been allotted to the Presidency Division to be awarded in the University Entrance Examination in 1906.

2. The second grade scholarships will be awarded to those candidates who take the highest places in the Divisional list, irrespective of districts.

3. The third grade scholarships will be distributed among the different districts of the Presidency Division as follows:—

24-Parganas	3
Nadia	2
Murshidabad	2
Jessore	2
Khulna	2
Total ...	11

E. W. COLLIN. *Commissioner.*

COMMR.'S OFFICE, PRESY. DIVN., CALCUTTA, *the 28th February 1906.*

NOTIFICATION.

THE ELLIOTT PRIZE FOR SCIENTIFIC RESEARCH FOR 1906.

WITH reference to Notification No. 5058-F., in the *Calcutta Gazette* of the 28th December 1892, Part I, page 1172, the Elliott Prize for Scientific Research will be given this year to the author of the best original essay composed during the year 1906, giving the results of original research or investigation by the essayist in Natural Science.

2. Any native of Bengal, including any Eurasian or domiciled European residing in Bengal, may compete for the prize.

3. The essays of competitors *must be* sent to the President of the Asiatic Society of Bengal, 57, Park Street, Calcutta, by the end of December 1906. The prize will be adjudged to the best competitor, and awarded publicly at the Annual General Meeting of the Asiatic Society in February 1907.

4. Preference will be given to researches leading to discoveries likely to develop the industrial resources of Bengal. In the case of no essay being deemed by the Trustees to be of sufficient merit, no prize is to be awarded, but the amount is to be retained, so that in any future year two or more prizes may be given, or the prize may be enhanced in the case of an exceptionally good essay.

A. H. L. FRASER,
President of the Asiatic Society of Bengal.

ALEX. PEDLER,
Director of Public Instruction, Bengal,
and
Vice-Chancellor of the Calcutta University.

CALCUTTA,
The 23rd February 1906.

NOTIFICATIONS OF THE BOARD OF REVENUE.

No. 1297B.

NOTICE is hereby given that the Fourth Sale of Opium, the Provision of 1903-1904, will be held at the Government Opium Sale-room, No. 2 Bankshall Street, on Tuesday, the 3rd April 1906, at 11 A.M., and will comprise 4,400 chests, viz.—

		Chests.
Opium manufactured at the Patna Factory, consisting of	...	2,200
Ditto at the Ghazipur Factory, consisting of	...	2,200
Total	...	4,400

2nd.—The general conditions of the sale now advertised will be the same as usual. They may be ascertained by reference to the notification issued on the 28th November 1905, and published in the *Government* and *Exchange Gazettes*, or on personal application at the office of the Board of Revenue.

3rd.—The latest dates for deposit and clearance will be the 9th and 18th April 1906, respectively, that is to say, no Bank of Bengal Receipts, Government Promissory Notes or other Public Securities that may be tendered for deposit in redemption of Promissory Notes given by purchasers in the sale-room will be received after 3-30 P.M. of Monday, the 9th April 1906, and no Bank of Bengal Receipts in full payment of lots will be accepted after 3-30 P.M. of Wednesday, the 18th April 1906.

4th.—In addition to the quantity above advertised for sale, the following quantities, more or less, of the opium manufactured at the Patna and Ghazipur Factories will be brought to sale between the sale now advertised and December next on or about the dates specified below. The Board of Revenue, however, reserve to themselves the right of altering these dates, should circumstances render it expedient to do so:—

DATES.			Manufactured at the Patna Factory; about chests.	Manufactured at the Ghazipur Factory; about chests.	Total; about chests.

GANGA GOVINDO GUPTA, for Collector.

Revised Advertisement of Sale.

NOTICE is hereby given that the undermentioned plots of land, no longer required by Government, situated along the Hajipur Branch Railway, in the district of Muzaffarpur, will be put up to sale at 1 o'clock on Monday, the 29th March 1906, corresponding with the 2nd Chait 1313 Fusli, at Muzaffarpur.

The purchasers of the several plots of land will be subject to the following conditions:—

1st.—The purchasers will have no power to make any excavations on the land nearer than 15 feet from the railway boundary, or to plough the land nearer than 3 feet from the same.

2nd.—If the amount of purchase-money does not exceed Rs. 100, the whole amount must be paid down at once.

3rd.—If the amount of purchase-money exceed Rs. 100, one-fourth of the amount must be immediately deposited. If the balance be not paid by noon of the fifteenth day after the sale, reckoning the day of sale as one, or if that day be a close holiday, then by noon of the first succeeding office day, the sale shall be cancelled, the sum deposited being forfeited to Government, and the lot again put up for sale at the risk of the defaulting purchaser, after issue of advertisement, as in the case of original sale.

4th.—The plots of land will be sold revenue-free to the highest bidders.

5th.—The purchasers shall be put in possession on receipt by the Collector of the orders of the Board confirming the sale.

Consecutive lot No.	Name of district.	Pargana and mauza.	Number of mile on which land is situate.	Situated on which side of the railway.	Approximate area of lot in bighas and in acres.		Land excluded from sale from each lot.		Commencement and termination of lot.	Boundary of lot.

Alipore, the 17th February 1906.

GANGA GOVINDA GUPTA, for Collector.

Advertisement of Sale.

NOTICE is hereby given that the proprietary right of Government, as specified in the conditions of sale below, to the undermentioned estates, situate in the district of Burdwan, will be put up to sale at the Burdwan Collectorate on the 7th March 1906, corresponding to 19th Chaitra 1312 (B.S.).

Conditions of Sale.

1st.—The estates to be sold to the highest bidder above the upset price which will be fixed by the Collector at the time of sale. The purchasers of these estates will be considered as the proprietors of the estates, and the entire proprietary right of Government in such estates will be transferred to them with effect from 1st April 1906 as revenue free or subject to the revenue fixed in perpetuity.

2nd.—The sale to be subject to existing leases and to the rights conferred by the settlement proceedings and by the laws in force, and purchasers to be bound to respect the rights of resident cultivators who have signed the schedule of assessment prepared by the Revenue authorities.

3rd.—If the amount of purchase-money does not exceed Rs. 100, the whole amount to be paid at once

4th.—If the amount of purchase-money exceed Rs. 100, one-fourth of the amount bid to be immediately deposited. If the balance be not paid by noon of the fifteenth day after the sale, reckoning the day of sale as one, or if that day be a close holiday, then by noon of the first succeeding office day, the sale will be cancelled (the sum deposited being forfeited to Government), and the estate will be again put up to sale at the risk of the defaulting purchaser, after issue of advertisement as in the case of original sale

Burdwan Collectorate, the 19th February 1906 P. H O'BRIEN, Collector.

Advertisement of Sale.

NOTICE is hereby given that the proprietary right of Government, as specified in the conditions of sale below, to the undermentioned plots of land formerly occupied by the old outpost building at Barjora, thana Gangajalghati in the district of Bankura, will be put up to sale by the Collector of the district at Sadar office, Bankura, on the 28th March 1906, corresponding to 14th Chaitra 1312 (B.S.).

The purchasers will be subject to the following conditions of sale :—

Conditions of Sale.

1st.—The four plots of land to be sold to the highest bidder above the upset price which will be fixed by the Collector at the time of sale. The purchaser of this estate will be considered as the proprietor of the plots, and the entire proprietary right of Government in such estate will be transferred to him, subject to the revenue fixed in perpetuity.

2nd.—The sale to be subject to existing leases and to the rights conferred by the settlement proceedings and by the laws in force; and the purchasers to be bound to respect the rights of resident cultivators who have signed the schedule of assessment prepared by the revenue authorities.

3rd.—If the amount of purchase-money does not exceed Rs. 100, the whole amount to be paid down at once.

4th.—If the amount of purchase-money exceed Rs. 100, one-fourth of the amount bid to be immediately deposited. If the balance be not paid by noon of the fifteenth day after the sale, reckoning the day of sale as one, or if that day be a close holiday, then by the noon of the first succeeding office day, the sale is to be cancelled (the sum deposited being forfeited to Government), and these plots to be again put up to sale at the risk of the defaulting purchaser, after issue of advertisement, as in the case of original sale.

Advertisement of Sale.

NOTICE is hereby given that the proprietary right of Government, as specified in the conditions of sale below, to the undermentioned estates situate in the district of Hooghly, will be put up to sale at the Hooghly Collectorate on the 26th March 1906, corresponding with 12th Chait 1312 (B.S.).

The purchaser will be subject to the following conditions of sale :—

Conditions of Sale.

1st.—The estate to be sold to the highest bidder above the upset price, which will be fixed by the Collector at the time of sale. The purchaser of this estate will be considered as the proprietor of the estate, and the entire proprietary right of Government in such estate will be transferred to him, subject to the revenue fixed in perpetuity.

2nd.—The sale to be subject to existing leases and to the rights conferred by the settlement proceedings and by the laws in force ; and purchasers to be bound to respect the rights of resident cultivators who have signed the schedule of assessment prepared by the revenue authorities.

3rd.—If the amount of purchase-money does not exceed Rs. 100, the whole amount to be paid down at once.

4th.—If the amount of purchase-money exceed Rs 100, one-fourth of the amount bid to be immediately deposited. If the balance be not paid by noon of the fifteenth day after the sale, reckoning the day of sale as one, or if that day be a close holiday, then by the noon of the first succeeding office day, the sale is to be cancelled (the sum deposited being forfeited to Government), and the estate to be again put up to sale at the risk of the defaulting purchaser, after issue of advertisement, as in the case of original sale.

Conditions of Sale.

1st.—The estate to be sold to the highest bidder above the upset price which will be fixed by the Collector at the time of sale. The purchaser of this estate will be considered as the proprietor of the estate, and the entire proprietory right of Government in such estate will be transferred to him subject to the revenue fixed in perpetuity.

2nd.—The sale to be subject to existing leases and to the rights conferred by the settlement proceedings and by the laws in force, and purchasers to be bound to respect the rights of resident cultivators who have signed the schedule of assessment prepared by the Revenue authorities.

3rd.—If the amount of purchase-money does not exceed Rs. 100, the whole amount to be paid down at once.

4th.—If the amount of purchase-money exceed Rs. 100, one-fourth of the amount of bid to be immediately deposited. If the balance be not paid by noon of the 15th day after sale, reckoning the day of sale as one, or if that day be a closed holiday, then by noon of the first succeeding office day, the sale is to be cancelled (the sum deposited being forfeited to Government), and the estate to be again put up to sale at the risk of the defaulting purchaser after issue of advertisement as in the case of original sale.

Chinsura, the 23rd February 1906. B. DE, Collector.

Advertisement of Sale.

NOTICE is hereby given that the undermentioned plots of land, no longer required by Government, situated along the Eastern Branch, Tirhut State Railway, in the district of Darbhanga, will be put up to sale at 12 o'clock (noon) on the 26th day of April 1906, corresponding with the 17th Baisakh 1313 Fusli, at the Collectorate of Darbhanga.

The purchasers of the several plots of land will be subject to the following conditions:—

1st.—The purchasers will have no power to make any excavations on the land nearer than 15 feet from the railway fencing, or plough the lands closer than 3 feet from its foundation.

2nd.—If the amount of purchase-money does not exceed Rs. 100, the whole amount must be paid down at once.

3rd.—If the amount of purchase-money exceed Rs. 100, one-fourth of the amount must be immediately deposited. If the balance be not paid by noon of the fifteenth day after the sale, reckoning the day of sale as one, or if that day be a close holiday, then by noon of the first succeeding office day, the sale shall be cancelled, the sum deposited being forfeited to Government, and the lot again put up for sale at the risk of the defaulting purchaser, after issue of advertisement, as in the case of original sale.

4th.—The plots of land will be sold revenue-free to the highest bidders.

5th.—The purchasers shall be put in possession on receipt by the Collector of the orders of the Board confirming the sale.

PRAJA DURLAV HAZRA, *for* Subdivisional Officer and Collector under Act I of 1894.

Deoghur, the 24th February 1906.

Advertisement of Sale.

NOTICE is hereby given that the proprietary right of Government, as specified in the conditions of sale below, to the undermentioned estates, situated in the district of Hooghly, will be put up to sale at the Hooghly Collectorate on the 26th March 1906, corresponding to 12th Chait 1312 (B.S.).

The purchasers will be subject to the following conditions of sale:—

Conditions of Sale.

1st.—The estate to be sold to the highest bidder above the upset price, which will be fixed by the Collector at the time of sale. The purchaser of this estate will be considered as the proprietor of the estate, and the entire proprietary right of Government in such estate will be transferred to him, subject to the revenue fixed in perpetuity.

2nd.—The sale to be subject to existing leases and to the rights conferred by the settlement proceedings and by the laws in force, and purchasers to be bound to respect the rights of resident cultivators who have signed the schedule of assessment prepared by the revenue authorities.

3rd.—If the amount of purchase-money do not exceed Rs. 100, the whole amount to be paid down at once.

4th.—If the amount of purchase-money exceed Rs. 100, one-fourth of the amount bid to be immediately deposited. If the balance be not paid by noon of the fifteenth day after the sale, reckoning the day of sale as one, or, if that day be a close holiday, then by noon of the first succeeding office day, the sale is to be cancelled (the sum deposited being forfeited to Government), and the estate to be again put up to sale at the risk of the defaulting purchaser after issue of the advertisement as in the case of original sale.

Muzaffarpur Collector's Office, the 27th February 1906. R. G. KILBY, Offg. Collector.

Advertisement of Sale.

NOTICE is hereby given that the undermentioned plots of land, no longer required by Government, situated along the Eastern branch, T. S, Railway, in the district of Darbhanga, will be put up to sale at 12 noon on the 26th day of April 1906, corresponding with the 17th Baisakh 1313 Fasli, at the Collectorate, Darbhanga.

The purchasers of the several plots of land will be subject to the following conditions:—

1st.—The purchasers will have no power to make any excavations on the land nearer than 15 feet from the railway boundary, or to plough the land nearer than 3 feet from the same.

2nd.—If the amount of purchase-money does not exceed Rs. 100, the whole amount must be paid down at once.

3rd.—If the amount of purchase-money exceed Rs. 100, one-fourth of the amount must be immediately deposited. If the balance be not paid by noon of the fifteenth day after the sale, reckoning the day of sale as one, or if that day be a close holiday, then by noon of the first succeeding office day, the sale shall be cancelled, the sum deposited being forfeited to Government, and the lot again put up for sale at the risk of the defaulting purchaser, after issue of advertisement, as in the case of original sale.

4th.—The plots of land will be sold revenue-free to the highest bidder.

5th.—The purchasers shall be put in possession on receipt by the Collector of the orders of the Board confirming the sale.

Notice

IS hereby given that the system under which salt cannot be transported beyond certain limits in Bengal except under a special *rawana* will be abolished with effect from the 1st April 1906. All duty on salt educed from saltpetre in Calcutta and its environs should, on and after the 1st April 1906, be paid by the licensee onbehalf of the purchaser of the salt into the Calcutta Collectorate Treasury by chalans in duplicate. One copy of the chalan will remain with the Treasury Officer of the Calcutta Collectorate, and the other will be handed over to the person remitting the duty. On receipt of the chalan the Sub-Inspector in charge of the refineries will issue the salt. The advice list showing the receipt of the duty which has hitherto been forwarded to the Board of Revenue by the Treasury Officer will no longer be necessary.

C. C. MITTRA, Persl. Asst., *for* Commissioner.

THE INDIAN LAW REPORTS.

Published in FOUR SERIES, viz.

CALCUTTA, MADRAS, BOMBAY AND ALLAHABAD.

THE Indian Law Reports, published under the authority of the Governor General in Council, are printed in monthly Parts, which are issued, as soon as possible after the first of each month, at Calcutta, Madras, Bombay and Allahabad, respectively.

The Reports comprise four Series—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court.

The cases heard by the Privy Council on appeal from each High Court are reported in the Series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat Book Depôt: and the Madras, Bombay and Allahabad Series are distributed direct from Madras, Bombay and Allahabad, respectively.

Persons desiring to subscribe for or purchase the Reports should apply to—

the Officer in charge, Bengal Secretariat Book Depôt, Calcutta,
or
the Superintendent, Government Press, Madras, or
the Superintendent, Government Central Press, Bombay, or
the Curator of Government Books, United Provinces of Agra and Oudh, Allahabad.

PRICES.

THE terms of subscription, and the terms on which current issues and back numbers are sold, are as follows:—

	Without postage.	With Indian postage.	With Foreign postage.

19. Procedure in regard to coin which is liable to be cut under both clause (*a*) and clause (*b*) of section 16.
20. Power to certain persons to cut counterfeit silver coin and procedure in regard to coin so cut.

Supplemental Provisions.

21. Power to make rules.
22. Bar of suits.
23. Saving of making of other coins at Mints.
24. Repeals.

THE SCHEDULE—ACTS REPEALED.

An Act to consolidate and amend the law relating to Coinage and the Mint.

WHEREAS it is expedient to consolidate and amend the law relating to Coinage and the Mint; It is hereby enacted as follows:

Preliminary.

1. (*1*) This Act may be called the Indian Coinage Act, 1906; and

Short title and extent.

(*2*) It extends to the whole of British India, inclusive of British Baluchistan, the Sonthal Parganas and the Pargana of Spiti.

2. In this Act, unless there is anything repugnant in the subject or context,—

Definitions.

(*a*) "deface", with its grammatical variations and cognate expressions, includes clipping, filing, stamping, or such other alteration of the surface or shape of a coin as is readily distinguishable from the effects of reasonable wear;

(*b*) "the Mint" includes the Mints now existing and any which may hereafter be established;

(*c*) "prescribed" includes prescribed by a rule made under this Act;

(*d*) "remedy" means variation from the standard weight and fineness; and

(*e*) "standard weight" means the weight prescribed for any coin.

3. The Governor General in Council may, by notification in the Gazette of India,—

Power to establish and abolish Mints.

(*a*) establish a Mint at any place at which a Mint does not for the time being exist; and

(*b*) abolish any Mint, whether now existing or hereafter established.

Silver Coinage.

4. The following silver coins only shall be coined at the Mint for issue under the authority of the Governor General in Council, namely:—

Silver coins.

(*a*) a rupee to be called the Government rupee;

(*b*) a half rupee, or eight-anna piece;

(*c*) a quarter-rupee, or four-anna piece; and

(*d*) an eighth of a rupee, or two-anna piece.

5. (*1*) The standard weight of the Government rupee shall be one hundred and eighty grains Troy, and its standard fineness shall be as follows, namely, eleven-twelfths, or one hundred and sixty-five grains of fine silver, and one-twelfth, or fifteen grains of alloy.

Standard weight and fineness.

(*2*) The other silver coins shall be of proportionate weight and of the same fineness:

Provided that, in the making of silver coins, a remedy shall be allowed of an amount not exceeding the following, namely:—

	Remedy in weight.	Remedy in fineness.
Rupee . . } Half-rupee . . }	Five-thousandths.	Two-thousandths.
Quarter-rupee .	Seven-thousandths.	Three-thousandths.
Eighth of a rupee .	Ten-thousandths.	

Nickel Coinage.

6. The following nickel coin only shall be coined at the Mint for issue under the authority of the Governor General in Council, namely: a one-anna piece.

Nickel coin.

7. The standard weight of the one-anna piece shall be sixty grains Troy:

Standard weight.

Provided that, in the making of nickel coin, a remedy shall be allowed of an amount not exceeding one-fortieth in weight.

Bronze Coinage.

8. The following bronze coins only shall be coined at the Mint for issue under the authority of the Governor General in Council, namely:—

Bronze coins.

(*a*) a pice, or quarter-anna;

(*b*) a half-pice, or one-eighth of an anna; and

(*c*) a pie, being one-third of a pice, or one-twelfth of an anna.

9. (*1*) The standard weight of the pice shall be seventy-five grains Troy, and the other bronze coins shall be of proportionate weight.

Standard weight and composition.

(*2*) Bronze coins shall be coined from a mixed metal consisting of copper, tin and zinc:

Provided that, in the making of bronze coins, a remedy shall be allowed of an amount not exceeding one-fortieth in weight.

Dimensions and Designs of Coins.

10. (*1*) The Governor General in Council may, by notification in the Gazette of India,—

Power to direct coining, and to prescribe dimensions and designs.

(*a*) direct the coining and issuing of all coins referred to in sections 4, 6 and 8, and

(*b*) determine the dimensions of, and designs for, such coins.

(*2*) Until the Governor General in Council otherwise determines by notification under sub-section (*1*), the dimensions and designs of the silver coins coined under this Act shall be

of those prescribed for the like silver coins under the Indian Coinage Act, 1870, at the time of the commencement of this Act.

Legal Tender.

Gold coins a legal tender.

11. Gold coins, whether coined at His Majesty's Royal Mint in England or at any Mint established in pursuance of a Proclamation of His Majesty as a branch of His Majesty's Royal Mint, shall be a legal tender in payment or on account at the rate of fifteen rupees for one sovereign:

Provided that such coins have not been called in by any Proclamation made in pursuance of the Coinage Act, 1870, or have not lost weight so as to be of less weight than that for the time being prescribed for like coins by or under the said Statute as the least current weight.

Silver coin when a legal tender.

12. (*1*) The rupee and half-rupee shall be a legal tender in payment or on account:

Provided that the coin—

(*a*) has not lost in weight so as to be more than two per cent. below standard weight, and

(*b*) has not been defaced.

(*2*) The quarter-rupee and eighth of a rupee shall be a legal tender in payment or on account for any sum not exceeding one rupee:

Provided that the coin—

(*a*) has not lost in weight so as to be more than such percentage below standard weight as may be prescribed as the limit of reasonable wear, and

(*b*) has not been defaced.

Nickel coin when a legal tender.

13. The nickel coin specified in section 6 shall be a legal tender in payment or on account for any sum not exceeding one rupee at the rate of sixteen for a rupee.

Bronze coin when a legal tender.

14. The bronze coins specified in section 8 shall be a legal tender in payment or on account for any sum not exceeding one rupee at the following rates, respectively, namely:—

(*a*) the pice at the rate of sixty-four for a rupee, or four for an anna;

(*b*) the half-pice at the rate of one hundred and twenty-eight for a rupee, or eight for an anna; and

(*c*) the pie at the rate of one hundred and ninety-two for a rupee, or twelve for an anna.

Coin made under former Acts.

15. (*1*) (*a*) All silver coin of the weight and standard specified in Acts No. XVII of 1835, No. XXI of 1838, No. XIII of 1862 and the Indian Coinage Act, 1870, and

(*b*) all copper coin of the weight specified in Acts No. XXI of 1835, No. XXII of 1844, No. XIII of 1862 and the Indian Coinage Act, 1870,

which may have been issued since the passing of those Acts respectively, and declared by those Acts respectively to be a legal tender, shall, notwithstanding anything contained in this Act or in any Act hereby repealed, but subject in the case of silver coin to the provisos contained in section 12 of this Act in so far as such provisos apply to like coins under this Act, continue to be a legal tender for the amounts for which the like silver and bronze coins are a legal tender under this Act respectively.

(*2*) All double pice copper coins which may have been issued under the Acts specified in sub-section (*1*), clause (*b*), shall continue to be a legal tender in payment or on account for any sum not exceeding one rupee at the rate of thirty-two for a rupee or two for an anna.

Diminished, Defaced and Counterfeit Silver Coin.

Power to certain persons to cut diminished or defaced silver coins.

16. Where any silver coin which has been coined and issued under the authority of the Governor General in Council is tendered to any person authorised by the Governor General in Council or by the local Government to act under this section, a such person has reason to believe that the coin—

(*a*) has been diminished in weight so as to be more than such percentage below standard weight as may be prescribed as the limit of reasonable wear, or

(*b*) has been defaced,

he shall, by himself or another, cut or break the coin.

Procedure in regard to coin cut under section 16 (*a*).

17. A person cutting or breaking coin under the provisions of clause (*a*) of section 16 shall observe the following procedure, namely:—

(*a*) if the coin has been diminished in weight so as to be more than such percentage below standard weight as may be prescribed as the limit of reasonable wear, but not more than such further percentage as may be prescribed in this behalf, he shall either return the pieces to the person tendering the coin, or, if such person so requests, shall receive and pay for the coin at such rates as may be prescribed in this behalf; and

(*b*) if the coin has been diminished in weight so as to be more than such further percentage below standard weight so prescribed as aforesaid, he shall return the pieces to the person tendering the coin, who shall bear the loss caused by such cutting or breaking.

Procedure in regard to coin cut under section 16(*b*).

18. A person cutting or breaking coin under the provisions of clause (*b*) of section 16 shall observe the following procedure, namely:—

(*a*) if such person has reason to believe that the coin has been fraudulently defaced, he shall return the pieces to the person tendering the coin, who shall bear the loss caused by such cutting or breaking;

(*b*) if such person has not reason to believe that the coin has been fraudulently defaced, he shall receive and pay for the coin at its nominal value.

Explanation.—For the purposes of this section a coin which there is reason to believe has been defaced by sweating shall be deemed to have been fraudulently defaced.

Procedure in regard to coin which is liable to be cut under both clause (*a*) and clause (*b*) of section 16.

19. If a coin is liable to be cut or broken under the provisions of both clause (*a*) and clause (*b*) of section 16, the person cutting or breaking the coin shall deal with it,—

(*a*) if he has reason to believe that the coin has been fraudulently defaced, under clause (*a*) of section 18, and

(*b*) in other cases, under section 17.

Power to certain persons to cut counterfeit silver coin and procedure in regard to coin so cut.

20. Where any silver coin purporting to be coined or issued under the authority of the Governor General in Council is tendered to any person authorised by the Governor General in Council or by the Local Government to act under this section, and such person has reason to believe that the coin is counterfeit, he shall by himself or another cut or break the coin, and may at his discretion either return the pieces to the tenderer, who shall bear the loss caused by such cutting or breaking, or receive and pay for the coin according to the value of the silver bullion contained in it.

Supplemental Provisions.

Power to make rules.

21. (*1*) The Governor General in Council may make rules to carry out the purposes and objects of this Act.

(*2*) In particular and without prejudice to the generality of the foregoing power, such rules may—

(*a*) reduce the amount of remedy allowed by sections 5, 7 and 9 in the case of any coin;

(*b*) provide for the guidance of persons authorised to cut or break coin under sections 16 and 20;

(*c*) determine the percentage of diminution in weight below standard weight not being less in any case than two per cent. which shall be the limit of reasonable wear;

(*d*) prescribe the further percentage referred to in clause (*a*) of section 17, and the rates at which payments shall be made in the case of coins falling under the same clause; and

(*e*) provide for the acceptance at prescribed rates by officers authorised in this behalf of the gold coins described in section 11 where such coins have lost weight so as to be of less weight than that for the time being prescribed for like coins by or under the Coinage Act, 1870, as the least current weight.

(*3*) Every such rule shall be published in the Gazette of India, and on such publication shall have effect as if enacted in this Act. 33 & 34 Vict., c. 10.

Bar of suits.

22. No suit or other proceeding shall lie against any person in respect of anything in good faith done, or intended to be done, under or in pursuance of the provisions of this Act.

Saving of making of other coins at Mints.

23. Nothing in this Act shall be deemed to prohibit or restrict the making at the Mint of coins intended for issue as money by the Government of any territories beyond the limits of British India.

Repeals.

24. The Acts mentioned in the Schedule are hereby repealed to the extent specified in the last column thereof:

Provided that copper coins of such descriptions as at the time of the commencement of this Act may be coined at the Mint for issue under the authority of the Governor General in Council may, notwithstanding the repeal of the said Acts, continue to be so coined until such time as the Governor General in Council may by notification in the Gazette of India otherwise direct, and all copper coins so coined shall be a legal tender in payment or on account for the amounts for which bronze coins of corresponding nominal value are a legal tender under this Act.

THE SCHEDULE.

(*See section 24.*)

ACTS REPEALED.

Year.	No.	Short title.	Extent of repeal.
1870	XXIII	The Indian Coinage Act, 1870.	So much as is unrepealed.
1893	VIII	The Indian Coinage and Paper Currency Act, 1893.	So much as relates to the Indian Coinage Act, 1870.
1899	XX I	The Indian Coinage and Paper Currency Act, 1899.	So much as relates to the Indian Coinage Act, 1870.

J. M. MACPHERSON,
Secretary to the Government of India.

APPENDIX TO

The Calcutta Gazette.

WEDNESDAY, MARCH 7, 1906.

NOTICES TO MARINERS.

THE following Notices are published for general information.

W. A. INGLIS,
Secretary, Marine Department.

CALCUTTA, *the 3rd March 1906.*

CEYLON COAST—COLOMBO HARBOUR.

Caution—A rocky ridge on the northern approaches.

No. 79 (first publication).—The Master Attendant, Colombo, has given notice of the existence of a rocky ridge in the northern approaches of Colombo harbour with a least depth of 21 feet over it. A buoy has been placed N. 14° W. two miles from head of south-west breakwater. Mariners are accordingly warned.

AFRICA, SOUTH—CAPE COLONY.

Whale rock—Bell buoy withdrawn.

No. 80 (first publication).—With reference to Notice to Mariners No. 227, dated 27th June 1903, issued by this office, the British Admiralty has given further notice (No. 97 of 1906) that the bell buoy formerly marking Whale rock, and situated in a position from which Robben island lighthouse bore N. 37° E., distant 1¼ miles, has been withdrawn.

Approximate position, lat. 33° 50′ S., long. 18° 22¼′ E.

(Variation 29° Westerly in 1906.)

This Notice affects the following Admiralty Charts:—Table bay to Cape Agulhas, No. 2082; Table bay to Donkin bay, No. 2091; Cape of Good Hope and False bay, No. 636; Table bay, No. 1920. Also, Africa Pilot, part II, 1901, page 334; Supplement, 1905, page 19, and part III, 1897, page 55.

PACIFIC OCEAN—THE PHILIPPINE ISLANDS—MINDORO STRAIT.

Apo island light—Alteration in—.

No. 81 (first publication).—With reference to Notice to Mariners No. 362, dated 20th October 1904, issued by this office, the British Admiralty has given further notice (No. 105 of 1906) that, on or about 20th December 1905, the character of the light on Apo island, Mindoro strait, would be altered from white fixed to a *group flashing* light about *every ten seconds*, thus:—*white* flash, eclipse *five seconds*; *red* flash, eclipse *five seconds*; it would be elevated 123 feet above high water, and visible in clear weather from a distance of 15 miles, the light being of the 3rd order. The exact time occupied by the flashes and eclipses is not stated.

Approximate position, lat. 12° 40′ N., long. 120° 24′ E.

This Notice affects the following Admiralty Charts:—Molucca passage to Manila, No. 943; China sea, No. 2661b; St. Bernardino and Mindoro straits, No. 2577: Also, List of Lights, part VI, 1905, No. 621a; China Sea Directory, vol. II, 1899, page 297; and Eastern Archipelago, part I, 1902, page 77.

CHINA, NORTH—MANCHURIA—PECHILI STRAIT—KWANG TUNG PENINSULA.

Ta lien hwan—Mines removed in approach.

No. 82 (first publication).—With reference to Notice to Mariners No. 151, dated 8th May 1905, issued by this office, the British Admiralty has given further notice (No. 106 of 1906) that the mines in the approach to Ta lien hwan have been cleared away, and that the Kwang tung peninsula may now be approached on the southern side, eastward of a line joining South Entry point and Cap island, and running in a S. 61° W. direction for a distance of 10 miles from Cap island, with reasonable security.

Approximate position, Cap island, lat. 38° 47¼ N., long. 121° 36½ E.

The cautionary note respecting mines will, however, be retained on the Charts until it is known that the whole of the coast in this locality is free from these dangers.

(*Variation 3° Westerly in 1906.*)

This Notice affects the following Admiralty Charts:—Gulfs of Pechili and Liau tung, No 1256; Kwang tung peninsula, No. 1798: Also, China Sea Directory, vol. III, 1904, pages 585, 589, 633, 634.

PACIFIC OCEAN—THE PHILIPPINE ISLANDS—LUZON—SAN BERNARDINO STRAIT—TEKLNI STRAIT.

Cabezas shoal—Amended position.

No. 83. (first publication).—With reference to Notice to Mariners No. 194, dated 20th October 1894, issued by this Office, the British Admiralty has given further notice (No. 111 of 1906) that Cabezas shoal, with a depth of one fathom over it is situated at a distance of 13 cables No. 20° W., and not one-third of a mile N. 20° W. from Kalantas bank as previously stated. It is a shoal head on Hamorauan bank.

Approximate position, lat. 12° 31¾′ N., long. 124° 4′ E.

(*Variation Nil in 1906.*)

This Notice affects the following Admiralty Charts:—San Bernardino and Mindoro straits' No. 2577; San Bernardino strait, No. 3370; plan of Matnog bay on Chart No. 3475; Also Eastern Archipelago, Part I, 1902, page 349.

EASTERN ARCHIPELAGO—MALACCA STRAIT—PULO PENANG.

Pulo Rimau light—Character altered.

No. 84 (first publication).—The British Admiralty has given notice (No. 112 of 1906) that on 15th January 1906, the character of Pulo Rimau light would be altered from fixed to a *red occulting* light *every twenty seconds*, thus:—light, *seventeen and a half seconds*; eclipse, *two and a half seconds*; it would be elevated 129 feet above high water, visible in clear weather from a distance of about 13 miles, and shown from an iron tower, 57 feet high,

erected on a masonry base, situated on the eastern side of the island at a distance of 1¾ cables N. 12° E. from its southern point.

The light is of the 3rd order.

Approximate position, lat. 5° 14′ N., long. 100° 16½′ E.

(*Variation 2° Easterly in 1906.*)

This Notice affects the following Admiralty Charts :—Acheh head to Tyingkok bay, No. 2760; Rutang group to Pulo Berhala, No. 793; Penang Harbour, No. 1366; Malacca strait, No, 1355: Also, List of Lights, part VI, 1906, No. 408; and China Sea Directory, Vol. I, 1896, page 147.

JAPAN—Honshu, north-west coast—Wakara bay.

Tsunegami saki—Rock awash of Chi shima—Amended height.

No. 85 (first publication).—The British Admiralty has given notice (No. 113 of 1906) of the existence of a rock awash, situated at a distance of about 3½ cables S. 55° W. from the extremity of Tsunegami saki.

Approximate position, lat. 35° 38½′ N., long. 135° 48½′ E.

Also, that the height of Chi shima, situated 2¾ miles S. 30° W. from Tsunegami saki, is 103 feet, and not 38 feet above high water as at present shown on the Charts.

(*Variation 5° Westerly in 1906.*)

This Notice affects the following Admiralty Charts :—Aburatani bay to Ando saki, No 1495 : Amarube saki to Ando saki, No. 2174 : Also, Sailing Directions for Japan, etc., 1904, page 650.

JAPAN—Naikai—Bingo nada.

Sanagi shima—Wreck to the southward.

No. 86 (first publication).—The British Admiralty has given notice (No. 114 of 1906) that the wreck of a sailing vessel, with a mast showing 6 feet above high water, is reported to be sunk in Bingo nada, in a position from which Sanagi shima summit (812 feet) bears N. 33° E., distant 1$\frac{6}{10}$ miles, and Mushima summit S. 83° W.

Approximate position, lat. 34° 19′ N., long. 133° 36½′ E.

(*Variation 4° Westerly in 1906.*)

This Notice affects the following Admiralty Charts :—Naikai, No. 2875; Bingo nada to Osuchi shima, No. 128 : Also, Sailing Directions for Japan, etc., 1904, page 450.

CHINA, EAST COAST—Port Shelter.

Rocks.

No. 87 (first publication).—The British Admiralty has given notice of the existence of the undermentioned rocks in port Shelter, in the following positions:—

(*a*) A rock, with a depth of 3 fathoms over it at low-water springs, situated in a position from which the north-western point of Shelter island bears N. 56° E., distant 4 cables, and the southern extremity of the same island S. 56° E.

Approximate position, lat. 22° 20′ N., long. 114° 17½′ E.

(*b*) A rock, with a depth of 3¾ fathoms over it at low-water springs, situated in a position from which the north-western point of Shelter island bears N. 20° E., distant 4⅛ cables, and the southern extremity of the same island S. 68° E.

(*c*) A rock, with a depth of 2½ fathoms over it at low-water springs, situated in a position from which the eastern summit of Sharp island bears S. 24° W., distant 2$\frac{3}{10}$ cables, and Keui island summit (725 feet) S. 31° E.

(*d*) A rock, with a depth of 1¾ fathoms over it at low-water springs, situated in a position from which the northernmost summit of Sharp island bears S. 7° W., distant $3\frac{1}{10}$ cables, and the northern extremity of Nga ju tau N. 82° W.

Approximate position, lat. 22° 23′ N., long. 114° 17½′ E.

(*e*) The channel between Peaked rock and Jin island is foul.

Approximate position, Peaked rock, lat. 22° 19¾ N., long. 114° 19½′ E.

(*Variation Nil in 1906.*)

This Notice affects the following Admiralty Charts :—Approaches to Hongkong, No. 1180; Mirs bay, No. 1964 : Also, China Sea Directory, Vol. III, 1904, page 128.

CHINA SEA—Banka strait.

Amelia bank—Light buoy established. Banju Asin river.—Buoy replaced by light buoy No. 88 (first publication).—With reference to Notice to Mariners No. 468, dated 30th November 1905, issued by this office, the British Admiralty has given further notice (No. 117 of 1906) that a light buoy, painted in red and black horizontal bands, and exhibiting a *white occulting* light *every twenty seconds* (light, *ten seconds;* eclipse, *ten seconds*), has been established near the south-eastern edge of Amelia bank, Banka strait, in approximately lat. 2° 13¾′ S., long. 105° 17′ E.

Also, that the black can buoy formerly situated 1½ miles north-eastward from Tanjong Sereh, Banju Asin river, has been replaced by a light buoy, painted black, from which a *white occulting* light *every twenty seconds* (light, *ten seconds;* eclipse, *ten seconds*) is exhibited.

Approximate position, lat. 2° 22′ 25″ S., long. 104° 45′ 10″ E.

This Notice affects the following Admiralty Charts :—Banka strait to Singapore, No 2757; Gaspar and Banka straits, No. 2149; Banka strait, Nos 2597 and 3471 : Also, China Sea Directory, vol. I, 1896, pages 413, 400; and Supplement, 1899, page 35.

INDIA, WEST—Sind coast.

Karachi harbour—Light buoy established.

No. 89 (first publication)—The British Admiralty has given notice (No. 118 of 1906) that a light buoy, painted red, exhibiting a *red fixed* light, has been established to mark the 20-foot patch in Karachi harbour; it is moored in a position from which Manora point light-house bears S. 85° W., distant $3\frac{3}{10}$ cables, and the breakwater light S. 8° W.

Approximate position, lat. 24° 47¾′ N., long. 66° 59′ E.

(*Variation 1° Easterly in 1906.*)

This Notice affects the following Admiralty Chart :—Karachi harbour, No. 40 : Also, Hindustan Pilot, 1898, page 304; and Supplement, 1903, page 19.

INDIA, WEST—Bombay coast.

Port of Aguada—Light to be fixed.

No 72 (second publication).—The Bombay Government has given notice (No. 16 of 1906) that information, dated 22nd January 1906, has been received from the Captain of the Port, Aguada, through the Consul-General for Portugal in British India, Bombay, that from the 10th February 1906 Aguada light will be fixed until further notice.

This Notice affects the following Admiralty Charts :—No. 827, Vengurla to Cape Comorin; No. 2737, Vizadrug to Cochin; No. 740, Achra river to Cape Ramas; No. 492, Aguada to St. George Islands, including Marmugoa and Goa roadstead, and West Coast of Hindustan Pilot, 4th edition, 1898, page 164; also list of Light-houses and Light-vessels in British India, page 28, No. 257.

ARABIA, NORTH-EAST COAST—Persian gulf.

Rennie Shoal—Depth of water.

No. 73 (second publication).—The Bombay Government has given notice (No. 18 of 1906) that the Commander of the B. I. S. N. Co.'s S.S. *Waroonga* reports that on her recent voyage from Koweit to Bahrein the vessel grounded on the shoal which was reported by

H. M. S. *Sphinx* in 1897, bearing S. ¼ W. 2¾ miles from Rennie Shoal and to have a depth of 19 feet.

It appears that there is less water on this shoal than previously reported, as the S.S. *Waroonga* was only drawing 15′ 6″ at the time of her grounding.

This Notice affects Admiralty Chart No. 2837C, Persian Gulf, Western Sheet, and Persian Gulf Pilot, 4th edition, 1898, page 137.

CHINA, EAST COAST—Yang tse Kiang.

Kiu Toan beacon—Position altered.

No. 74 (second publication).—The British Admiralty has given notice (No. 88 of 1906) that in consequence of the washing away of the banks, Kiu Toan beacon has been moved for a distance of 5$\frac{4}{10}$ cables S. 87° W. from its former position.

Approximate position, lat. 31° 15¾′ N., long. 121° 43′ E.

(*Variation 2° Westerly in 1906.*)

This Notice affects the following Admiralty Charts :—Kueshan islands to Yang tse Kiang, No. 1199; approaches to the Yang tse Kiang, No. 1602: Also, China Sea Directory, vol. III, 1904, page 407.

INDIAN OCEAN—MADAGASCAR, EAST COAST.

Cape East—Experimental light exhibited.

No. 75 (second publication).—The British Admiralty has given notice (No. 89 of 1906) that a *white group flashing* light, showing groups of two flashes at an elevation of 236 feet above high water, and visible in clear weather from a distance of 21 miles, has been experimentally exhibited from a lighthouse erected on Ambohitsara hill, about 1½ cables from the coast and at a distance of about one mile southward from the extremity of cape East; it has been placed on the Chart in approximately lat. 15° 15′ 30″ S., long. 50° 29′ 15″ E.

This Notice affects the following Admiralty Charts :—Indian ocean, Nos. 748a, b; Chagos archipelago to Madagascar, No. 2899; Delagoa bay to Guardafui, No. 597; St. Andrew to Antongil bay, No. 758: Also, List of Lights, Part VI, 1905, page 17; and islands in the Southern Indian Ocean, 1904, page 79.

EASTERN ARCHIPELAGO—Celebes, north coast, Kwandang bay.

Antoinette reef—Beacon re-erected.

No. 76 (second publication).—With reference to Notice to Mariners No. 154, dated 14th May 1904, issued by this Office, the British Admiralty has given further notice (No. 91 of 1906) that a pile beacon with conical top mark has again been erected on Antoinette reef, in Kwandang bay.

Approximate position, lat. 0° 56½′ N., long. 122° 55′ E.

This Notice affects the following Admiralty Charts :—Penang to Pulo Motuo, No. 3195: Also, Eastern Archipelago, Part II, 1904, page 395.

EASTERN ARCHIPELAGO—Sumatra west coast—Koninginne bay approach.

Pulo Pisang light—Intended alteration in character.

No. 77 (second publication).—The British Admiralty has given notice (No. 92 of 1906) that it is intended to alter the character of Pulo Pisang light from fixed to *occulting every twelve seconds*, thus :—light, *six seconds*; eclipse, *six seconds*; the light being produced by acetylene gas.

Approximate position, lat. 1° 0′ S., long. 100° 20′ E.

Further notice will be given when received.

This Notice affects the following Admiralty Charts :—Acheh head to Tyingkok, No. 2760; Ujong Masang to Ujong Indrapura, No. 709; Koninginne bay, No. 212 : Also, List of Lights, Part VI, 1905, No. 457; China Sea Directory, vol. I, 1896, page 299; and Supplement, 1899, page 20.

JAPAN, WEST COAST—Simonoseki strait.

Wreck in western entrance.

No. 78 (second publication).—The British Admiralty has given notice (No. 94 of 1906) that the wreck of a steamship, with masts 9 to 20 feet above water, lies sunk in the western entrance to Simonoseki strait, in a position from which Wakura jima summit bears N. 59° W., distant $4\frac{1}{10}$ cables, and Mutsure jima light N. 11° E.

Approximate position, lat. 33° 57½′ N., long. 130° 51½′ E.

(*Variation 4° Westerly in 1906.*)

This Notice affects the following Admiralty Charts :—Simonoseki strait, Nos. 532, 1578 : Also, Sailing Directions for Japan, &c., 1904, page 514.

INDIAN OCEAN—Madagascar, east coast.

Island of St. Mary—Experimental light exhibited from the extremity of point Albrand or Halbrand.

No. 64 (third publication).—The British Admiralty has given notice (No. 58 of 1906) that a *white flashing* light *every five seconds*, elevated 255 feet above high water, and visible in clear weather from a distance of 22 miles, has been experimentally exhibited from a light-house erected at a distance of about 1¾ miles from the extremity of point Albrand or Halbrand, island of St. Mary; it has been placed on the Chart in approximately lat. 16° 42′ 20° S., long. 50° 3′ 40° E.

This Notice affects the following Admiralty Charts :—Indian Ocean, No. 748a ; Chagos archipelago to Madagascar, No. 2899 ; Delagoa bay to Guardafui, No. 597 ; Antongil bay to Ambatosa, No. 759b ; island of St. Mary, No. 683 ; Also List of Lights, part VI, 1905, page 17 ; and Islands in the Southern Indian Ocean, 1904, page 91.

PACIFIC OCEAN—Hawaiian or Sandwich islands.

Honolulu harbour channel—Dredging—Pilots necessary.

No. 65 (third publication).—With reference to Notice to Mariners No. 244, dated 16th July 1904, issued by this office, the British Admiralty has given further notice (No. 59 of 1906), that the dredging now in progress renders it necessary to alter the positions of the buoys and beacons, etc., marking the channel into Honolulu harbour.

A pilot is therefore necessary for vessels proceeding in or out of the harbour until the dredging is completed and the marks re-established, of which further notice will be given.

Approximate position, lat. 21° 18′ N., long. 157° 52′ W.

This Notice affects the following Admiralty Chart :—Honolulu harbour, No. 1378 : Also Pacific Islands, vol. III, 1900, page 230 ; and Supplement, 1903, page 16.

INDIAN OCEAN—Seychelles islands.

Shoal sounding on bank to the westward.

No. 66 (third publication).—The following Notice to Mariners (No 63 of 1906), issued by the British Admiralty, is republished :—

Information dated 3rd January 1906 has been received from the Eastern Telegraph Company that a sounding of 10 fathoms rock was obtained by the Company's S S. *Sherard Osborn* on the bank extending westward from the Seychelles islands. in approximately lat. 4°, 47′ 45° S., long. 54° 30′ E.

This Notice affects the following Admiralty Charts :—Chagos Archipelago to Madagascar No. 2899 ; Seychelles group, No. 721 : Also, Islands in the Southern Indian Ocean, 1904, page 361.

RED SEA—Gulf of Suez.

Newport rock light—Intended alteration in.

No. 67 (third publication).—The British Admiralty has given notice (No. 67 of 1906) that it is intended shortly to alter the colour of the Newport rock (*revolving*) light from white to *red*.

Approximate position, lat. 29° 53′N., long 32° 33′ E.

Further Notice will be given when this alteration has been effected.

This Notice affects the following Admiralty Charts:—Red sea, Nos. 2523 and 8a; Gulf of Suez, No. 757; Suez bay, No. 734: Also, List of Lights, Part V, 1905, No. 1428, Part VI, 1905, No. 166; and Red Sea, etc., Pilot, 1900, page 90.

PACIFIC OCEAN—New Guinea, south coast—Aru islands, Dobbo harbour.

Tanjong Ular—Light established.

No. 68 (third publication).—With reference to Notice to Mariners No. 177, dated 1st June 1905, issued by this office, the British Admiralty has given further notice (No. 70 of 1906) that a *white group occulting* light, showing groups of three eclipses *every thirty seconds*, thus:—light *fifteen seconds*; eclipse, *three seconds*; light, *three seconds*; eclipse, *three seconds*; light, *three seconds*; eclipse, *three seconds* has been established on Tanjong Ular, the north-western end of Wammer island, at the entrance to Dobbo harbour: it is elevated 72 feet above high water, visible in clear weather from a distance of 14 miles and shown from an open ironwork support, 42 feet high, painted white. The light is of the 4th order.

Approximate position on plan on Chart No. 1460, lat. 5° 45′ S., long. 134° 11′ E.

This Notice affects the following Admiralty Charts:—Eastern Archipelago, No. 942b; Australia, No 2759a; Aru islands, No. 470; Dobbo harbour on No. 1460: Also List of Lights, Part VI, 1905, page 87; and Eastern Archipelago, Part I, 1902, page 478.

AUSTRALIA, SOUTH—Spencer gulf—Port Lincoln approach.

Cape Donnington—Light established.

No. 69 (third publication).—With reference to Notice to Mariners No. 58, dated 14th February 1905, issued by this Office, the British Admiralty has given further notice (No. 73 of 1906) that a *fixed* light, elevated 80 feet above high water, and visible in clear weather from a distance of 14 miles, has been established on cape Donnington, in the approach to port Lincoln, Spencer gulf; it shows the following sectors:—*white* from the bearing of N. 70° E. to N. 74° E, *red* from N. 74° E., through east, to S. 44° E., *white* from S. 44° E., through south and west, to N. 74° W., *red* from N. 74° W. to about N. 51° W., when it is obscured by the land. The light is shown from a white wooden tower erected about one cable to the southward of the extremity of the cape.

Approximate position, lat. 34° 43¾′ S., long. 135° 59¾′ E.

(*Variation 4° Easterly in 1906.*)

This Notice affects the following Admiralty Charts:—Cape Catastrophe to Great Australia light, No. 1061; St. Vincent and Spencer gulfs, No. 2389b; port Lincoln, No. 784: Also, List of Lights, Part VI, 1905, No. 1146; and Australia Directory, vol. I, 1897, page 182.

AUSTRALIA, SOUTH—St. Vincent Gulf.

Port Wakefield—Shoal in approach—Buoy.

No. 70 (third publication).—The British Admiralty has given notice (No. 74 of 1906) of the existence of a shoal, with a depth of 4 feet over it at low water, in the eastern approach to Port Wakefield, situated at a distance of 4¼ miles N. 58° W. from Great Sandy point. A red can buoy marks its position.

Approximate position, lat. 34° 26′ S., long. 138° 11′ 20″ E.

(*Variation 5° Easterly in 1906.*)

This Notice affects the following Admiralty Chart:—St. Vincent and Spencer gulfs, No. 2389b: Also, Australia Directory, vol. I, 1897, page 338.

PACIFIC OCEAN—THE PHILIPPINE ISLANDS—MINDANAO, NORTH POINT.

Polo point—Light established. Tagola point—Light altered.

No. 71 (third publication).—The British Admiralty has given notice (No. 76 of 1906) that a *white fixed* light, elevated 44 feet above high water, and visible in clear weather from a distance of 11 miles, has been established on a frame structure, painted white, erected on Polo point; the light is 38 feet above the ground, and is visible from the bearing of S. 56° E., through south and west, to N. 35° W.

Approximate position, lat. 8° 36′ 30″ N., long. 123° 44′ 40″ E.

Also, with reference to Notice to Mariners No. 413 of 1904, (this office No. 223 dated 25th June 1905) that the colour of Tagola point light (*fixed*) has been altered from white to *red*, and is now visible from a distance of 7 miles only: in other respects it remains as before.

Approximate position, lat. 8° 44′ N., long. 123° 22′ E.

(*Variation 1° Easterly in 1906*)

This Notice affects the following Admiralty Charts:—The Philippine islands, No. 943; Sulu or Mindoro sea, No. 2578; Plan of Dapitan bay on Chart No. 957: Also List of Lights, Part VI, 1905, page 101, No. 585a; and Eastern Archipelago, Part I, 1902, pages 319, 320.

E. J. BEAUMONT, COMDR., R.I.M.,
Port Officer of Calcutta.

REVISED LIST OF SPECIAL AND COMMON JURORS FOR THE YEAR 1906.

	Inches.
The mean pressure of the seven days	30·022
The average pressure of the corresponding period for 24 yeasr, Surveyor-General's Office	29 884
	Hours.
The total number of hours of bright sunshine	62·6
The maximum possible number of hours of sunshine	81·4
	°
The mean temperature of the seven days	64 9
The average temperature of the corresponding period for 24 years, Surveyor-General's Office	77·0
The extreme variation of temperature	30·2
The maximum temperature	81·9
	Miles.
The highest velocity of the wind in one hour	19
	° /
The mean relative humidity	59
The average relative humidity of the corresponding period for 24 years, Surveyor-General's Office	65
	Inches.
The total fall of rain from 25th February to 3rd March 1906	Nil
The average fall of the corresponding period for 24 years, Surveyor-General's Office	0·42
The total fall from 1st January to 3rd March 1906	9 74
The average fall of the corresponding period for 24 years, Surveyor General's Office	1·78

The mean pressure, temperature, &c., are deduced from eye observations.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected to those of the standard, Newman's No. 88, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground. Rainfall reported on any day is for 24 hours preceding 8 A.M. of that day.

≏, dew.

J. A. CUNNINGHAM,
for Meteorological Reporter to the Govt. of India and Director-General of Indian Observatories.

METEOROLOGICAL OFFICE, GOVT. OF INDIA;
Alipore (Calcutta), the 4th March 1906.

No. 1304L.R.—The 8th March 1906.—In supersession of Notification No. 3667L.R., dated the 21st December 1905, published at page 2069, Part I of the *Calcutta Gazette* of the 27th idem, the Lieutenant-Governor is pleased, in exercise of the power conferred on him by section 3 of the Bengal Survey Act, V (B.C.) of 1875, to direct that a survey shall be made of all lands situated within the external boundaries of the estate of Dhalbhum, bearing tauzi No. 1 on the revenue-roll of the Singhbhum district, situated in the districts of Singhbhum and Midnapore, and that the boundaries of estates, tenures, mauzas and fields shall be demarcated on the lands so to be surveyed.

Singhbhum and Midnapore.

No. 1322L.R.—The 9th March 1906.—Under section 11 of the Central Provinces Land Revenue Act, 1881 (XVIII of 1881), section 2, clause 9, of the Central Provinces Tenancy Act, 1898 (XI of 1898), section 4 of the Land Improvement Loans Act, 1883 (XIX of 1883), the Lieutenant-Governor is pleased to confer the following powers on Mr. E. A. Guest, Extra Assistant Commissioner, Sambalpur:—

Sambalpur.

(1) Power to effect imperfect partitions under section 136 of the Central Provinces Land Revenue Act, 1881 (XVIII of 1881) [as amended by Act XII of 1898].

(2) Powers of a Deputy Commissioner under the Central Provinces Land Revenue Act, 1881 (XVIII of 1881) [as amended by Act XII of 1898].

(3) Power to deal with cases under sections 13, 14, 15, 16, 17, 50, 58 and 78 of the Central Provinces Tenancy Act, 1898 (XI of 1898).

(4) Power to grant loans under the Land Improvement Loans Act, 1883 (XIX of 1883).

No. 1352L.R.—The 12th March 1906.—In exercise of the powers conferred by section 101 (2) (*c*) of the Bengal Tenancy Act, VIII of 1885, as amended by Act III (B.C.) of 1898, the Lieutenant-Governor of Bengal is pleased to direct that a survey shall be made and a record-of-rights prepared in respect of all lands included in the Trust Estate Raj Narain Das (Borboria), tauzi No. 3005, in the district of Midnapore.

Midnapore.

The particulars to be recorded in the survey and record-of-rights shall be the following:—

(*a*) the name of each tenant or occupant;

(*b*) the class to which each tenant belongs, that is to say, whether he is a tenure-holder, raiyat holding at fixed rates, settled raiyat, occupancy raiyat, non-occupancy raiyat, or under-raiyat; and, if he is a tenure-holder, whether he is a permanent tenure-holder or not, and whether his rent is liable to enhancement during the continuance of his tenure;

(*c*) the situation and quantity and one or more of the boundaries of the land held by each tenant or occupier;

(*d*) the name of each tenant's landlord;

(*e*) the money-rent payable at the time the record-of-rights is being prepared, or if a produce rent, the fact that a produce rent is paid;

(*f*) the mode in which that rent has been fixed—whether by contract, by order of a Court or otherwise;

(*g*) if the rent is a gradually increasing rent, the time at which, and the steps by which, it increases;

(*h*) the special conditions and incidents, if any, of the tenancy;

(*i*) if the land is claimed to be held rent-free, whether or not rent is actually paid, and, if not paid, whether or not the occupant is entitled to hold the land without payment of rent, and, if so entitled, under what authority;

(*j*) the name of each proprietor, with the character and extent of his interest, and the situation, quantity, and one or more of the boundaries of each proprietor's private lands, as defined in Chapter XI of the Act;

(*k*) the custom of the village regulating the methods of irrigation, and the duties and rights of both landlords and tenants with respect to the use and maintenance of the means of irrigation.

No. 1353L.R.—The 12th March 1906.—In exercise of the powers conferred by section 101 (2) (*a*) of the Bengal Tenancy Act, VIII of 1885, as amended by Act III (B.C.) of 1898, the Lieutenant-Governor of Bengal is pleased to direct that a survey shall be made and a record-of-rights prepared in respect of all lands included in estate Raja Baikanto Nath Dey (Borboria), tauzi No. 906, in the district of Midnapore.

Midnapore.

The particulars to be recorded in the survey and record-of-rights shall be the following:—

(*a*) the name of each tenant or occupant;

(*b*) the class to which each tenant belongs, that is to say, whether he is a tenure-holder, raiyat holding at fixed rates, settled raiyat, occupancy raiyat, non-occupancy raiyat or under-raiyat, and, if he is a tenure-holder, whether he is a permanent tenure-holder or not and whether his rent is liable to enhancement during the continuance of his tenure;

(*c*) the situation and quantity and one or more of the boundaries of the land held by each tenant or occupier ;
(*d*) the name of each tenant's landlord ;
(*e*) the money-rent payable at the time the record-of-rights is being prepared, or if a produce-rent, the fact that a produce-rent is paid ;
(*f*) the mode in which that rent has been fixed—whether by contract, by order of a Court or otherwise ;

RAILWAY DEPARTMENT.

Calcutta, the 13th March 1906.

No 12R.—Notification.—The following notification issued by the Railway Board is republished for general information.

W. A. INGLIS,
Secy. to the Govt. of Bengal.

Notification No. 60, dated the 5th March 1906, by the Railway Board.

"It is hereby notified for general information that His Majesty's Secretary of State for India has sanctioned the construction, on the 5' 6" gauge, of an extension of the Hooghly-Katwa Branch of the East Indian Railway from Katwa to Barharwa, with two short ghat lines, a total length of 102·7 miles.

2. "The extension will form an integral part of the East Indian Railway."

No. 11R.—Notification.—Whereas it appears to the Lieutenant-Governor of Bengal that land is likely to be required to be taken by Government at the public expense for a public purpose, viz, for a railway line from Kishenganj, a station on the Barsoe-Kishenganj Branch of the Eastern Bengal State Railway, *vid* Titalia to Jalpaiguri, a station on the main line of the Eastern Bengal State Railway, passing through the following villages in the district of Purnea:

Notice is hereby given, under the provisions of section 4 of Act I of 1894, that a Survey Party is to take the field for the purpose of making a survey of the proposed line, and that, in exercise of the powers conferred by the above-mentioned section, the Lieutenant-Governor has authorised the Engineers for the time being engaged in the undertaking to enter upon

and survey and do all other acts required for the proper execution of their works as provided or specified in the said section:—

CALCUTTA,
The 13th March 1906.

A. PEDLER,
Director of Public Instruction, Bengal.

RULES FOR GRANTS-IN-AID TO SCHOOLS IN BENGAL FOR INDIAN PUPILS (SANCTIONED IN BENGAL GOVERNMENT ORDER No. 1413 T.—G., DATED THE $\frac{20\text{TH JULY}}{2\text{ND AUGUST}}$ 1905).

1. An allotment from Provincial revenues is assigned annually by Government to be expended in grants-in-aid to schools not under Government management, provided they fulfil the conditions prescribed in the following rules and are conducted in accordance with the general rules laid down by the Department.

2. The allotment is distributed by the Director of Public Instruction, on the recommendation of the Divisional Inspectors, to schools which are certified to be eligible under these rules, reference being had to the requirements of each locality, as compared with others, and to the funds available. In determining the amount of the grants, special consideration shall be shown to schools which have a highly-qualified and well-paid staff and which levy fees at comparatively high rates.

Ordinary grants are given in aid of ordinary recurring expenditure.

Special grants are given in aid of non-recurring expenditure of a special character.

Temporary grants are given in certain cases in aid of boarding-houses and hostels in accordance with the principle that such establishments should generally be made self-supporting in so far as recurring expenditure is concerned.

3. Any school to which a grant-in-aid is given, together with all its accounts, books and other records, shall at all times be open to inspection and examination by any officer appointed by the Government for the purpose, and to this end the records and accounts shall be placed in such custody that they shall be always accessible on the visit of any inspecting officer. Such inspection and examination shall have no reference to religious instruction, but only to secular education.

NOTE.—The following books shall be kept by all aided schools :—

(*a*) An admission register.

(*b*) Attendance registers for teachers and scholars, together with a summary of such attendance, and a book for keeping copies of "D" forms for preserving the monthly abstract of attendance.

(*c*) A register showing whether boys attending the school live with parents or recognised guardians or in hostels or messes, and, if in the last, whether such institutions are under proper supervision.

(*d*) A cash-book and a book containing copies of "C" forms for preserving the monthly abstract account and also acquittance-rolls showing the payment of all teachers and all scholarship-holders.

(*e*) A visitors' book.

(*f*) A diary, stoutly bound and containing not less than 200 pages.

(*g*) A book in which all transfer certificates received, and all declarations of guardians on scholars first entering school are duly kept, and a guard-book in which details of all transfer certificates issued from the school and signed by the head-master are kept under the care of the head-master.

(*h*) A book containing the proceedings of the Managing Committee of the school, if any such Committee exists.

(*i*) Service-books of teachers, which shall be kept up to date.

(*j*) A catalogue of library books, and also a book in which the dates of issue and return of such books shall be entered.

(*k*) A correspondence book or file.

(*l*) A conduct register, in which all corporal punishment inflicted upon students shall be recorded.

(*m*) A book showing the results of class examinations and at departmental examinations, as also at the University Entrance or other similar examinations.

The head-master shall, from time to time, make entries in the diary, showing the visits of the Managers and Inspectors, the curricula and progress of the various classes, and other important facts concerning the school or its teachers and students, such as appointments, dates of joining, dismissal or resignation, or absences due to illness of teachers, instructions to staff, serious infringement of discipline, use of school buildings for purposes other than school, etc., which are likely to be required for future reference. Such communications from the Inspector of Schools as he may direct to be inserted in the diary must be copied *verbatim* therein. An entry shall be made at least once a month by the head-master showing the progress of the various classes in their different subjects of study, but no reflections or opinions of a general character are to be entered.

The only persons authorised to make entries in the diary are the head-master, the Inspector, and the Assistant Inspector of Schools in the case of high schools, while in the case of middle schools the Deputy Inspector may also make entries. The diary shall be kept in the custody of the head-master, but shall be open at all times to the inspection of the Managers as well as of inspecting officers. No entry once made may be erased or removed, nor may it be altered otherwise than by a subsequent entry.

At the commencement of each school session, the names of all teachers who are to form part of the school staff for the year, and the distribution of the work among them, shall be entered in the diary and signed by the head-master. Any subsequent change in the staff, or in the distribution of the work, should similarly be recorded.

4. Inspecting officers will interfere as little as possible with the local management of the school, but shall satisfy themselves that the instruction is efficient, and that the conditions on which the grants were made are fulfilled; and aid will be withdrawn from any school in which such conditions are not fulfilled.

5. Grants are given on the principle of strict religious neutrality, and no preference will be shown to any school on the ground that any particular religious doctrines are taught or not taught therein.

6. Grants will be made to such schools only (with the exception of training schools, girls' schools, night schools for adults, and schools for aborigines and low castes) as realize some fee, however small, from all their scholars. Exemption from this rule may be allowed in exceptional cases by the Director of Public Instruction.

7. No grant shall be made to a high school unless provision is made for (*a*) instruction in drawing, drill, gymnastics, and, if required, in manual training also; (*b*) employment of graduates and trained teachers; (*c*) employment of teachers who have passed the oral examination in English for teaching all the subjects taught through the medium of English; (*d*) instruction in any subjects which may be required by the local conditions of the place in which the school is situated; and (*e*) spending a portion of the grant on purchase of educational and other appliances for practical teaching of various subjects; nor shall a grant be admissible unless the medium of instruction in classes below the fourth be in accordance with the requirements of the scheme for vernacular education sanctioned in Government Resolution No. 1, dated the 1st January 1901.

8. The managers of any school applying for a grant must appoint a Secretary to conduct their correspondence with the Department, and all their names must be stated.

9. The managers shall be responsible for the due expenditure of the school funds in accordance with the conditions of the grant.

10. In respect of any school for which application is made, full information must be supplied on the following points, on which the grant will depend, and must be given in the shape required in Form A appended to these rules :—

(*a*) The pecuniary resources, permanent and temporary, on which the school depends for support.
(*b*) The proposed monthly expenditure in detail.
(*c*) The average number of pupils under instruction.
(*d*) Class of children attending the school, together with their races and creeds.
(*e*) A rough statement of social position or calling of parents of the pupils.
(*f*) The names and social standing of the persons who will form the Committee of Management, and the classes they represent.
(*g*) The class of school and course of instruction.
(*h*) The number, qualifications, and salaries of the teachers.
(*i*) The fees to be charged in each class.
(*j*) The amount of aid sought.
(*k*) The treasury at which the grant, if sanctioned, is to be payable.
(*l*) The existence of other schools of whatever class within a distance of four miles of the school applying for a grant. In the case of towns like Calcutta, the four-mile limit will not be observed, but in such cases information as to neighbouring schools must be fully given.
(*m*) The nature and size of the school-house and of the rooms contained in it, and also a description of the surroundings of the school. If possible, a rough map of the school and its immediate surroundings should be sent in, showing whether the school has a garden or play-ground and whether there are any arrangements for the residential accommodation of either masters or pupils.
(*n*) The nature of the provision which has been made for the sanitary arrangements of the pupils and teachers, and the sanitation of the school buildings and its compound.

11. An application for a grant shall be made either directly to the Divisional Inspector or to the District Deputy Inspector, who shall forward it, with his remarks, to the Inspector. The Inspector shall consult the District Magistrate, and, if they agree as to the rejection of the application, shall reject it; otherwise it shall be forwarded to the Director of Public Instruction for sanction or orders as the case may be with the opinion of the District Magistrate and his recommendation.

12. Grants shall not exceed in amount the sums to be expended from private sources except in special cases, under special orders of Government. Municipal contributions will be reckoned for this purpose as receipts from public sources.

13. Aided schools are divided into the following classes :—

High Schools—In which the pupils are educated up to the standard of the Entrance Examination of the Calcutta University or up to the standard of the "B" and "C" classes, or to similar standards.

Middle Schools—In which the pupils are educated up to the Middle Scholarship standard.

Primary Schools—In which the pupils are educated up to the Upper or Lower Primary Scholarship standard.

Girls' Schools—Including agencies for *zanana* instructions.

Training Schools—For the training of masters and mistresses.

Special Schools—For instruction in special subjects or for special classes of pupils, such as music schools, schools for the deaf and dumb and for the blind.

14. Grants are of two kinds—Annual grants and special grants.

Annual Grants.

15. For high schools the grants shall not exceed one-half of the income guaranteed from private sources, except in the districts of—

Birbhum,	Chittagong,
Dinajpur,	Tippera,
Rangpur,	Noakhali,
Bogra,	The Patna Division,
Darjeeling,	The Bhagalpur Division,
Jalpaiguri,	The Orissa Division,
Mymensingh,	The Chota Nagpur Division, and the
The island of Dakhin Shahbazpur in Backergunge,	thanas of Khatra, Raipur and Simlapal in Bankura,

in which the grants may equal two-thirds of the income so guaranteed.

16. For middle schools, in which the expenditure is more than Rs. 40 a month, the grants shall not exceed two-thirds of the income guaranteed from private sources, except in the places mentioned above, in which the grants may equal the income so guaranteed.

17. For primary schools, and for middle schools in which the expenditure does not exceed Rs. 40 a month, as well as for girls' schools, training schools and special schools, the grant shall not exceed a sum equal to the full amount of the income guaranteed.

18. The amounts laid down are maximum grants, but it must be understood that the maximum grant will not in all cases, and as a matter of course, be sanctioned.

19. No grant shall be made, or, if made, shall be continued, unless the buildings are well constructed and contain sufficient accommodation for the scholars in attendance. The rooms also must be properly furnished, lighted and ventilated, and the surrounding premises properly drained. (General directions on these points have been issued by the Department.)

20. Grants will be sanctioned ordinarily for a term of three years; but the Inspector may, at any time during its currency, recommend the revision of any grant. Notice of a proposed reduction, or suspension, if considerable, shall be given to the managers, who may, if considered necessary by the Inspector or Director, be allowed an opportunity of stating any objection that they may have.

21. When a grant is sanctioned the managers shall sign an agreement, on stamped paper, to the effect that they will conduct the school in accordance with the conditions of the grant.

22. The sanction of a grant shall be conveyed in the following form:—

Office Memorandum of the Director of Public Instruction.

(1) A grant of Rs. a month is sanctioned from the 190 , for the school at , in the district of , on the following conditions:—

(*a*) That Rs. a month at least be regularly contributed from private sources.

(*b*) That the following scale of expenditure be maintained, subject to any alteration that may be sanctioned by the Inspector:—

		Rs.
Head-master	...	
Second master	...	
Third master	...	
Servants	In case of girls' schools only ...	
Contingencies		
Total	...	

(2) The grant shall be payable every month.

(3) The monthly bill (in Form B annexed) must be sent to the Inspector for countersignature, and must be accompanied by an account (in Form C) for the month preceding that for which the bill is drawn and by a certificate that all salaries for the previous month have been paid in full.

After countersignature the bill will be paid at the treasury.

[NOTE.—Where the sanctioned scale contains an item for prize or library, separate accounts should be kept and vouchers should be filed of the prize or library fund expenses.]

(4) The monthly bill and the certificate must be signed by the Secretary of the school.

(5) The bill shall be countersigned on the distinct understanding that the salaries and other charges, certified by the Secretary to have been paid, have actually been paid.

(6) Salaries for service in any month shall become due on the first day of the following month.

(7) The appointment and dismissal of every teacher shall be notified to the Department. No appointment shall be confirmed until it has received the sanction of the Department: and the Department shall have the power to enquire into any case of dismissal of a teacher.

(8) The grant shall be liable to be reduced or withdrawn if the payment of any teacher's salary is delayed for more than two months after it has become due.

(9) The grant shall be liable to be reduced or withdrawn if the chool is unfavourably

reported on as regards the attendance or proficiency or discipline of the scholars. With the monthly bills for grant-in-aid a statement of the attendance of pupils in all the classes for the previous month shall be submitted in Form D.

(10) The grant shall be liable to be reduced or withdrawn if the managers keep their accounts in a negligent or untrustworthy manner, or if they send up incorrect accounts, or if they fail to transmit punctually the periodical returns required by the Department, or if the Department is otherwise dissatisfied with the management.

(11) The grant shall be liable to be reduced or withdrawn, if the teachers are inefficient or if they are absent from duty otherwise than in accordance with the rules of the Department, or if they keep the school registers in a negligent or untrustworthy manner.

(12) Holidays shall not exceed 65 days in the year, exclusive of Sundays, except under peculiar circumstances and with the sanction of the Inspector.

(13) Free studentships shall not ordinarily exceed 5 per cent. of the total number of pupils on the rolls, exclusive of scholarship-holders. Managers of high schools may, with the sanction of the Inspector, admit an additional number (not exceeding 12) of Muhammadans as free students up to the limit of 8 per cent. of the total number of pupils on the rolls.

(14) The Department shall have power to define the subjects of instruction to be given, and to have a voice in settling the fee-rates, in controlling expenditure, in enforcing discipline, and in regulating attendance.

(15) The Department shall have power to direct the Managers to purchase such articles as furniture, teaching appliances, black-boards, maps, library books, etc.

(16) Every new election to the Committee of Management shall be notified to the Inspector under the signatures of the Secretary and of the member or members elected.

(17) Every change of Secretary shall be notified to the Inspector under the signatures of the new Secretary and the members of the Committee of Management.

(18) All receipts, from whatever sources or for whatever purposes collected, shall be entered in the account book of the school, which shall be open to inspection and examination by any officer appointed by Government for the purpose. All receipts collected by the headmaster should be remitted on the same date, as far as possible, to the Secretary with a challan to be signed by the Secretary after the receipt of the money.

(19) No part of the previous balance of the school shall be spent without the sanction of the Inspector, except for payment of the sanctioned establishment, in order to make up any deficit in the private contributions in any particular month.

(20) The surplus funds of the school shall be placed in the Postal Savings Bank at the end of each quarter, and the savings bank account should be made out in the joint names of the Secretary and one of the members of the Managing Committee, who will be selected for the purpose by the Committee.

(21) No new building shall be constructed for the school until the plan and estimates have been approved by the Inspector.

22. Government may claim a fair share of any balance at the credit of a school at the time of its abolition, as well as of the sale-proceeds of any school-house or furniture towards the erection, enlargement, repairs or purchase of which a grant may have been given by Government.

Special Grants.

23. Grants may be given to managers of schools in aid—

(*a*) of erecting, enlarging or furnishing school buildings;

(*b*) of attaching boarding establishments to high schools;

(*c*) of executing extensive repairs; and

(*d*) in special cases, of paying off debts incurred in erecting or enlarging school buildings.

NOTE.—(1) Expenditure in the purchase of buildings may be treated as expenditure in the erection of buildings.

(2) The sum to be allotted annually for building grants to schools shall be fixed provisionally for a term of years. It shall not, in ordinary circumstances, be reduced, though it may be increased for any year during that term.

(3) Every application for a grant shall be submitted to the Department not later than on the 31st December, if the grant is to be admissible for sanction during the following financial year. If found to be in accordance with the rules, and in other respects deserving of support, it will be included in the list of "approved applications." If not so included, the reasons shall be notified to the managers.

(4) The total sum allotted for the year will be divided between schools for different sections of the community (Europeans, Hindus, Muhammadans, Native Christians, etc.), in some proportion to the requirements of each community, as indicated by the amount of the "approved applications" received from each, regard being also paid to preferential claims as explained in note (5).

Grants not required by one section of the community may, towards the close of the year, be reappropriated to meet the wants of another section.

(5) In selecting "approved applications" for sanction, those projects that involve the education or boarding of an increased number of pupils shall ordinarily be preferred to those that merely seek to improve the accommodation of existing pupils.

(6) In the case of an application for a repair grant under rule (*c*), the managers will be required to show that the necessity for such a grant has not arisen from the neglect of current repairs in previous years.

24. Except in the case provided in the foregoing rule, no grant shall be made in consideration of previous expenditure on school buildings.

25. In general, the proportion of the Government contribution made under rule 23 shall not exceed the proportion laid down in rules 15 to 18 for a school of the same class.

NOTE.—The sum of Rs. 10,000 is fixed as ordinarily the maximum grant for any undertaking or project.

26. Before a building grant is sanctioned, the site, plans, estimates, specifications, title and draft trust-deeds must be approved by the Director of Public Instruction. If the school receives no monthly grant, the managers must also satisfy the Department that it is likely to be maintained in efficiency and that it will be open to inspection.

27. The trust-deed must declare the building to be granted in trust for school purposes only. It must also provide for the legal ownership of the premises, for the proper maintenance of the building, and for the inspection and management of the school.

NOTE.—(1) This rule does not preclude the managers from using the building for other purposes, subject, if necessary, to the sanction of the Department, when not required for the purposes of the school.

(2) When the grant does not exceed Rs. 1,000, the manager may execute a deed of acceptance in place of a trust-deed (*vide* Government order No. 584, dated the 13th November 1890).

28. No grant will be finally sanctioned until a certificate is received from the managers, setting forth that the funds in their hands will, when added to the grant, be sufficient to meet all claims and to close the account.

29. Advances may be made from time to time out of the sanctioned grant on receipt of a report from the Public Works Department that the work is proceeding satisfactorily.

30. No grant will be paid in full until—

(1) a report is received from the Public Works Department or other competent authority that the building is satisfactorily completed, and

(2) the trust-deed is duly registered and lodged with the Department.

NOTE.—"Title-deeds of property mortgaged to Government on account of building grants may, as hitherto, remain with the mortgagor" (*vide* Government order No. 44T.—G., dated the 16th June 1890).

NOTIFICATION.

THE ELLIOTT PRIZE FOR SCIENTIFIC RESEARCH FOR 1906.

WITH reference to Notification No. 5058-F., in the *Calcutta Gazette* of the 28th December 1892, Part I, page 1172, the Elliott Prize for Scientific Research will be given this year to the author of the best original essay composed during the year 1906, giving the results of original research or investigation by the essayist in Natural Science.

2. Any native of Bengal, including any Eurasian or domiciled European residing in Bengal, may compete for the prize.

3. The essays of competitors *must be* sent to the President of the Asiatic Society of Bengal, 57, Park Street, Calcutta, by the end of December 1906. The prize will be adjudged to the best competitor, and awarded publicly at the Annual General Meeting of the Asiatic Society in February 1907.

4. Preference will be given to researches leading to discoveries likely to develop the industrial resources of Bengal. In the case of no essay being deemed by the Trustees to be of sufficient merit, no prize is to be awarded, but the amount is to be retained, so that in any future year two or more prizes may be given, or the prize may be enhanced in the case of an exceptionally good essay.

A. H. L. FRASER,
President of the Asiatic Society of Bengal.

ALEX. PEDLER,
Director of Public Instruction, Bengal,
and
Vice-Chancellor of the Calcutta University.

CALCUTTA,
The 23rd February 1906.

NOTIFICATION.

THE Final Commercial Class examination will be held in the Presidency College, Calcutta, on the 5th April 1906 and subsequent dates.

There shall be separate papers in (*1*) (*a*) English, including Grammar and Composition; (*b*) English Correspondence, including Commercial Correspondence, and (*c*) Letter-drafting and Précis-writing; (*2*) Bengali; (*3*) (*a*) Arithmetic, including Commercial Arithmetic and (*b*) Mental Arithmetic; (*4*) (*a*) Commercial History, (*b*) Commercial Geography.

Candidates are required to pass in all the above papers.

Candidates shall also be examined, and shall be required to pass, in either Shorthand-writing, or Type-writing, or Book-keeping. A candidate may offer two of these subjects, and failure to pass in one of them will not disqualify him.

Candidates are warned that if the answer-papers are not legibly and neatly written or prepared, they will not be examined, and examiners are requested to reject papers which show carelessness, or slovenliness, or really bad work.

The examination will be held on the dates and hours and in the order noted below :—

5th April	... 11—1-30 ...	...	Shorthand or Book-keeping.
	2—4-30 ...	...	Type-writing.
6th April	... 11—1-30 ..	...	English.
	2—4-30 ...	...	Commercial Correspondence.
9th April	... 11—1-30 ...	...	Précis-writing.
	2—4-30 ...	...	Bengali.
10th April	... 11—1-30 ...	...	Arithmetic.
	2—4-30 ...	...	Mental Arithmetic.
11th April	... 11—1-30 ...	...	Commercial History.
	2—4-30 ...	...	Commercial Geography.

A. PEDLER,
Director of Public Instruction, Bengal.

The 7th March 1906.

NOTIFICATIONS OF THE BOARD OF REVENUE.

No. 1297B.

NOTICE is hereby given that the Fourth Sale of Opium, the Provision of 1903-1904, will be held at the Government Opium Sale-room, No. 2 Bankshall Street, on Tuesday, the 3rd April 1906, at 11 A.M., and will comprise 4,400 chests, viz.—

		Chests.
Opium manufactured at the Patna Factory, consisting of	...	2,200
Ditto at the Ghazipur Factory, consisting of	...	2,200
Total	...	4,400

2nd.—The general conditions of the sale now advertised will be the same as usual. They may be ascertained by reference to the notification issued on the 28th November 1905, and published in the *Government* and *Exchange Gazettes*, or on personal application at the office of the Board of Revenue.

3rd.—The latest dates for deposit and clearance will be the 9th and 18th April 1906, respectively, that is to say, no Bank of Bengal Receipts, Government Promissory Notes or other Public Securities that may be tendered for deposit in redemption of Promissory Notes given by purchasers in the sale-room will be received after 3-30 P.M. of Monday, the 9th April 1906, and no Bank of Bengal Receipts in full payment of lots will be accepted after 3-30 P.M. of Wednesday, the 18th April 1906

4th.—In addition to the quantity above advertised for sale, the following quantities, more or less, of the opium manufactured at the Patna and Ghazipur Factories will be brought to sale between the sale now advertised and December next on or about the dates specified below. The Board of Revenue, however, reserve to themselves the right of altering these dates, should circumstances render it expedient to do so:—

DATES.			Manufactured at the Patna Factory; about chests.	Manufactured at the Ghazipur Factory; about chests.	Total; about chests.
On or about Tuesday, 1st May	1906	...	2,200	2,200	4,400
On or about Tuesday, 5th June	,,	...	2,200	2,200	4,400
On or about Tuesday, 3rd July	,,	...	2,200	2,200	4,400
On or about Tuesday, 7th August	,,	...	2,200	2,200	4,400

On or about Tuesday, 6th November	,,	...	2,200	2,200	4,400
On or about Tuesday, 4th December	,,	...	2,200	2,200	4,400
Total		...	17,600	17,600	35,200

By order of the Board of Revenue, L. P.,

S. M. NASIRUDDIN, *Offg. Secretary.*

BOARD OF REVENUE, L. P., CALCUTTA, *the 26th February 1906.*

ELECTION OF MUNICIPAL COMMISSIONERS.

NOTIFICATION.

IT is hereby notified for general information that under Rule 21 (*b*) of the Manual of Rules for the management of Charitable Hospitals and Dispensaries in Bengal, Babu Nand Keshore Das is appointed to be a member of the Committee for the management of the Charitable Dispensary at Begusarai, in the district of Monghyr, in place of Babu Kissen Ballabh Das, deceased.

D. J. MACPHERSON, *Commissioner.*

COMMR.'S OFFICE, BHAGALPUR, *the 23rd February 1906.*

NOTIFICATION.

IT is hereby notified for general information that in exercise of the powers delegated to me by Bengal Government Notification No. 3403L.S.-G., dated the 1st December 1904, I declare the Bengadhar ferry, in the district of Bhagalpur, maintained by the District Board of Bhagalpur as a non-toll-paying ferry, to be a public ferry.

I also direct, under section 35 of the Bengal Ferries Act, 1885, that the said ferry shall be managed by the District Board of Bhagalpur, and that all the proceeds of the ferry, and all the fines levied and compensation received under the said Act in respect thereof, shall be paid into the District Fund.

This notification will take effect from the 1st April 1906.

[Second publication.]

No. 820M.—The 22nd February 1906.—Under the provisions of section 308 of the Bengal Municipal Act, III of 1884, the following plan, which has been submitted by the Commissioners of the Cossipore-Chitpur Municipality for lighting with gas the following roads in the said Municipality and 100 feet from their edges, is published for general information—

24-Parganas.

(1) The whole of the Cossipore Road, commencing from the Bagbazar Canal Bridge and ending in Baranagar Bazar situate within the Municipality.

(2) The portion of the Barrackpore Trunk Road from the Talla Canal Bridge to its junction with the Gun Foundry Road.

2. An agreement has been entered into between the Commissioners of the Cossipore-Chitpur Municipality and the Oriental Gas Company for the supply and lighting of lamps at the rate of Rs. 63-1 per lamp per year. The expenditure for lighting 98 lamps in the above roads is estimated at Rs. 6,180, including charges for repair of lamps according to the existing arrangements with the Oriental Gas Company.

3. The Municipal Commissioners propose to meet the charge to be incurred on account of lighting the aforesaid areas by imposing a lighting rate of 3 per cent. on the annual value of holdings situated in the areas referred to. The income to be realized from the lighting-tax in the aforesaid areas is estimated at Rs. 5,716 a year.

L. P. SHIRRES,
Secy. to the Govt. of Bengal.

ERRATUM.

No. 966L.S.-G.—The 28th February 1906.—In Government Notification No. 221L.S.-G., dated the 16th January 1906, published in Part IB of the *Calcutta Gazette* dated the 24th idem, approving the election of Munshi Mahammad Abdullah as Chairman of the Bagerhat Local Board, in the district of Khulna, *vice* Babu Sashi Bhusan Mukerjee, resigned, *for* "Munshi Mahammad Abdullah" *read* "Maulvi Mahamad Abdulla."

LAND SALE NOTICES.

Notification A.

NOTICE is hereby given, under sections 6 and 13, Act XI of 1859, that the undermentioned estates and shares of estates in the district of Muzaffarpur will be put up for sale at the office of the Collector of that district on the 26th March 1906 at 12 noon for arrears of revenue and other demands which by law are realizable as arrears of land revenue.

When in columns 5, 7 and 9 of the appended statement it is stated that only a share is to be sold, it is to be understood that a separate account is kept for that share.

Muzaffarpur Collectorate, the 10th February 1906.

D. N. De, *for* Offg Collector.

Advertisement of Sale.

NOTICE is hereby given that the proprietary right of Government, as specified in the conditions of sale below, to the undermentioned estates, situated in the district of Hooghly, will be put up to sale at the Hooghly Collectorate on the 26th March 1906, corresponding to 12th Chait 1312 (B.S.).

The purchasers will be subject to the following conditions of sale:—

Conditions of Sale.

1st.—The estate to be sold to the highest bidder above the upset price, which will be fixed by the Collector at the time of sale. The purchaser of this estate will be considered as the proprietor of the estate, and the entire proprietary right of Government in such estate will be transferred to him, subject to the revenue fixed in perpetuity.

2nd.—The sale to be subject to existing leases and to the rights conferred by the settlement proceedings and by the laws in force, and purchasers to be bound to respect the rights of resident cultivators who have signed the schedule of assessment prepared by the revenue authorities.

3rd.—If the amount of purchase-money do not exceed Rs. 100, the whole amount to be paid down at once.

4th.—If the amount of purchase-money exceed Rs. 100, one-fourth of the amount bid to be immediately deposited. If the balance be not paid by noon of the fifteenth day after the sale, reckoning the day of sale as one, or, if that day be a close holiday, then by noon of the first succeeding office day, the sale is to be cancelled (the sum deposited being forfeited to Government), and the estate to be again put up to sale at the risk of the defaulting purchaser after issue of the advertisement as in the case of original sale.

Alipore, the 17th February 1906.

GANGA GOVINDA GUPTA, for Collector.

Advertisement of Sale.

NOTICE is hereby given that the proprietary right of Government, as specified in the conditions of sale below, to the undermentioned estates, situate in the district of Burdwan, will be put up to sale at the Burdwan Collectorate on the 7th March 1906, corresponding to 13th Chaitra 1312 (B.S.).

Conditions of Sale.

1st.—The estates to be sold to the highest bidder above the upset price which will be fixed by the Collector at the time of sale. The purchasers of these estates, will be considered as the proprietors of the estates, and the entire proprietary right of Government in such estates will be transferred to them with effect from 1st April 1906 as revenue free or subject to the revenue fixed in perpetuity.

2nd.—The sale to be subject to existing leases and to the rights conferred by the settlement proceedings and by the laws in force, and purchasers to be bound to respect the rights of resident cultivators who have signed the schedule of assessment prepared by the Revenue authorities.

3rd.—If the amount of purchase-money does not exceed Rs. 100, the whole amount to be paid at once.

4th.—If the amount of purchase-money exceed Rs. 100, one-fourth of the amount bid to be immediately deposited. If the balance be not paid by noon of the fifteenth day after the sale, reckoning the day of sale as one, or if that day be a close holiday, then by noon of the first succeeding office day, the sale will be cancelled (the sum deposited being forfeited to Government), and the estate will be again put up to sale at the risk of the defaulting purchaser, after issue of advertisement as in the case of original sale.

Advertisement of Sale.

NOTICE is hereby given that the proprietary right of Government, as specified in the conditions of sale below, to the undermentioned estates situate in the district of Hooghly, will be put up to sale at the Hooghly Collectorate on the 26th March 1906, corresponding with 12th Chait 1312 (B.S.).

The purchaser will be subject to the following conditions of sale :—

Conditions of Sale.

1st.—The estate to be sold to the highest bidder above the upset price, which will be fixed by the Collector at the time of sale. The purchaser of this estate will be considered as the proprietor of the estate, and the entire proprietary right of Government in such estate will be transferred to him, subject to the revenue fixed in perpetuity.

2nd.—The sale to be subject to existing leases and to the rights conferred by the settlement proceedings and by the laws in force; and purchasers to be bound to respect the rights of resident cultivators who have signed the schedule of assessment prepared by the revenue authorities.

3rd.—If the amount of purchase-money does not exceed Rs. 100, the whole amount to be paid down at once.

4th.—If the amount of purchase-money exceed Rs. 100, one-fourth of the amount bid to be immediately deposited. If the balance be not paid by noon of the fifteenth day after the sale, reckoning the day of sale as one, or if that day be a close holiday, then by the noon of the first succeeding office day, the sale is to be cancelled (the sum deposited being forfeited to Government), and the estate to be again put up to sale at the risk of the defaulting purchaser, after issue of advertisement, as in the case of original sale.

Number on the district Roll.	Name of estate and pargana or thana.	Approximate area in acres.	Government revenue assessed.	REMARKS.

B. DE, Collector.

Advertisement of Sale.

NOTICE is hereby given that the undermentioned plots of land, no longer required by Government, situated along the Eastern Branch, Tirhut State Railway, in the district of Darbhanga, will be put up to sale at 12 o'clock (noon) on the 26th day of April 1906, corresponding with the 17th Baisakh 1313 Fusli, at the Collectorate of Darbhanga.

The purchasers of the several plots of land will be subject to the following conditions :—

1st.—The purchasers will have no power to make any excavations on the land nearer than 15 feet from the railway fencing, or plough the lands closer than 3 feet from its foundation.

2nd.—If the amount of purchase-money does not exceed Rs. 100, the whole amount must be paid down at once.

3rd.—If the amount of purchase-money exceed Rs. 100, one-fourth of the amount must be immediately deposited. If the balance be not paid by noon of the fifteenth day after the sale, reckoning the day of sale as one, or if that day be a close holiday, then by noon of the first succeeding office day, the sale shall be cancelled, the sum deposited being forfeited to Government, and the lot again put up for sale at the risk of the defaulting purchaser, after issue of advertisement, as in the case of original sale.

4th.—The plots of land will be sold revenue-free to the highest bidders.

5th.—The purchasers shall be put in possession on receipt by the Collector of the orders of the Board confirming the sale.

The patni rent for the said 6 annas 8 gundas share being Rs. 4,800 a year is payable to the zamindar, Babu Nak Chaddi Lall, of Kashba Purnea in the district of Purnea.

D. C. PATTERSON, Sub-Judge.

Rajmahal, the 20th February 1906. (177—3)

Notice under Section 30, Civil Procedure Code.

REGULAR SUIT No. 541 OF 1905.

IN THE 3RD COURT OF THE MUNSIF OF HOWRAH.

Shaik Mojahar Ali, of village Gouripur, thana Jagatbullovpur, *versus* Kritibash Bhakta and others, of village Gouripur, thana Jagatbullovpur.

WHEREAS the above-named plaintiff has instituted this suit for obtaining a declaration that none of the abovenamed defendants and no people, whether Sanayasis or not, of mauza Gouripur in thana Jagatbullovpur of this district, have any right to fish in the tank described below on the Amispanna day of the Sanayasis of the idol Siva of Gouripur and also for declaration of the plaintiff's title to the said tank as lease-holder of the same under Nanda Lal Mukherjee and others of Janai, the zamindars of Gouripur, under a registered kabuliat, dated 8th Assin 1311, and also for recovery of possession of the said tank and other reliefs, praying that the abovenamed defendants may be allowed to defend the suit on behalf of all the people of Gouripur, notice is hereby given, under section 30, Civil Procedure Code, to all the inhabitants of Gouripur of the institution of the above suit under section 30 of the Civil Procedure Code.

The tank in dispute is known as "Chota Chalera" and is situate in the said mauza Gouripur, and is bounded on the east by the jamai lands of Sariatulla and others, which are in occupation of Purna Samonta and Chintamoni Pachal and the jamai lands of Joggeswar Samanta and danga of Manik Das, on the the north by the jamai lands of Sariatulla and others which are in the occupation of Nobin Kaurar and jamai lands of Lal Chand Bairagi and others, on the west by the jamai lands of Sarsitulla and others, Khetra Pramanik and Shaik Samiruddin and others, and on the south by the jamai danga of Tarak Palleh and others and the jamai land of Tarini Pachhal.

SRIPATI CHATTERJEE,

Munsif, 3rd Court, Howrah.

Howrah, the 1st March 1906. (230—1)

NOTICE.

Lost

THE Government Promissory Notes Nos (1) 013383, (2) 013384, (3) 010322 of the 3 per cent. of 1896-97 for Rs. 1,000, Rs. 1,000 and Rs 300, respectively, originally standing in the name of the Bank of Bengal, the first two last endorsed to Balika Sundari Dassi and the third one to Nikunja Bala Dassi, which has been inherited by my minor son, Krishna Chandra Kuar, of whom I have been appointed guardian, the proprietors, by whom they were never endorsed to any other person, having been lost, notice is hereby given that payment of the above notes and the interest thereupon have been stopped at the Public Debt Office, Bank of Bengal, Calcutta, and that application is about to be made for the issue of duplicates in favour of the proprietors. The public are cautioned against purchasing or otherwise dealing with the above-mentioned securities.

Name of the Advertisor—Balika Sundari Dassi.

Residence—Balindar, Dabipur Post Office, district Burdwan. (238—3—14)

INSOLVENT NOTICES.

In the matter of ELIAS ABRAHAM COHEN, an insolvent.

On Wednesday, the 28th day of February last, it was ordered that Tuesday, the 3rd day of April next, be appointed for the further hearing of this matter, and that unless cause be shown to the contrary on that day, the said insolvent be discharged personally as well as to his after-acquired property from all liabilities for debts, claims and demands of and against the said insolvent at the time of the filing of his petition for relief.

Suttyendra Ch. Mitter, Attorney. (239—2)

In the matter of JOSEPH DAVID JOHN HORRELL, an insolvent.

Notice that an application for an *ad interim* protection order was made by the said insolvent on the 9th instant, and that such application will be heard and disposed of by the Acting Commissioner of the Insolvent Court on Monday, the 19th day of March instant, at the hour of half-past ten o'clock in the forenoon.

☞ Any creditor of the said insolvent desirous of opposing such application must appear before the said Court at the time and place aforesaid.

Fox and Mandal, Attorneys. (240—1)

Berhampore, the 12th March 1906

NOTICE.

THE next annual stock-taking of the Indian Law Reports kept at the Bengal Secretariat Book Depôt will commence on the 1st April and will last till the 21st April 1906, inclusive. The public are hereby informed that all issues of the said Reports from the said Depôt to subscribers and officials will be suspended during the period.

L. C. ADAMI,
Offg. Secy. to the Bengal Council, and Asst. Secy. to the Govt. of Bengal, Legislative Dept.

LEGISLATIVE DEPT.,
BOOK DEPÔT BRANCH,
The 9th January 1906.

THE INDIAN LAW REPORTS.

Published in FOUR SERIES, viz.

CALCUTTA, MADRAS, BOMBAY AND ALLAHABAD.

THE Indian Law Reports, published under the authority of the Governor General in Council, are printed in monthly parts, which are issued, as soon as possible after the first of each month, at Calcutta, Madras, Bombay and Allahabad, respectively.

The Reports comprise four Series—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court

The cases heard by the Privy Council on appeal from each High Court are reported in the Series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat Book Depôt: and the Madras, Bombay and Allahabad Series are distributed direct from Madras, Bombay and Allahabad, respectively.

Persons desiring to subscribe for or purchase the Reports should apply to—

the Officer in charge, Bengal Secretariat Book Depôt, Calcutta, or

the Superintendent, Government Press, Madras, or

the Superintendent, Government Central Press, Bombay, or

the Curator of Government Books, United Provinces of Agra and Oudh, Allahabad.

PRICES.

THE terms of subscription, and the terms on which current issues and back numbers are sold, are as follows:—

	Without postage.	With Indian postage.	With Foreign postage.

PART IVA.

Proceedings of the Bengal Legislative Council.

GOVERNMENT OF BENGAL

LEGISLATIVE DEPARTMENT.

Abstract of the Proceedings of the Council of the Lieutenant-Governor of Bengal assembled under the provisions of the Indian Councils Acts, 1861 and 1892.

THE Council met in the Council Chamber on Saturday, the 3rd March, 1906, at 11 A.M.

Present:

The Hon'ble SIR ANDREW FRASER, K.C.S.I., Lieutenant-Governor of Bengal, *presiding*.
The Hon'ble MR. L. HARE, C.S.I., C.I.E.
The Hon'ble MR. F. A. SLACKE.
The Hon'ble MR. B. L. GUPTA.
The Hon'ble MR. P. O'KINEALY, Advocate-General of Bengal.
The Hon'ble MR. E. W. COLLIN.
The Hon'ble MR. R. W. CARLYLE, C.I.E.
The Hon'ble MR. W. A. INGLIS.
The Hon'ble MR. L. P. SHIRRES.
The Hon'ble MR. G. GORDON.
The Hon'ble MR. C. G. H. ALLEN.
The Hon'ble MR. C. F. LARMOUR.
The Hon'ble BABU AMBIKA CHARAN MAZUMDAR.
The Hon'ble RAJA BAN BEHARI KAPUR, C.S.I.
The Hon'ble BABU JOGENDRA NATH MUKHERJEE, M.A., B.L.
The Hon'ble MR. J. D. NIMMO.
The Hon'ble MR. SYED SHURFUDDIN.

QUESTIONS AND ANSWERS.

BIRTHS AND DEATHS IN CALCUTTA AND IN THE PRESIDENCY AND BURDWAN DIVISIONS.

The Hon'ble Babu Ambika Charan Mazumdar, in the absence of the Hon'ble Mr. Chaudhuri, asked:—

Will the Government be pleased to lay on the table a tabular statement giving for the year 1905-06, the births and deaths (and in the case of the latter, showing in separate columns those due to fever and cholera and the total number of deaths and the rate per *mille*) in the town of Calcutta, and the different districts comprised in the Presidency and Burdwan Divisions of Bengal.

The Hon'ble Mr. Shirres replied:—

"A statement giving the information desired by the Hon'ble Member for the year 1905 has been laid upon the table."

Statement referred to in the above answer.

NAMES OF PLACES.	BIRTHS.		DEATHS.				Total number.	Rate per *mille*.	REMARKS.
			FROM FEVER.		FROM CHOLERA.				
	Total number.	Rate per *mille*.	Total number.	Rate per *mille*.	Total number.	Rate per *mille*.

SCARCITY IN BENGAL AND BIHAR.

The Hon'ble Babu Ambika Charan Mazumdar, in the absence of the Hon'ble Mr. Chaudhuri, asked:—

Does the Government apprehend a scarcity in Bengal and Bihar, owing to the partial failure of the winter crop and the gloomy prospects of the *rabi* crop? If so, which are the districts where the prospects are particularly bad? Does the Government propose to adopt any precautionary measures to cope with the scarcity and to avert distress amongst the cultivating classes.

The Hon'ble MR. CARLYLE replied:—

"Government does not apprehend any scarcity in Bengal and Bihar. The winter rice crop is estimated at 88 *per cent.* of a normal crop and the prospects of the *rabi* crop are still on the whole fair. The situation will be carefully watched, but no special precutionary measures seem to be necessary at present to avert distress among the cultivating classes."

THE BENGAL COURT OF WARDS (AMENDMENT) BILL, 1905.

The Hon'ble Mr. Hare moved that the Report of the Select Committee on the Bill to amend the Court of Wards Act, 1879, be taken into consideration.

The motion was put and agreed to.

The Hon'ble Mr. Hare also moved that the clauses of the Bill be considered in the form recommended by the Select Committee.

He said:—"It is not necessary for me to say more than a very few words in moving that the Report of the Select Committee on the Bill to amend the Court of Wards Act, 1879, be taken into consideration.

"The criticisms on the Bill as it was originally presented which it is necessary to notice are confined principally to two points. The first is in regard to the penalty which will be incurred by creditors who withhold presentation of their claims. The Committee recommend that the penalty shall be forfeiture of interest. This is the least that can reasonably be inflicted. I may point out that a creditor, even when he does not expect immediate payment of his principal, is usually on the look-out for and continually demanding his interest, and it is very unlikely that he will fail to present his claim for interest repeatedly, and so will easily come to know that the Court has taken charge of the estate which owes him his debt. If no penalty for delay in submitting a claim is inflicted, it will clearly be advantageous for creditors who have claims carrying heavy interest to conceal their claims in order that the interest may mount up, as it is unlikely that they could easily obtain other equally profitable investments.

"The main argument, however, is that which has already been put forward and is referred to in paragraph 4 of the Report of the Select Committee, *viz.*, that unless the Court knows all the liabilities which an estate has to meet, the Court cannot safely ask any one to lend money to that estate.

"The other criticism which I notice is that which is referred to in paragraph 8 of the Report of the Select Committee; *viz.*, against the provision in the Bill for giving the Court of Wards power to retain an estate until its debts are cleared even in cases where the proprietor is not disqualified under section 6 *(e)* of the Court of Wards Act, *i.e.*, on his own application. In addition to the arguments which have been given in paragraph 8 of the Report of the Select Committee, I may mention that I have frequently had experience of the great difficulty of reclaiming estates which were heavily indebted whose proprietors were disqualified under the provisions of sections 6 (*a*) to 6 (*b*) of the Court of Wards Act. Such a case happens where a proprietor dies leaving his estate heavily encumbered. In the absence of any certainty that owing to death or other reasons the estate will not be removed from the Court's jurisdiction before a loan is repaid, people are very unwilling to lend money and onerous terms are demanded. When this is the case it becomes impossible to save the estate, and the Court cannot extend any protection to the disqualified proprietors. But those are just the cases where the Court's action is most needed and where an impartial on-looker would specially urge the Court to interfere and save the minor or widow from utter ruin. Where the proprietor has himself been improvident there is much to be said for letting him suffer the natural consequences of his improvidence, and such an one can expect much less sympathy than will be freely extended to his helpless dependants. It is surely unsound to give the Court larger powers of saving an estate for the benefit of an improvident proprietor than for the protection of helpless dependants of an improvident proprietor, such as a child or widow.

"There are some people, however, who while they will want such estates to be reclaimed and would wish the minors and widows to be saved from ruin, would not give the Court of Wards the necessary powers for fear these powers should be abused. This is irrational and there is no danger at all of any abuse. Proprietors cannot have their cake and eat it too, and this is so even if it is their predecessors in interest who have eaten the cake. Extravagance must be followed by restriction, whether it is the Court of Wards who restrains the proprietor for a time from spending, or the restraint is imposed by the fact that the property has been all dissipated and there is nothing left to spend. I claim therefore that the proposed power ought to be given in the best interest of the proprietors, and I must confess I am much surprised that the objection is put forward by the Bihar Landholders' Association as it is essentialy a measure for their protection and benefit. This provision is the subject of certain amendments which have been proposed, and I have therefore considered it advisable to deal with it at some length.

"As regards the other provisions and modifications of the Bill I have only to bring to your notice that greater publicity is given to the action of the Court of Wards when taking charge of estates.

"The amendments which have been put down in my name are due to suggestions made by my learned friend the Hon'ble Advocate-General and will be explained as each one is considered."

Clause 3.

The Hon'ble Mr. Hare moved that in sub-section (*1*) of section 10A in clause 3 of the Bill, after the words "submit the same in writing to the Court," the words "at a place to be named in the notice," be inserted.

He said:—"The reason for this amendment is that it often happens that an estate has property in several districts. The rule is that it is managed by a Collector of one of these districts only, generally the one where the proprietor is resident or in which he has the largest amount of property, and in issuing the notice that Court will generally be mentioned. The creditor will have no difficulty in knowing where he has to send his information."

The motion was put and agreed to.

The Hon'ble Babu Ambika Charan Mazumdar, in the absence of the Hon'ble Babu Bhupendra Nath Basu, moved that in the proviso to section 10A in clause 3 of the Bill, the words "and allow, either wholly or in part," be inserted after the words "may consider."

The motion was put and agreed to.

The Hon'ble Babu Ambika Charan Mazumdar moved that in sub-section (*1*) of section 10B in clause 3 of the Bill, the words "within such time as the Court may appoint" be substituted for the words "at the same time."

He said:—"The first amendment which stands against my name refers to sub-section (*1*) of section 10B in clause 3 of the Bill. After requiring in the previous section all creditors to submit their claims to the Court of Wards within a given period, the present section prescribes the time when all documents relating to such claims must be produced; and the Select Committee recommend that that time should coincide with the filing of the written statement of such claims. This seems to me to lay down a rule, calculated not only to work hardship and injustice on the claimant, but also to unnecessarily fetter the discretion of the Court in many cases. Instances may easily be conceived where a claimant may be unable to produce along with his written statement documents which may be with his servant or agent and which would not therefore be legally out of his possession or control; and yet the case and its circumstances may be such as to induce the Court to accept such documents and settle with the creditor to the best advantage of the estate. To leave no discretion even to the Court in such cases would in my opinion be highly impolitic. It is not suggested that this provision is intended to prevent fabrication of documents; for six months' time would be quite enough for the purpose of those who may be inclined to do so, and the refusal of an additional time of a month or a fortnight would not be an appreciable safeguard against such practice. It is, however, said that this stringent provision is intended to expedite the disposal of all claims against a ward's estate. But can it be pretended that with the aid of this provision the Court will be in a position to dispose of each claim on the very day or even within a fortnight of the presentation of the written statement? If not, then wherein is the necessity of shutting out the party in advance while the Court itself would be unable in many cases to take up the matter probably for months together? It goes without saying that the Collector who is the 'what not' of his district must take some time to arrange his file. I fail to see why should not a portion at least of that time be given to the claimant to arrange and file his documents. It will be remembered that the Civil Procedure Code, which is the recognized guide of procedure in all civil and revenue matters, allows some time to parties to produce their documents; and even in case of documents upon which a plaintiff may base his claim, it is permissible to a Court of Justice to allow them to be produced some time after the plaint has been filed. Upon all these considerations, I think the extraordinary stringency of the proposed clause in the Bill should be relaxed and a fair margin of discretion left in the Court itself to appoint the time within which under the circumstance of each case the documents should be produced."

The motion was put and agreed to.

The Hon'ble Mr. Hare moved that in sub-section (*3*) of section 10B in clause 3 of the Bill, for the words "is in the possession or under the control of the creditor" the words "to the knowledge of the creditor is in his possession, power or control," be substituted.

He said:—"This is a merely verbal alteration, and I do not intend to make any remarks upon it."

The motion was put and agreed to.

The Hon'ble Babu Ambika Charan Mazamdar moved that sub-section (*3*) of section 10B in clause 3 of the Bill be omitted.

He said:—"The next amendment which I have to move refers to sub-section (*3*) of section 10B in the same clause of the Bill. I fully appreciate the difficulties with which Courts of Wards are sometimes confronted in dealing with encumbered estates of which they have once assumed charge; but I must confess that I feel equally impressed that the Legislature, in dealing with a one-sided legislation like the present, cannot be too careful in seeing that in trying to avoid one difficulty it may not fall into another. In the Bill as originally drafted it was provided that any claim, not submitted to the Court within the prescribed period, 'shall be deemed to have been duly discharged.' Strong opposition was raised both in this Council as well as by the outside public against this most stringent proposal which entailed forfeiture of all claims not so submitted. The general law of limitation as well as various other considerations were referred to in support of the opposition. The Select Committee to which the Bill was then referred also report that they too recognise the force of this contention and the hardship to which the original proposal might lead in some cases; and they have accordingly proposed that a much lesser penalty might meet the requirements of the Court; *i.e.*, instead of the forfeiture of the principal they have recommended the forfeiture of the interest only. So far so good, but does the Bill, as re-cast by the Select Committee, give effect to this intention? I submit not. If the inability of a creditor to produce the documents in support of his claim before the Court of Wards is to preclude him from using such documents ever after, then wherein is the difference between the provisions of the original and the amended Bill? Except perhaps only in the rare case of creditors who may submit their claims as well as their documents, and who even after so doing may have the misfortune to have their claims rejected by the Court, the difference, as it appears to me, would be one of circumlocution only. Let us take a concrete case by way of illustration. A, a creditor to the estate of a ward under a registered mortgage bond, fails to produce the bond before the Court within the appointed time. His claim being rejected by the Court of Wards, A, brings a suit in the Civil Court to recover his claim. Under the present section he would be debarred from using the bond, and under the Law of Evidence he would be debarred from adducing other evidence of its contents. Clearly therefore, his suit would have to be dismissed; and the result of such a rule would be practically the forfeiture of the claim altogether, which the Select Committee have agreed not to work. Then the inequitable nature of the rule may be further illustrated by another example. Supposing A and B are two creditors to the estate of a ward. After notice by the Court of Wards, A submits written statement of his claim, but for some reason or other A fails to produce in time the necessary document in support of his claim. B, however, for reasons best known to him, neither submits a written statement, nor puts in his document. Under the rule proposed A, who partially submitted to the authority of the Court, would receive the punishment, but B, who defied it, would be let off scot-free Would such a result be fair or acceptable to the Government? I dare hope not. I have already pointed out that a document may be with a servant or an agent and as such it would not legally be out of possession of the party. Besides, is it necessary, Sir, to take such a drastic measure? There may be difficulties which the Court of Wards has to contend against in the present state of the law; but would not the forfeiture of interest, which is more often than not as large as the principal itself, be a sufficient warning to creditors to register their claims before it is lost to them for ever? And where they fail to do so, would not the heavy loss of interest be a sufficient punishment for their laches and more than a justifiable

gain to the estate of the ward? It is no doubt to the credit of an enlightened Government like ours that it feels so deeply interested in the protection of improvident and incompetent proprietors, but, Sir, is there any real generosity in robbing Peter to pay Paul? Your Honour's Government cannot have the remotest idea of legalising fraud. If the reckless improvident proprietors are objects of commiseration, the legitimate interest of thrifty good people ought also to receive some consideration of the estate. They are the backbone of the economic organization of the country, and it would be a bad policy to hamper them too much. Let us not kill the goose that lays the golden egg. Whose fault is it that an estate becomes involved? And whose again that an accurate and a complete list of its debts is not submitted before the Court is led to assume its charge? Certainly not of the money-lender. Then, Sir, it is too well known that violent measures always defeat their own purposes. If we make the position of creditors so precarious, many a proprietor will fail to find money in the market, and the value of property will as a consequence depreciate. To avoid one difficulty we shall drift into another; and then there may not be much to choose between the ultimate gain and loss in the bargain."

The Hon'ble Mr. Hare said:—"I beg to oppose this motion. It seems to me that if a creditor does not produce his documents which are in his possession, power or control within such time as the Court may allow him, there is no practical hardship at all in his being told that he cannot produce them afterwards. Why should he conceal them and keep them back? The ordinary Civil Courts do not allow a man to reconsider what he shall put in in support of his claim. Why should the Court of Wards do more than the ordinary Civil Courts? I cannot see that there is any hardship whatever for a creditor who knows that he has got a certain document which is in his power or in his possession or control and does not produce it. If he wants a little time, he has only got to ask the Court, and the Court will not be unreasonable If he does not then produce it, why should he be allowed to come in at any future time and say 'I have got something more?' The Courts are put in a false position altogether. They are asked to decide upon evidence before them. He does not put the evidence before them, but afterwards he goes to another Court and says 'I have got more evidence'. The first Court is useless in that case. For these reasons I must oppose this amendment."

The motion was then put and lost.

The Hon'ble Babu Ambika Charan Mazumdar also moved that in sub-section (*3*) of section 10B in clause 3 of the Bill, after the words "claiming under him" the words "in respect of such claim," be added.

He said:—"I have unfortunately lost the main amendment which I moved for the omission of sub-section (*3*), and I have now to move an amendment for modifying it. Sub-section (*3*) of section 10B as it now stands would seem to bar the reception of a document, not produced before a Court of Wards, in all suits between a ward and his creditor. I presume, however, that it is not the intention of the Select Committee to enforce this penalty for all purposes, but that it is intended to confine its operation to the debt or claim which is the subject-matter of investigation by the Court of Wards only. If I am right in this presumption, the present wording of the section does not appear to me to be satisfactory. If on the contrary I am wrong in my interpretation of that intention, I have a serious objection to the provision of the sub-section under consideration. Supposing a creditor has a money claim against the estate of a ward which is contained in an entry in a book of account. The book also contains another entry showing payment of rent by the ward's estate to the creditor as landlord. The book is not produced before the Court of Wards as required by the sub-section. Would or would not the book with the second entry be admissible in a rent-suit between the ward and the creditor? Evidently it would. In that case I think the section ought to be made clearer. The use of the word 'creditor' may not be sufficient to clear up the point. So, with a view to make it unmistakable, the words 'in respect of such claim" should be distinctly mentioned. In the notice I have asked those words to be added to the section; but with your Honour's permission for grammatical connection I would have them inserted after the words 'against the ward.'"

The Hon'ble Mr. O'Kinealy said:—"I think the original motion of the Hon'ble Member was clearer than what is now suggested. What the section is meant to convey is this: that it shall not be admissible in evidence in any suit, and therefore the words would naturally come at the end of the section and not in the earlier part of the section which the Hon'ble Member wishes. I think it would be much clearer to add those words at the end of the section and not in the middle of it.

The Hon'ble Mr. Hare said:—"I accept the amendment as originally proposed."

The Hon'ble Babu Ambica Charan Mazumdar agreed to stick to his original amendment.

The original amendment was then put and agreed to.

The Hon'ble Babu Ambika Charan Mazumdar also moved that in section 10C in clause 3 of the Bill, after the words "assumed charge of such property," the words "and before any sale or complete satisfaction takes place," be introduced

He said:—"The next amendment which stands in my name in the notice paper relates to section 10C in clause 3 of the Bill. I admit that it would be but fair to give a Court of Wards some breathing time after it has assumed charge of an encumbered estate, and in that view it should have the power to ask a Civil Court to stay its execution proceedings against a ward's estate. But there ought to be a limitation to it both as regards time as well as stage. The Select Committee think that one year would be the reasonable limit for such applications. I will not join issue with them; but I must beg leave to differ from them that there should not be a similar limitation as regards the stage up to which and not beyond which such applications may be entertained. An execution proceeding does not necessarily terminate with a sale or satisfaction. A sale has to be confirmed and a satisfaction has to be certified and recorded. As the section in the Bill stands a Court of Wards would have power to stop an execution proceeding even after such sale or satisfaction has taken place and until the execution proceedings have completely terminated. The sale would introduce a third party, *viz.*, the purchaser in the case, and the reversal of it at the option of the Court might seriously prejudice his interest. I think the privilege of the Court ought to be extended up to the sale and no further. After a sale has once taken place the Court of Wards ought to be content with the remedy provided by the Civil Procedure Code for all debtors. It may deposit the amount and have the sale set aside."

The Hon'ble Mr. O'Kinealy said:—"As regards the addition of the words proposed by the Hon'ble Member, I think one part of the addition is unnecessary and the other I do not think ought to be adopted. For this reason, if a complete satisfaction has taken place then these execution proceedings must fail themselves because once there is complete satisfaction the decree cannot be further executed, and therefore I do not think, with great respect to the Hon'ble Babu Ambika Charan Mazumdar, that it is necessary in that case. And in the case of a sale we all know this, that when a sale takes place, that is merely the beginning of expensive proceedings in execution connected with whether the sale should be confirmed or not. Why should not the Court of Wards be enabled to stay proceedings so that it may be in a position to say 'we shall agree to the sale or we shall not agree to it or we shall make certain terms with the parties?' I do not think it would be a wise thing to say that the Court could not ask for a stay of the proceedings after the sale takes place, because as I say that is only the beginning of expensive proceedings which, if the Court of Wards were empowered to deal with, they might make an arrangement which would be beneficial to all."

The Hon'ble Mr. Hare said:—"I think it is unnecessary to accept this amendment, and I oppose it."

The motion was then put and lost.

The Hon'ble Mr. Hare moved that in sub-section (*2*) of section 10D in clause 3 of the Bill, after the words "binding upon the crditor" the words "and upon the ward" be added.

He said:—"This is a reasonable addition to make and is what we intended."

The motion was put and agreed to.

The Hon'ble Babu Ambika Charan Mazumdar moved that sub-section (*3*) of section 10D in clause 3 of the Bill be omitted, and that the following section be added after section 10E, namely :—

'10F. Subject to the provisions of sub-section (*2*) of section 10A, and sub-section (*2*) of section 10D, nothing in this Act shall be construed to bar the institution of a suit in a Civil Court for the recovery of a claim against a ward or his property.'

He said :—"The fifth amendment which I have to move refers to sub-section (*3*) of section 10D. It will be observed that there are two restrictive clauses provided in this Bill—One in section 10A, sub-section (*2*), with regard to forfeiture of interest, and the other provided in sub-section (*2*) of section 10D. It, of course, goes without saying that the jurisdiction of a Civil Court continues in all suits of a civil nature unless such jurisdiction is expressly barred by any special enactment. But then why provide this section at all? Out of two restrictive clauses why do you select one and say that nothing in it will bar a civil suit, while you remain altogether silent in the case of the other? This to my mind is likely to introduce an element of doubt which may in some instances lead to difficulties. Though brevity may be a recommendation of the Legislature, I think clearness ought also to be one of its aims, although it would not perhaps be altogether disadvantageous to the profession to which some of us belong that some doubt and uncertainty were left in every piece of legislation. Besides, the section as it has been worded seems to me to suffer from clumsiness both on account of its place as well as on account of its scope and bearing. I would prefer an independent section dealing with both the penal provisions and make the matter clear of all misconception. I would have no objection if the present clause were wholly omitted; but as it is, I would move that the clause be taken out of its place and an independent section provided as contained in my notice."

The Hon'ble Mr. Gupta said:—"I think the amendment proposed by my Hon'ble friend is quite unnecessary, as under section 10A only the interest is barred if a claim is not submitted to the Court of Wards. The right to bring a suit as regards a claim remains unaffected by this Act a together. We are obliged to put in a provision in section 10D in regard to claims already submitted to the Court of Wards because it might possibly be open to doubt as to whether in respect of claims that have been submitted to the Court of Wards the claimant's right to bring a suit remains intact or not; so that this sub-section (*2*) of section 10D refers entirely to claims that have been submitted to the Court of Wards. Section 10D deals only with claims submitted to the Court of Wards, and therefore the proviso stands in its proper place, but as regards section 10A it is quite unnecessary to declare that claims that have not been submitted to the Court of Wards may be brought again in a Civil Court because except as regards the interest no person's right to bring a suit is in any way interferred with. I do not think that there can be the least possibility of a doubt in this respect, and I think that my hon'ble friend's amendment is quite unnecessary."

The motion was then put and lost.

The Hon'ble Babu Ambika Charan Mazumdar also moved that in sub-section (*3*) of section 10D in clause 3 of the Bill, the words "and received by" be omitted.

He said :—"I have to move a small amendment to sub-section (*3*) of section 10D. That sub-section as drafted runs thus:—

'(*3*) Subject to the provisions of sub-section (*2*), nothing in this section shall be construed to bar the institution of a suit in a Civil Court for the recovery of a claim against a ward or his property which has been submitted to and received by the Court of Wards.'

"I object to the words 'and received by;' for I do not understand why they are there. A party can only submit his claim to the Court, and that ought to be tantamount to reception by it. What can there be between the filing and the reception which necessitates the use of the expression *and received by the Court?* It must be a surplusage and surplusages are always foreign to legislation. These words, if allowed to stand, are likely to lead to doubts and consequent misinterpretation also, and I hope the Council will not agree to retain them."

The motion was put and agreed to.

The Hon'ble Babu Jogendra Nath Mukerjee moved that the following sub-section be added to section 10D in clause 3 of the Bill, namely :—

'(4) In calculating the period of limitation applicable to suits for the recovery of a claim which has been submitted to and received by the Court of Wards, the period from the date of submission of the claim up to the date of the communication of the Court's decision thereon to the creditor shall be excluded, and in cases where such claims are wholly or partly admitted by the Court, and its proposals or ony modifications of them are accepted by the creditor in accordance with the provisions of clauses (1) and (2) of this section, a further period from the date of communication of the Court's decision, as aforesaid, to the date of termination of the Court's charge or superintendence of the property of the ward, shall be excluded.'

He said :—"In introducing this amendment I would submit to the Council that the necessity for the first portion of this amendment is obvious. The provisions of this Bill have introduced an adventitous condition of things requiring a creditor to submit his claims to the Court, and when he submits his claim he must necessarily expect some time to elapse between his act of submission and the communication of the Court's decision. Of course, if it was intended that during this time he should rush into Court to avoid limitation and try to obtain what is due to him, the object of this legislation would be frustrated

"As regards the second portion of this amendment, there may be some diversity of opinion, and it has been suggested to me that the introduction of the words 'shall bind the ward' substitutes or introduces a fresh contract between the Court of Wards, representing the minor and the creditor, and therefore limitation would run from the date of the Court's decision. If that be the case, there will be no necessity for the second portion of this amendment, but I would submit that the words 'shall bind the ward' have been introduced since notice of my amendment was given. Still I would place before the Council for consideration this fact that the clause if retained in its entirety would undoubtedly place the matter in much clearer light than it would otherwise do. If it be explicitly stated in Council that by the words 'the ward shall also be bound' a fresh contract is introduced, that will serve my purpose equally well. With these few words I place the amendment before the Council for consideration."

The Hon'ble Mr. Hare said:—"I accept this amendment in part, but not altogether. We are willing to add to the sub-section the following words:—

'(4) In calculating the period of limitation applicable to suits for the recovery of a claim which has been submitted to the Court of Wards, the period from the date of submission of the claim up to the communication of the Court's decision thereon to the creditor shall be excluded.'

"I think this would practically carry out the intention of the amendment, and that is as far as we are advised to go."

The amended motion was put and agreed to.

The Hon'ble Mr. Hare moved that in sub-section (1) of section 10E in clause 3 of the Bill, after the words "of the ward" the words "under this section" be added.

He said :—"The intention is to make it clear that matters have been put *in statu quo* in cases in which the Court after looking into the matter and making inquiries and ascertaining what the assets and liabilities are finds that it cannot interfere and resigns at once. I wish to make it clear that this section stands by itself as it were and is not to be construed as general."

The motion was put and agreed to.

The Hon'ble Babu Jogendra Nath Mukerjee moved that, after the word and figure "sub-section (2)" in sub-section (2) (c) of section 10E in clause 3 of the Bill, the words "together with the security therefor, if any," be inserted.

He said :—"My reason for introducing this amendment is this: the Bill says that if a claim be not submitted within six months from the date specified in the Bill itself the interest shall be lost to the creditor, but if certain events happen the interest shall revive. Now the question is if there is a mortgage bond and if for payment of the interest security has been given in the bond and if the interest goes, can it be said that the security stands intact apart from the interest itself? That is a question which seems to me to be very doubtful, and if when the interest revives the security has gone out of existence altogether, to say that

the security should revive with the interest is a proposition of law which does not seem to appear clearly anywhere. In section 43 of the Civil Procedure Code, the closing lines say that 'for the purpose of this section an obligation and a collateral security for its performance shall be deemed to constitute but one cause of action.' If at the time the interest is said to go out of existence it be argued that the security is kept alive, that by no means appears to be clear under the wording of section 43 of the Civil Procedure Code. It seems to me, Sir, that the object of Legislation is to state the intention of the Legislators in as clear and precise language as possible; and if by the introduction of these words the matter be cleared up, I would suggest that the words which stand in this amendment be adopted."

The Hon'ble Mr. O'Kinealy said:—"I do not think this amendment which is proposed by the Hon'ble Member is necessary. It would only have the effect of suggesting really that the word 'interest' in section 10A, sub-section (*2*), should not be held to have exactly the same meaning in section 10C; whereas as the Bill stands they both must be construed in the same way, and therefore I think the amendment is unnecessary."

The motion was then put and lost.

The Hon'ble Mr. Hare moved that for clause (*c*), sub-section (*2*) of section 10E in clause 3 of the Bill, the following be substituted, namely:—

"(*c*) the claims for interest barred under section 10A, sub-section (*2*), shall revive in case the debt or liability in respect of which the interest is claimed be not then barred by any law of limitation."

He said:—"I am advised that this would more clearly express the intention we had in view than the words as they originally stood."

The motion was put and agreed to.

The Hon'ble Mr. Hare also moved that in sub-section (*3*) of section 10E in clause 3 of the Bill, for the words "and enforce debts and liabilities" the words "claims for interest" be substituted.

He said:—"The reason is that we overlooked the fact that we had modified a section of the original Bill and we no longer barred the whole claim if it were not put forward, but only barred the claim for interest. It was therefore necessary that in this section we should explain that the claim is as to interest to which we refer. The modification seems to be necessary."

The motion was put and agreed to.

The Hon'ble Babu Jogendra Nath Mukerjee moved that after the word "shall" in sub-section (*3*) of section 10E in clause 3 of the Bill, the words 'notwithstanding anything contained in section 43 of the Code of Civil Procedure' be inserted.

He said:—"My object in introducing this amendment will appear from a consideration of section 43 of the Code of Civil Procedure, which runs thus:—

'43. Every suit shall include the whole of the claim which the plaintiff is entitled to make in respect of the cause of action; but a plaintiff may relinquish any portion of his claim in order to bring the suit within the jurisdiction of any Court.

'If a plaintiff omit to sue in respect of, or intentionally relinquish, any portion of his claim, he shall not afterwards sue in respect of the portion so omitted or relinquished.

'A person entitled to more than one remedy in respect of the same cause of action may sue for all or any of his remedies; but, if he omits (except with the leave of the Court obtained before the first hearing) to sue for any of such remedies, he shall not afterwards sue for the remedy so omitted.

'For the purpose of this section, an obligation and a collateral security for its performance shall be deemed to constitute but one cause of action.'

"It will be contended perhaps that the section deals with claims which a person is *entitled* to make in respect of the cause of action, and that the words 'is entitled to make' mean 'entitled to make at the moment that the claim is preferred.' But such words are not to be found in this section 43 itself. It speaks generally of a title to sue. In cases of revival of interest, however, the title to that interest is not extinguished, but is only dormant. Therefore the case stands thus: a man is entitled to sue, but for some act of his own which is dependent entirely upon his own will, his remedy is not available to him for some time, and it may be argued that as he could have submitted his claim before, he is responsible for not having submitted it in time, and not having done so he has, by a voluntary act of his own, debarred himself of a remedy

which the law gives him, the title to sue being in him all this time. So that, it seems to me that if a provision like the one contained in the proposed amendment was introduced it would make matters very clear, and there would be no danger of any interpretation like that I have submitted to the Council. I submit that it is not what any great lawyer would consider to be the correct meaning of this section of the Bill, that should weigh with the Hon'ble Members, but what the ordinary Courts would take the words to mean, and if by the introduction of a few words the Hon'ble Members can make the intention of the Legislature clear, they ought to do so."

The Hon'ble Mr. Gupta said:—"I think, Sir, this amendment of my hon'ble friend is not at all necessary. I do not think that any Court can possibly interpret section 43 in the way that my hon'ble friend apprehends it might. Section 43 of the Civil Procedure Code distinctly says that if any person being entitled to sue for a certain thing does not sue for it he shall be taken to have relinquished it. In this case under section 10A, if a man does not bring forward his claim before the Court of Wards his right to the interest does not lie dormant but the language of the Bill is that the claim shall cease to carry interest, so that when he brings his suit for the main claim he is absolutely debarred by the provisions of section 10A from suing for the interest and therefore section 43 of the Civil Procedure Code could not possibly apply. That section is really intended to apply to the case where a man voluntarily relinquishes a part of his claim or through negligence or oversight does not bring it. In such cases he cannot bring a supplementary suit in respect of the same cause of action. Here he is debarred by the statutory provisions of this Act from bringing a claim for interest, but when his claim revives again under the provisions of section 10E then he has a fresh cause of action in respect of that interest. He brings a claim to the interest which he could not possibly have brought under section 10A before. I think therefore, Sir, it is quite clear that section 43 of the Civil Procedure Code could not be interpreted by any Court to stand in his way of bringing a fresh suit for the interest when his claim to interest revives under section 10E. I think, therefore, the amendment is quite unnecessary."

The amendment was then put and lost.

Clause 4.

The Hon'ble Babu Ambika Charan Mazumdar moved that section 13A in clause 4 of the Bill, be omitted.

He said:—"Sir, I beg to oppose this new provision in the law on two grounds. In the first place I object on principle that a law which relates only to disqualified proprietors ought not to have operation when such disqualification ceases. A Court of Wards must be *functus officio* when there is no ward to protect. In the next place, I apprehend that if power is taken for the Court to retain charge of an estate even after the disqualification of a ward ceases, serious complications may arise. Government may often be misunderstood, its best intentions misinterpreted and undesirable friction may not unfrequently arise between a proprietor who has become qualified and the Court. I will not dilate upon this. The difficulties of the situation which is going to be created may be easily foreseen, and I would earnestly request the Council to consider the propriety of this new provision in the law relating to the Court of Wards which must be a misnomer if it is to have jurisdiction even where there is no ward or disqualified proprietor for the Court to retain charge of his estate."

The Hon'ble Mr. Hare said:—"I would ask Hon'ble Members of this Council to recollect what I said when I moved for leave for the consideration of the provisions of this Bill. The Hon'ble Member has said that this is entirely a new provision. In that I beg to differ from him and to point out that it is only partially a new provision. It is an extension of the law as it now stands. At present when a man is inextricably involved in difficulties he can come to the Court and say 'I am quite incompetent to manage this estate', and then if it is taken up by the Court it can be retained by the Court until such time as the debts have been paid off. We propose now to extend the same provision to other proprietors. The Hon'ble Member seems to imagine that the question of retention or release of

an estate would be considered and decided when the new proprietor possibly becomes qualified or ceases to be disqualified. It is nothing of the kind. The question is practically considered and decided at the time when the estate first comes under the management of the Court of Wards. It is then that the Court of Wards have to decide whether they intend to take the estate and endeavour to redeem it, or whether they will stand aside and allow things to take their course. At that time they have to decide whether or not they can raise the necessary funds at a lower rate of interest than is already current on the debts due by the estate and whether by good management they can hope to redeem the estate. Whether they can do so or not depends upon what they can obtain in the way of a loan. The terms of a loan, as we all perfectly well know, depend entirely upon the security. If the security is good a loan will be given on easy terms; if the security is bad the Court will perhaps get no loan at all, or if it does obtain one it will be on onerous terms. Whatever risk there is must be paid for and it is therefore at the time when the estate is taken up that it would be decided for all practical purposes whether or not the estate is to be retained after the proprietor ceases to be disqualified. I therefore oppose this motion as powerfully as I can."

The motion was then put and lost.

The Hon'ble Babu Ambika Charan Mazumdar also moved that in section 13A in clause 4 of the Bill, the words and expression " with the consent of the proprietor at the time " be introduced after the words and expression " the Court may either withdraw from the charge of such property or."

He said:—" The object of this amendment is plain enough. I yet regret that my main amendment for the omission of this section has been lost; but let us at all events minimise the effect of this dangerous section. If the Government is determined to prolong the period of its control even beyond the period of disqualification of a proprietor, let it do so at least with the consent of such proprietor. If the proprietor has become qualified to manage his property, what business is it of the Government still to stick to its management against his wishes? It is said that it might be to the advantage of the proprietor to do so; but I fail to understand why the Government should waste its generosity when it is no longer appreciated. Can the Government extend this generosity *ad infinitum*? If not why should it try to do so at all? I have already pointed out that such a step will lead to many complications, and there is every chance of the intention of the Government being misunderstood in many cases, particularly when the proprietor is able and desirous of taking over the property under his own management Management by a Court of Wards is not altogether an inexpensive matter, and I think it is by no mean desirable to interfere with the claims and wishes of the proprietors themselves. Certainly it is desirable to be just before being generous "

The Hon'ble Mr. Hare said:—" I think the Hon'ble Members who have just heard the remarks I have made will see clearly that it is absolutely impossible to accept this amendment. The Court has to give to a creditor who wishes to advance money to the Court a promise that it will retain the estate in order to enable the estate to be redeemed. If the Court has given the promise to him that it will retain the estate it must retain the estate. To give the successor of the disqualified proprietor an opportunity of coming in as soon as he comes of age and the disqualification ceases is to take the power out of the Court altogether and nullify the whole section."

The motion was then put and lost.

The Hon'ble Babu Jogendra Nath Mukerjee moved that in section 13A in clause 4 of the Bill, for the words " as the Court considers necessary to be discharged," the words " as the Court may have incurred for the benefit of the ward during his minority by taking advances from Trust Funds in the hands or under the supervision of Government", be substituted.

He said:—" My reason for placing this amendment for consideration before the Council is this: Section 6 of the Act provides for disqualification of proprietors and it has been already submitted by my Hon'ble friend Babu Ambika Charan Mazumdar that, apart from the question of disqualification, if the Court wishes to prolong its management in order to discharge certain debts, it may do so with the consent of the proprietor. If the proprietor is willing that the Court

should manage his affairs after he attains majority, the case to my mind is provided for by sub-section (*e*) of section 6, which deals with persons as to whom the Local Government has declared on their own application, that they are disqualified. If therefore the proprietor wishes that the Court should manage his affairs the Court can do it under this sub-section (*e*), section 6; but what justification can the Court have to retain the management when the proprietor himself is unwilling that the Court should retain it. The reasons put forward, as I have understood them, are these: that the Court might obtain loans at a favourable rate of interest if the assurance was given to the creditor that the Court would undertake to repay them. Now this question of loans may refer to two state of things: first, to clear up those debts which were incurred by the proprietor's ancestors before the Court assumed management of the property, and secondly, those which the Court itself incurred for paying off the debts of the disqualified proprietor. As to the antecedent debts no such question arises as whether the Court should obtain loans on favourable terms, but if the Court chooses to obtain loans from outsiders to repay those antecedent loans it can do so only if it can obtain fresh loans on favourable terms. The Court can also incur debts for payment of the loans which may have been incurred by the proprietor or by the proprietor's agent between the time the Court assumes the management and the death of the previous owner only under favourable circumstances as to interest. In respect of such debts, it is stated in the Statement of Objects and Reasons of this Bill that the Trust Funds in the hands of Government or under the supervision of Government might be laid under requisition, and that was the only object to be found stated in that statement regarding the introduction of this section, but in the Bill itself, as it has been pointed out by the Bihar Landholders' Association, there is no reference to Trust Funds at all. Now if the Court takes loans from outsiders and not from Trust Funds, why should there be any necessity for a section like this? The best intentions of the Court might be misunderstood by those very men whom it might seek to protect, and as it has been pointed out by my friend the Hon'ble Babu Ambika Charan Mazumdar, any interference of the Court against the wishes of the proprietor, simply for the purpose of paying off his debts may lead to unpleasant consequences. If the loans are obtained from the Trust Funds this amendment provides for the retention of the management of the disqualified proprietor's estate in the hands of the Court, and if only under these circumstances the management was retained, perhaps the possibilities of friction would be reduced to a minimum. The Court does not seek to manage the estates of all proprietors, but it is only in respect of a limited class that the Court steps in, and it seems to me that in a case where the proprietor himself is very unwilling to leave matters in the hands of the Court, after attainment of majority if the Court simply gets loans from outsiders and retains the management of the estate it would not be quite as satisfactory as it would be if the Court had retained the management in the case of loans obtained from Trust Funds alone. The high rate of interest to which reference has been made may be got rid of by obtaining advances from Trust Funds, and when this Fund was pointed to as the Fund from which relief might be obtained, why other sources of credit should be referred to as a ground for the introduction of this section as it stands is not very clear to me. I submit, Sir, that if any provision like that contained in section 13A must be introduced, it must be introduced in conection with section 6 of the Court of Wards Act, and not independently of it. With these remarks I beg to place the amendment before the Council."

The Hon'ble Mr. Hare said:—"I must oppose this amendment. It it not only the case that we shall tap Trust Funds especially, though certainly we hope to get large sums of money occasionally from Trust Funds, as it is one source from which we can obtain money, but all creditors if they are going to give us loans on a reasonable rate of interest will insist on good security. We are acting for the Trust Funds, and of course we won't lend as the Trustees unless the security is good, nor would any creditor acting for himself lend us money unless to security is good, and if the security is otherwise, he would undoubtedly charge a high rate of interest. I therefore must oppose this amendment and consider that it must be rejected. I do not see myself the hardship which is put forward. It seems to me a man must take what he is born to; if he finds that he has got to inherit an estate which is worthless, well if it is worthless he can't get over it; if he finds he is the inheritor of an estate which is in process of being redeemed but that it has got to be kept for a certain time under close management and

he cannot touch it, well he has inherited that. I cannot see that there is any hardship in insisting that the promises which the Court have made and which alone have enabled the Court to take up the estate should be adhered to and that it should not be left to a successor to come in and set them aside and thus frustrate the whole of our intention."

The motion was then put and lost.

Clause 7.

The Hon'ble Mr. Hare moved that in clause (*a*) of section 60B in clause 7 of the Bill, after the word and figures "section 11" the words, figures and letter "or charge of whose property has been retained under section 13A," be inserted.

He said:—"We wish to make quite clear what has always been understood to be the present law that where an estate is taken over in order to pay off the debts, the ward, though he is able to incur debts in regard to any other property which he may have outside the estate, cannot hypothecate any property of the estate. We wish to make this quite clear, and have therefore added these words. It does not alter the law as it now exists."

The motion was put and agreed to.

The Hon'ble Mr. Hare also moved that clause (*b*) of section 60B in clause 7 of the Bill be omitted.

He said:—"It has been pointed out to me by the Hon'ble the Advocate-General that the section as it is entered in the Bill would clash with the provisions of the Bengal Tenancy Act. It is also said that if that provision were retained the Court of Wards would not very often be made a Manager in such case. To that personally I should not be very much opposed. We are not anxious to be Managers, but at the same time I think the argument put forward that it would interfere with the provisions of the Bengal Tenancy Act is sound, and it also appears that the clause itself is unnecessary. It has been decided by the Privy Council, as I understand the decision, that where there are co-owners and a general Manager is put in for the body of co-owners, a fractional owner or co-owner can do anything be likes as regards his own share, but he cannot practically interfere with the management because, so far as his powers of interfering with the management are concerned, they have been superseded by the general Manager who has been appointed by the Civil Court. I have had no occasion myself to find any difficulty arising in the absence of this section, and I accept the proposal which has been strongly advanced by the Hon'ble Advocate-General that it is unnecessary and might therefore be omitted."

The motion was put and agreed to.

Clause 9.

The Hon'ble Babu Ambika Charan Mazumdar moved that the following clause be added to section 64A in clause 9 of the Bill, namely:—

'(*d*) by posting such notice on the Notice Boards in the offices of the Collector and of the Judge of the district in which the place named in the notice is situate.'

He said:—"Your Honour, I beg now to move my last amendment which is also the last in the notice paper. It refers to the publication of notices to creditors. The section provides for these notices being published in the Calcutta Gazette and some newspapers; but gazettes and newspapers are not so largely in circulation in this country as to give sufficient notice to money-lenders. Most of these people, however, frequent law Courts and have their agents to look after their interests in public offices. For notices and citations they look more to the notice board of the Collector and of the Judge than to the bewildering pages of the Gazette and the still more obscure columns of the newspaper. I suppose the Hon'ble Member in charge of the Bill will not have much difficulty in accepting this amendment."

The motion was put and agreed to.

The Hon'ble Mr. Hare moved that the Bill, as settled in Council, be passed.

The motion was put and agreed to.

The Council was then adjourned to Saturday, the 10th March, 1906.

CALCUTTA;
The 13th March, 1906.

L. C. ADAMI,
Offg. Secretary to the Bengal Council.

Abstract of the Proceedings of the Council of the Lieutenant-Governor of Bengal, assembled under the provisions of the Indian Councils Acts, 1861 and 1892.

THE Council met in the Council Chamber on Saturday, the 10th March, 1906, at 11 A.M.

Present:

The Hon'ble SIR ANDREW FRASER, K.C.S.I., Lieutenant-Governor of Bengal, *presiding*.

The Hon'ble MR. L. HARE, C.S.I., C.I.E.

The Hon'ble MR. F. A. SLACKE.

The Hon'ble MR. B. L. GUPTA.

The Hon'ble MR. P. O'KINEALY, Advocate-General of Bengal.

The Hon'ble MR. E. W. COLLIN.

The Hon'ble MR. R. W. CARLYLE, C.I.E.

The Hon'ble MR. W. A. INGLIS.

The Hon'ble MR. L. P. SHIRRES.

The Hon'ble MR. G. GORDON.

The Hon'ble MR. C. G. H. ALLEN.

The Hon'ble MR. C. F. LARMOUR.

The Hon'ble BABU AMBIKA CHARAN MAZUMDAR.

The Hon'ble MR. J. CHAUDHURI, M.A.

The Hon'ble ASIF KADR SAIYID WASIF ALI MIRZA, of Murshidabad.

The Hon'ble RAJA BAN BEHARI KAPUR, C.S.I.

The Hon'ble BABU JAGENDRA NATH MUKHERJEE, M.A., B.L.

The Hon'ble MR. J. D. NIMMO.

The Hon'ble MR. SYED SHURFUDDIN.

QUESTION AND ANSWER.

THE GORAI BRIDGE ON THE EASTERN BENGAL STATE RAILWAY.

The Hon'ble BABU AMBIKA CHARAN MAZUMDAR asked:—

(*a*) Is the Government aware that the open span of the Gorai Bridge on the Eastern Bengal State Railway is going to be reduced by bunding up a portion of the river on both sides? And will the Government be pleased to inquire if this is not likely to still further interfere with the water passage of the bridge and thereby materially affect the water-supply and the sanitation of the vast tract of country watered by this important channel?

(*b*) Will the Government be further pleased to inquire whether the Eastern Bengal State Railway is not responsible for the deterioration of such rivers as the Kumar, the Gorai, the Kaliganga and the Chandana, and whether it is either safe or desirable to permit any further interference with the natural course of any of these rivers in the interest of both water-supply as well as of sanitation of the country traversed by them?

The Hon'ble MR. INGLIS replied:—

"(*a*) It is the case that the land spans in the approach viaduct to the Gorai Bridge on the Eastern Bengal State Railway are being filled up. This Government was consulted, and it was found on inquiry that there was no objection to the measure which will have no appreciable effect on the capacity of the bridge to pass the flood discharge of the river.

"(*b* There is no reason to suppose that the Eastern Bengal State Railway has been in any way responsible for the deterioration of the rivers mentioned."

THE BENGAL LAND REGISTRATION (AMENDMENT) BILL, 1905.

The Hon'ble MR. HARE moved that the Report of the Select Committee on the Bill to amend the Land Registration Act, 1876, be taken into consideration.

The motion was put and agreed to.

The Hon'ble MR. HARE also moved that the clauses of the Bill be considered in the form recommended by the Select Committee.

Clause 2.

The Hon'ble BABU AMBIKA CHARAN MAZUMDAR moved that the following be inserted after sub-clause (*1*) in clause 2 of the Bill, namely:—

"(*1a*) After clause (*3*) of the same section the following shall be inserted, namely:—

"(*3a*) 'interest' means and includes interest in an estate, or share of an estate or in any mauza or land within such estate for which a separate revenue may be payable to Government."

He said:—"It is a well-known fact that there is a large class of transfers in this country which refer neither to entire estates, nor to any specified share thereof; but which relate only to certain specified mauzas or kismats and sometimes merely to specific blocks of land included in such estate. These transfers are commonly called *khanda kharid*. The transferees in such cases pay their quota of the revenues to the Collector either with reference to the quinquennial papers, which sometimes gives the revenue assessed upon each mauza, or by private arrangement with other co-sharers. There is nothing objectionable in these transfers, and they have been always recognized by the Courts as conferring valid proprietary interests in such purchasers. But their position under the Land Registration Act has always been a difficult if not an anomolous one. Seldom if ever these purchasers are admitted to registration of their names under the Act, and thus their position in relation to their tenants is rendered an extremely embarrassing one. Section 38 of the Act refers to the initial registration, while section 42 deals with substituted registration upon transfers. But these sections refer to proprietors having any *interest* in an estate, while

section 52, which provides for the inquiries to be held by the Collector, also speaks of such *interests* being the subject matter of the Collector's investigation. Unfortunately, however, the word 'interest' is nowhere defined in the Act. This omission has given rise to the difficulty in case of transfers other than those of entire estates or shares of estates to which I have drawn the attention of the Hon'ble Members. In 1890 the Board of Revenue issued a circular which practically precluded Collectors from recognising this class of transfers, and although a recent letter of the Board addressed to the Commissioner of the Presidency Division (No. 273A., dated the 7th June, 1898) seems to express a contrary opinion, the position of the transferees in such cases has not yet been cleared up, and in most places it continues to be as unsatisfactory as ever. Then it will be noticed that section 78 of the Act precludes all proprietors of estate from recovering rents from their tenants unless their names are registered under the Act. Thus the unfortunate purchasers of whom I am speaking are placed between two difficulties for neither of which they are responsible. The Collector finds himself unable to record their names, while the tenants are allowed to withhold their rents because their names are not registered by the Collector. This to my mind seems to be extremely unsatisfactory; and now that the Act has been allowed a much longer lease of life than usual, I hope the present opportunity will not be allowed to pass without some authoritative pronouncement being made to remedy this state of things. Either the scope of sections 38 and 42 should be widened by clearly defining the word 'interest' so as to include the cases of transfer to which reference has been made, or the operation of section 78 ought to be limited only to cases of proprietors of entire estates or specific shares of estates who are eligible for registration under the Act. I think a proper definition of the word 'interest' would remedy the evil complained of."

The Hon'ble MR. HARE said:—"I would oppose this amendment. The intention is to widen the scope of the Act, as I understand it. No reasons were given to us before the present moment as to why this amendment should be introduced, but I now understand from the speech I have just heard that the intention of the Hon'ble Member is to widen the scope of the Act. I wish, however, to point out that so far from widening the scope of the Act he narrows it. I understand it is a rule of interpretation of all Acts that when you specify certain things as being included in a definition, you by implication exclude things which you do not specify. Now by mentioning estates which pay revenue to Government he excludes the estates which do not pay revenue to Government. As to estates which do not pay revenue to Government, you can have an interest in them, and under the Act at present such interests are recorded; but if we accepted this interpretation clause which is now proposed, you would exclude all those and the whole of the registers which we now keep, running into thousands of volumes and millions of interests would no longer be registered. I do not see that there is any necessity whatever for defining the word 'interest.' We have a definition of extent of interest which by implication gives a definition which is full and sufficient in my opinion. Clause 3 of section 2 of the Act as it now stands says:—"Extent of interest" means the share of interest in an estate or revenue-free property of which the person with respect to whom the words are used is in possession as proprietor or manager.' That includes estates which are revenue-paying and revenue-free properties also. The present definition would be less wide and less complete. I must, therefore, oppose this amendment, which I think answers no purpose whatever."

The motion was then put and lost.

The Hon'ble MR. HARE moved that in head (*b*) of sub-clause (*3*) of clause 2 of the Bill for the word "notified" the words "adopted by notification," be substituted.

He said:—"This is merely a verbal amendment in clause 2 of the Bill. I wish to alter the word 'notified' into 'adopted by notification.' It has been pointed out that possibly the word 'notified' may be read to mean that at the time of making a survey a notification is issued to the effect that it is intended that the survey shall define mauzas, but that was not the wish or

meaning. Many of the surveys which we shall now adopt as defining mauzas have already been made. The idea is to have a very clear and distinct boundary recorded of each mauza. The land-revenue survey was by units of mauzas and mauzas were defined in that survey. In the new surveys which we make in accordance with the record-of-rights we follow almost entirely the old revenue survey as regards boundaries, but here and there it is accepted as convenient where rivers have altered or boundaries have changed and for other reasons, to make a slight modification. We wish that those slight modifications should from the time of such surveys be adopted as defining the boundaries of mauzas. We therefore wish to adopt the words 'adopted by notification' so as to give us power to accept those surveys which have already been made as well as to accept any surveys which may be made in the future. I do not think the amendment requires any further explanation."

The motion was put and agreed to.

The Hon'ble BABU AMBIKA CHARAN MAZUMDAR moved that in the definition of the word "mauza" in sub-clause (*3*) of clause 2 of the Bill, after the words "declare to constitute a mauza," the following words and expression be added " and includes every kismut, village, hamlet or tola or other subdivision of a mauza by whatever name such sub-division may be known in any district."

He said:— "My object in moving this amendment is this: The word "mauza" has been sought to be satisfactorily defined by this Bill, and it is said that wherever there is any local area which is not yet known by the name of any mauza, the Collector may, with the sanction of the Board of Revenue, by general or special order, declare such area to constitute a mauza. It seems to me that the wording of the old Act was wider and simpler, namely, that the word 'mauza' includes 'every kismut, village, hamlet or tola or other sub-division of a mauza by whatever name such subdivision may be known in any district.' All that I wish is that in the definition which we have now got may be retained the words I have quoted so as to make it more comprehensive and useful so long as a particular area may not be declared by the Collector to be a mauza. That is my object, and I submit it would be more comprehensive and it would not be at all a disadvantage to have it."

The Hon'ble MR. HARE said:—"I must oppose this amendment. I think it proceeds from misunderstanding to some extent of our intention. It is suggested that in the definition of the word 'mauza' in sub-clause (3) of clause 2 of the Bill, after the words 'declare to constitute a mauza' the words 'and includes every kismut, village, hamlet or tola or other sub-division of a mauza by whatever name such sub-division may be known in any district' be added. The word 'include' may mean that everything which is situated on the block which is called a mauza is part of that mauza. If that is what is meant, no words are necessary to explain that meaning; but if, on the other hand, by 'includes' he means that a kismut, village, hamlet or tola is to be synonimous with mauza and express the same thing as mauza, surely that would be very inconvenient and it is not true. A mauza is a defined area laid down by a scientific survey or laid down arbitrarily where there has been no scientific survey, by the Collector, but it is in all cases absolutely definite, and I imagine that if a Collector were laying down boundaries of his own free will, he would make some sort of a record of what he did; but in the case of a kismut, village, hamlet or tola, the expression is very indefinite. If you ask people in a village, they will say it means these houses or blocks of houses; but as to how far the land outside those houses it includes no two persons would agree. To say that a person has got four annas in the land of a kismut when the outside area is not defined or not capable of being laid down scientifically, accurately or precisely is to record something extremely indefinite and of very little value to anybody. I therefore oppose this, because I consider in no case would the addition be at all useful or convenient."

The motion was then put and lost.

Clause 11.

The Hon'ble BABU AMBIKA CHARAN MAZUMDAR also moved that in clause 11 of the Bill, after the proviso, the following be added, namely :—

"*Explanation.*—The term 'fee-simple waste-land lot' means plots of land commonly known by that name in the Darjeeling district."

He said :—"That expression has been for the first time used in connection with the Land Registration Act. The Select Committee in declining to define it have said that the term 'fee-simple waste-land lot' denotes only certain plots of land chiefly in the Darjeeling district; and as they are generally known by this title, it is not necessary to insert any definition thereof. I think upon their statement I am entitled to ask the Council to accept my explanation"

The Hon'ble MR. HARE said :—"I am advised that the proposed amendment is unnecessary. The Select Committee considered it unnecessary to make any such explanation or addition to the Bill. The term 'fee-simple waste-land lot' is a term which is expressed upon the deeds, which convey these blocks of land to their holders. It is not expressed in other cases, and I do not think there will be any difficulty whatever in knowing what is intended by the term."

The motion was then put and lost.

Clause 12.

The Hon'ble BABU AMBIKA CHARAN MAZUMDAR also moved that clause 12 of the Bill be omitted.

He said :—"The last point to which I have an amendment to lay before the Council is as to clause 12 of the Bill. My submission is that this clause be omitted. It is intended by this clause to levy a fee of Rs. 2 upon applications for opening separate accounts. As a justification for this imposition it is urged that similar applications under the Revenue Act are also charged with a fee. In my humble opinion the argument should be reversed. It should not be used for adding another imposition, but, on the contrary, as there is no such fee charged in the case of opening out of separate accounts under the Land Registration Act, there ought to be none under the Bengal Land-revenue Sales Act. It is not suggested that a separate establishment is required for the purpose, and I do not understand why we should impose a tax upon such applications, however small it may be. I submit that land is very heavily taxed in this country. A man purchases a property and pays a heavy stamp duty; then when he gets his name registered he pays the usual court-fees and so forth It is not a small amount, and if at every step we tax the land, it would only increase the hardship and burden of landowners, however small each charge may be. I do not think therefore that we ought to impose this additional fee of Rs. 2."

The Hon'ble MR. HARE said :—"I ought to explain that the original amendment was intended to include certain separation of accounts which were not formerly included. I think there is no special reason why the separation of accounts made under the Bengal Land Revenue Sales Act should have been excluded. Fees were charged in the other two cases, where separations of account happened under the Land Registration Act. It seems desirable to keep all the separations of account on the same footing. We have considered this matter in the Select Committee, and we thought instead of the complicated calculations which had to be made in the case of a fee separation account under the Registration Act, it would be simpler to have a uniform fee of Rs. 2 in all cases. The fee does not seem very heavy. Nobody need apply for the separation of account if they do not wish to. It is intended for their benefit, and it does not seem unreasonable that they should pay for it. They have been paying this fee for the last 20 or 30 years. I think they might now pay in all cases uniformly, and that the fee is not an unreasonable one."

The motion was then put and lost.

The Hon'ble MR. HARE moved that the Bill, as settled in Council, be passed.

The motion was put and agreed to.

THE BENGAL DISORDERLY HOUSES BILL, 1905.

The Hon'ble MR GORDON moved that the Report of the Select Committee on the Bill to provide for the discontinuance of brothels and disorderly houses in certain localities in Bengal, be taken into consideration.

The motion was put and agreed to.

The Hon'ble MR. GORDON also moved that the clauses of the Bill be considered in the form recommended by the Select Committee.

Clause 2.

The Hon'ble BABU AMBIKA CHARAN MAZUMDAR moved that in sub-clause (*1*) (*a*) of clause 2 of the Bill, the words "or of any place of public worship" be introduced after the word "students."

He said:—"The amendment which I propose speaks for itself, and I do not think I need say much to commend it to the acceptance of the Hon'ble Members. Doubtless there are obvious difficulties in extending the provisions of this measure to fairs and markets, but it seems to me that there are at least as good grounds for safeguarding the places of public worship as the educational institutions, and I should ask the Council to accept this amendment with a view to protect churches, mosques and temples from all disturbances and annoyances of dirty environments."

The Hon'ble MR. GORDON said:—"The proposal of the Hon'ble Member is not a new one. When the provisions of the proposed Bill were circulated for criticism, a suggestion was received that they should be extended to all places of public resort, such as places of worship, bathing ghâts, reading-rooms, etc. It was, however, pointed out that this would practically amount to restricting prostitutes to certain defined quarters of the town, and all that I think necessary to say now is that to include places of public worship would be to extend the Act far beyond the limits originally contemplated by the framers of it, and to introduce into it a new principle which has neither been submitted for general criticism nor has been approved by His Excellency the Governor General in Council. All that at present we desire to do is to protect our students and soldiers from contamination, and our respectable citizens from annoyance, and the question of interfering with the liberty of the people in places of public resorts involves considerations of a far wider scope than can be dealt with in the present discussion. I must therefore oppose the amendment."

The motion was then put and lost.

The Hon'ble BABU JOGENDRA NATH MUKHERJEE moved that in sub-clause (*1*) (*a*) of clause 2 of the Bill, for the words "disorderly persons of any description" the words "dissolute and debauched persons," be substituted.

He said:—"I would invite the attention of the Hon'ble Members to the following facts in connection with the Bill as it now stands.

"The Bill does not lay down any procedure, or make any statement as to the manner in which a Magistrate taking action under its provisions is to satisfy himself. He may or may not record any evidence. He may or may not record even any proceeding. The only thing, or I might say two things, he need do in writing is to issue a summons and to pass the final order. There is no provision for an appeal from that order. In this state of things it is absolutely necessary that the aim and scope of the Bill should be clearly conceived by the Legislature and then expressed in language as clear as possible.

"I would submit to Hon'ble Members that so far as the main principle of the Bill is concerned and in so far as it aims at removing brothels and

drinking-houses, where persons of an objectionable character assemble from the neighbourhood of educational institutions, boarding-houses and the like, every one, I may presume, has the fullest sympathy with it, and I would venture to express my thankfulness to Your Honour's Government for having introduced the present Bill.

"But apart from the matter of removal of brothels and drinking-houses from a certain neighbourhood, has the Bill set before itself any other objective? That is a question which appears to me very much like a riddle. And the riddle seems to be contained in the words 'disorderly persons of any description.'

"What classes of persons are meant by those words? We have no means of discovering them, and the Report of the Select Committee tells us 'something must be left to the discretion and common sense of the Magistrate.'

"But I may say the Bill has not left 'something to the discretion and common sense of the Magistrate, but in fact everything.' If the words of the amendment I am going to propose be accepted, 'something' will necessarily be left to the Magistrate's discretion and common sense. It will tax his discretion to a degree in drawing the line between who may be classed as 'dissolute and debauched' and those just outside that limit, as it does in all cases when abstract principles have to be applied to concrete forms.

"Now, Sir, in the present instance the matter has been left in so much doubt and uncertainty that even District Magistrates and Divisional Commissioners have suggested that light may be thrown on it, so that they may know which way to proceed. These are the very persons who, I may say, will have to apply the law in practice.

"It seems to me that the words which are to be found in this Bill, are reproduced from section 43 of the Calcutta Police Act, but without the safeguards that are to be found in it. That section runs thus:—'On proof to the satisfaction of the Commissioner of Police or of a Magistrate, that a house is used as a common brothel, or lodging-house for prostitutes or disorderly persons of any description.' The important words 'on proof' to be found in the Police Act are wanting in this Bill. As I have already submitted, it is not indicated in what way the Magistrate is to satisfy himself. So that here we have an important measure and the very ground on which the Magistrate is to base his decision is not indicated. The words in the Police Act 'a house which is used as a lodging-house for disorderly persons of any description' have a more definite and specific meaning than the words which are used in the present Bill. In the present Bill these words have been used in a detached sort of way, and it would be a house that is used not as a lodging-house but a house that is used by disorderly persons of any description whatever. So that I may venture to point out that there is a vast difference between the words 'disorderly persons of any description whatever' to be found in section 43 of the Calcutta Police Act and the way in which the words have been introduced in the present Bill. In order to realise the meaning of this phrase and to ascertain the doubts it might give rise to, I have consulted the Century Dictionary, and instead of elucidating the matter it seems to me that the matter becomes worse and worse confounded by using them in that particular manner.

"Disorderly" is defined in the Century Dictionary as follows:—

'Lawless; violating or disposed to violate *law* and *good order*, or the restraints of morality: specifically, so conducted as to be a nuisance; *disreputable*: *as a "disorderly house."* In criminal law disorderly is a technical term which by statute covers a variety of offences '*against the public peace, order, morals, or safety*'.

"In using particular words in a Act we must take into consideration how the public will interpret them and how Magistrates who will have to apply the Act in practice would interpret them, because the only means by which they can discover the meaning of an Act is to consult the words themselves. If it is intended by this Act that only a certain class of persons should be prohibited from residing in a certain locality, let that be expressed in as clear terms as possible, and let it not give rise to complications hereafter, and those complications may be of a very serious character. As I have already submitted to

Hon'ble Members, there is no procedure laid down, there is no appeal, there is no record of evidence, and I would here point out that the Bar Association of Comilla suggested that, in the first place, a preliminary notice should issue to show cause why proceedings should not be taken against the person charged, then evidence recorded and then an order is finally passed and a right of appeal should be given. The Select Committee, however, have not taken the course suggested by them. The evident meaning is that the Select Committee did not like, at any rate, to make the matter more complex, but I venture to submit that if the procedure has been shortened, it is absolutely necessary that the aim and scope of the Bill should be defined in clearer terms than has been done. A strong body of opinion exists as to the particular phrase to be found in this Bill, and Divisional Commissioners and several District Magistrates have asked that the matter be placed beyond doubt by giving particulars. So that in the present state of things I would submit that it would be far better if the words contained in the amendment which stands in my name were adopted. The words are not mine, and, as it has been pointed out by the Bengal Landholders' Association, they were used by an eminent Judge of England, Justice Hawkins, in the Criminal Law Amendment Act, and that being the case they have a further recommendation than anything said by me to achieve. With these words I beg to place the amendment for consideration before the Council."

The Hon'ble BABU AMBIKA CHARAN MAZUMDAR said:—"I support the amendment of my hon'ble friend Babu Jogendra Nath Mukerjee. The expression 'disorderly persons of *any description*' is very vague and is so wide as almost to bear an appearance of suspicion. Supposing there is a Music Hall, or a Theatre, or a Temple where it is customary to have certain kinds of ceremonies performed almost every evening. It may be the opinion of some people that these are disorderly things. Is it or is it not the object of the Legislative to make their intention clear and intelligible? If it is, then, I submit, the words suggested by the amendment should be accepted, and I fully support the amendment of my friend that instead of the words 'by disorderly persons of any description' the words 'dissolute and debauched persons' be substituted."

The Hon'ble MR. CHAUDHURI said:—"I support the Hon'ble Babu Jogendra Nath Mukerjee so far as this amendment is concerned. I need only mention that there cannot be any doubt as to the meaning of the expression 'disorderly houses' as used in this Bill, because it comes after the expression 'brothels' and, therefore, it must be taken to belong to the same order as brothels. But still, as has been pointed out by my hon'ble friend, the expression 'dissolute and debauched' is an expression well known in English law, and it will help our Magistrates in the interpretation of the section if we substitute that expression for the one that now stands before the word 'person.' I therefore beg to support the amendment."

The Hon'ble MR. GORDON said:—"The Hon'ble Member who has brought forward this amendment has relieved me from a very considerable amount of responsibility, because he has contented himself with pointing out that certain Divisional Commissioners, Magistrates and others are not able to understand the meaning of the words 'disorderly persons of any description.' If he had gone further and pointed out what would have been a more intelligible expression, such as the Commissioners, Magistrates and others would have been able to understand, then he might have given us some assistance, but I shall proceed to show that the words 'dissolute and debauched' which he wishes to substitute are much more vague than the words we are using and which were taken from a series of English enactments extending over a very considerable period. He has told us that the words which he has quoted were used by the eminent Mr. Justice Hawkins in a speech upon the amendment of the Criminal Law. That may or may not be so. I am not aware of that. All I do know is that the words were suggested to us by the Bengal Landholders' Association, who said they took them from a book entitled 'Hawkins' Pleas of the Crown' published in the year 1824. It is not now very easily obtainable, and probably the Bengal Landholders' Association have never seen it.

"It is not clear why the substitution of the words 'dissolute and debauched persons' is desired. It is not suggested that they are to be found in any enactment recited in the book which I have mentioned or elsewhere. They are merely contained in some observations on the law relating to disorderly houses where the author points out that the object of the law is for the preservation of peace and for the prevention of dissolute and debauched persons gathering together to disturb it.

"The objection to the use of such words in an enactment of the Legislature may be briefly summed up as follows. The words 'dissolute' and 'debauched' are both of exceedingly vague signification, and it would be practically impossible for a Magistrate to hold that any particular person could be characterised as either the one or the other.

"On the other hand, disorder connotes definite conduct of which evidence can be offered in a Court of Law, and while no witness could testify to a person being dissolute or debauched except by inference, the proof of his having acted in a disorderly manner would be easy.

"That the word 'disorderly' comprises all that is meant by dissoluteness or debauchery is apparent from the definition to be found in another dictionary to which I have referred, where it will be seen that disorderly in a legal sense is 'offensive to good manners and public decency; notoriously offensive as a disorderly house.'

"The word 'dissolute, on the other hand' is defined as 'loose in morals and conduct; recklessly abandoned to sensual pleasures, profligate, wanton. lewd, debauched. The word 'debauched' is defined as dissolute and dissipated,

"It will thus be seen that while an author of a commentary on law may, for the purpose of illustration, use such words as dissolute, debauched, immoral, vicious, lewd, it by no means follows that he intends to suggest that they would be more appropriate in the text of an Act. I submit therefore that the present words are both in a legal as well as in a popular sense more suitable than those of the amendment."

The motion was then put and lost.

The Hon'ble BABU JOGENDRA NATH MUKHERJEE also moved that in sub-clause (*1*) (*a*) of clause 2 of the Bill, for the words "by disorderly persons of any description" the words "as a disorderly house," be substituted.

He said:—"So far as I can see there is some covert meaning in the words 'disorderly persons of any description.' There cannot be any possible objection to the alternative proposed by me. We have seen that Magistrates and Judges have interpreted the prefix in a way which is not commendable to the public. So here any Magistrate who may have some reason of his own may interpret the words 'disorderly persons of any description' as person who are not orderly. We have nothing to suggest that he is prevented from coming to that conclusion, otherwise why should there be a definition in the Statement of Objects and Reasons which is a Bill to provide for the discontinance of brothels and disorderly houses in certain localities in Bengal? But between the two I submit that the phrase 'disorderly house' has acquired a more specific sense than the phrase 'disorderly persons of any description,' and one Commissioner of a Division has actually suggested that the phrase 'disorderly house' be substituted, or rather it would be preferable to have those words in place of the words 'disorderly persons of any description.' So that if any Hon'ble Member thinks of opposing this amendment one would like to know what classes of persons are meant by 'disorderly persons of any description' beyond what can be conveyed by the phrase 'as a disorderly house.' There must be two answers: either there is a class of indeterminate persons who cannot be called up for the present before us, and whose position cannot be examined, or it must be said that we mean to say that any person who does not strictly come within the signification of the phrase 'disorderly house'; there are others, but who those others are we won't say. Surely that is not a very justifiable position. With these remarks I beg to place my amendment before the Council."

The Hon'ble MR. GORDON said:—"I have no particular objection to the amendment except that it seems to me to be entirely unnecessary. The words

which are used in the Act have been taken, as already quoted by the Hon'ble Member, from the Police Act, and it seems to me that they are more suitable than the words he proposes to use. I would prefer therefore to keep the words as they are."

The motion being put, the Council divided as follows:—

Ayes 5.	*Noes 12.*
The Hon'ble Babu Ambica Charan Mazumdar.	The Hon'ble Mr. Slacke.
The Hon'ble Mr. Chaudhuri.	The Hon'ble Mr. Gupta.
The Hon'ble Raja Ban Behari Kapur.	The Hon'ble Mr. O'Kinealy.
The Hon'ble Babu Jogendra Nath Mukerjee.	The Hon'ble Mr. Collin.
The Hon'ble Mr. Syed Shurfuddin.	The Hon'ble Mr. Carlyle.
	The Hon'ble Mr. Inglis.
	The Hon'ble Mr. Shirres.
	The Hon'ble Mr Gordon.
	The Hon'ble Mr. Alien.
	The Hon'ble Mr. Larmour.
	The Hon'ble Asif Kadr Saiyid Wasif Ali Mirza, of Murshidabad.
	The Hon'ble Mr. Nimmo.

So the amendment was lost.

The Hon'ble MR. GORDON moved that in sub-clause (1) of clause 2 of the Bill the words "or, if the Magistrate deems fit, to vacate such house," be omitted.

He said:—"These words were an addition introduced by the Select Committee, and involving as they did a question of principle were referred to the Government of India for approval. His Excellency the Governor General in Council considers that the provision is exceedingly drastic, and goes further than any enactment of which he is aware. He further points out that the consequences of such a provision do not seem to have been considered. There is no definite time stated during which the house is to remain vacant, and it is not clear that the position would be as between a lessor and a lessee, or whether new leases could be granted before such a prohibition was withdrawn. The Government of India consider that such a law might press hardly upon an innocent tenant, and suggest that it may be withdrawn. I beg therefore to move the withdrawal of the words above quoted."

The motion was put and agreed to.

The Hon'ble BABU AMBIKA CHARAN MAZUMDAR moved that the following proviso be added after proviso (*ii*) to sub-clause (*1*) of clause 2, namely:—

"or (*iii*) on the report of the Commissioners of the Municipality concerned"

He said:—"The next amendment which stands against my name refers to the proviso to clause (2) of the Bill. As a safeguard against all malicious and harassing prosecutions it has been very properly provided that no action shall be taken under this section except with the sanction of the District Magistrate, or on the complaint of three or more neighbouring residents. This is all very good, but any one conversant with these nuisances in a mufassal town must know that it may often be difficult to find three persons to complain against such nuisances, although there may be a couple of respectable neighbours who may be seriously suffering from them. To my mind there is a legally constituted agency which is directly interested in controlling these disorderly houses, and if the salutary provisions of the law are to have any effect they ought not to be ignored in the matter. This agency is the Municipal Corporation of each town. It is the Municipal Commissioners, more than any number of their ratepayers, that ought to be vested with the right of moving the legal machinery in such cases. Their initiation would carry with it the further guarantee that the prosecution has been maturally considered, and that it is not the outcome of malice or of any private grudge. Indeed I once thought of moving that the second proviso might be taken out, and the amend-

ment which I have to move be substituted in its place. But upon further consideration I have come to the conclusion that a second string is always very useful, so both the provisos might be retained."

The Hon'ble MR. CHAUDHURI said :—"I entirely support my hon'ble friend Babu Ambika Charan Mazumdar with regard to this amendment and I do not see what possible objection there can be to it. Since power is given to three respectable neighbours to complain, it is much safer to confer the same power on the Municipal Commissioners. When private individuals are agreed as to such nuisances, clause 2 (*1*) proviso (*ii*) will enable them to move the Magistrate with regard to the removal of such nuisances. Although the scope of the present Bill is limited to Municipal towns, yet power is taken under it by the Local Government to extend its operation to non-municipal areas. When this is done, action may have to be taken at the instance of three or more private individuals. But in municipal towns private individuals may not care to figure as complainants, but they will prefer immensely more to draw the attention of a Municipal Commissioner to the nuisance, and the latter may consult his colleagues and move in the matter in the official capacity. The Municipal Commissioners are also sure to inquire before taking action, and this would minimise the chances of frivolous applications. The amendment will thus safeguard public interests and at the same time the interests of private individuals. I therefore commend its acceptance by the Council."

The Hon'ble MR. GORDON said:—"There is no very serious objection to this amendment, though I have been unable to understand what the nature of the safeguard, of which the Hon'ble Member who has just sat down, has spoken. He says it would be far safer if the Commissioners of the Municipality are allowed to complain to the Magistrate and the Magistrate takes action under this Act. How that can safeguard the interests of anybody it is not very easy for me to understand.

"This amendment raises a new question which is practically one of procedure only. It is not very clear why the Commissioners of a municipality should wish to take action against the occupiers of any particular house unless there was some complaint by the persons resident in the locality or if they wish to object on the ground that the house is a danger to the educational institutions or cantonment why they cannot apply for the sanction of the District Magistrate. The amendment seems to me to be superfluous and I must therefore oppose it."

The Hon'ble BABU AMBIKA CHARAN MAZUMDAR said:—"With Your Honour's permission I beg to say a few words in reply. I do not understand what possible objection there can be in accepting this amendment. The Hon'ble Member in charge of this Bill says he has no particular objection, but he thinks it is not necessary and he fails to understand how the proposed amendment could safeguard the interest of anybody. May I ask why it has been thought necessary to provide for the sanction of the Magistrate or to invite three of the ratepayers of the Municipality to complain? They may not be even ratepayers. It is obviously intended to safeguard against malicious prosecutions, and therefore there are two things provided, namely, that a prosecution should be instituted only with the permission of the Magistrate or upon the complaint of at least three individuals. That gives some guarantee, but I say let us have a much better guarantee. Why three persons only, let us have the Municipality itself to complain in such cases. Private persons may have private reasons for lodging or withholding a complaint which would not exist in the case of Municipal Commissioners. If there is no safeguard in giving the power to the Municipal Commissioners, there is absolutely none in giving it to three private individuals. I think this amendment ought to be accepted, not simply in the interests of the prosecution itself, but also to ensure the proper working of the Act, otherwise the law may remain a dead letter. I hope the Council will see its way to accept the amendment."

The motion being put, the Council divides as follows:—

Ayes 13.	*Noes 4.*
The Hon'ble Mr. Slacke.	The Hon'ble Mr. O'Kinealy.
The Hon'ble Mr. Gupta.	The Hon'ble Mr. Inglis.
The Hon'ble Mr. Collin.	The Hon'ble Mr. Shirres.
The Hon'ble Mr. Carlyle.	The Hon'ble Mr. Gordon.
The Hon'ble Mr Allen	
The Hon'ble Mr. Larmour.	
The Hon'ble Babu Ambika Charan Mazumdar.	
The Hon'ble Mr. Chaudhuri.	
The Hon'ble Asif Kadr Saiyid Wasif Ali Mirza, of Murshidabad.	
The Hon'ble Raja Ban Behari Kapur.	
The Hon'ble Babu Jogendra Nath Mukherjee.	
The Hon'ble Mr. Nimmo.	
The Hon'ble Mr. Syed Shurfuddin.	

So the amendment was carried.

The Hon'ble BABU JOGENDRA NATH MUKHERJEE moved that after proviso (*ii*) to sub-clause (*1*) of clause 2 of the Bill, the following clause be added, namely:—

"Where the owner of such house does not reside on the premises thereof, the summons on him as hereinbefore prescribed shall direct him to appear in person or by agent."

He said:—"I am not certain that I have expressed very clearly what I mean, and with Your Honour's permission I would prefer to alter my amendment as follows:—

'Where the owner of such house does not reside on the premises thereof, the summons on him as hereinbefore prescribed shall give him the option of appearing in person or by agent.' What I wish to make quite clear is that in the summons an option shall be given to the persons summoned to appear either in person or by agent. This I beg to submit does not introduce any novelty in the Act itself, and where there is an absent landlord who does not know anything about the house, as was pointed out by the Bihar Landholders' Association in the case of the Maharaja of Tikari, who was summoned to appear in person, it is desirable that there should be a provision in the Bill to that effect. It makes it much safer and does not take away anything from the value of the Act itself. I need not say anything more in support of the amendment."

The Hon'ble MR. GORDON said:—"With regard to this amendment all that it seems necessary to say is that the section follows the procedure laid down in section 204 of the Criminal Procedure Code. That section provides for the issue of summons for the attendance of the accused. Section 205, however, provides that in all cases when a Magistrate issues a summons, he may, if he sees reason so to do, dispense with the personal attendance of the accused and permit him to appear by his pleader. I think it may be said to have been taken for granted by the framers of this Bill that the Magistrate would, in the case of all persons concerned, whether owners, tenants, managers or occupiers, allow them to appear by pleader or agent. It seems to me that in a case of this description it is not so much the personal attendance of the person against whom the information has been laid that is required as the appearance of some one who can show cause why an order should not be made. I am willing to accept the amendment as it stands or add the words 'either in person or by agent' after the words 'appear before him' in the original clause."

The Hon'ble BABU JOGENDRA NATH MUKHERJEE said:—"I have no objection to the amendment proposed by the Hon'ble Member, namely, 'in person or by agent,' but what led me to suggest the amendment was the following passage in the report of the Select Committee:—

"We have discussed the objections put forward by the Bihar Landholders' Association and others to the inclusion in the Bill of 'owners' among those

made liable to be summoned. While fully realizing that in some cases the owner of a house used as a brothel may be totally ignorant of such use, still we cannot lose sight of the fact that in a great many cases the owners are not only cognisant of that use, but intentionally let their houses to prostitutes as a means of profit to themselves. We therefore do not deem it advisable to omit owners' from the category of persons responsible."

"I thought therefore it would be far better if in the case of owners who do not reside on the premises the summons should give them the option of appearing either by an agent or a pleader. But if we are going to extend this to other classes of persons also, it is just as well that it should be so."

The Hon'ble MR. GUPTA said:—"I think it would be better to have the amendment 'in person or by agent' after the words 'appear before him.' A man is not going to be punished even in the case of an offence. The Criminal Procedure Code gives the Magistrate a discretion to allow an accused person to appear in person or by agent. The object of this amendment is to give the accused person the option of appearing in person or by agent, and I think we may give that option in all cases where a summons is served under this Act."

The motion was then put in the amended form and carried.

The Hon'ble MR. GORDON moved that in sub-clause (*2*) of clause 2 of the Bill the words "or remains unvacated, as the case may be," be omitted.

He said:—"As we omitted the words 'or if the Magistrate deems fit to vacate such house' at the end of sub-clause (*1*) of clause 2 of the Bill it is necessary that the words 'or remains unvacated, as the case may be' in sub-clause (*2*) of clause 2 of the Bill should be also omitted.

The motion was put and agreed to.

The Hon'ble MR. GORDON also moved that the Bill, as settled in Council, be passed.

The motion was put and agreed to.

The Council was then adjourned to Saturday, the 24th March 1906.

CALCUTTA,
The 13th March, 1906.

L. C. ADAMI,
Offg. Secretary to the Bengal Council.

APPENDIX TO

The Calcutta Gazette.

WEDNESDAY, MARCH 14, 1906.

NOTICES TO MARINERS.

THE following Notices are published for general information.

W. A. INGLIS,
Secretary, Marine Department.

CALCUTTA, *the 9th March 1906.*

BAY OF BENGAL—BURMA COAST.

Rangoon river—Lower Hastings black buoy in a sinking condition.

No. 90 (first publication).—The Bombay Government has given notice (No. 19 of 1906) that the Lower Hastings black buoy is in a sinking condition, and will be replaced as early as possible.

This Notice affects Admiralty Chart No. 833, Rangoon River and approaches (plan, Port of Rangoon); also Bay of Bengal Pilot, 3rd edition, 1901, page 353.

BAY OF BENGAL—BURMA COAST.

Rangoon river—Spit Light-vessel replaced.

No. 91 (first publication).—The Bombay Government has given notice (No. 20 of 1906) that the Spit Light-vessel will be brought up to town on the 7th or 8th instant, and the Light-vessel *Martaban* put approximately in the place of the Spit Light-vessel as on former occasions, *i.e.*, the line of the two lights in one will be on the same bearing as before. The temporary light consists of two mast-head lights back to back.

This Notice affects the Admiralty Chart Nos. 833, Koronge Island to White Point, 833, Rangoon river and approaches, and Bay of Bengal Pilot, 3rd edition, 1901, page 348; also List of Lights, part VI, 1905, No. 369.

INDIA, WEST—Sind coast.

A derelict off Kori creek.

No. 92 (first publication).—The Bombay Government has given notice (No. 23 of 1906) that the Commander of S.S. *Lama* reports that he passed a bugalow floating on her side yesterday at 0-20 P.M. (Standard time), with no one on board of her, off Kori creek in latitude 23° 20′ 45″ N., longitude 68° 3′ E., tide half flood.

This affects Admiralty Charts Nos. 826, Karachi to Vengurla, 42, Coasts of Sind and Kutch, and 118, Kediwari Mouth to Nirani Creek; also West Coast of Hindustan Pilot, 4th edition, 1898, page 297.

AFRICA, NORTH-EAST—Red Sea, Western shore.

Shab Shanks—Feux Eclaires light established.

No. 93 (first publication).—With reference to Notice to Mariners No. 149, dated 7th May 1904, issued by this office, the Bombay Government has given notice (No. 24 of 1906) that the new light Feux Eclaires will be exhibited on the extremity of the Shab Shank reef from the 15th February 1906, and will be visible, in clear weather, for a distance of 18 miles.

Approximate position :—Latitude 14° 40′ N.; longitude 41° 06′ E.

This Notice affects the following Admiralty Charts :—Red Sea, Sheets IV and V, Nos. 8d and 8e, Jebel Tier to Perim Island, No. 143; also Admiralty List of Lights, Part VI, 1906, page 23, No. 152; also Red Sea and Gulf of Aden Pilot, fifth edition, 1900, page 197, and Supplement 1904, page 20.

AUSTRALIA, SOUTH—Gulf of St. Vincent.

Entrance to Port Wakefield—White and red lights placed.

No. 94 (first publication).—The President, Marine Board, Port Adelade, has given notice (No. 2 of 1906) that a White light, eight feet high, has been fixed on the south end of the wharf; also a red light, twenty feet high, has been placed on the wharf 360 feet north of the white light.

The above lights in line lead up to the outer red beacon, but do not show Mid Channel inside of that.

This affects Admiralty Chart No. 2389b and plan No. 2152.

CEYLON COAST—Colombo harbour.

Caution—A rocky ridge on the northern approaches.

No. 79 (second publication).—The Master Attendant, Colombo, has given notice of the existence of a rocky ridge in the northern approaches of Colombo harbour with a least depth of 21 feet over it. A buoy has been placed N. 14° W. two miles from head of south-west breakwater. Mariners are accordingly warned.

AFRICA, SOUTH—Cape Colony.

Whale rock—Bell buoy withdrawn.

No. 80 (second publication).—With reference to Notice to Mariners No. 227, dated 27th June 1903, issued by this office, the British Admiralty has given further notice (No. 97 of 1906) that the bell buoy formerly marking Whale rock, and situated in a position from which Robben island lighthouse bore N. 37° E., distant 1¼ miles, has been withdrawn.

Approximate position, lat. 33° 50′ S., long. 18° 22¼′ E.

(Variation 29° Westerly in 1905.)

This Notice affects the following Admiralty Charts :—Table bay to Cape Agulhas, No. 2082; Table bay to Donkin bay, No. 2091; Cape of Good Hope and False bay, No. 656; Table bay, No. 1920: Also, Africa Pilot, part II, 1901, page 324; Supplement, 1905, page 19, and part III, 1897, page 55.

PACIFIC OCEAN—THE PHILIPPINE ISLANDS—MINDORO STRAIT.

Apo island light—Alteration in—.

No. 81 (second publication).—With reference to Notice to Mariners No. 362, dated 20th October 1904, issued by this office, the British Admiralty has given further notice (No. 105 of 1906) that, on or about 20th December 1905, the character of the light on Apo island, Mindoro strait, would be altered from white fixed to a *group flashing* light about *every ten seconds*, thus:—*white* flash, eclipse *five seconds; red* flash, eclipse *five seconds;* it would be elevated 123 feet above high water, and visible in clear weather from a distance of 15 miles, the light being of the 3rd order. The exact time occupied by the flashes and eclipses is not stated.

Approximate position, lat. 12° 40′ N., long. 120° 24′ E.

This Notice affects the following Admiralty Charts:—Molucca passage to Manila, No. 943; China sea, No. 2661b; St. Bernardino and Mindoro straits, No. 2577: Also, List of Lights, part VI, 1905, No. 621a; China Sea Directory, vol. II, 1899, page 297; and Eastern Archipelago, part I, 1902, page 77.

CHINA, NORTH—MANCHURIA—PECHILI STRAIT—KWANG TUNG PENINSULA.

Ta lien hwan—Mines removed in approach.

No. 82 (second publication).—With reference to Notice to Mariners No. 151, dated 8th May 1905, issued by this office, the British Admiralty has given further notice (No. 106 of 1906) that the mines in the approach to Ta lien hwan have been cleared away, and that the Kwang tung peninsula may now be approached on the southern side, eastward of a line joining South Entry point and Cap island, and running in a S. 61° W. direction for a distance of 10 miles from Cap island, with reasonable security.

Approximate position, Cap island, lat. 38° 47¼ N., long. 121° 36½ E.

The cautionary note respecting mines will, however, be retained on the Charts until it is known that the whole of the coast in this locality is free from these dangers.

(*Variation 3° Westerly in 1906.*)

This Notice affects the following Admiralty Charts:—Gulfs of Pechili and Liau tung, No. 1256; Kwang tung peninsula, No. 1798: Also, China Sea Directory, vol. III, 1904, pages 585, 589, 633, 634.

PACIFIC OCEAN—THE PHILIPPINE ISLANDS—LUZON—SAN BERNARDINO STRAIT—TEKLNI STRAIT.

Cabezas shoal—Amended position.

No. 83 (second publication).—With reference to Notice to Mariners No. 194, dated 20th October 1894, issued by this Office, the British Admiralty has given further notice (No. 111 of 1906) that Cabezas shoal, with a depth of one fathom over it is situated at a distance of 13 cables No. 20° W., and not one-third of a mile N. 20° W. from Kalantas bank as reviously stated. It is a shoal head on Hamorsuan bank.

Approximate position, lat. 12° 31¾′ N., long. 124° 4′ E.

(*Variation Nil in 1906.*)

This Notice affects the following Admiralty Charts:—San Bernardino and Mindoro straits' No. 2577; San Bernardino strait, No. 3370; plan of Matnog bay on Chart No. 3475; Also Eastern Archipelago, Part I, 1902, page 349.

EASTERN ARCHIPELAGO—MALACCA STRAIT—PULO PENANG.

Pulo Rimau light—Character altered.

No. 84 (second publication).—The British Admiralty has given notice (No. 112 of 1906) that on 15th January 1906, the character of Pulo Rimau light would be altered from fixed to a *red occulting* light *every twenty seconds*, thus:—light, *seventeen and a half seconds;* eclipse, *two and a half seconds;* it would be elevated 129 feet above high water, visible in clear weather from a distance of about 13 miles, and shown from an iron tower, 57 feet high.

erected on a masonry base, situated on the eastern side of the island at a distance of 1¾ cables N. 12° E. from its southern point.

The light is of the 3rd order.

Approximate position, lat. 5° 14′ N., long. 100° 16½′ E.

(*Variation 2° Easterly in 1906.*)

This Notice affects the following Admiralty Charts :—Acheh head to Tyingkok bay, No. 2760 ; Rutang group to Pulo Berhala, No. 791; Penang Harbour, No. 1366; Malacca strait, No. 1355: Also, List of Lights, part VI, 1906, No. 408; and China Sea Directory, Vol. I, 1896, page 147.

JAPAN—Honshu, north-west coast—Wakara bay.

Tsunegami saki—Rock awash of Chi shima—Amended height.

No. 85 (second publication).—The British Admiralty has given notice (No. 113 of 1906) of the existence of a rock awash, situated at a distance of about 3½ cables S. 55° W. from the extremity of Tsunegami zaki.

Approximate position, lat. 35° 38½′ N., long. 135° 48½′ E.

Also, that the height of Chi shima, situated 2¾ miles S. 30° W. from Tsunegami zaki, is 103 feet, and not 38 feet above high water as at present shown on the Charts.

(*Variation 5° Westerly in 1906.*)

This Notice affects the following Admiralty Charts :—Aburatani bay to Ando zaki, No. 1495 ; Amarube zaki to Ando zaki, No. 2174 : Also, Sailing Directions for Japan, etc., 1904, page 650.

JAPAN—Naikai—Bingo nada.

Sanagi shima—Wreck to the southward.

No. 86 (second publication).—The British Admiralty has given notice (No. 114 of 1906) that the wreck of a sailing vessel, with a mast showing 6 feet above high water, is reported to be sunk in Bingo nada, in a position from which Sanagi shima summit (812 feet) bears N. 33° E, distant 1$\frac{6}{10}$ miles, and Mushima summit S. 83° W.

Approximate position, lat. 34° 19′ N., long. 133° 36½′ E.

(*Variation 4° Westerly in 1906.*)

This Notice affects the following Admiralty Charts :—Naikai, No. 2875; Bingo nada to Ozuchi shima, No. 128 : Also, Sailing Directions for Japan, etc., 1904, page 450.

CHINA, EAST COAST—Port Shelter.

Rocks.

No. 87 (second publication).—The British Admiralty has given notice of the existence of the undermentioned rocks in port Shelter, in the following positions :—

(*a*) A rock, with a depth of 3 fathoms over it at low-water springs, situated in a position from which the north-western point of Shelter island bears N. 66° E., distant 4 cables, and the southern extremity of the same island S. 56° E.

Approximate position, lat. 22° 20′ N., long. 114° 17¼′ E.

(*b*) A rock, with a depth of 3¾ fathoms over it at low-water springs, situated in a position from which the north-western point of Shelter island bears N. 20° E., distant 4½ cables, and the southern extremity of the same island S. 68° E.

(*c*) A rock, with a depth of 2½ fathoms over it at low-water springs, situated in a position from which the eastern summit of Sharp island bears S. 24° W., distant 2$\frac{3}{10}$ cables, and Keui island summit (725 feet) S. 31° E.

(*d*) A rock, with a depth of $1\frac{3}{4}$ fathoms over it at low-water springs, situated in a position from which the northernmost summit of Sharp island bears S. 7° W., distant $3\frac{3}{10}$ cables, and the northern extremity of Nga ju tau N. 82° W.

Approximate position, lat. 22° 23′ N. long. 114° 17½′ E.

(*e*) The channel between Peaked rock and Jin island is foul.

Approximate position, Peaked rock, lat. 22° 19¾ N., long. 114° 19½′ E.

(*Variation Nil in 1906.*)

This Notice affects the following Admiralty Charts :—Approaches to Hongkong, No. 1180; Mirs bay, No. 1964 : Also, China Sea Directory, Vol. III, 1904, page 128.

CHINA SEA—Banka strait.

Amelia bank—Light buoy established. Banju Asin river.—Buoy replaced by light buoy.

No. 88 (second publication).—With reference to Notice to Mariners No. 468, dated 30th November 1905, issued by this office, the British Admiralty has given further notice (No. 117 of 1906) that a light buoy, painted in red and black horizontal bands, and exhibiting a *white occulting* light *every twenty seconds* (light, *ten seconds;* eclipse, *ten seconds*), has been established near the south-eastern edge of Amelia bank, Banka strait, in approximately lat 2° 13¾′ S., long. 105° 17′ E.

Also, that the black can buoy formerly situated 1¼ miles north-eastward from Tanjong Sereh, Banju Asin river, has been replaced by a light buoy, painted black, from which a *white occulting* light *every twenty seconds* (light, *ten seconds;* eclipse, *ten seconds*) is exhibited.

Approximate position, lat. 2° 22′ 25″ S., long. 104° 45′ 10″ E.

This Notice affects the following Admiralty Charts :—Banka strait to Singapore, No. 2757; Gaspar and Banka straits, No. 2149; Banka strait, Nos. 2597 and 3471 : Also, China Sea Directory, vol. I, 1898, pages 413, 400; and Supplement, 1899, page 35.

INDIA, WEST—Sind coast.

Karachi harbour—Light buoy established.

No. 89 (second publication).—The British Admiralty has given notice (No. 118 of 1906) that a light buoy, painted red, exhibiting a *red fixed* light, has been established to mark the 20-foot patch in Karachi harbour; it is moored in a position from which Manora point light-house bears S. 85° W., distant $3\frac{3}{10}$ cables, and the breakwater light S. 8° W.

Approximate position, lat. 24° 47¾′ N., long. 66° 59′ E.

(*Variation 1° Easterly in 1906.*)

This Notice affects the following Admiralty Chart :—Karachi harbour, No. 40 : Also, Hindustan Pilot, 1898, page 304; and Supplement, 1903, page 19.

INDIA, WEST—Bombay coast.

Port of Aguada—Light to be fixed.

No. 72 (third publication).—The Bombay Government has given notice (No. 16 of 1906) that information, dated 22nd January 1906, has been received from the Captain of the Port, Aguada, through the Consul-General for Portugal in British India, Bombay, that from the 10th February 1906 Aguada light will be fixed until further notice.

This Notice affects the following Admiralty Charts :—No. 827, Vengurla to Cape Comorin; No. 2737, Vizadrug to Cochin; No. 740, Achra river to Cape Ramas; No. 492, Aguada to St. George Islands, including Marmugoa and Goa roadstead, and West Coast of Hindustan Pilot, 4th edition, 1898, page 164; also list of Light-houses and Light-vessels in British India, page 28, No. 257.

ARABIA, NORTH-EAST COAST—Persian gulf.

Rennie Shoal—Depth of water.

No. 73 (third publication).—The Bombay Government has given notice (No. 18 of 1906) that the Commander of the B. I. S. N. Co.'s S.S. *Waroonga* reports that on her recent voyage from Koweit to Bahrein the vessel grounded on the shoal which was reported by

H. M. S. *Sphinx* in 1897, bearing S. ½ W. 2¾ miles from Rennie Shoal and to have a depth of 19 feet.

It appears that there is less water on this shoal than previously reported, as the S.S. *Waroonga* was only drawing 15′ 6″ at the time of her grounding.

This Notice affects Admiralty Chart No. 2837C, Persian Gulf, Western Sheet, and Persian Gulf Pilot, 4th edition, 1898, page 137.

CHINA, EAST COAST—YANG TSE KIANG.

Kiu Toan beacon—Position altered.

No. 74 (third publication).—The British Admiralty has given notice (No. 88 of 1906) that in consequence of the washing away of the banks, Kiu Toan beacon has been moved for a distance of 5$\frac{4}{10}$ cables S. 87° W. from its former position.

Approximate position, lat. 31° 15¾′ N., long. 121° 43′ E.

(Variation 2° Westerly in 1906.)

This Notice affects the following Admiralty Charts :—Kueshan islands to Yang tse Kiang, No. 1199; approaches to the Yang tse Kiang, No. 1602: Also, China Sea Directory, vol. III, 1904, page 407.

INDIAN OCEAN—MADAGASCAR, EAST COAST.

Cape East—Experimental light exhibited.

No. 75 (third publication).—The British Admiralty has given notice (No. 89 of 1906) that a *white group flashing* light, showing groups of two flashes at an elevation of 236 feet above high water, and visible in clear weather from a distance of 21 miles, has been experimentally exhibited from a lighthouse erected on Ambohitsara hill, about 1½ cables from the coast and at a distance of about one mile southward from the exremity of cape East ; it has been placed on the Chart in approximately lat. 15° 15′ 30″ S., long. 50° 29′ 15″ E.

This Notice affects the following Admiralty Charts :—Indian ocean, Nos. 748a, b; Chagos archipelago to Madagascar, No. 2899; Delagoa bay to Guardafui, No. 597; St. Andrew to Antongil bay, No. 758: Also, List of Lights, Part VI, 1905, page 17; and islands in the Southern Indian Ocean, 1904, page 79.

EASTERN ARCHIPELAGO—CELEBES, NORTH COAST, KWANDANG BAY.

Antoinette reef—Beacon re-erected.

No. 76 (third publication).—With reference to Notice to Mariners No. 154, dated 14th May 1904, issued by this Office, the British Admiralty has given further notice (No. 91 of 1906) that a pile beacon with conical top mark has again been erected on Antoinette reef, in Kwandang bay.

Approximate position, lat. 0° 56½′ N., long. 122° 55′ E.

This Notice affects the following Admiralty Charts :—Penang to Pulo Motuo, No. 3195: Also, Eastern Archipelago, Part II, 1904, page 395.

EASTERN ARCHIPELAGO—SUMATRA WEST COAST—KONINGINNE BAY APPROACH.

Pulo Pisang light—Intended alteration in character.

No. 77 (third publication).—The British Admiralty has given notice (No. 92 of 1906) that it is intended to alter the character of Pulo Pisang light from fixed to *occulting every twelve seconds*, thus :—light, *six seconds;* eclipse, *six seconds;* the light being produced by acetylene gas.

Approximate position, lat. 1° 0′ S., long. 100° 20′ E.

Further notice will be given when received.

This Notice affects the following Admiralty Charts :—Acheh head to Tyingkok, No. 2760; Ujong Masang to Ujong Indrapura, No. 709; Koninginne bay, No. 212 : Also, List of Lights, Part VI, 1905, No. 457; China Sea Directory, vol. I, 1896, page 299; and Supplement, 1899, page 26.

JAPAN, WEST COAST—SIMONOSEKI STRAIT.

Wreck in western entrance.

No. 78 (third publication).—The British Admiralty has given notice (No. 94 of 1906) that the wreck of a steamship, with masts 9 to 20 feet above water, lies sunk in the western entrance to Simonoseki strait, in a position from which Wakura jima summit bears N. 59° W., distant 4$\frac{1}{10}$ cables, and Mutsure jima light N. 11° E.

Approximate position, lat. 33° 57$\frac{1}{2}$′ N., long. 130° 51$\frac{1}{2}$′ E.

(*Variation 4° Westerly in 1906.*)

This Notice affects the following Admiralty Charts :—Simonoseki strait, Nos. 532, 1578 : Also, Sailing Directions for Japan, &c., 1904, page 514.

E. J. BEAUMONT, COMDR., R.I.M.,
Port Officer of Calcutta.

Indian-corn	15	0	

Ranchi.—Rainfall at Sadar nil. Weather seasonable. Ploughing of lands continues. State of standing crops fair. Cattle-disease reported from two thanas. Fodder and water sufficient. Common rice sells at Sadar at 11¼ seers per rupee.

Palamau.—No rain. Weather fair. *Rabi* crops being reaped in places. Fodder and water sufficient. A few cases of cattle-disease reported. Common rice sells at 9 seers and 9 chitaks per rupee at Sadar.

Manbhum.—Rainfall nil. Weather seasonable. Prospects of crops good. Fodder and water sufficient. Cattle-disease reported from Purulia thana. Common rice sells as follows :—

	Srs.	ch.	
Sadar	12	0	per rupee.
Gobindpur	10	0	

Singhbhum.—Rainfall nil. Prospects of crops fair. Outturn of *rabi* crops is estimated at 80 per cent. Fodder and water sufficient. Cattle-disease reported from thana Ghatsila. Common rice sells at 12½ seers per rupee.

General Summary.—In the week under report the Province was almost free from rain; light showers are reported from Monghyr and Bhagalpur only. Sugarcane pressing and harvesting of oilseeds are approaching completion. The condition of the *rabi* crops is generally good in Bihar, though they have suffered in places from the recent rain. Cattle-disease continues in eight districts. Fodder and water are generally sufficient. The price of common rice has risen in seven and has fallen in four districts. It continues high in most of the districts of the Presidency Division and also in Hooghly, Howrah, Muzaffarpur, Monghyr and Purnea.

C. E. A. W. OLDHAM,

Officer on special duty in connection with the Agricultural Department, Bengal.

DEPT. OF AGRICULTURE, BENGAL,

The 6th March 1906.

Jessore.—Rainfall nil. Character of the weather seasonable. Prospects of standing crops favourable. Fodder and water sufficient. Condition of cattle generally good. Common rice sells as follows:—

	Srs. ch.	
Sadar	9 0	per rupee.
Bangaon	8 14	
Narail	8 14	
Magura	9 0	
Jhenida	8 8	

Khulna.—Rainfall nil. Weather a little cloudy. Lands are being prepared for jute. Outturn of winter rice and rape and mustard is estimated at 78 and 83 per cent. respectively. No cattle-disease. Fodder and water sufficient. Common rice sells as follows:—

	Srs. ch.	
Sadar	9 0	per rupee.
Bagerhat	9 0	
Satkhira	9 8	

Patna.—Rainfall at Sadar 0·23. Weather seasonable. Harvesting of *rabi* continues. Lancing of poppy in progress. No cattle-disease. Fodder and water for cattle sufficient. Average price of common rice is as follows:—

	Srs. ch.	
Sadar	12 0	per rupee.
Bihar	11 8	

Gaya.—Rainfall at Sadar 0·20. Weather seasonable; occasionally cloudy. Pressing of sugarcane and lancing of poppy continue. Harvesting of *rabi* crops going on. Planting of sugarcane commenced. Fodder and water ample. Average price of common rice is 11¼ seers a rupee.

Shahabad.—Rainfall at Buxar 0·07, Dehri 0·08, Arrah 0·30. Harvesting of *rabi* and lancing of poppy going on. No cattle-disease. Fodder and water sufficient. Common rice sells at 12 seers a rupee.

Saran.—Rainfall at Sadar 0·11, Siwan 0·13, Gopalganj 0·06. Weather cloudy with cold nights. Harvesting of *rabi* crops commenced. Planting and pressing of sugarcane going on. Prospects of crops good. No cattle-disease. Fodder and water sufficient. Common rice and maize sell at 11 and 13 seers a rupee, respectively, at Sadar.

Champaran.—No rain. Prospects of standing crops good. Harvesting of oilseeds and collection of opium going on. Lands are being prepared for *bhadoi* paddy. No cattle-disease. Fodder and water sufficient. Common rice and maize sell at 11⅛ and 12¾ seers a rupee, respectively.

Muzaffarpur.—Rainfall at Sadar 0·09, Hajipur 0·06, Sitamarhi 0·05. Prospects of crops good. Harvesting of *rabi* begun at some places. No cattle-disease reported. Fodder and water sufficient. Common rice and maize sell at 10 and 12 seers a rupee, respectively, at Sadar.

Darbhanga.—Rainfall at Sadar 0·04, Madhubani nil, Samastipur 0·09. Weather seasonable. Prospects of standing crops good. Harvesting of oilseed crops in progress. Fodder and water sufficient. No cattle-disease reported. Common rice sells as follows:—

	Srs. ch.	
Sadar	11 0	per rupee.
Samastipur	11 0	
Madhubani	11 0	

Monghyr.—Rainfall at Sadar 0·07, Begusarai 0·05, Jamui 0·22. Weather seasonable. Pressing of sugarcane continues. Lancing of poppy going on. Prospect of *rabi* crops not well. Fodder and water sufficient. No cattle-disease. Common rice sells as follows:—

	Srs.	ch.	
Sadar	10	0	per rupee.
Begusarai	10	0	
Jamui	10	0	

Bhagalpur.—Rainfall at Sadar 0·20, Banka 0·34, Madhipura and Supaul nil. Weather seasonable. Prospect of *rabi* favourable. Fodder and water sufficient. No cattle-disease reported. Common rice sells as follows:—

	Srs.	ch.	
Sadar	10	12	per rupee.
Banka	11	4	
Madhipura	12	0	
Supaul	12	0	

Purnea.—Slight rainfall with hail at Kishanganj and Araria. Lands are being prepared for *bhadoi* crops. Standing crops doing well. No cattle-disease. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	9	0	per rupee.
Kishanganj	8	8	
Araria	9	8	

Darjeeling.—Rainfall at Sadar 0·18. Weather seasonable. Hills—Wheat, barley and mustard in fair state. Terai—Ploughing for jute and *bhadoi* paddy continues. Tobacco doing well. Coarse rice sells as follows:—

	Srs.	ch.	
Hills	7	8	per rupee.
Terai	8	0	

Maize sells at 9 seers a rupee at Darjeeling and at 11 seers at Kalimpong.

Sonthal Parganas.—Rainfall at Sadar 0·25, Deoghur 0·38, Godda 1·05, Jamtara 0·01, Pakour 0·25, Rajmahal 0·28. Weather seasonable. Sugarcane pressing still continues at Sadar. Prospect of *rabi* fair. Fodder and water sufficient. Common rice sells at 10 seers a rupee at Sadar.

Cuttack.—Rainfall nil. *Dalua* flowering; cotton, tobacco, *mung* and sugarcane growing. Condition of cattle generally good. Fodder and water sufficient. Common rice sells at 12 seers and 7 chitaks per rupee.

Balasore.—Rainfall at Sadar nil. Threshing of *saradh* and pressing of sugarcane continue. Sporadic cases of cattle-disease reported from Bhadrak. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	13	0	per rupee.
Bhadrak	14	0	

Angul.—Rainfall nil. Weather seasonable. Paddy-fields being ploughed. Planting of sugarcane is in progress. Fodder and water available. Common rice sells as follows:—

	Srs.	ch.	
Sadar	13	0	per rupee.
Khondmals	12	0	

Puri.—Rainfall at Sadar and Khurda nil. Weather seasonable. *Dalua* getting on well. *Mung* flowering. Sugarcane being crushed. Cotton thriving well. Land being ploughed for the ensuing *saradh* paddy. Miscellaneous crops doing well. Common rice sells at 13 seers and 2 chitaks per rupee.

Sambalpur.—No rain. Weather warm. Fields are being ploughed for sugarcane plantation. Cattle in healthy condition. Fodder and water sufficient. Common rice sells as follows :—

	Srs.	ch.	
Sambalpur	14	0	per rupee.
Bargarh	15	12	

Hazaribagh.—Rainfall at Sadar 0·09. Fodder and water sufficient. Common rice sells at 11 seers per rupee, *marua* at 20 seers and Indian-corn at 15 seers.

Ranchi.—Rainfall at Sadar 0 31. Weather little cloudy. Ploughing continues. State of *rabi* crops not favourable in the Gumla subdivision. Cattle-disease reported from several thanas. Fodder and water sufficient. Common rice sells as follows :—

	Srs.	ch.	
Sadar	11	8	per rupee.
Khunti	13	0	
Gumla	14	0	

Palamau.—No rain. Weather seasonable. Harvesting of *rabi* commenced. A few cases of cattle-disease reported. Fodder and water sufficient. Common rice sells at 9 seers and 9 chitaks per rupee at Sadar.

Manbhum.—Rainfall at Sadar 0·07, Gobindpur nil. Weather seasonable. Prospects of crops good. Fodder and water sufficient. Cattle-disease reported from Purulia thana. Common rice sells as follows :—

	Srs.	ch.	
Sadar	13	0	per rupee.
Gobindpur	10	0	

Singhbhum.—Report not received.

General Summary.—There was general but very light rain in Bihar and scattered showers in the Burdwan, Presidency and Chota Nagpur Divisions ; while Orissa was free from rain. Lands are being prepared for jute and *aus* paddy. The prospect of the *rabi* crops is reported to be on the whole good. Cattle-disease exists in five districts. Fodder and water are generally sufficient. The price of common rice has risen in four and has fallen in three districts. It continues high in most of the districts of the Presidency Division and also in Hooghly, Howrah, Muzaffarpur, Monghyr, Purnea and Darjeeling.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN EASTERN BENGAL AND ASSAM, FOR THE MONTH OF FEBRUARY, 1906.

FEBRUARY 1906 has established an absolute record in the matter of excessive rainfall. In every division of the Province the amount received was at least four or five times as much as is usual in February, and in Chota Nagpur the excess was actually sevenfold. This heavy rainfall eclipsed, of course, all other features of the weather, and gave the month a completely abnormal character in spite of the fact that when analysed the other components of the weather show nothing strikingly strange. Pressure and temperature were both on the whole in slight defect.

A sudden atmospheric see-saw on the last two days of January had, it may be remembered, been associated with a rapid fall of temperature over the Province from several degrees above to a couple of degrees below normal, and had in fact left the north-east of India in the possession of a strong but typical North-East Monsoon. The 1st of February showed these conditions only slightly intensified—a slightly steeper North to South pressure gradient and mean temperature, as much as 4° below normal. On the 2nd, there was a slight going back to within less than 2° of normal, which on the 3rd became 2°, on the 4th 4°, and on the 5th 6° above normal, while all the time an essentially anti-cyclonic pressure distribution prevailed, with the barometer highest in the extreme north-east. It was during the 4th, 5th, and 6th that the first rain fell in a more or less scattered manner over Central India and Chota Nagpur. This rain can scarcely be associated with any definite depression, but only with a generally disturbed state of weather probably emanating from the upper atmospheric strata. The ground level winds were light and irregular, but with, on the whole, a southerly component over Bengal, which caused the temperature to rise continuously—4° above normal on the 6th, 6° on the 7th, and 7° or 8° on the 8th and 9th. A small depression which had travelled rapidly across India gave rain in Bihar on the 8th, then remained nearly stationary over the north of the Province for a couple of days, giving a very general and heavy fall of rain over the whole Province except Bihar on the 10th, and continued in Assam on the 11th. With the disappearance of this depression eastwards the winds assumed a northerly direction in its wake, and caused a rapid fall of temperature which remained about 2° below normal on the 11th and 12th. On the 13th, however, the first effects of another depression which was only shown by the isobars on the 14th, were felt in a slight rise of temperature. During the day and night of the 14th, precipitation was general and heavy over the whole western part of Bengal, and spread all over Bengal and Assam on the 15th and 16th, while on the 17th, there was very heavy rain, but confined mainly to the South of Bengal and Orissa, only to spread over the whole area again on the 18th. During these very wet days the barometer continued highest in the extreme north-east with a steep pressure gradient and strong winds towards the south-west. On the morning of the 17th, the isobars did indeed show two shallow depressions—one over North Madras and the other in the extreme west of Bihar. But the general disturbed character of the weather of this period was better illustrated by the small but well-defined cyclonic storm which passed over Calcutta on the morning of the 15th. This steady rain, accompanied by north-easterly winds and heavy overclouding, kept the day temperature so much below normal that though the nights were a little hotter than usual, the mean temperature was always a little below normal by about 3° or 4° up to the 19th when the rain ceased and the temperature began to rise again slowly until the 21st.

During the night of the 21st a very deep and large depression in the north-west began to cause a strong indraught from the Bay, with general heavy rain in Bihar and less heavy in South-West Bengal. On the 22nd heavy rain fell all over Bengal and Assam, and on the morning of the 23rd the centre of the depression appeared in South Orissa.

On the 22nd also the accompanying cold wave reached its maximum development (with a defect of 10° below normal) in Bengal, and after the cessation of the rain temperature continued 6° and 4° below normal on the 23rd and 24th, and fell again to 8° below on the 25th, 10° on the 26th, and rising to within 8° of normal on the 27th only to fall again on the 28th to 12° below normal. During these last days of the month, after the cessation of the rain the pressure distribution was very typically that proper to the season of the year, with a strong anti-cyclonic movement with its centre towards the W. N. W.

Summary of Pressure.—The month was characterised by very considerable oscillations of pressure. It began just a trifle above normal, especially in the north, varying slightly at about $\frac{1}{10}$th of an inch in excess up to the 5th, falling to normal on the 6th and 7th, rising again to $\frac{1}{10}$th in excess on the 8th, falling to $\frac{1}{10}$th in defect on the 9th and $\frac{1}{8}$th in defect on the 10th and back again to normal on the 11th. It remained about normal on the 12th and 13th, fell through $\frac{1}{10}$th on the 14th and 15th and rose back to normal on the 16th only to fall $\frac{1}{10}$th again on the 17th, 18th and 19th, rising $\frac{1}{10}$th on the 20th and back to normal on the 21st. On the 22nd a rapid fall took place, and the barometer remained $\frac{1}{10}$th of an inch or more below normal for the next three days, rising again rapidly on the 25th and 26th to $\frac{1}{10}$th above normal, from which it only fell by a trifling amount on the 28th.

The average for the month shows a defect of about $\frac{1}{10}$th of an inch over the whole Province and Bay.

Summary of Temperature.—Mean temperature for the month as a whole was in slight defect south and west of the line of the Partition of Bengal, and in slight excess in Eastern Bengal and Assam. Day temperature was in defect all over and night temperature in excess.

Summary of Rainfall.—The total rainfall for the month was quite exceptionally great, being 490 per cent. of the normal in South West Bengal, 420 in Bihar, 380 in Orissa, and 690 in Chota Nagpur, and the number of rainy days from three to five times as many as usual in February.

The following table gives the summary of the temperature of each of the seven Meteorological Divisions of the Provinces of Bengal and of Eastern Bengal and Assam, and rainfall data of each of the four meteorological divisions of the Province of Bengal for the month of February 1906:—

Meteorological Divisions.	Temperature.						Rainfall—							
	Highest observed during month.	Lowest observed during month.	Average for month.			Average mean of month above or below normal mean of month.	Of month.			Rainy days.			Since 16th October 1905.

METEOROLOGICAL OFFICE,
BENGAL;
The 10th March 1906.

J. A. CUNNINGHAM,

Offg. Meteorological Reporter to the Govt. of Bengal.

Abstract of the Results of Meteorological Observations taken at the Alipore Observatory in the month of February 1906.

	Inches.	Date.	Hour.
The mean pressure of the month	29·938		
The average pressure of February from 44 years' registers	29·953		
The highest pressure in the month	30·125	4th	1
The lowest pressure in the month	29·710	22nd	16
The range of pressure	0·415		
	Hours		
The total number of hours of bright sunshine during the month	179·1		
The maximum possible number of hours of sunshine	318·0		
	⊖		
The mean temperature of the month	70·0		
The average temperature of February from 19 years' registers	70·0		
The highest temperature in the month	87·4	9th	
The lowest temperature in the month	53·1	1st	
The range of temperature during the month	34·3		
The mean daily range of temperature	16·3		
The greatest range of temperature in one day	23·9	1st	
	Per cent.		
The mean humidity of the month	78		
The average humidity of February from 19 years' registers	65		
	Inches.		
The mean vapour tension of the month	0·567		
The average vapour tension of February from 19 years' registers	0·463		
The mean cloud proportion of the month	5·13		
The average cloud proportion of February from 29 years' registers	2·12		
	Inches.		
The total rainfall of the month	7·96		
The total rainfall indicated by a Beckley's self-registering rain-gauge (mouth of the gauge about 8 feet above the ground)	7·73		
The average fall of February from 23 years' registers	1·02		
The greatest fall in 24 hours	3 18	18th	
	Days.		
The number of rainy days in the month	8		
The average number of rainy days in February from 23 years' registers	2		
	⊖		
The mean maximum equilibrium temperature of solar radiation during the month	133·3		
The mean difference of sun and air temperatures	54·7		
The greatest sun temperature	147·8	14th	
The greatest excess of sun over air temperature	67·9	24th	
The mean temperature of the nocturnal radiation thermometer on woollen cloth	60·4		
The mean depression of the nocturnal radiation thermometer below the minimum air temperature at 4 feet above the ground	2·3		
The greatest depression of the nocturnal radiation thermometer below the minimum air temperature	4·7	4th	
	Miles.		
The mean movement of the wind per day	102·5		
The greatest movement of the wind in one day	147·0	11th and 27th	
The greatest movement of the wind in one hour	19·0	27th 1 to 2 P.M.	

The number of hours with winds from each of the eight points—

N. 110, N.E. 58, E. 79, S.E. 9, S. 11, S.W. 144, W. 101, N.W. 133, Calm 27.

	Inches.
The mean pressure of the seven days	29·981
The average pressure of the corresponding period for 24 years, Surveyor-General's Office	·842
	Hours.
The total number of hours of bright sunshine	61·2
The maximum possible number of hours of sunshine	82·5
	°
The mean temperature of the seven days	74·4
The average temperature of the corresponding period for 24 years, Surveyor-General's Office	78·1
The extreme variation of temperature	33·1
The maximum temperature	90·1
	Miles.
The highest velocity of the wind in one hour	12
	°/°
The mean relative humidity	73
The average relative humidity of the corresponding period for 24 years, Surveyor-General's Office	69
	Inches.
The total fall of rain from 4th to 10th March 1906	Nil
The average fall of the corresponding period for 24 years, Surveyor-General's Office	0·46
The total fall from 1st January to 10th March 1906	97·4
The average fall of the corresponding period for 24 years, Surveyor-General's Office	2·24

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermo graph, and from eye observations.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground. Rainfall reported on any day is for 24 hours preceding 8 A.M. of that day.

⌓, dew.

J. A. CUNNINGHAM,
for Offg. Meteorological Reporter to the Govt. of India and Director-General of Indian Observatories.

METEOROLOGICAL OFFICE, GOVT. OF INDIA;
Alipore (Calcutta), the 12th March 1906.

MARINE DEPARTMENT.

NOTIFICATION.

No. 30 Marine, dated the 20th March 1906.

UNDER sect on 10 of Act I of 1859 (an Act for the amendment of the law relating to merchant seamen), the Lieutenant-Governor is pleased, with the sanction of the Governor-General in Council, to make the following rules for the conduct of examinations for Masters and Mates of Foreign going ships and Home trade ships and as to the qualifications to be required. These rules are in supersession of the rules issued under notification No. 183Marine, dated the 28th September 1899.

The new rules will come into force from the 1st May 1906.

W. A. INGLIS,

Secy. to the Govt. of Bengal.

RULES.

CHAPTER I.

Time and place of examinations.

1. The times and places at which examinations are held are shown in Appendix A, page 30.

How to apply.

2. Candidates for examination must fill up a Form of application (Form Exn. 2) at the Port Office. The Form properly filled in, together with he Candidate's testimonials and dis harges, must be lodged with the Port Officer of Calcutta, not later than the day before the day of examination, and the Candidate must conform to any regulations in this respect which may be laid down by the Government. The discharges and testimonials should be handed in, together with the Form of application as many days as possibly before the date of the examination which the Candidate desires to attend. In the absence of the nec essary verification the Candidate cannot be examined The Port Officer should be particularly careful to ascertain that there are no gaps in the Candidate's service which are not properly accounted for before he is allowed up for examination.

How to apply in special cases.

3. In cases where the services of the Candidate require verification, or where he is in doubt whether his service complies with the regulations, and wishes to submit his case for special consideration, all Certificates, discharges, testimonials, &c., together with the Form of application* properly filled in, should be submitted to the Port Officer of Calcutta. If necessary, the Port Officer will, after seeing that all the required information is clearly set forth in the papers, forward them with his observations to the Government who will deal with the case, or transmit it to the Board of Trade for decision.

Inquiries.

4. All other inquiries regarding examinations should be made and dealt with in the same way. The point on which information is sought should be clearly stated, and Certificates, discharges, testimonials, &c., should be forwarded when they are material to the inquiry.

* Form Exn. 2 which can be obtained at the Port Office.

Services determined by Articles.

5. Services which cannot be verified by proper entries in the Articles of the ships in which the Candidates have served cannot be counted For instance, a man may state that his service has been as Second or only Mate, and to support his assertion may produce a Certificate of Discharge or of employment from the Master, to the effect that he served as Mate, when on reference to the Articles it appears that he has actually been rated as Boatswain; the service in such a case will not be regarded as having been in the capacity of Mate.

Age

6. Should any doubt exist as to the age of a Candidate, he will be required to produce a certificate of birth

Fraud and misrepresentation.

7. It is provided by section 104 of the Merchant Shipping Act, 1894, that any person who makes, assists in making, or procures to be made, any false representation for the purpose of procuring either for himself or for any other person a Certificate of Competency, shall, in respect of each offence, be guilty of a misdemeanour,—the punishment for which is imprisonment for any period not exceeding six months, with or without hard labour, or a fine not exceeding one thousand rupees.

Testimonials required.

8 Testimonials to character, including sobriety, and to experience and ability on board ship for at least the twelve months of service immediately preceding the date of application to be examined, will be required of all Candidates, and without producing them no person will be examined.

Penalty for misconduct

9. Candidates who have neglected to join their vessels after having signed Articles, or who have deserted their vessels after having joined, or who have been found guilty of gross misconduct on board, will be required to produce satisfactory proofs of two years' subsequent service and good conduct at sea, unless the Local Government, after having investigated the matter, should see fit to reduce the time.

10. Every Candidate for a certificate of competency of any grade must pass the three tests before he can proceed to the examination in navigation and seamanship.

(1) The sight tests are open to all persons serving or intending to serve in the Mercantile Marine, and all such persons are recommended to take the earliest opportunity of ascertaining by means of these tests whether their vision is such as to qualify them for service in that profession

(2) The three tests are —

(*a*) Form Vision Test (*see* page 61).
(*b*) Colour Vision Test (*see* page 62).
(*c*) Colour Ignorance Test (*see* page 68).

No Candidate will be examined in the Colour Vision Test until he has passed the Form Vision Test, or in the Colour Ignorance Test until he has passed the Colour Vision Test.

This rule must be observed whether the candidate has or has not on any previous occasion passed the sight tests

(3) Any person serving or intending to serve in the Mercantile Marine, if desirous of undergoing the Form Vision Colour Vision, and Colour Ignorance Tests only, must make application to the Port Officer on the Form hereto, and must pay a fee of one rupee.

This fee will be payable on each occasion upon which a candidate is examined in Form Vision and Colour tests.

(4) Candidates who fail to pass the Form Vision Test or Colour Ignorance Test can be re-examined at intervals of three months, but Candidates who fail to pass the Colour Vision Test cannot be re-examined. It is open, however, to any Candidate who has failed to pass the Colour Vision Test to appeal to the Government who may, if they think fit, remit the case to a special Examiner or body of Examiners for final decision

(5) The expenses of Candidates who are examined by such special Examiner, or body of Examiners, and are reported by them to have passed, will, under certain circumstances, be paid by the Government, at a rate which will be notified to the Candidate; but no payment whatever will be made towards the expenses of Candidates who, upon their own application are examined by the special Examiners and are reported by them to have failed, unless the Government consider that the particular circumstances of the case justify such payment. The special examinations will be held in Calcutta only.

(6) When a Candidate fails to pass the Colour Vision Test, the Examiner will point out to him the conditions under which he can appeal. Appeals are to be made through the Examiner, and forwarded to the Government with the Examiner's remarks.

(7) The fee paid for examination for a Certificate of Competency includes the fee of one rupee for examination in Form Vision, Colour Vision, and Colour Ignorance, and if the Candidate fails to pass those tests, this fee will, with the exception of one rupee, be returned to him.

(8) Only Examiners who have themselves passed the Colour Test are to undertake these examinations.

(9) Whenever the holder of a certificate of competency fails to pass any of the three tests, there is reason to believe that he is from incompetency unfit to discharge his duties, and in the public interest the Government may cause an inquiry to be held by a Court having jurisdiction to cancel or suspend such certificate; but in the alternative the Government may accept the voluntary surrender of the certificate until such time as the applicant succeeds in passing the tests in which he failed.

Foreigners must know English.

11. Foreigners must prove, to the satisfaction of the Examiners, that they can speak and write the English language sufficiently well to perform the duties required of them on board a British vessel (*see* paragraph 19). In the case of candidates for Home Trade Certificates, the Certificates of Asiatics who may not be able to speak English shall be endorsed to the effect that they are valid only for vessels manned and officered entirely by Asiatics.

Issue of certificate.

12. If the Candidate passes, he will receive a Form (Form Exn. 16), authorising the Port Officer to whom it is addressed to issue the Certificate. The Candidate's testimonials and other papers will be returned to him with the Certificate. It is therefore important that the port at which the Certificate is to be issued should be the same on both the Form Exn. 16 and the Form Exn. 2. If circumstances should make any alteration necessary, the Examiner should see that it is made in both Forms, otherwise delay in the issue of the Certificate may be caused.

Service found to be insufficient.

13. If, after a Candidate has passed the examination, it is discovered on further investigation that his services are insufficient to entitle him to receive a Certificate of the grade for which he has passed, the Certificate will not be granted to him, but if the Government is satisfied that the error in the calculation of the Candidate's services did not occur through any fault or wilful misrepresentation on his part, he may either have the fee returned to him, or have it placed to his credit. Should his services entitle him to a Certificate of a lower grade, it may be granted to him, and the difference, if any, between the fee paid by him for the superior Certificate and the fee payable for the inferior Certificate will be returned to him or placed to his credit. The superior Certificate will not be granted until the Candidate has performed the amount of service in which he was deficient, and has been re-examined in all the subjects unless the Government see fit to dispense with the re-examination.

Failure in examination.

14. In all cases of failure the Candidate must be examined anew. If a candidate fails in Seamanship, he will not be re-examined until after a lapse of six months. Whether the whole or part of this period must be served at sea must depend upon the subjects in Seamanship in which the Candidate failed, but the amount of further sea service to be required will be left to the discretion of the Port Officer, Calcutta.

Examiner's Report.

15. The Examiner, in making his report on Form Exn. 14, should state what amount, if any, of further sea service the Candidate must perform, and he should also insert this information in Form Exn. 2.

Failure in Navigation.

16. If a Candidate fails three times in Navigation within three months, he will not be re-examined until after a lapse of THREE MONTHS from the date of the last failure.

Failure in Extra Examinations.

17. Candidates for Extra Certificates will not be allowed to present themselves for examination more than three times within a period of twelve months.

Lower Certificate may be granted.

18. If a Candidate has failed in his examination, but the subjects in which he has failed are not included in the subjects required for a Certificate of a lower grade, he may, if he so desires, proceed with the examination for the lower

grade certificate without further formal application or payment of fee, but in this case he will be required to complete the whole of the work prescribed for such lower grade, that portion (if any) already done standing good No part, however, of the fee he has paid will be returned to him, and on presenting himself, when qualified, for re-examination for the higher Certificate, he will be required to pay a further full fee.

Failure for spelling, &c

19. If a Candidate fails for bad spelling or writing, he will not be re-examined until after a lapse of at least three months. If he fails for ignorance of the English language, he will not be re-examined until after a lapse of six months.

Failure in Seamanship

20. If a Candidate fails in Seamanship so far as regards the management of square-rigged Sailing Vessels, in his examination for an Ordinary Certificate, he may, if qualified as to service, without further formal application or further payment of fee, proceed with the examination for a Certificate of Competency for Foreign-going Steamships, or for Fore and Aft-rigged Vessels. And if a Candidate fails in the same manner in his examination for an Extra Master's Certificate, he may, under the same conditions as above, proceed with the examination for an Extra Certificate for Steamships.

Fee always paid first.

21. Candidates for examination, in making their application on Form Exn. 2, will be required to pay the examination fee before any step is taken in the way of inquiring into their services or testing their qualifications. If the Candidate is found not to be qualified, the fee will either be returned to him or placed to his credit until he is qualified.

Where to pay fees.

22. The fee for examination must be paid to the Port Officer in the cash office. If a Candidate offers a gratuity to any officer of the Department, he will be regarded as having committed an act of misconduct, and will be rejected, and not allowed to be again examined for twelve months either at the port where the offence was committed, or at any other port.

Fee not returned on failure

23. If a Candidate fails to pass the examination, no part of the fee will be returned to him

Table of fees.

24 The fees are as follows :—

FOR "FOREIGN-GOING SHIPS"

	Rs.
Second Mate	12
First and Only Mate if previously possessing an inferior Certificate, either granted by the Board of Trade, or by the Government of a British Possession *under section 8 of "The Merchant Shipping (Colonial) Act, 1869"* ...	6
If not	12
Master	24
Where a Candidate is in possession of a Certificate for Fore and Aft rigged Vessels, and requires an Ordinary or Steamship Certificate of the same grade; or where a Candidate is in possession of a Steamship Certificate, and requires an Ordinary Certificate of the same grade	Half the usual fee.
Master, Extra, if possessing an Ordinary Master's Certificate; or Master, Extra, for Steamships if possessing a Master's Certificate for Steamships	12*

* If the examination for the Extra Master's Certificate takes place at the same time as the examination for the Ordinary Master's Certificate, the usual fee for the Ordinary Master's Certificate in addition to the fee for the Extra Certificate must be paid This rule as to fees also applies to the extra examinations for Steamships and yachts.

	Rs.
Where a Candidate is in possession of a Certificate for Foreign-going Ships, not granted under the *Merchant Shipping (Colonial) Act, 1869*, or section 102 of the Merchant Shipping Act, 1894; or of a Provisional Certificate of qualification obtained after examination on board one of His Majesty's Ships; for an Imperial Certificate of same grade, for first attempt	No fee.
Every subsequent attempt ...	Usual fee

FOR "HOME TRADE PASSENGER SHIPS."

	Rs.
Mate	6
Master	12

FOR VOLUNTARY EXAMINATION IN STEAM.

	Rs.
Any Master or Mate holding a Certificate of any grade, whether for the Foreign or Home Trade, or as Master of his own Pleasure Yacht ...	12

FOR VOLUNTARY EXAMINATION IN DEVIATION OF THE COMPASS.

	Rs.
Any Master or Mate holding a Certificate of any grade, whether for the Foreign or Home Trade, or as Master of his own Pleasure Yacht ...	12

FOR "YACHTS."

	Rs.
Master	24
Master, Extra, if possessing a Master's Certificate	12

NOTE.—No abatement will be made in the fee charged to a Candidate for a Certificate for Foreign going Ships in consequence of his possessing a Master's or Mate's Certificate for Home Trade Passenger Ships.

CHAPTER II.

QUALIFICATIONS REQUIRED FOR THE VARIOUS GRADES.*

Certificates for "Foreign-going" Ships or Ordinary Certificates.

Square-rigged service required.

25. A Candidate for an Ordinary Certificate of any grade, who has not previously held an Ordinary Certificate of a lower grade, must prove that he has served 12 months in the Foreign Trade, or 18 months in the Home or Coasting Trade in a square-rigged sailing vessel.

Value of ordinary certificates.

26. Ordinary Certificates will entitle the holders to go to sea as Mates or Masters of any vessel, sailing or steam.

Second Mate, ordinary.

27. SECOND MATE.—A Candidate must be not less than seventeen years of age, and must have served four years at sea.

---

* These qualifications are shown in a tabular form in Appendix P, page 69.

SECOND MATE.

Navigation.

28. *Examination in Navigation.*—A Candidate for a Second Mate's Certificate will be required –

(*a*) To write a legible hand and spell correctly; this will be tested by not less than a quarter-of-an-hour's dictation.

(*b*) To write a short definition of various astronomical and other terms and to draw a rough sketch or diagram to illustrate their meaning. (*See* Appendix C and paragraph 156.)

(*c*) To show a competent knowledge of the first five rules of arithmetic and the use of logarithms.

(*d*) To work a day's work complete, correcting the courses for leeway, deviation and variation.

(*e*) To find the latitude by the meridian altitude of the sun.

(*f*) To work any practical problem in parallel sailing.

(*g*) To find the true course and distance from one given position to another by Mercator's method; also the compass course, the variation and deviation being given.

(*h*) To find the time of high water at a given port.

(*i*) To find the true amplitude of the sun and the error of the compass therefrom; also the deviation, the variation being given.

(*j*) To find the longitude by chronometer from altitude of the sun by the usual methods, computing the daily rate of chronometer from errors observed when acquired; also to find the true azimuth of the sun, and the error of the compass; and the deviation, the variation being given.

(*k*) To find the true azimuth of the sun by the "Time Azimuth" tables; the error of the compass; also the deviation, the variation being given.

(*l*) To find on either a "true" or "magnetic" chart* the course to steer and the distance from one given position to another; to find the ship's position on the chart from cross-bearings of two objects; from two bearings of the same object, the course and distance run between taking the bearings being given; also the distance of the ship from the object at the time of taking the second bearing. (*See* Appendix G.)

He will be required to answer viva voce *questions on the following subjects :—*

(*m*) The use and adjustments of the sextant, read off and on the arc, and the mode of finding the index error by both horizon and sun.

(*n*) The International Code of Signals.

(*o*) The construction, use and principle of the barometer, thermometer and hydrometer.

(*p*) Weights and measures.

Second Mate, or linary Seamanship.

29. *Examination in Seamanship.*—He must understand and give satisfactory answers on the following subjects:—

(*a*) The standing and running rigging of ships.

(*b*) Bending, unbending, setting, reefing, taking in and furling sail.

(*c*) Sending masts and yards up and down, &c.

(*d*) Management of a ship when under canvas.

(*e*) Management of ship's boats in heavy weather.

(*f*) Dunnaging and stowing cargo, &c.

(*g*) The Rule of the Road as regards both steamers and sailing vessels, their regulation lights and fog and sound signals.

(*h*) The signals of distress, and the signals to be made by ships wanting a Pilot, and the liabilities and penalties incurred by the misuse of these signals

* The terms "true" and "magnetic" are used for brevity and convenience throughout the Regulations to indicate charts which have compasses engraved upon them showing the true or magnetic points of the compass respectively.

(*i*) The marking and use of the lead and log lines.
(*j*) The use and management of the rocket apparatus in the event of a vessel being stranded.
(*k*) Any questions of a like nature appertaining to the duties of a Second Mate that the Examiner may think necessary to ask.
(*l*) Also questions on the additional subjects which are specified in the Rules of Examination for Second Mates' Certificates of Competency for Foreign-going Steamships (*see* paragraph 44).

Only Mate ordinary.

30. ONLY MATE.—A Candidate must be not less than nineteen years of age, and have served five years at sea.

First Mate ordinary.

31. FIRST MATE.—*A Candidate must be not less than nineteen years of age, and have served five years at sea, of which—

(*a*) One year must have been in a capacity not lower than Fourth Mate of a Foreign-going Vessel, whilst holding a Second Mate's Certificate for Foreign-going Vessels;
If his service was as Third or Fourth Mate, proof will be required that he had during the whole year *charge of a Watch* (*see* para. 106):
(*b*) *or* one year and a-half must have been in a capacity not lower than Only Mate in a Home Trade or Coasting Vessel whilst holding a Second Mate's Certificate for Foreign-going Vessels, or a Mate's Certificate for Home Trade Passenger Ships;
(*c*) *or* one year must have been as Pilot with a First Class Pilot's Certificate (*see* para. 103).
(*d*) or eighteen months' active service as Chief Officer with a Second Mate's Certificate on a Bengal Pilot Brig.

Mate, ordinary Navigation.

32. *Examination in Navigation.*—A Candidate for an Only or First Mate's Certificate will be required—

(*a*) To work out any *three* of the nautical problems prescribed for the Second Mates' examination which may be given him by the Examiner, in addition to the chart paper (*l*) and the oral subjects (*m*, *n*, *o*, *p*) prescribed for that grade.
(*b*) To compute the time at which a given star will be on the observer's meridian. [Occasionally by inspection.]
(*c*) To describe where tables giving the names of the principal stars passing the meridian may be found.
(*d*) To describe where the meridian passage of the principal planets may be found.
(*e*) To determine what bright stars will be within an hour or more of the observer's meridian above the pole and above the horizon at any given time; also the hour angle, east or west of each of the stars, and whether to the north or south of the observer's zenith when passing the meridian.
(*f*) To describe any maps or diagrams which the Candidate knows, and prefers for further facilitating the recognition of the stars and planets.
(*g*) To compute the approximate meridian altitude of one of the stars just found, for setting the sextant.
(*h*) To find the latitude from the meridian altitude of the same star.
(*i*) To find the longitude by chronometer by altitude of a star.
(*j*) To find the true azimuth of a star by the "Time Azimuth" tables, and get the deviation therefrom.
(*k*) To find the latitude by ex-meridian altitude of the sun or a star.
(*l*) To find the *line of position* and the true bearing of the sun, and the ship's position, by Sumner's method by projection.

*For convenience of calculation the service required is stated in a tabular form, Appendix P, page 69

(*m*) To answer certain questions relative to cyclones or revolving storms. (*See* Appendix H, page 50.)

He will be required to answer viva voce *questions on the following subjects*:—

(*n*) How to keep a ship's log book.
(*o*) How to calculate the capacity of a given bunker or hold.
(*p*) How to calculate a freight and its commissions.

First Mate, Ordinary. Seamanship.

33. *Examination in Seamanship.*—In addition to the qualifications required for a Second Mate's Certificate, an Only or First Mate will be required to show a knowledge of the following subjects:—

(*a*) Shifting large spars, rigging sheers, taking lower masts in and out.
(*b*) How to moor and unmoor ship; to keep a clear anchor; and to carry out an anchor.
(*c*) How to manage a ship in stormy weather, and to cast a ship on a lee shore.
(*d*) How to secure the masts in the event of accident to the bowsprit.
(*e*) How to rig purchases for getting heavy weights, anchors, machinery, &c., in or out.
(*f*) How to dispose various kinds of cargo and weights in a stiff, and in a tender vessel.
(*g*) The ventilation of holds and the stowage of explosives.
(*h*) How to rig a sea anchor, and what means to employ to keep a vessel, disabled or unmanageable, out of the trough of the sea, and lessen her lee drift.
(*i*) How to get a cast of the deep sea lead in heavy weather.
(*j*) Accidents, and how to deal with them.
(*k*) Any other questions appertaining to the duties of an Only or First Mate which the Examiner may think necessary to ask.
(*l*) Also questions on the additional subjects which are specified in the Rules of Examination for Only and first Mate's Certificates of Competency for foreign-going Steamships (*see* para. 48).

Master, Ordinary.

34. MASTER.*—A Candidate must be not less than twenty-one years of age, and

(*a*) he must have served six years at sea, of which one year must have been in a capacity not lower than Only Mate of a Foreign-going Vessel whilst holding a Certificate not lower than an Only Mate's Certificate for Foreign-going Vessels, provided that this service as officer was not performed whilst holding a First Mate's Certificate for Foreign-going Vessels, the Candidate will also be required to prove the officer's service prescribed for that grade (para. 31);
(*b*) *or*, he must have served six years at sea, of which one year and-a-half must have been in a capacity not lower than Only Mate of a Home Trade or Coasting Vessel whilst holding a Certificate not lower than an Only Mate's Certificate for Foreign-going Vessels provided that if this service as officer was not performed whilst holding a First Mate's Certificate for Foreign-going Vessels, the Candidate will also be required to prove the Officer's service prescribed for that grade (para. 31);
(*c*) *or*, he must have served six and a-half years at sea, one year of which must have been in a capacity not lower than Second Mate of a Foreign-going Vessel whilst holding a First Mate's Certificate for Foreign going Vessels, provided that if this service as Second Mate was

* For convenience of calculation the service required is stated in a tabular form in Appendix P, page 169.

performed under an Additional or Auxiliary First Mate it will only be accepted if a Third and Fourth Mate were also carried, *and* one year and-a-half not lower than Third or Fourth Mate of a Foreign-going Vessel *in charge of a Watch* whilst holding a Second Mate's Certificate for Foreign-going Vessels;

(*d*) *or*, he must have served nine years at sea in the Home or Coasting Trade, of which three years must have been as Master, *or* one year as Master and three years in a capacity not lower than that of Mate, *provided that in either case* he has served in such capacity for not less than one year with a Second Mate's Certificate for Foreign-going Vessels or a Master's Certificate for Home Trade Passenger Ships.

Master, Ordinary. Navigation

35. *Examination in Navigation.*—A Candidate for an Ordinary Master's Certificate will be required to work out any *twelve* of the nautical problems prescribed for the grades of Second and First Mate that may be given him by the Examiner, in addition to the chart paper, the cyclone paper, and the oral subjects prescribed for the grades of Second and First Mate. He will also be required—

(*a*) To find the latitude by the altitude of the polar star at any time.

(*b*) To find the latitude by the meridian altitude of the moon.

(*c*) To find the magnetic bearing of any fixed object when at sea or at anchor from bearings of the object taken with the ship's head on equidistant compass points, and to compute the deviation therefrom; to construct a deviation curve upon a Napier's diagram which will be furnished by the Examiner, and show that he understands its practical application; to give satisfactory written *and oral* answers to certain practical questions as to the effect of the ship's iron upon the compasses, and the method of determining the deviation, and show how to compensate the deviation by magnets and soft iron by the aid of Beall's Compass Deviascope (*see* Appendix I, page 50).

(*d*) To find on a chart the course to steer by compass in order to counteract the effect of a given current, and find the distance the ship will make good towards a given point in a given time, and to work out practically the correction to apply to soundings taken at a given time and place to compare with the depth marked on the chart, (*see* Appendix G, page 49).

He will be required to answer vivâ voce *questions on the following subjects*:—

(*e*) The law as to the engagement and discharge and management of the crew, and the entries to be made in the official log.

(*f*) How to prevent and check an outbreak of scurvy on board ship.

(*g*) The law as to load line marks, and the entries and reports to be made respecting them.

(*h*) Invoices, charter party, bills of lading, Lloyd's agent, nature of bottomry, bills of exchange, surveys, averages, &c.

(*i*) The prevailing winds and currents of the globe.

(*j*) The trade routes.

(*k*) Tides.

aster, Ordinary, Seamanship.

36. *Examination in Seamanship.*—In addition to the qualifications required for the grades of Second and First Mate, an Ordinary Master will be required to show a knowledge of the following subjects:—

(*a*) Construction of jury rudders for both wooden and iron vessels, also rafts.

(*b*) Resources for the preservation of the ship's crew in the event of wreck.
(*c*) Management of ship in heavy weather.
(*d*) Rescuing the crew of a disabled vessel.
(*e*) Steps to be taken when a ship is on her beam ends, or in any danger or difficulty, or disabled or unmanageable and on a lee shore.
(*f*) Heaving a keel out.
(*g*) How to proceed when placing a ship in dry dock, and directing repairs, and when putting into port in distress with damage to cargo and ship.
(*h*) Any other question of a like nature appertaining to the management of a ship which the Examiner may think it necessary to ask.
(*i*) Also questions on the additional subjects which are specified in the Rules of Examination for Masters' Certificates of Competency for Foreign-going Steamships. *See* para. 51.

CERTIFICATES FOR FOREIGN-GOING FORE AND AFT-RIGGED VESSELS.

Fore and aft Certificates.

37. Certificates for the grades of Master, First Mate, Only Mate and Second Mate of fore and aft-rigged vessels will be issued to Candidates who have not complied with the regulation which requires them to have served at least one year in square-rigged sailing vessels, or who prove in course of examination that they are ignorant of the management of square-rigged ships. In other respects the qualifications for examination for such Certificates are the same as for Ordinary Certificates.

Character of examinations.

38. The examinations for the grades of Second Mate, Only Mate, First Mate, and Master of fore and aft-rigged vessels will be precisely the same as for the Ordinary Certificates, excepting that in seamanship a knowledge of the management of square-rigged vessels is not required.

Value of Certificates.

39. A Certificate for "Fore and Aft-rigged vessels" will not entitle the possessor to act in any case in which a Certificate for square-rigged vessels is required. Amongst square-rigged vessels are classed full-rigged ships, barques, brigs, barquentines, brigantines, and steamships carrying square sails.

How certificates may be changed.

40. A Candidate possessing a Certificate for fore and aft-rigged vessels, and desiring to be examined for an Ordinary Certificate, must prove that he has served at sea at least one year in a square-rigged sailing vessel, *unless* he has previously held an Ordinary Certificate of a lower grade.

CERTIFICATES FOR FOREIGN-GOING STEAMSHIPS.

Steamship Certificates.

41. Certificates applying only to steamships are issued to Candidates who are either unable to comply with the regulation which requires them to have passed one year in square-rigged sailing vessels, or who prove in course of examination that they are ignorant of the management of square-rigged sailing vessels. All the qualifying Officers' service prescribed for these Certificates must have been performed in steamships.

These Certificates will entitle the holders to go to sea as Masters or Mates of Foreign-going Steamships, but will not entitle them to go to sea as Masters or Mates of Foreign-going Sailing Ships.

There will be no distinction in these Certificates between "Fore and Aft-rigged" Steamships and "Square-rigged" Steamships.

Second Mate Steamships.

42. SECOND MATE.—The qualifications as to age and service are the same as for an Ordinary Second Mate's Certificate (*see* para 27), excepting that no service in square-rigged sailing vessels is required.

43. *Examination in Navigation.*—The examination in navigation for a Second Mate's Certificate for Foreign-going Steamships will be precisely the same as that prescribed for an Ordinary Second Mate's Certificate. Navigation.

44. *Examination in Seamanship.*—The Candidate must understand and be able to give satisfactory answers as to the following subjects:— Seamanship.

(*a*) The standing and running rigging of steamships.
(*b*) Bending, unbending, setting, reefing, taking in and furling sail
(*c*) Sending masts and yards up and down, &c.
(*d*) Seeing everything in readiness and clear for getting under way, and the precautions to be then observed with regard to engines, propeller, &c.
(*e*) Management of a steamship when under canvas.
(*f*) Management of a ship's boat in heavy weather.
(*g*) Dunnaging and stowing cargo, &c.
(*h*) The Rule of the Road as regards both steamers and sailing vessels, their regulation lights and fog and sound signals.
(*i*) Signals of distress, and signals to be made by ships wanting a Pilot, and the liabilities and penalties incurred by the misuse of these signals.
(*j*) The marking and use of the lead and log lines.
(*k*) The construction, use and action of the sluices, and of the water-ballast tanks.
(*l*) Engine-room, telegraph, &c.
(*m*) Use and management of the rocket apparatus in the event of a vessel being stranded.
(*n*) Any other questions of a like nature appertaining to the duties of the Second Mate of a steamship which the Examiner may think necessary to ask.

45. ONLY MATE.—The qualifications as to age and service are the same as for an Only Mate's Ordinary Certificate (*see* para 30), excepting that no service in square-rigged vessels is required. Only Mate, Steamship.

46. FIRST MATE.— The qualifications as to age and service are the same as for a First Mate's Ordinary Certificate (*see* para. 31), excepting that the service required as officer must have been in Steamships, and that no service in square-rigged vessels is required. First Mate, Steamships.

47. *Examination in Navigation.*—The examination in navigation for an Only or First Mate's Certificate for Foreign-going Steamships will be precisely the same as that prescribed for an Ordinary First Mate's Certificate (*see* para. 32). Navigation.

48. *Examination in Seamanship.*—In addition to the qualifications required for a Second Mate's certificate, an Only or First Mate will be required to show a knowledge of the following subjects:— Seamanship.

(*a*) Shifting large spars; rigging sheers; and taking lower masts in and out.
(*b*) How to moor and unmoor ship, keep a clear anchor, and to carry out an anchor.
(*c*) Management of a steamship in stormy weather.
(*d*) How to rig purchases for getting heavy weights, anchors, machinery, &c., in and out.
(*e*) How to dispose various kinds of cargo and weights, in a stiff and in a tender vessel.
(*f*) Ventilation of holds and the stowage of explosives.
(*g*) The effects of the screw race upon the rudder; and the effect produced on the direction of the head of the ship by going [ahead] [astern] with a [right] [left] handed screw when the rudder is [ported] [starboarded]; also the effect of twin-screws under the same conditions, and when going ahead with one and reversing the other, &c., &c.
(*h*) How to rig a sea anchor, and what means to employ to keep a steamer, with her machinery disabled,

out of the trough of the sea and to lessen her lee drift.

(*i*) How to turn a steamship short round.

(*j*) How to get a cast of the deep sea lead in heavy weather.

(*k*) Any other questions of a like nature appertaining to the duties of a First Mate of a steamship which the Examiner may think necessary to put to him.

Master, Steamships

49. MASTER.—The qualifications as to age and service are the same as for a Master's Ordinary Certificate for a Foreign-going Ship (*see* para. 34), excepting that the service required as officer must have been performed in steamships, and that no service in square-rigged vessels is required.

Navigation.

50. *Examination in Navigation.*—The examination in navigation for a Master's Certificate for Foreign-going Steamships will be precisely the same as that prescribed for an Ordinary Master's Certificate (*see* para 35)

Seamanship.

51. *Examination in Seamanship.*—In addition to the qualifications required for the grades of Second and First Mate, a Master will be required to show a knowledge of the following subjects:—

(*a*) Construction of rafts and jury rudders suitable for screw steamships.

(*b*) The preservation of the ship's crew in the event of wreck.

(*c*) Management of steamships in heavy weather.

(*d*) Rescuing the crew of a disabled ship.

(*e*) Steps to be taken when a vessel is on her beam ends or disabled and on a lee shore.

(*f*) How to use steam appliances in the event of fire.

(*g*) The best arrangement for towing vessels under different circumstances.

(*h*) Placing ship in dry dock, directing repairs, and the mode of procedure when putting into port in distress with damage to cargo and ship.

(*i*) Any other questions of a like nature appertaining to the management of a steamship which the Examiner may think it necessary to put to him.

Steamship Certificates, how changed.

52. A Candidate possessing a Certificate for "Foreign-going Steamships" and desiring to be examined for an Ordinary Certificate, must prove that he has served at sea at least one year in a square-rigged sailing vessel *unless* he has previously held an Ordinary Certificate of a lower grade.

CERTIFICATES FOR HOME TRADE PASSENGER SHIPS.

Mate, Home Trade.

53. MATE.—A Candidate must be not less than nineteen years of age and have served four years at sea.

Navigation.

54. *Examination in Navigation*—He must write a legible hand and spell correctly, and understand the first five rules of arithmetic, both simple and compound. He must be able to take a bearing by compass, be conversant with the use of Mercator's Chart, and be able to find, on either a "true" or "magnetic" chart, the course to steer, and the distance from one given position to another; to find the ship's position on the chart from cross bearings of two objects and from two bearings of the same object, the course and distance run between taking the bearings being given; and the distance of the ship from the object, at the time of taking the second bearing. He must also pass an examination in the International Code of Signals.

Seamanship

55. *Examination in Seamanship.*—He must possess a thorough knowledge of the Rule of the Road as regards both steamers and sailing vessels, their regulation lights, and fog and sound signals. He must be able to describe the signals of distress and the signals to be made by ships

wanting a Pilot, and the liabilities and penalties incurred by the misuse of these signals; also the use and management of the rocket apparatus in the event of his vessel being stranded. He must be able to mark and use the lead and log lines, to moor and unmoor a vessel, and to manage a ship's boat in heavy weather, etc., etc. He must also understand the construction, use and action of the bulkhead sluices, the engine room, telegraph, etc., and to answer any other questions of a like nature appertaining to the duties of the Mate of a Home Trade Passenger Ship which the Examiner may think proper to put to him.

Master, Home Trade

56. MASTER *—A Candidate must be not less than twenty years of age and have served five years at sea of which—

(*a*) one year must have been in a capacity not lower than that of only Mate of a Home Trade or Coasting Vessels whilst holding a Mate's Certificate for Home Trade Passenger Ships, or a Second Mates's Certificate for Foreign going Vessels;

(*b*) *or*, two and-a-half years must have been in a capacity not lower than Second Mate of a Home Trade or Coasting Vessel *in charge of a Watch* whilst holding a Mate's Certificate for Home Trade Passenger Ships, or a Second Mate's Certificate for Foreign-going Vessels (*see* para. 106);

(*c*) *or*, one year must have been as Pilot with a First Class Pilot's Certificate (*see* para. 103).

Master, Home Trade Navigation.

57. *Examination in Navigation.*—In addition to the qualifications required of a Mate of a Home Trade Passenger Ship, a Master will be required to find on a chart the course to steer by compass in order to counteract the effect of a given current and to find the distance the ship will make good towards a given point in a certain time, and to *work out practically* the correction to apply to soundings taken at a given time and place, to compare with the depth marked on the chart, etc. He will also be required to understand the use of the quadrant, to be able to observe with it, to read *off* and *on* the arc, and to find the index error by horizon He will also be required to find the latitude by a meridian altitude of the sun, and to give written answers to certain practical question on the subject of the deviation of the compass (*See* also supplementary *viva voce* test, para. 157.)

Master, Home Trade Seamanship

58. *Examination in Seamanship.*—In addition to the qualifications required of a Mate of a Home Trade Passenger Ship, a Master must understand how to rig a sea anchor and what means to apply to keep a steamship with machinery disabled out of the trough of the sea; also how to get a cast of the lead in heavy weather, etc. He will be examined as to his resources for the preservation of the crew and passengers in the event of wreck and the steps to be taken if his vessel is disabled and drifting towards a lee shore, and will be required to answer any other questions appertaining to the management of a Home Trade Passenger Ship which the Examiner may think necessary to put to him.

EXTRA CERTIFICATES.

Extra Master Foreign going

59. *Certificates as Extra Master.*—An Extra Master's Certificate will entitle the holder to go to sea as Master of any vessel, sailing or steam.

The examination is voluntary and intended for such persons as wish to prove their superior qualifications and are desirous of having Certificates of the highest grade granted by the Board of Trade.

The extra examination may take place when the Applicant is qualified to go up for examination for an Ordinary

* For convenience of calculation, the service required is stated in a tabular form in Appendix P, page 69.

Master's Certificate, or at any time subsequent to his having passed the examination for that Certificate.

Extra Master, Navigation.

60. *Examination in Navigation.*—The Candidate will be required to work out and show the construction of any four of the problems,* prescribed for the Ordinary Certificates and to satisfy the Examiner in the oral subjects prescribed for those Certificates. He must also be prepared to be examined in any of the following subjects, showing the construction of all problems† :—

(*a*) To work a lunar‡ observation by either sun, star, or planet; and to compute the altitudes when they are not given.

(*b*) To find the latitude from double altitudes of the sun or of a star.

(*c*) To determine, from simultaneous observations of two different stars, the position of the ship, and the true bearing of the stars, by Sumner's method. The Candidate may either determine the four longitudes from the two assumed latitudes which will be given, or solve the question in any other way he may choose.

(*d*) To find the error of a chronometer from the altitude of the sun or of a star, observed with an artificial, or with the natural, horizon.

(*e*) To explain clearly in writing the principles of—(1) Great Circle sailing; (2) Windward Great Circle sailing; (3) Composite Great Circle sailing; and their advantages and disadvantages.

(*f*) To show approximately on a terrestrial globe the Great Circle track and the distance from one given position to another; also the latitude and longitude of vertex; and the longitude from vertex; and to explain how the track can then be transferred to a Mercator's chart. Occasionally the Candidate will be required to lay the tract down on a chart.

(*g*) To determine the initial Great Circle course, and the distance, from one given position to another the latitude and longitude of vertex, the longitude from vertex and the latitudes and longitudes through which the Great Circle will pass; laying the track, composite or otherwise, down on a Mercator's chart, and explaining briefly how the course and distance from one point to another on this track is then found. This problem may, subject to the decision of the Examiner, be solved, either by calculation, or by any tables, graphic method, or Great Circle chart, known to and preferred by the Candidate, and it will usually be set so as to leave the choice of method to the Candidate.

(*h*) To draw a figure, and write down the trigonometrical ratios.

(*i*) Right-angled plane trigonometry; deducing and writing down the formula for each computation in the problem given.

(*j*) Oblique-angled plane trigonometry; deducing and writing down the formula, or the rule, for each computation in the problem given.

(*k*) To give Napier's rules for circular parts for the solution of right-angled spherical triangles, explaining clearly how the different angles and sides are considered in deducing the formulæ.

(*l*) Right-angled spherical trigonometry

(*m*) The laws of the deviation of the compass in iron ships. (*See* Appendix K, page 52.)

(*n*) To construct a Mercator's chart.

(*o*) The law of storms. The Candidate to write a paper of what he knows of this subject.

* *See* Board of Trade notice of May 1905 on page 29.

* Either of the chart papers Exn. 9*c*. or Exn. 9*d*. may be given as one of these four problems.

Two or three of these problems may usually be omitted, but all those set in the examination papers given to the Candidate must be worked.

He must be prepared to answer viva voce *questions on the following subjects* :—

(*p*) The leading principles of the construction of the sextant and of the vernier.

(*q*) The civil duties of a Shipmaster in which he will be expected to show a more extensive knowledge than a Candidate for an Ordinary Master's Certificate.

The construction of the problems mentioned above and those in the compass syllabus, must be shown as follows:—

(*a*) A circle should be drawn projected on the plane of the horizon—unless the problem can be shown better otherwise—and a correct figure drawn in it, the magnitude of the sides and angles being estimated approximately by the eye.

(*b*) The sides and angles used in solving the problem should be marked by distinguishing letters in the figure, and the Candidate should for each fresh computation write down clearly what is given and what he is required to find, together with the formula which he proposes to use.

(*c*) Opposite each quantity in the computation he should put the letters denoting the part of the triangle which it represents, writing 'comp' before the letters when the quantity is the complement of that part of the triangle.

Candidates will not be required to enter into the mathematical investigation of the rules and formulæ used in the solution of problems, involving oblique-angled spherical triangles, but credit will be given to any Candidate showing such knowledge. When, however, a problem or part of a problem is solved by right-angled spherical trigonometry, the simple process of deducing the formula from the figure, by Napier's rules for circular parts or other method, must be shown.

Where a problem is solved by right-angled plane trigonometry, the simple process of deducing the formula from the figure for each of the computations in it must be shown.

The rule for finding the latitude by meridian altitude must be proved by the figure.

Extra Master Seamanship.

61. *Examination in Seamanship* —In addition to the qualifications required of an Ordinary Master, the Extra Master will be expected to give satisfactory answers to any questions in practical seamanship that the Examiner may put to him.

Extra certificates, Steamships.

62. Extra Certificates for Steamships will also be issued, subject to the examination described below to Officers who can show the necessary service in Steamships. The certificates will be marked "For Steamships only," and will only entitle the holders to go to sea as Masters of *Steamships*.

The examination is open to all who are qualified to go up for a Certificate as Master of a Foreign-going Steamship, or who have already obtained this Certificate It is open also to Candidates who have failed in the examination for an Extra Master's Certificate to show the requisite knowledge of the management of square-rigged sailing vessels, provided they can prove the necessary amount of Officer's service in Steamship (*see* para. 20).

Extra Master, Steamship, Navigation

63. *Examination in Navigation.*—The examination in navigation for an Extra Master's Certificate for steamships will be precisely the same as that prescribed for an Extra Master's Certificate.

Seamanship.

64. *Examination in Seamanship.*—In addition to the qualifications required of a Master of a Foreign-going Steamship, the Extra Master will be expected to give satisfactory answers to any questions appertaining to the management of a steamship that the Examiner may put to him.

CERTIFICATES FOR PLEASURE YACHTS.

Yacht Certificates.

65. The examination for these Certificates is purely voluntary, and is confined to persons who command their own

sea-going pleasure yachts. A Master of yacht who is not also the sole owner, or who is under 21 years of age, is not eligible for examination.

Description of Certificate.

66. Only one description of Certificate will be issued whether the yacht is foreign-going or cruises within the home trade limits.

The Certificate will not entitle the holder to command any vessel except the pleasure yacht or yachts of which he is at the time the sole owner.

No sea service required.

67. Candidates are not required to have served any specified time afloat, as it is believed that their sea knowledge will be sufficiently tested by the examination they will have to pass in seamanship.

Statutory declaration necessary.

68. Testimonials of service need not be shown, but a Candidate for examination will be required to produce a statutory declaration to the effect (1) that he is sole owner of the yacht; (2) that the yacht is sea-going; (3) that it is not to be used for trading purposes. He will also be required to fill up the form of application (Form Exn. 2) and pay the fee of Rs 24 at the Port Office, as in paragraph 3.

In other respects ordinary regulations apply.

69. In all other respects the regulations relating to examinations of Masters of Foreign-going ships will apply in these cases.

Yacht Master, Navigation.

70. *Examination in Navigation.*—The examination in navigation for a Yacht Master's Certificate will be precisely the same as that prescribed for an Ordinary Master's Certificate, except that in the Civil duties of a Ship Master the Master of a yacht will only be expected to possess a knowledge of what he is required to do by the Merchant Shipping Act.

Yacht Master, Seamanship.

71. *Examination in Seamanship.*—He must give satisfactory answers as to his knowledge of making and taking in sail, and as to the management of a yacht under canvas in moderate and in stormy weather He must have a thorough knowledge of the Rule of the Road at sea as regards both steamers and sailing vessels; their regulation lights, and fog and sound signals; and be able to describe the signals of distress and the signals to be made by ships wanting a Pilot, and the liabilities and penalties incurred by the misuse of these signals He must also understand the use and management of the rocket apparatus in the event of his vessel being stranded. He must be able to mark and use the lead and log lines; to cast a vessel on a lee shore; to moor and unmoor a ship; to keep a clear anchor, and to carry out an anchor. He must know how to keep his vessel out of the trough of the sea in the event of accident; how to rig rafts and jury rudders, &c., and what steps to take if his vessel is disabled or unmanageable and drifting towards a lee shore. He will also be examined as to his resources for the preservation of the crew in the event of wreck. He must also possess a knowledge of the measures he should adopt for preventing and checking an outbreak of scurvy on board, and be prepared to answer any other questions relating to the management of a yacht either steam or sailing which the Examiner may ask

Extra Master, Yachts.

72. EXTRA MASTER OF YACHT.—An Extra Certificate will be issued to the owner of a yacht who either holds, or is qualified to be examined for a Yacht Master's Certificate, subject to the following examination.

Navigation

73. *Examination in Navigation.*—The examination in navigation will be precisely the same as that prescribed for an extra Master's Certificate. (*See* paragraph 60.)

Seamanship

74. *Examination in Seamanship.*—The subjects of examination in Seamanship will be the same as those prescribed for a Yacht Master's Certificate, but the Candidate for an Extra Certificate will be expected to show a more extensive practical knowledge than is required of a Candidate for the Yacht Master's Certificate.

PROVISIONAL CERTIFICATES.

Provisional Certificates

75 Provisional Certificates for Foreign-going ships or for Foreign-going Steamships, according to the Candidate's

qualifications, are granted on the conditions stated below to any officer of the Mercantile Marine who may require such a Certificate to qualify him for appointment to or promotion in the Royal Naval Reserve These Certificates are only issued for Royal Naval Reserve purposes, and do not authorise the holders to go to sea as First Mate or Master.

How to appl.

76. Candidates for these Certificates must apply to the Port Officer of Calcutta, fill up the form of application (Exn 2), and pay the usual fee They must produce their First or Second Mate's Certificates of Competency, and an authority from the Government before they can be examined. This authority should be obtained through the Port Officer.

Provisional Certificates, First Mate

77 *Provisional Certificates as First Mate.*—Provisional Certificates as First Mate are granted to Candidates who can prove that they have served five years at sea, and that during one year of this period they have served in a capacity not lower than Fourth Mate while holding a Second Mate's Certificate. They must pass the usual examination for First Mate and pay the usual fee. The provisional Certificate is exchangeable for the full Certificate as First Mate, without further payment or examination, on production to the Port Officer of satisfactory proofs that the holder has served at sea not less than 12 months in a Foreign going Vessel in a capacity not lower than Fourth Mate, *and that during the whole of that period he has been in regular charge of a Watch* and in possession of a Certificate of Competency as Second Mate.

Provisional Certificates, Master

78. *Provisional Certificates as Master.*—Provisional Certificates as Master are granted to Candidates who can prove not less than six and-a-half years' service at sea, and who pass the usual examination for Master and pay the usual fee. Of this service two and a-half years must have been served in a capacity not lower than Fourth Mate of an Ocean-going Steamship, during the last 12 months of which the Candidate must have been in possession of a full Certificate as First Mate. These Certificates will be exchanged for the full Certificates as Master, without further payment or examination, on production to the Port Officer of satisfactory proofs that the holder has served at sea not less than two and a-half years in a Foreign going Vessel *in charge of a Watch* in a capacity not lower than Fourth Mate, and that during 12 months of this period he has served as Second Mate while in possession of a full Certificate of Competency as First Mate.

VOLUNTARY EXAMINATION IN COMPASS DEVIATION.

Compass deviation.

79. Any person holding a Certificate of any grade in the Foreign or Home Trade, or as Master of his own Pleasure Yacht, who wishes to pass a *voluntary* examination in Compass Deviation,* can at any time be examined upon filling up the usual form of application and paying to the Port Officer the fee of Rs. 12. If the Candidate passes the examination, a note to that effect will be made upon his Certificate.

VOLUNTARY EXAMINATION IN STEAM.†

Examination in steam.

80. These examinations are provided for the purpose of giving Masters and Mates who are possessed of Certificates of Competency an opportunity of undergoing a voluntary examination as to their practical knowledge of the use and working of the steam-engine. They are conducted on the premises, and under the superintendence of the Port Officer at such times as he may appoint for the purpose ; and the Examiners are selected by the Government from the Engineer Surveyors appointed under the Indian Steam Ships' Act, 1884.

*See Appendix K, page 52.
†See also Appendix N, page 60.

Persons eligible.

81. The examination is open to any person who holds a Certificate of any grade in the foreign or home trade, o as master of his own Pleasure Yacht. Candidates should fill up the Form of application, Form (Exn. 2) at the Port Office, pay the fee of Rs. 12 and deposit their Certificates with the Port Officer. The Port Officer will inform the applicant when and where to attend to be examined. If the Candidate fails to pass, his certificate will be at once returned to him.

How to apply

Result of Examination.

82. If he passes, the Report (Exn. 14) will be sent to the Port Officer, and the Certificate together with the Form Exn. 2 will be sent to the Government; the words "certified to have passed in steam," with the date and place of examination, will then be entered on the Certificate and its counterpart, and the certificate will be sent to the Superintendent of the Mercantile Marine Office of the port named in the Form Exn. 2, and be delivered to the Candidate in the usual manner.

In case of failure

83. If a Candidate fails, he may not present himself for re-examination until the expiration of three months from the date of failure.

Character of Examination.

84. The examination is for the most part *viâ voce*, and extends to a general knowledge of the practical use and working of the steam-engine, and of the various valves, fittings, and pieces of machinery connected with it and of the way in which electric lighting is carried out on board ship. Intricate theoretical questions on calculations of horse power or areas of cylinders and valves, or any of the more difficult questions relating to steam-engines and boilers, will not be asked. The examination will in fact be confined to the duties which a master of a steam-vessel may be called upon to performed in the case of the death, incapacity or delinquency of the Engineer.

Practical knowledge required.

85. Examiners are to satisfy themselves that the Candidates know the names and understand the use of the various parts of engines and boilers and their connecting pipes, valves, cocks, &c. Practical knowledge, as distinguished from theories and abstruse calculations, is to be the test of the Candidate's fitness to have his Certificate endorsed.

Examination on boardship.

86. The Examiner should arrange to conduct part of the examination in the engine-room of a Steamship, unless from circumstances, he finds it impossible to do so; but in the event of the Candidate passing, the Examiner should state in writing what circumstances prevented a visit to an engine-room If an opportunity offer, the candidate should be permitted, under the guidance of the Examiner, to start and stop the engine of some vessel which may have her steam up.

Place of Examination to be reported.

87. The Examiner, in sending in his report of the examination, should state where the examination has been held.

Elementary questions to be answered.

88. Candidates will be required to give written answers to sixteen out of twenty questions taken from a book of Elementary Questions published by the Government.* These questions will be altered from time to time without notice. The twenty questions are not to be difficult, theoretical or book questions, but are to be such as any man of ordinary capacity who has any *practical knowledge of the use and working of the steam-engine* ought to answer.

Answers to be sent to Govt.

89. These questions, with the Candidate's answers, should be sent to the Government, with the reports, after each examination.

Copying.

90. If a Candidate refers to any book or paper or memorandum, or obtains information from another Candidate during the examination, he will be treated as having failed, will forfeit his fee, and will not be allowed to be re-examined for a period of three months.

Report on failure.

91. The Examiners will report, in the case of failure, the nature of the question or questions that decided the failure, or the point in the management of the engine in which the Candidate was deficient.

---

*Printed at the end of the Regulations relating to the examination of Engineers, Exn 1A.

92. There is nothing in the regulations requiring that Applicants for the voluntary examination shall have served on board Steamships; all that is required is that they shall have a practical knowledge of the use and working of the steam-engine. Examiners will not fail to appreciate the fact that practical knowledge is best gained in the engine-room; and the examination of an Officer who does not produce official evidence of service in steamships, and of experience of engines, must necessarily be more searching than in the case of one who produces evidence of such service and experience. Service on Steamships not essential.

CERTIFICATES OF SERVICE.

93. A person who has attained the rank of Lieutenant, Sub-Lieutenant, Navigating Lieutenant or Navigating Sub-Lieutenant in His Majesty's Navy, or of Lieutenant in His Majesty's Indian Marine Service, is entitled to a Certificate of Service as Master of a Foreign-going Ship without examination. This Certificate will not entitle the holder to go to sea as Master or Mate, of a Home Trade Passenger Ship. Persons qualified.

94. Applications for Certificates of Service must be made on a printed form, E n. 18, to be obtained free of charge of the Registrar General of Seamen, Custom House, London, E. C, or of the Port Officer. Form of application.

95. Applications for certificates of Service by Officers of the Royal Navy on the active list must be made through their Commanding Officers, and applications from officers of the Royal Navy on half pay must be made to the Secretary of the Admiralty, who will, in either case, forward the application to the Board of Trade How to apply.

Ambulance Certificate, &c.

96. Any person holding a Certificate from the St. John's or St. Andrew's Ambulance Association, as qualified to render first aid to the injured can have the fact stamped on his Board of Trade Certificate or Certificate granted by an authority in British Possession abroad by forwarding the two Certificates to the Government either direct or through the Port Officer. Ambulance Certificates.

Recipients of Government awards can also have the fact stamped on their Certificates on application in a similar manner.

CHAPTER III.

RULES FOR ESTIMATING SEA SERVICE.

97. In these regulations sea service is reckoned from the commencement to the termination of the voyage. The Certificates of Discharge for service in the Foreign Trade will generally be accepted as proof of sea service, but Certificates of Discharge for service in the Home or Coasting Trade must always be sent to the Port Officer for verification. The Port Officer and Examiners will be careful to see that these discharges have not been in any way tampered with, and will report any suspicious cases to the Government. Sea service

98. For Foreign-going Certificates the term "Sea service" means, unless otherwise stated, service performed in Foreign-going Vessels. Sea service for Foreign-going Certificates.

99. For Home Trade Passengers Ship Certificates, service in the Home or Coasting Trade is regarded as equivalent to service in the Foreign Trade; but for Foreign-going Certificates, it is regarded as only equivalent to two-thirds of the time served in the Foreign Trade, except in the case of Indian Coasting Voyages extending beyond a distance of 500 miles from the port of departure in vessels commanded by Masters holding Foreign-going Certificates, when such service will count as foreign voyages, and will be Service in Home Trade.

reckoned as full time; but the time spent in the port of departure or Home Port will not be allowed to count. In all cases the length of service is deemed to commence on the date of sailing from the port of departure or Home Port and to end on the date of arrival at the Home Port. Such service must be vouched for in the form laid down in Appendix P, page 69.

Certificate—Meaning of.

100. By the word "Certificate" is meant a Certificate of Competency granted by the Board of Trade under the Merchant Shipping Act, or by the Government of a British Possession under an Order in Council issued in pursuance of the Merchant Shipping Act. A list of the Colonial Certificates, referred to, will be found in Appendix T, page 76. They are of the same force as the corresponding Certificates granted by the Board of Trade.

Colonial Local Certificates.

101. The holder of a Colonial Certificate for Foreign-going Ship not granted under the Merchant Shipping Act, who desires to be examined for an Imperial Certificate of the same grade, must prove that he has performed the amount of service required by these regulations to entitle him to hold such a Certificate. He must also produce satisfactory testimonials as to character for at least the 12 months immediately preceding his application to be examined.

Foreign going Certificates.

102. Where a Foreign going Certificate is required in order to qualify a Candidate for examination, the Certificate may be either an Ordinary Certificate, or a Certificate for Fore and Aft-rigged Vessels, or a Certificate for Foreign-going Steamships.

Pilot defined.

103. The term "Pilot" in these regulations (*see* paras. 31 and 56) means a pilot who is employed in general pilotage and holds a First Class Pilot's Certificate from some competent authority authorising him to pilot vessels outside harbour and partially smooth water limits. A Hooghly Master Pilot is for the purpose of this rule to be considered as First Class Pilot.

Officer's service.

104. Officer's Service, to be recognised as qualifying for purposes of examination must be performed with the requisite Certificate as specified in Appendix P, page 69. The Officer's service performed by men who have been duly promoted during the course of a voyage (*see* paragraph 108), or who, in consequence of serving in vessels plying between ports abroad, have been unable to obtain the necessary Certificates, may, however, be recognised, provided that it is in other respects satisfactory.

Foreign officers.

105. Foreign Officers who wish to apply for a British Certificate of Competency must in all cases have performed their qualifying Officer's service with the requisite British Certificate. The service may have been performed in Foreign Vessels if the Candidate can produce satisfactory testimonials to conduct and character, and is able to prove that the service has been in the required capacities, and that during the period of service he has held a British Certificate of Competency of the rank required by the regulations (*see* paragraph 110).

In charge of Watch

106. When service "in charge of a Watch" in either the Foreign or Home Trade, is specified in the regulations, the Candidate will have to prove that during the whole of the time claimed he had the *regular* charge of a Watch or Watches, which, if in the Foreign Trade, must amount to not less than 8 hours of each 24 hours of service. It must be distinctly understood that occasional service in charge of a Watch, will not be accepted as Mate's service under the regulations. Great care must be exercised by the Port Officer in regard to such service, and unless the Candidate produces a clear and satisfactory Certificate, specially setting forth the above facts, from the Master or Owner of the Vessels in which the service was performed, it must not be accepted.

Additional Mates.

107. Service as Additional or Auxiliary First or Second Mates, in large Foreign-going vessels when in both cases Third and Forth Mates are also carried, will count as First Mate's or Second Mate's service, as the case may be, provided that the Candidate was entered on the Articles in one of these

capacities, and that he produces the necessary Certificate (see paragraph 106) showing that he was in charge of a watch or watches during the whole time claimed.

Promotion during Voyage.

108. Whenever a man has, from any cause, been regularly promoted, on the occurrence of a vacancy in the course of the Voyage, from the rank in which he first shipped, and such promotion, with the ground on which it has been made, is properly entered in the Articles and in the Official Log Book, he will receive credit for his service in the higher grade for the period subsequent to his promotion.

Officer's Service, Home Trade.

109. Service in a lower grade than First or Only Mate in the Home or Coasting Trade will not be recognised as Officer's service towards qualifying a Candidate for examination for a Foreign Trade Certificate.

Evidence as to Service in Foreign Vessels.

110. The testimonials of service of Foreigners and of British Officers and Seamen serving in foreign vessels, which cannot be verified by the Port Officer, must be confirmed either by the Consul of the country to which the ship in which the Candidate served belonged, or by some other recognised official authority of that country, or by the testimony of some credible person on the spot having personal knowledge of the facts required to be established. The production, however, of such proofs will not of necessity be deemed sufficient. Each case will be decided on its own merits, and, if the sufficiency of the proofs given appears to be at all doubtful, it must be referred to the Government for decision.

Auxiliary Screw Ships.

111. Service in Auxiliary Screw Whaling Ships and in Vessels with auxiliary steam power, which use their screws only in calms or during light winds, is considered as service performed in Sailing Vessels.

Excursion Steamers.

112. In the case of Excursion Steamers only such service as can be proved to have been performed at sea will be accepted.

Service as Carpenter, Sailmaker, Cook, Steward, etc.

113. Candidates whose service has been performed in capacities other than Apprentice, Midshipman, Cadet, Ordinary Seaman, or Able Seaman, *e.g.*, men who have served as Carpenter, or Sailmaker, or as Cook in small vessels where cooking is only a part of a man's duty, will be required to satisfy the Port Officer that they have, during the whole time claimed, performed deck duties in addition to their own particular work, and that they have a good knowledge of Seamanship. These facts may possibly be proved by the production of satisfactory Certificates from the Masters with whom the Applicant has served; but such service will only be accepted as equivalent to two-thirds of the time served as ordinary deck hand. Failing satisfactory evidence, the Applicant will be required to perform additional service in the capacity of Seaman. Service as Cook (under other conditions than the above), or as Steward, or as Purser, will not be accepted.

Service in fishing or Pilot Vessels.

114. Service performed exclusively in Trawlers and other deep sea-fishing vessels or in Pilot Vessels will not qualify a Candidate for examination. He must, in addition, prove the following service:—

(1) For a *Foreign-going Certificate*, service for at least eighteen months in an ordinary trading vessel in the Foreign Trade, or the equivalent period (27 months) in the Home or Coasting Trade.

(2) For a *Home Trade Passenger ship Certificate* service for at least twelve months in an ordinary trading vessel in the Foreign, Home or Coasting Trade.

Service in Yachts.

115. Service in Pleasure Yachts will be accepted as qualifying service under the following conditions:—

(*a*) It must in all cases be verified by satisfactory proofs, which must set forth clearly and in detail the nature and duration of the service claimed, and it must be distinctly understood that only actual sea service will be accepted, and that service in harbour or port is inadmissible.

(*b*) Service in foreign-going Yachts will be accepted in full; and service performed within Home Trade

limits in Sailing Yachts of not less than 50 tons net register or in Steam Yachts of not less than 80 tons gross register will be accepted in the proportion stated in para. 99; but Candidates must also show (1) for a *Foreign-going Certificate*, service for at least eighteen months in an ordinary trading vessel in the Foreign Trade, or for the equivalent period (27 months) in an ordinary trading vessel in the Home or Coasting Trade; (2) for a *Home Trade Passenger Ship Certificate*, service for at least twelve months in an ordinary trading vessel in the Foreign, Home, or Coasting Trade.

(*c*) Service within Home Trade limits in Sailing Yachts of 20 tons net register, or in Steam Yachts of 40 tons gross register, will be accepted towards qualifying a candidate for a Foreign-going Certificate as equivalent to half the same time served in the Foreign Trade, but no amount of such service shall count as more than two years' service in the Foreign Trade, and no such service shall count as Officer's service to qualify Candidates for Foreign-going Certificates.

(*d*) Service within Home Trade limits in Sailing Yachts of not less than 20 tons net register, or in Steam Yachts of not less than 40 tons gross register will be accepted at the ordinary rate as qualifying service for Home Trade Passenger Ship Certificates, but Candidates must prove that they have in addition served for at least twelve months in an ordinary trading vessel in the Foreign, Home or Coasting Trade.

(*e*) Service within Home Trade limits in Sailing Yachts of less than 20 tons net register, or in Steam Yachts of less than 40 tons gross register, will not be accepted as qualifying service for any class of Certificate.

Service in Tugs.

116. Service performed in Tugs employed in Channel Service or outside partially smooth water limits (*see* Appendix S, page 72) may be accepted as sea service for the purpose of qualifying a Candidate for a Mate's or Master's Certificate for Home Trade Passenger Ships

Service in dredgers.

117. Service in Steam Hopper Barges may, subject to the provisions of para. 119, be allowed to count towards qualifying a Candidate for a Mate's Certificate of Competency for Home Trade Passenger Ships, provided the Candidate can prove at least two years' service in an ordinary trading vessel in either the Home, Coasting, or Foreign Trade. Service in these Steam Hoppers will not be accepted as Officer's service towards qualifying a Candidate for a Master's Certificate.

Service in Light-ships or Engine-room.

118. Service in Light-ships or in an Engine-room will not be accepted as sea service.

Service on rivers.

119. Service performed on rivers, no matter of what size, and service performed within smooth or partially smooth water limits (see Appendix S, page 72) will not be accepted.

Where any doubt whatever exists on this point, the Candidate will be required to produce a Certificate from the Master or Owner of the vessel in which the service was performed before the service can be accepted.

Service on Training Ships.

120. Half the time served on board a training ship will be allowed to count as service at sea up to a limit of one year (*i e*, no length of service will be allowed to count as more than one year at sea), provided that the Candidate can produce a Certificate from the Committee that he has conducted himself creditably and passed a good examination in seamanship so far as it is practised in the training ship, as well as in other matters, down to the time of his leaving the ship, but this service will not be regarded as equivalent to service in square-rigged vessels.

Apprentices

121. The *whole* of the time claimed under Indentures of Apprenticeship will be accepted as actual sea service

to qualify under para. 27 for a second Mate's Certificate provided (*a*) that the Indentures have not been cancelled through some fault of the Candidate, but are endorsed by the Owner or Master to whom he was bound, to the effect that he has performed his service faithfully during the time he remained as Apprentice; and (*b*) that the Candidate has served at sea four-fifths of the time claimed, that is to say, has not spent more than one-fifth of the time in Home Ports. In cases where an Apprentice is qualified for examination before the expiration of his Indentures, *e.g.*, where he has had training ship or other sea service prior to being bound, which together with his actual time as Apprentice makes up the required four years, or where his Indentures are for a period of more than four years, a letter from the Owner or Master will be accepted in place of the endorsement referred to above.

In the event of the Candidate being short of the required four-fifths of the time claimed as Apprentice out of the United Kingdom, he will be required to show sufficient additional sea service, either as seaman or junior officer, to make up the four-fifths of the time claimed.

Midshipmen and Cadets.

122. The whole of the time served as midshipman or cadet under indentures will also be accepted subject to the same conditions as those laid down for apprentices; and the same will be the case even when not bound by indentures, provided that the service as midshipman or cadet has been continuous, and that on the date of the termination of the period of service claimed in this capacity the candidate was on articles of agreement, and that he is able to comply with the requirements laid down in the matter of serving or making up the four-fifths period at sea during the time claimed.

Light-house tenders.

123. Service performed in the sea-going Steam Vessels of the Trinity House, of the Commissioners of the Northern Light-houses, or of the Commissioners of Irish Lights, will be accepted as sea service for the purpose of qualifying a Candidate for examination for a Home Trade Passenger Ship Certificate; but for a Foreign-going Certificate a Candidate must show in addition to this service calculated in accordance with paragraph 99 at least twelve months in an ordinary Trading Vessel. In order to qualify a Candidate for an Ordinary Certificate, this twelve months must have been performed in a square-rigged Sailing Vessel. (*See* para. 25.)

Service in Royal Navy.

124. Officers of the Royal Navy are at liberty to apply for Certificates of Service and to be examined for Certificates of Competency in the Mercantile Marine, but the Lords Commissioners of the Admiralty have directed that the applications of officers on the active list should be made through their commanding officers, and that the applications of officers on half-pay should be made to the Secretary of the Admiralty, who, in either case, will forward the application to the Board of Trade. In the case of Royal Marine officers, applications for certificates of service should be made on a printed form Examination 18, which will be supplied free of charge on application to the Director of the Royal Indian Marine. Applicants on duty in India should submit their claims to the Director for transmission to the Government of India and the India Office. Officers on leave in England should submit their claims to the India Office, on the printed form which may be obtained from that office.

The conditions on which Certificates of service are issued are stated at page 19.

Qualifications required of Naval officers.

125. Officers of the Royal Navy or of the Royal Indian Marine who wish to be examined for Certificates of Competency in the Mercantile Marine will be required to prove the following service; and if an officer wishes to obtain the Ordinary Certificate for Foreigngoing Ships, he must prove that at least twelve months of this required period was served under sail alone:—

(*i*) For Second Mate.—The officer must prove four years' service at sea or that he has attained the rank of Acting Sub-Lieutenant.

(*ii*) For Only Mate.—Five years' service at sea.

(*iii*) For First Mate or Master.—The officer must prove that he has attained the rank of Sub-Lieutenant in the Royal Navy, or of Lieutenant in the Royal Indian Marine.

Service in Royal Naval Reserve.

126. Lieutenants, Sub-Lieutenants, and Acting Sub-Lieutenants of the Royal Naval Reserve who perform sea service on board His Majesty's ships will be allowed to count such service as if it had been performed in Foreign-going Merchant Ships; and the service will rank according to the Certificate of Competency held by the Candidate at the time. Midshipmen of the Royal Naval Reserve, possessing a First Mate's Certificate, and temporarily granted the rank of acting Sub-Lieutenant whilst undergoing twelve months' training afloat in the Royal Navy, will only be allowed to count such service as if it had been performed in the capacity of Second Mate of a Foreign-going Merchant Ship with a First Mate's Certificate.

Service in drill and harbourships.

127. If accompanied by a good report, half the time spent in Drill in the Royal Naval Reserve, and in Harbour Ships of the Royal or Colonial Navies, will be allowed to count as sea service, subject to the limit that no such service must amount to more than one-fourth of the time required for the particular grade of Certificate applied for.

CHAPTER IV.

CONDUCT OF THE EXAMINATIONS.

Commencement and duration of examinations.

128. The examinations will commence early in the forenoon, and will be continued from day to day until all the Candidates whose names appear upon the Port Officer's list on the day of examination are examined.

Candidates to be punctual.

129. Candidates are required to appear at the examination room punctually at the time appointed.

Loose paper and books removed.

130. Before commencing the examination, the tables or desks must be cleared of all scraps of paper or books that are not used in the examination, and care should be taken that the Candidates do not bring into the examination room any book or paper.

No strangers admitted.

131. No person will be allowed in the room during the examination, other than those whose duties require them to be present. No instructors will be allowed on the premises.

Books and papers strictly forbidden.

132. Candidates are prohibited from bringing into the examination room, books or papers of any kind whatever. The slightest infringement of this regulation will subject the offender to all the penalties of a failure, and he will not be allowed to present himself for re-examination for a period of three months.

All work to be shown.

133. No Candidate will be allowed to work out his problems on a slate or on waste paper, or to write on the blotting paper supplied for his use in the examination. Violation of this rule will subject the Candidate to all the penalties of a failure.

A sheet of blotting paper should be issued to each Candidate with the first examination paper, and it must be returned to the Examiner when the last paper is completed each day. The Examiner will be careful to see that the blotting paper has not been used by the Candidate in solving his problems or for conveying information to other Candidates.

Instruments are provided.

134. All instruments necessary for use in the examinations are supplied by the Government.

Leaving room or building.

135. No Candidate may leave the examination room without permission and without giving up the paper on which he is engaged. Under no circumstances will a Candidate be allowed to leave the building while the examination is proceeding. Violation of this rule will subject the Candidate to all the penalties of a failure.

Copying, &c., to be prevented.

136. Candidates should be so placed as to prevent one copying from the other, and no communication whatever between the Candidates should be allowed.

Penalty for copying, &c.

137. In the event of any Candidate being discovered referring to any book or paper, or copying from another, or affording any assistance or giving any information to another, or communicating in any way with another, during the time of examination, or copying any part of the problems for the purpose of taking them out of the examination room, he will subject himself to all the penalties of a failure, and will not be allowed to be examined for a period of six months.

Injury to books.

138. If a Candidate defaces, blots, writes in or otherwise injures any book or form belonging to the Board, his papers will be retained until he has replaced the damaged book or document. He will not be allowed to remove the damaged book or document, and will be subjected to all the penalties of a failure.

Silence.

139. Perfect silence is to be preserved in the examination room.

Penalty for breach of rules.

140. Any Candidate violating any of the regulations, or being guilty of insolence to the Examiner, or of disorderly or improper conduct in or about the room, will render himself liable to the postponement of his examination; or if he has passed, to the detention of his Certificate for such period as the Government may direct.

Examination papers, how to be dealt with.

141. The examination papers of Candidates must in all cases be sent to the Port Officer, Calcutta, for his approval, together with the report of the examination on the Form, Exn. 14. Should the envelope containing the examination papers appear to have been opened, or in any way tampered with, the Examiner should, if he thinks it necessary, defer the examination until the following day. In the event of any case of this kind occurring, a full report of the circumstances, and of the steps taken in the matter, should be immediately forwarded to the Port Officer, Calcutta.

Papers to be issued singly.

142. The examination papers should be issued to the Candidates in half sheets only and one at a time. This will prevent a Candidate from spreading out the sheets on the table so as to enable his neighbour to look over the problems. It will also enable the Examiner to look over and report upon the work on one-half sheet, while the Candidate is at work upon another. When the errors are not too numerous, the incorrect problems may be returned to the Candidate for correction, but in no case should the errors be pointed out by the Examiner, neither should any marks be made which would indicate how far or to what extent, the work is incorrect. The incorrect problems are not to be returned to the Candidate for correction a second time, and should more than one of the problems—or two, if the errors are only slight—be still incorrect, this would involve a failure. It must be understood, however, that the day's work, latitude by meridian, altitude of sun and star, chronometer problem by sun and star, and the Sumner problem must always be correct.

Extra hour allowed in certain cases.

143. When, from the large number of the Candidates, it may sometimes be found impossible to look over the work on the day of examination during the office hours, an hour in the morning of the following day may be allotted for the purpose of correcting the problems, but in no case should a Candidate have his problem returned to him for correction after he has made the second attempt.

Extra certificates.

144. In the examinations for Extra Certificates for Foreign-going Ships and for Steamships, the Candidate will be required to complete the whole of his problems and other papers, which must not be returned to the Candidate for correction, but will then be dealt with by the Examiner on the mark system. If the Candidate does not obtain 85 per cent. of the total number of marks allotted for the papers, he will be declared to have failed. (See Appendix Q, page 70.)

Dictation.

145. The examination will commence with not less than a quarter of an hour's dictation to test handwriting and spelling. This, however, is only to be given to those Candidates who present themselves for examination for the first time for a Foreign-going Certificate. The spelling must be reasonably and fairly good, and the writing clear and legible. The spelling and writing of all Candidates must be satisfactory, and in cases where there is any doubt about the ability of a Candidate to spell correctly, he will be specially tested by dictation.

Definitions.

146. The paper of definitions (*see Appendix C, page 31*) is only for those Candidates who present themselves for examination for the first time for a Foreign-going Certificate. In using this paper, the Examiner will place a mark against the questions which he wishes to be answered, not less

than ten questions being so selected. The Candidate will then write against the questions so marked his definition of the terms in a clear and legible hand, and so as to prevent the possibility of any l tter being mistaken, and also draw a rough sketch or diagram opposite to each of the questions to which he has given written answers in further illustration of its meaning. The *viva voce* questions will be asked on the answers given. (See para. 156.)

Compass deviation.

147. In the questions on the Diviation of the Compass (*see Appendix I, page 50*), the Examiner will mark at least twelve of the questions, *including the problems*. The selected questions will be varied frequently, and no two Candidates will have precisely the same questions. The Candidate will be furnished with sheets of the blank ruled paper which is supplied for the purpose, with instructions that he is to write only on one side of the paper, and to answer in a clear and legible hand each of the questions against which a mark is placed, and to commence each answer by writing down the number of the question to which it relates in the margin. In answering question 39 on the tentative method of compass adjustment, the Candidate will be tested by Beall's Compass Deviascope, and it will not therefore be necessary for him to give the written answer and sketches. A Candidate for an Extra Master's Certificate will not be required to answer the questions on Compass Deviation on Form Exn. 7, but will be examined in the Syllabus *shown in Appendix K, page 52*, and with the Compass Deviascope.

Barometer, tides, &c

148. The examination on the Barometer, Thermometer, and Hydrometer, prevailing winds and currents of the globe, Trade routes and Tides will for the present be conducted orally, and the questions asked by the Examiner, which will be constantly varied, will be confined to and based on the information given in the test-books mentioned in Appendix R, page 71. Candidates will be required to have a fair and intelligent knowledge of the contents of those books.

Adjustment of sextant.

149. Particular attention should be paid to the adjustments of the sextant, the examination in which subject will be conducted orally and practically. Every candidate will be examined practically as to his knowledge of the adjustments, and the use of the various screws; he must be able to read correctly off the arc, a supposed index error being given by the Examiner, as additive, as well as reading on the arc in he usual way; he must also be able to find the index error both by the horizon and by the sun.

Corrections.

150. Candidates will find it more convenient, both during the examination and at sea, to correct the declination and other elements from the Nautical Almanac by the hourly differences given in that work; they will thereby render themselves independent of any proportional or logarithmic table for that purpose.

Corrections by tables.

151. The corrections by inspection of tables given in some of the works on navigation, *e.g.*, Tables IX, XI, and XXI in Norie's Epitome, will not be allowed; every correction must appear on the papers of the Candidates.

Minor corrections to be shown

152. All outstanding or minor corrections should appear in the margin of each problem paper, and on the chart papers, and the papers of the Candidate will not be considered complete without these corrections.

Problems are tests

153. Examiners should bear in mind that the problems to be solved are required as tests, and for the purposes of an examination, and not for sea-going or practical purposes alone.

Candidates may use own method.

154. The Candidates will be allowed to work out the various problems according to the method and the tables they have been accustomed to use.

Problems to be varied.

155. All the problems given in the examinations, both for the Ordinary and for the Extra Certificates, will be constantly varied; and the mode of stating the times in the astronomical problems, and the mode of wording and setting these and all other problems will be varied in every possible way, so as to ensure that the Candidate has a proper knowledge of the subject.

156. Candidates are expected not only to give correct written answers to the questions set in the papers, but also to possess an intelligent knowledge of the various subjects prescribed in the regulations. The Examiner will therefore put a few *vivâ voce* questions to the Candidate as the papers are brought up for inspection or during the course of the examination. The questions, which will be based on the papers set, will be such that the Examiner may satisfy himself that the Candidate possesses a real knowledge of what he has written. **Supplementary vivâ voce.**

157. When an Examiner finds it necessary to fail a Candidate in this supplementary *vivâ voce* test, a statement to that effect will be made on the Candidate's examination papers before they are forwarded to the Port Officer, Calcutta. **Failure in supplementary vivâ voce.**

Time allowed.

158. Candidates for Second Mate's Ordinary Certificates must complete the whole of the examination in Navigation in *nine hours*, including the time allowed for writing the definitions on Form Exn. 4*a*, the paper on the *chart*, and the correction of *all* errors and oversights; but *the quarter of an hour's dictation and all* the nautical problems, *excepting the chart paper*, must be completed within six hours, and without the Candidates leaving the premises during that period. **Second Mate.**

159. Candidates for Only and First Mates' Ordinary Certificates must complete the whole of the examination in Navigation in *twelve hours*,* including the time allowed for the papers on the chart; cyclones or revolving storms; and for the correction of all errors and oversights; but the nautical problems *up to and including* (*k*) *of the Syllabus*, prescribed for Only and First Mate must be completed within six hours and without the Candidates leaving the premises during that period. **Only and First Mates.**

160. Candidates for Ordinary Certificates as Master must complete the whole of the examination in Navigation in fifteen hours, including the time allowed for the papers on the chart; compass deviation; cyclones or revolving storms; and for the correction of all errors and oversights; but the problems given, *up to and including* (*k*) *of the Syllabus prescribed for Only and first Mate*, must be completed within six hours, and without the Candidates leaving the premises during that period. **Masters, Ordinary.**

161. Candidates for Certificates for Foreign-going Steamships will be allowed the same amount of time to complete their navigation work as is allowed in the case of Ordinary Certificates. **Time allowed Steamship Certificates.**

162. Candidates for Certificates as Masters of pleasure Yachts will be allowed the same amount of time for completing the examination as the Candidates for Ordinary Masters' Certificates. **Yacht Masters.**

163. Candidates for Home Trade Mates' Certificates must complete the whole of their arithmetical chart, and other papers, within eight hours, and Candidates for Home Trade Masters' Certificates within ten hours. **Home Trade Mates.**

164. The time allowed to Candidates for Extra Certificates to complete the whole of the problems and writings, including the Compass Syllabus, must not exceed 26 hours. **Masters, extra certificates.**

165. A period not exceeding eleven hours will be allowed to Candidates for the completion of the whole of the examination in the Compass Syllabus, including the correction of all errors and oversights in both the problems and writings. **Compass syllabus.**

166. Punctually at the expiration of the prescribed time all papers will be collected whether completed or not If the papers are not completed, the Candidate will be declared to have failed, unless the Port Officer should see fit to lengthen the period in any special case. Where such an extension of time is granted, the case must be fully reported to the Government on the Form Exn. 14. **Papers to be collected punctually.**

* A Candidate who is not applying for a Second Mate's Certificate, and who has not previously passed an examination, may be allowed the time allotted to dictation and writing the definitions on form Exn. 4*a*, in addition to the above.

Viva voce time extra.

167. The periods prescribed in the foregoing paragraphs are not intended to include the time occupied by the *viva voce* part of the examination.

Viva voce time allowed.

168. In the *viva voce* examination a reasonable time should be allowed for the Candidate to give his answers. No assistance should be given or leading question put.

Time allowed for navigation.

169. It is anticipated that few Candidates will require the whole of the time allowed for completing the examination in Navigation, but ample time has been given so that the work may be done carefully and be clear and legible, and to the entire satisfaction of the examiners.

Order of work.

170. Candidates, after finishing the problems required in the various grades on the first day of examination, should proceed, until the end of that day, with such subjects as the definitions, chart, *questions relating to cyclones and compass deviation.*

Sumner problem.

171. The Sumner problem (Exn. 60) must on no account be given out to any of the Candidates on the first day of the examination, but should form the commencement of the Candidates' work on the second day. On completion of this problem the Candidates for Masters' Certificates should proceed with the problems (*a*), (*b*), (*c*) *of the Syllabus for that Grade.*

Degree of precision required.

172. Degree of precision required in the solution of the problems:—

(*a*) Candidates are expected to work out their answers to all problems where the answer required is a latitude, longitude or distance within 1½′ of position from a correct result: in finding the ship's position by Sumner's method a margin of 2½′ will be allowed.

(*b*) In such problems as the "Amplitude" and "Alt.-Azimuth," where the bearing, deviations, &c., only are required, a margin of 3′ or 4′ from a correct result will be sufficiently accurate.

(*c*) Candidates for Ordinary Certificates are not required to correct for *second differences* in taking out the quantities from the Nautical Almanac; and even Candidates for extra Certificates are only required to show that they are acquainted with the method of second differences by correcting the elements for same in the lunar problem.

(*d*) In solving the Time Azimuth problems an answer not exceeding half a degree from the exact result will be sufficiently near. But in all cases the actual latitude, declination, and time used, together with the exact bearing from the North or South as given in the tables, must be clearly shown by the Candidate on his papers.

(*e*) In computing the time at which a given star will be on the observer's meridian, and the name of the stars near the meridian [sections (*b*) and (*c*) of paragraph 32], an approximation only is required, and it will be sufficiently precise if the Candidate works throughout with the nearest minute of time. In computing the approximate meridian altitude of a star [section (*g*)], working throughout with the nearest minute of arc will also be sufficiently close.

(*f*) In interpolating for the correct deviation to be applied in solving the chart questions, it will usually be sufficient if the Candidate works throughout with the nearest degree of deviation taken from the Deviation Card; and even in cases where the deviations may vary but little, the nearest half degree used throughout will be sufficiently precise. It is not necessary that the Candidate should waste his time in solving the course to odd minutes, as is sometimes done.

(*g*) In calculating the correction to apply to Soundings, the Candidate is not required to work to the exact inch, as is sometimes done. It will be sufficient if he brings his answer within half a foot or so of a precise result.

(*h*) In the Lunar problem a difference of 3′ in the longitude from the correct answer as deduced by a rigorous method by spherical trigonometry will be allowed.

It must be clearly understood in reading the foregoing instructions as to the precision required, that they only apply when the work of the Candidate is correct in principle.

No candidate to be examined twice in a week.

173. A Candidate will not be allowed to undergo examination twice in the same week, unless under very special and urgent circumstances the Port Officer should see fit to relax this rule. In that case a special set of problems should be supplied to the Candidate.

Consecutive Office No. 649, Departmental, 1375, Superintendents, 59, Examinations, 2.

BOARD OF TRADE,
MARINE DEPARTMENT.
May 1905.

EXAMINATIONS OF MASTERS AND MATES.

INSTRUCTIONS TO EXAMINERS AND NOTICE TO CANDIDATES.

Extra Masters' Certificates.

ON and after the 1st January 1907, the following alteration will be made in the examination of Extra Masters' Certificates.

The Lunar Problem referred to in paragraph 61(*a*) of the Regulations relating to the examination of Masters and Mates will no longer be set in this examination. In its place a paper on Naval Architecture will be given, the Candidate being required to give written answers to six or ten questions on this subject, and also to satisfy the Examiner in the supplementary *viva voce* test. For the purpose of this examination the Board of Trade have adopted "The Modern Practice of Shipbuilding in Iron and Steel"* as a text-book, from which the questions will be set, and they advise intending Candidates to take this or other books on the subject to sea with them, so that they can sutdy at their leisure.

FRANCIS J. S. HOPWOOD,
Secretary.

WALTER J. HOWELL,
Asstt. Secretary.

APPENDIX A.

EXAMINATION DAYS

For

Places.	Masters and Mates.
Aberdeen*	2nd and 4th Tuesday in each month.
Belfast*	1st and 3rd Tuesday in each month.
Bristol*	2nd Tuesday in each month.
Cardiff*	1st and 5th Tuesday in each month.
Cork	1st and 3rd Tuesday in each month.
Dublin*	2nd and 4th Tuesday in each month.
Dundee*	1st, 3rd, and 5th Tuesday in each month
Glasgow*	1st, 3rd, and 5th Tuesday in each month
Greenock*	2nd and 4th Tuesday in each month.
Hartlepool, West	1st Thursday in each month.
Hull*	2nd and 4th Tuesday in each month.
Leith*	2nd and 4th Tuesday in each month.
Liverpool*	Monday in each week.
London*	Monday in each week. Examination in steam held on Friday in each week.
Newport, Mon*	3rd Tuesday in each month.
Plymouth*	Monday in each week.
Shields, So*	1st, 3rd, and 5th Tuesday in each month.
Southampton	1st and 3rd Thursday in each month.
Sunderland*	2nd and 4th Tuesday in each month.
Swansea*	4th Tuesday in each month.
Calcutta*	1st Monday in January, April, July and October, and 3rd Monday in February, May, August and November.

* At these places examinations for Extra Masters' Certificates are held.
N.B.—The examination days are liable to occasional alteration, and Candidates are therefore advised to ascertain the actual date of examination from the Port Officer.

APPENDIX B.

EXAMINATION DAYS; SIGHT TESTS.

ABERDEEN.—Every Monday, by the Examiner of Masters and Mates.

BELFAST.—Every Saturday morning from 10 to 12 o'clock, by the Examiner of Masters and Mates.

BRISTOL.—Monday in examination week, * by the Examiner of Masters and Mates.

CARDIFF.—Any day, by the Principal Officer of the Board of Trade. Monday in examination week by the Examiner of Master and Mates.

CORK.—Any day, by the Examiner of Masters and Mates.

DUBLIN.—Monday in examination week, by the Examiner of Masters and Mates.

DUNDEE.—Any day, by the Superintendent of the Mercantile Marine Office, or by the Examiner of Masters and Mates.

GLASGOW.—Monday in examination week, by the Examiner of Masters and Mates.

GREENOCK.—Monday in examination week, by the Examiner of Masters and Mates.

GRIMSBY.—Any day, by the Superintendent of the Mercantile Marine Office.

HARTLEPOOL, WEST.—Wednesday or Thursday in examination week, by the Examiner of Masters and Mates.

HULL.—Any day, by the Principal Officer of the Board of Trade. Saturday preceding the examination of Masters and Mates, by the Examiner of Masters and Mates.

LEITH.—Any day, by the Superintendent of the Mercantile Marine Office, or by the Examiner of Masters and Mates.

LIVERPOOL.—Every Thursday, Friday and Saturday, by the Examiner of Masters and Mates.

LONDON (DOCK ST., E).—Every Friday and Saturday, by the Examiner of Masters and Mates.

LONDON (TILBURY, ESSEX).—Any day, by the Superintendent of the Mercantile Marine Office.

LONDON (VICTORIA DOCKS).—Any day, by the Superintendent of the Mercantile Marine Office.

NEWPORT.—Monday in examination week, by the Examiner of Masters and Mates.

NORTH SHIELDS.—Second and fourth Tuesday in each month, by the Principal Officer of the Board of Trade.

PLYMOUTH.—Every Saturday, by the Examiner of Masters and Mates.

* *i.e.*, the week in which Masters and Mates' examinations take place. *See* Appendix A.

APPENDIX B—*concluded.*

SOUTHAMPTON.—Wednesday in examination week, by the Superintendent of the Mercantile Marine Office.
SOUTH SHIELDS.—Monday in examination week, by the Examiner of Masters and Mates.
SUNDERLAND.—Monday in examination week, by the Examiner of Masters and Mates
SWANSEA.—Any day, by the Board of Trade Officer. Monday in examination week, by the Examiner of Masters and Mates.
CALCUTTA.—First Monday in January, April, July and October, and third Monday in February, May, August and November, by the Examiner of Masters and Mates, and any day, by the Port Officer.

APPENDIX C.

DEFINITION PAPER.

THE Candidate is required to write a short definition or answer, accompanied by a rough sketch or diagram, where applicable in the case of so many of the following questions as may be marked with a cross by the Examiner. The Examiner will mark not less than ten. Candidates must write clearly and pay attention to the spelling:—

1. Great circles.
2. Vertex of a great circle.
3. Small circles.
4. Vertical circles.
5. Right angle.
6. Oblique angle.
7. Obtuse angle
8. Spherical angle.
9. Arc.
10. Complement of an arc or angle.
11. Supplement of an arc or angle.
12. The equator.
13. The poles.
14. A meridian.
15. The ecliptic.
16. The Tropics.
17. Equinoctial.
18. The visible horizon.
19. The sensible horizon.
20. The rational horizon.
21. Artificial horizon, and its use.
22. Parallels of latitude.
23. Difference of latitude.
24. Meridional parts.
25. Longitude.
26. Difference of longitude.
27. Departure.
28. Nautical mile.
29. Rhumb line.
30. Prime meridian
31. First point of Aries.
32. Prime vertical.
33. Civil time.
34. Astronomical time.
35. Sidereal time.
36. Mean time.
37. Apparent time
38. Equation of time; why it is used, and when it is at a maximum, and when at a minimum
39. Hour angle of a celestial object
40. Observed altitude.
41. Apparent altitude.
42. True altitude.
43. Zenith distance.
44. Azimuth.
45. Amplitude.
46. Declination.
47. Polar distance.
48. Right ascension.
49. Dip or depression of the horizon.
50. Refraction.
51. Parallax.
52. Semi-diameter.
53. Augmentation of moon's semi-diameter.
54. Magnetic meridian.
55. True course of a ship.
56. Magnetic course.
57. Compass course.
58. Variation of the compass.
59. Deviation of the compass, and how it is caused.
60. The error of the compass.
61. Leeway.
62. Does the variation change with time?
63. Is the variation the same all over the world?
64. Where do you find the variation?
65. Does the deviation change; if so, when?
66. Where is the North magnetic pole situated?
67. Where is the South magnetic pole situated?
68. Should the compass needle point to the magnetic or the true pole of the earth?
69. When is the altitude of an object most seriously affected by refraction?
70. Where is the Pole star situated?
71. Which is the most favourable time for determining the hour angle of a celestial body, and thence the longitude, and state the reason why?
72. Describe the construction of a mariner's compass.
73. Describe an Azimuth compass.
74. Describe a Pelorus, and its use.
75. Describe a Chronometer, and its use

APPENDIX D

INTERNATIONAL CODE OF SIGNALS.

Examiners are recommended to frame the examination in the International Code of Signals upon the instructions and illustrations given at the commencement of Parts I and II of the Signal Book The information there given will be found sufficient to indicate all the characteristics of the Code.

By the form of the hoist, an observer can at sight understand the nature of any signal he sees flying; the examination should, therefore, tend to elicit a clear knowledge of all the distinctive features of the Code.

With this object in view, the Examiners should question the candidates as to the distinguishing forms of the respective hoists, which will be indicated according as a burgee, a pennant, or a square flag is uppermost, and also with regard to the number of flags, and the position of the Code flag when used in the hoist, making the 1, 2, 3 and 4 flag signals on the models supplied for the purpose, and varying the signals made, showing 2 and 3 flag signals, with and without the Code flag included, or a Geographical or a Vocabulary signal, the name of a merchant ship, or of a ship of war.

As the two latter signals would not be found in the Signal Book, the candidate should know where to find them and then be required to read them from the Code List of Ships.

The candidate should—(*a*) Be able to read a signal at sight, so far as to name the flags composing the hoist (*b*) Know the use of the Code pennant and of the pennants C and D, "Yes" and "No," also of the two burgees A and B and the square flags S and P, and the flags used to indicate cholera, plague, &c., on board, and the Quarantine flag. (*c*) Be required to signal some word or words not included in the Vocabulary of the Code either by letters or by the Spelling Table (page 516) or both (*d*) Have a knowledge of the Distant Signals and of their object, and the different modes of signalling therewith, and be required to make, and read off, one or two signals on the models supplied for this purpose (*e*) Understand the Morse Code and know the special signals indicated by certain letters as given on page 550. (*f*) Have a good knowledge of the Distress Signals and understand the penalty which may be incurred by their improper use

The ball being the distinguishing symbol of the Distant Signal, any pennants or flags may be used in conjunction with it irrespective of colour, when employed as an alternative for the cone and drums, but the latter should always be used where practicable.

The International Code is used on board His Majesty's ships, and it has been adopted by all the principal Maritime Powers for their public as well as their private ships.

SEMAPHORES.

Plates 1 and 2, Part II, of the Signal Book explain the method by which the arms of the Semaphore are made to represent by their position with respect to the indicator the four symbols used for distant signalling, viz, a ball, a cone point upwards, a cone point downwards and a drum

Before making signals with the Semaphore, the black disc with a white ring should be placed on the top of the Semaphore mast and the indicator shown on the proper side.

A list of the countries to which messages will be forwarded by the French Semaphore Stations, with the tariff, will be found on page 548 of the Signal Book

Note.—The International Code of Signals, with the Code List, is prepared by the Registrar-General of Shipping and Seamen, and may be obtained of the Publishers, Messrs. Spottiswoode & Co, 54 Gracechurch Street, London, and the principal Booksellers at the various ports

The Official Mercantile Navy List and Maritime Directory, may be obtained in like manner, price 12s.

APPENDIX E.

REGULATIONS FOR PREVENTING COLLISIONS AT SEA.

I. Order in Council of November 27, 1896.

SCHEDULE I.

Preliminary.

These Rules shall be followed by all vessels upon the high seas and in all waters connected therewith, navigable by sea-going vessels.

In the following rules every steam-vessel which is under sail and not under steam is to be considered a sailing vessel, and every vessel under steam, whether under sail or not, is to be considered a steam-vessel.

The word "steam-vessel" shall include any vessel propelled by machinery.

A vessel is "under way" within the meaning of these Rules when she is not at anchor, or made fast to the shore or aground.

Rules concerning Lights, &c.

The word "visible" in these Rules, when applied to lights, shall mean visible on a dark night with a clear atmosphere.

Article 1.—The Rules concerning lights shall be complied with in all weathers from sunset to sunrise, and during such time no other lights, which may be mistaken for the prescribed lights, shall be exhibited.

Article 2.—A steam-vessel when under way shall carry—

(*a*) On or in front of the foremast, or if a vessel without a foremast, then in the fore part of the vessel, at a height above the hull of not less than 20 feet, and if the breadth of the vessel exceeds 20 feet, then at a height above the hull not less than such breadth, so, however, that the light need not be carried at a greater height above the hull than 40 feet, a bright white light, so constructed as to show an unbroken light over an arc of the horizon of 20 points of the compass, so fixed as to throw the light 10 points on each side of the vessel, viz., from right ahead to 2 points abaft the beam on either side, and of such a character as to be visible at a distance of at least 5 miles.

(*b*) On the starboard side a green light so constructed as to show an unbroken light over an arc of the horizon of 10 points of the compass, so fixed as to throw the light from right ahead to two points abaft the beam on the starboard side, and of such a character as to be visible at a distance of at least 2 miles.

(*c*) On the port side a red light so constructed as to show an unbroken light over an arc of the horizon of 10 points of the compass, so fixed as to throw the light from right ahead to 2 points abaft the beam on the port side, and of such a character is to be visible at a distance of at least 2 miles.

(*d*) The said green and red side-lights shall be fitted with inboard screens projecting at least 3 feet forward from the light, so as to prevent these lights from being seen across the bow.

(*e*) A steam-vessel when under way may carry an additional white light similar in construction to the light mentioned in subdivision (*a*). These two lights shall be so placed in line with the keel that one shall be at least 15 feet higher than the other, and in such a position with reference to each other that the lower light shall be forward of the upper one. The vertical distance between these lights shall be less than the horizontal distance.

Article 3.—A steam-vessel when towing another vessel shall, in addition to her side-lights, carry two bright white lights in a vertical line, one over the other, not less than 6 feet apart, and when towing more than one vessel shall carry an additional bright white light 6 feet above or below such lights, if the length of the tow, measuring from the stern of the towing vessel to the stern of the last vessel towed exceeds 600 feet. Each of these lights shall be of the same construction and character, and shall be carried in the same position as the white light mentioned in Article 2 (*a*), except the additional light, which may be carried at a height of not less than 14 feet above the hull.

Such steam-vessel may carry a small white light abaft the funnel or aftermast for the vessel towed to steer by, but such light shall not be visible forward of the beam.

Article 4 (*a*).—A vessel which from any accident is not under command shall carry at the same height as the white light mentioned in Article 2 (*a*), where they can best be seen, and if a steam-vessel, in lieu of that light two red lights, in a vertical line one over the other, not less than 6 feet apart, and of such a character as to be visible all round the horizon at a distance of at least 2 miles, and shall by day carry in a vertical line one over the other, not less than 6 feet apart, where they can best be seen, two black balls or shapes each 2 feet in diameter.

(*b*) A vessel employed in laying or in picking up a telegraph cable shall carry in the same position as the white light mentioned in Article 2 (*a*), and if a steam-vessel, in lieu of that light, three lights in a vertical line one over the other, not less than 6 feet apart. The highest and lowest of these lights shall be red, and the middle light shall be white, and they shall be of such a character as to be visible

all round the horizon, at a distance of at least 2 miles. By day she shall carry in a vertical line, one over the other, not less than 6 feet apart, where they can best be seen, three shapes not less than 2 feet in diameter, of which the highest and lowest shall be globular in shape and red in colour, and the middle one diamond in shape and white.

(*c*) The vessels referred to in this Article, when not making way through the water, shall not carry the side lights, but when making way shall carry them.

(*d*) The lights and shapes required to be shown by this Article are to be taken by other vessels as signals that the vessel showing them is not under command and cannot therefore get out of the way.

These signals are not signals of vessels in distress and requiring assistance. Such signals are contained in Article 31.

Article 5.—A sailing vessel under way, and any vessel being towed shall carry the same lights as are prescribed by Article 2 for a steam-vessel under way, with the exception of the white lights mentioned therein which they shall never carry.

Article 6.—Whenever, as in the case of small vessels under way during bad weather, the green and red side-lights cannot be fixed, these lights shall be kept at hand lighted and ready for use; and shall, on the approach of or to other vessels, be exhibited on their respective sides in sufficient time to prevent collision, in such manner as to make them most visible, and so that the green light shall not be seen on the port side, nor the red light on the starboard side, nor, if practicable, more than 2 points abaft the beam on their respective sides.

To make the use of these portable lights more certain and easy, the lanterns containing them shall each be painted outside with the colour of the light they respectively contain, and shall be provided with proper screens.

Article 7.—Steam-vessels of less than 40, and vessels under oars or sails of less than 20 tons gross tonnage, respectively, and rowing boats, when under way, shall not be obliged to carry the lights mentioned in Article 2 (*a*). (*b*) and (*c*), but if they do not carry them, they shall be provided with the following lights:—

1. Steam-vessels, of less than 40 tons shall carry:

(*a*) In the fore part of the vessel, or on or in front of the funnel where it can best be seen and at a height above the gunwale of not less than 9 feet, a bright white light constructed and fixed as prescribed in Article 2 (*a*), and of such a character as to be visible at a distance of at least 2 miles.

(*b*) Green and red side-lights constructed and fixed as prescribed in Article 2 (*b*) and (*c*), and of such a character as to be visible at a distance of at least 1 mile, or a combined lantern showing a green light and a red light from right-a-head to 2 points abaft the beam on their respective sides. Such lantern shall be carried not less than 3 feet below the white light.

2. Small steam-boats, such as are carried by sea-going vessels, may carry the white light at a less height than 9 feet above the gunwale, but it shall be carried above the combined lantern, mentioned in subdivision 1 (*b*).

3. Vessels under oars or sails, of less than 20 tons, shall have ready at hand a lantern with a green glass on one side and a red glass on the other, which, on the approach of or to other vessels, shall be exhibited in sufficient time to prevent collision, so that the green light shall not be seen on the port side nor the red light on the starboard side.

4. Rowing boats, whether under oars, or sail shall have ready at hand a lantern showing a white light, which shall be temporarily exhibited in sufficient time to prevent collision.

The vessels referred to in this Article shall not be obliged to carry the lights prescribed by Article 4 (*a*) and Article 11, last paragraph.

Article 8.—Pilot vessels, when engaged on their station on pilotage duty, shall not show the lights required for other vessels, but shall carry a white light at the masthead, visible all round the horizon, and shall also exhibit a flare-up light or flare-up lights at short intervals, which shall never exceed 15 minutes.

On the near approach of or to other vessels they shall have their side lights lighted, ready for use, and shall for flash or show them at short intervals, to indicate the direction in which they are heading, but the green light shall not be shown on the port side, nor the red light on the starboard side.

A pilot-vessel of such a class as to be obliged to go alongside of a vessel to put a pilot on board, may show the white light instead of carrying it at the masthead, and may, instead of the coloured lights above-mentioned, have at hand ready for use a lantern with a green glass on the one side and a red glass on the other, to be used as prescribed above.

Pilot vessels, when not engaged on their station on pilotage duty shall carry lights similar to those of other vessels of their tonnage.

*Article 9.**

* *This Article will deal with regulations affecting fishing boats, and will be the subject of another order, which will be submitted to His Majesty for approval at a later date.*

Article 10.—A vessel which is being overtaken by another shall show from her stern to such last-mentioned vessel a white light or a flare-up light.

The white light required to be shown by this Article may be fixed and carried in a lantern, but in such case the lantern shall be so constructed, fitted, and screened that it shall throw an unbroken light over an arc of the horizon of 12 points of the compass, viz., for 6 points from right aft on each side of the vessel so as to be visible at a distance of at least 1 mile Such light shall be carried as nearly as practicable on the same level as the side lights.

Article 11.—A vessel under 150 feet in length, when at anchor, shall carry forward, where it can best be seen, but at a height not exceeding 20 feet above the hull, a white light in a lantern so constructed as to show a clear uniform and unbroken light visible all round the horizon at a distance of at least 1 mile.

A vessel of 150 feet or upwards in length, when at anchor, shall carry in the forward part of the vessel, at a height of not less than 20, and not exceeding 40 feet above the hull, one such light and at or near the stern of the vessel and at such a height that it shall be not less than 15 feet lower than the forward light, another such light.

The length of a vessel shall be deemed to be the length appearing, in her certificate of registry.

A vessel aground in or near a fair way shall carry the above light or lights and the two red lights prescribed by Article 4 (*a*).

Article 12.—Every vessel may, if necessary, in order to attract attention, in addition to the lights which she is by these rules required to carry, show a flare-up light or use any detonating signal that cannot be mistaken for a distress singal

Article 13.—Nothing in these Rules shall interfere with the operation of any special rules made by the Government of any nation with respect to additional station and signal lights for two or more ships of war or for vessels sailing under convoy, or with the exhibition of recognition signals adopted by ship owners, which have been authorised by their respective Governments and duly registered and published.

Article 14.—A steam-vessel proceeding under sail only, but having her funnel up, shall carry in day time, forward, where it can best be seen, one black ball or shape 2 feet in diameter.

Sound Signals for Fog, etc.

Article 15.—All signals prescribed by this Article for vessels under way shall be given :

1. By "steam-vessels" on the whistle or siren.
2. By "sailing vessels and vessels towed" on the fog-horn.

The words "prolonged blast" used in this Article, shall mean a blast of from 4 to 6 seconds' duration.

A steam-vessel shall be provided with an efficient whistle or siren, sounded by steam or some substitute for steam, so placed that the sound may not be intercepted by any obstruction, and with an efficient fog-horn, to be sounded by mechanical means, and also with an efficient bell.* A sailing vessel of 20 ton sgross tonnage or upwards shall be provided with a similar fog-horn and bell.

In fog, mist, falling snow or heavy rain-storms, whether by day or night the signals described in this Article shall be used as follows, viz. :—

(*a*) A steam-vessel having way upon her, shall sound, at intervals of not more than 2 minutes, a prolonged blast.

(*b*) A steam-vessel under way, but stopped and having no way upon her, shall sound at intervals of not more than 2 minutes, 2 prolonged blasts, with an interval of about 1 second between them.

(*c*) A sailing-vessel under way shall sound, at intervals of not more than 1 minute, when on the starboard tack one blast, when on the port tack two blasts in succession, and when with the wind abaft the beam three blasts in succession.

(*d*) A vessel, when at anchor, shall, at intervals of not more than 1 minute, ring the bell rapidly for about 5 seconds.

(*e*) A vessel, when towing a vessel employed in laying or in picking up a telegraph cable, and a vessel under way, which is unable to get out of the way of an approaching vessel through being not under command, or unable to manœuvre as required by these Rules shall, instead of the signals prescribed in subdivisions (*a*) and (*c*) of this Article, at intervals of not more than 2 minutes, sound three blasts, in succession, viz., one prolonged blast followed by two short blasts. A vessel towed may give this signal and she shall not give any other.

Sailing vessels and boats of less than 20 tons gross tonnage shall not be obliged to give the above-mentioned signals, but if they do not, they shall make some other efficient sound-signal at intervals of not more than 1 minute.

* In all cases where the Rules require a bell to be used, a drum may be substituted on board Turkish vessels, or a gong where such articles are used on board small sea-going vessels.

Speed of ships to be Moderate in Fog, etc.

Article 16.—Every vessel shall in a fog, mist, falling snow, or heavy rain-storms, go at a moderate speed having careful regard to the existing circumstances and conditions.

A steam-vessel hearing, apparently forward of her beam the fog-signal of a vessel the position of which is not ascertained, shall, so far as the circumstances of the case admit, stop her engines, and then navigate with caution until danger of collision is over.

STEERING AND SAILING RULES.

Preliminary—Risk of Collision.

Risk of collision can, when circumstances permit, be ascertained by carefully watching the compass bearing of an approaching vessel. If the bearing does not appreciably change such risk should be deemed to exist.

Article 17.—When two sailing vessels are approaching one another so as to involve risk of collision, one of them shall keep out of the way of the other, as follows, viz.:—

(*a*) A vessel which is running free shall keep out of the way of a vessel which is close-hauled.

(*b*) A vessels which is close-hauled on the port tack shall keep out of the way of a vessel which is close-hauled on the starboard tack.

(*c*) When both are running free, with the wind on different sides, the vessels which has the wind on the port side shall keep out of the way of the other.

(*d*) When both are running free, with the wind on the same side, the vessel which is to windward shall keep out of the way of the vessel which is to leeward.

(*e*) A vessel which has the wind aft shall keep out of the way of the other vessel.

Article 18.—When two steam-vessels are meeting end on, or nearly end on so as to involve risk of collision, each shall alter her course to starboard, so that each may pass on the port side of the other.

This Article only applies to cases where vessels are meeting end on, or nearly end on, in such a manner as to involve risk of collision, and does not apply to two vessels which must, if both keep on their respective courses, pass clear of each other.

The only cases to which it does apply are when each of the two vessels is end on, or nearly end on, to the other; in other words, to cases in which, by day, each vessels sees the masts of the other in a line, or nearly in a line, with her own; and, by night, to cases in which each vessel is in such a position as to see both the side-lights of the other.

It does not apply, by day, to cases in which a vessel sees another ahead crossing her own course; or, by night, to cases where the red light of one vessel is opposed to the red light of the other, or where the green light of one vessel is opposed to the green light of the other, or where a red light without a green light, or a green light without a red light, is seen ahead, or where both green and red lights are seen anywhere but ahead.

Article 19.—When two steam-vessels are crossing, so as to involve risk of collision, the vessel which has the other on her own starboard side shall keep out of the way of the other.

Article 20.—When a steam-vessel and a sailing-vessel are proceeding in such directions as to involve risk of collision, the steam-vessel shall keep out of the way of the sailing-vessel.

Article 21.—Where by any of these Rules one of two vessels is to keep out of the way, the other shall keep her course and speed.

Note.—When, in consequence of thick weather or other causes, such vessel finds herself so close that collision cannot be avoided by the action of the giving-way vessel alone, she also shall take such action as will best aid to avert collision. (See Articles 27 and 29.)

Article 22.—Every vessel which is directed by these Rules to keep out of the way of another vessels shall, if the circumstances of the case admit, avoid crossing ahead of the other.

Article 23.—Every steam-vessel, which is directed by these Rules to keep out of the way of another vessel, shall, on approaching her, if necessary, slacken her speed or stop or reverse.

Article 24.—Notwithstanding anything contained in these Rules, every vessel, overtaking any other, shall keep out of the way of the overtaken vessel.

Every vessel coming up with another vessel from any direction more than two points abaft her beam, *i. e.*, in such a position, with reference to the vessel which she is overtaking that at night she would be unable to see either of that vessel's side-lights, shall be deemed to be an overtaking vessel; and no subsequent alteration of the bearing between the two vessels shall make the overtaking vessel a crossing vessel within the meaning of these Rules or relieve her of the duty of keeping clear of the overtaken vessel until she is finally past and clear.

As by day the overtaking vessel cannot always know with certainty whether she is forward of or abaft this direction from the other vessel, she should, if in doubt, assume that she is an overtaking vessel and keep out of the way.

Article 25.—In narrow channels every steam-vessel shall, when it is safe and practicable, keep to that side of fair way or mid channel which lies on the starboard side of such vessel.

Article 26.—Sailing-vessels under way shall keep out of the way of sailing vessels or boats fishing with nets or lines, or trawls. This rule shall not give to any vessel or boat engaged in fishing the right of obstructing a fairway used by vessels other than fishing vessels or boats.

Article 27.—In obeying and construing these rules, due regard shall be had to all dangers of navigation and collision, and to any special circumstances which may render a departure from the above rules necessary in order to avoid immediate danger.

Sound Signals for Vessels in Sight of one another.

Article 28.—The words "short blast" used in this Article shall mean a blast of about one second's duration.

When vessels are in sight of one another, a steam-vessel under way, in taking any course authorized or required by these rules, shall indicate that course by the following signals on her whistle or siren, viz:—

One short blast to mean, "I am directing my course to starboard."

Two short blasts to mean, "I am directing my course to port."

Three short blasts to mean, "My engines are going full speed astern.

No Vessel under any Circumstances to neglect proper Precautions.

Article 29.—Nothing in these rules shall exonerate any vessel, or the owner, or master, or crew, thereof, from the consequences of any neglect to carry lights or signals, or of any neglect to keep a proper look-out or of the neglect to any precaution which may be required by the ordinary practice of seamen, or by the special circumstances of the case.

Reservation of Rules for Harbours and Inland Navigation.

Article 30.—Nothing in these rules shall interfere with the operation of a special rule, duly made by local authority, relative to the navigation of any harbour, river, or inland waters.

SCHEDULE II.

*Distress Signals.**

Article 31.—When a vessel is in distress and requires assistance from other vessels or from the shore, the following shall be the signals to be used or displayed by her, either together or separately, viz.:—

In the day time—

1. A gun or other explosive signal fired at intervals of about a minute;
2. The International Code signal of distress indicated by N. C;
3. The distance signal, consisting of a square flag, having either above or below it a ball or anything resembling a ball;†
4. A continuous sounding with any fog-signal apparatus.

At night—

1. A gun or other explosive signal fired at intervals of about a minute;
2. Flames on the vessel (as from a burning tar-barrel, oil-barrel etc.);
3. Rockets or shells, throwing stars of any colour or description fired one at a time, at short intervals;
4. A continuous sounding with any fog-signal apparatus.

*If a master of a vessel uses or displays, or causes or permits any person under his authority to use or display, any of those signals of distress, except in case of a vessel being in distress, he shall be liable to pay compensation for any labour undertaken, risk incurred, or loss sustained in consequence of that signal having been supposed to be a signal of distress, and that compensation may, without prejudice to any other remedy, be recovered in the same manner in which salvage is recoverable [Merchant Shipping Act, Section 434(2)].

†A further distress signal is provided in the new International Code of Signals It is a distant signal consisting of a cone point upwards having either above it or below it a ball or anything resembling a ball. This signal has not been sanctioned by order in Council under the provisions of section 434 of the Merchant Shipping Act, 1894.

2. Fishing vessels' lights. Article 10 of the order in Council of August 11th, 1884.

Article 10.—Open boats and fishing-vessels of less than 20 tons net registered tonnage, when under way and when not having their nets, trawls, dredges, or lines in the water, shall not be obliged to carry the coloured side lights; but every such boat and vessel shall in lieu thereof have ready at hand a lantern with a green glass on the one side, and a red glass on the other side, and on approaching to or being approached by another vessel such lantern shall be exhibited in sufficient time to prevent collision, so that the green light shall not be seen on the port side nor the red light on the starboard side.

The following portion of this Article applies only to fishing-vessels and boats when in the sea off the coast of Europe lying north of Cape Finisterre :—

(*a*) All fishing-vessels and fishing-boats of 20 tons net registered tonnage or upwards, when under way and when not required by the following regulations in this Article to carry and show the lights therein named shall carry and show the same lights as other vessels under way.

(*b*) All vessels when engaged in fishing with drift nets shall exhibit two white lights from any part of the vessel where they can be best seen. Such lights shall be placed so that the vertical distance between them shall be not less than 6 feet and not more than 10 feet; and so that the horizontal distance between them measured in a line with the keel of the vessel shall be not less than 5 feet and not more than 10 feet. The lower of these two lights shall be the more forward, and both of them shall be of such a character, and contained in lanterns of such construction as to show all round the horizon, on a dark night with a clear atmosphere, for a distance of not less than three miles.

(*c*) A vessel employed in line fishing with her lines out shall carry the same lights as a vessel when engaged in fishing with drift nets.

(*d*) If a vessel when fishing becomes stationary in consequence of her gear getting fast to a rock or other obstruction, she shall show the light and make the fog-signal for a vessel at anchor.

(*e*) Fishing-vessels and open boats may at any time use a flare-up in addition to the lights which they are by this Article required, to carry and show. All flare-up lights exhibited by a vessel when trawling, dredging, or fishing with any kind of drag net shall be shown at the after part of the vessel, excepting that if the vessel is hanging by the stern to her trawl, dredge, or drag net, they shall be exhibited from the bow.

(*f*) Every fishing-vessel and every open boat when at anchor between sunset and sunrise shall exhibit a white light visible all round the horizon at a distance of at least one mile.

(*g*) In fog, mist, or falling snow, a drift net vessel attached to her nets and a vessel when trawling, dredging or fishing with any kind of drag net, and a vessel employed in line fishing with her lines out, shall at intervals of not more than two minutes make a blast with her fog horn and ring her bell alternately.

---

3. ORDERS IN COUNCIL OF 30TH DECEMBER 1884 AND 24TH JUNE 1885.

ALTERNATIVE LIGHT FOR TRAWLERS WHEN ENGAGED IN TRAWLING HAVING THEIR TRAWLS IN THE WATER AND NOT BEING STATIONARY.

1884—PART I—STEAM-VESSELS OF 20 TONS GROSS REGISTER TONNAGE OR UPWARDS.

(1) On or in front of the foremost head and in the same position as the white light which other steam-ships are required to carry, a lantern showing a white light ahead, a green light on the starboard side and a red light on the port side; such lantern shall be so constructed, fitted, and arranged as to show an uniform and unbroken white light over an arc of the horizon of four points of the compass, a uniform and unbroken green light over an arc of the horizon of 10 points of the compass, and a uniform and unbroken red light over an arc of the horizon of 10 points of the compass, and it shall be so fixed as to show the white light from right ahead to two points on the bow on each side of the ship, the green light from two points on the starboard bow to four points abaft the beam on the starboard side, and the red light from two points on the port bow to four points abaft the beam on the port side: (2) a white light in a globular lantern of not less than 8 inches in diameter, and so constructed as to show a clear uniform and unbroken light all round the horizon; the lantern containing

such white light shall be carried lower than the lantern showing the green, white, and red lights as aforesaid; so, however, that the vertical distance between them shall not be less than 6 feet and not more than 12 feet.

1884—PART II—SAILING VESSELS OF 20 TONS NET REGISTER TONNAGE OR UPWARDS.

(1) On or in front of the foremast head a lantern having a green glass on the starboard side and a red glass on the port side, so constructed, fitted, and arranged that the red and green do not converge, and so as to show a uniform and unbroken green light over an arc of the horizon of 12 points of the compass, and a uniform and unbroken red light over an arc of the horizon of 12 points of the compass, and it shall be so fixed as to show the green light from right ahead to four points abaft the beam on the starboard side, and the red light from right ahead to four points abaft the beam on the port side; and (2) a white light in a globular lantern of not less than 8 inches in diameter, and so constructed as to show a clear uniform and unbroken light all round the horizon; the lantern containing such white light shall be carried lower than the lantern showing the green and red lights as aforesaid; so, however, that the vertical distance between them shall not be less than 6 feet and not more than 12 feet.

1885.—SAILING TRAWLERS OF ANY TONNAGE.

As regards sailing-vessels engaged in trawling, such vessels having their trawls in the water and not being stationary in consequence of their gear getting fast to a rock or other obstruction, if they do not carry and show the lights carried by sailing-vessels under way, or the other lights of the description set forth in Part 2 of the schedule to the order in Council of the 30th of December, 1884, shall carry and show, in lieu of these lights, other lights as follows, that is to say:—

A white light in a globular lantern of not less than 8 inches in diameter, and so constructed as to show a clear uniform and unbroken light all round the horizon, and visible on a dark night, with a clear atmosphere, for a distance of at least 2 miles; and also a sufficient supply of red pyrotechnic lights which shall each burn for at least 30 seconds and shall, when so burning, be visible for the same distance under the same conditions as the white light. The white light shall be shown from sunset to sunrise, and one of the red pyrotechnic lights shall be shown on approaching, or on being approached by another ship or vessel in sufficient time to prevent collision.

---

4. ORDER IN COUNCIL OF 7TH JULY 1897.

LIGHTS TO BE CARRIED BY STEAM PILOT VESSELS.

A steam pilot vessel exclusively employed for the service of Pilots licensed or certified by any Pilotage Authority or the Committee of any Pilotage District in the United Kingdom, when engaged on her station on pilotage duty, and in British waters and not at anchor, shall, in addition to the lights required for all pilot boats, carry at a distance of eight feet below her white masthead light a red light visible all round the horizon, and of such a character as to be visible on a dark night, with a clear atmosphere, at a distance of at least two miles, and also the coloured side lights required to be carried by vessels when under way.

When engaged on her station on pilotage duty and in British waters and at anchor, she shall carry, in addition to the light required for all pilot boats, the red light above mentioned, but not the coloured side lights.

When not engaged in her station on pilotage duty, she shall carry the same lights as other steam vessels.

EXAMINATION IN THE REGULATIONS FOR PREVENTING COLLISIONS AT SEA.

All applicants for examination, whether for Certificates as Masters or Mates, are to be examined as to their knowledge of the Regulations each time they present themselves for examination.

Questions suggested by the following heads of examination are to be asked in addition to, and are not to supersede, any other questions proper and necessary, to be asked by the Examiner.

The following questions need not be adhered to literally by the Examiner, and are not all to be asked; but the substance of the leading questions should be asked, and all that are asked should be satisfactorily answered, before an applicant is reported to have passed his examination. The Examiner should make such selection of the questions as each case appears to him to require.

1. Where and by what vessels are the rules to be followed?

The rules are to be followed by all vessels upon the high seas and in all waters connected therewith, navigable by sea-going vessels.

2. When is the steam-vessel considered a sailing-vessel, and when a steam-vessel?

Under the rules every steam-vessel which is under sail and not under steam is to be considered a sailing-vessel, and every vessel under steam, whether under sail or not, is to be considered a steam-vessel.

3. What does the word "steam-vessel" in the rules include?

The word "steam-vessel" as used in the rules includes any vessel propelled by machinery.

4. When is the vessel considered to be under way by these rules

When she is not at anchor, or made fast to the shore, or aground.

5. What does the word "visible" in these rules, when applied to lights, mean?

Visible on a dark night with a clear atmosphere.

6. During what time must the rules, concerning lights be complied with?

In all weathers from sunset to sunrise, and during such time no other lights which may be mistaken for the prescribed lights shall be exhibited.

7. What light or lights are required by the regulations to be exhibited by sailing-vessels at anchor?

If they are under 150 feet in length, one white light; if of 150 feet or upwards, two white lights, one forward and one aft.

8. What light or lights are required by the regulations to be exhibited by steam-ships at anchor?

The same as for sailing-vessels.

9. where is the anchor light to be exhibited in a vessel under 150 feet in length?

Forward where it can best be seen. It must be placed where there is the least chance of obstruction from spars, ropes, &c.' and must not be more than 20 feet above the hull.

10. Where must the two anchor lights be shown in vessels of 150 feet and upwards?

In vessels of 150 feet or upwards in length one light must be carried in the forward part of the vessel at a height of not less than 20 feet and more than 40 feet above the hull; and another light at or near the stern not less than 15 feet lower than the forward light.

11. In what direction or directions must the anchor lights show?

They must show a clear, uniform, and unbroken light, visible all round the horizon.

12. At what distance must they be visible?

At least one mile.

13. What shall be deemed to be the length of a vessel?

The length appearing in the certificate or registry.

14 What light or lights must a vessel aground in or near a fairway carry?

The light or lights prescribed for a vessel at anchor, and in addition the two red lights prescribed for a vessel not under command.

15. What is the number of lights required by the regulations to be carried by sailing ships when under way at night?

Two side lights, and to have in readiness a white light or a flare-up light to show from their stern to any vessel overtaking them.

16. Of what colour are these lights, and how are they to be placed on board the ship?

A green light on the starboard side, and a red light on the port side.

17. What description of lights must be shown from the sides of sailing vessels under way; and over how many points of the compass, and in what directions, and how far, are they required to show?

Each light must be so constructed as to show an unbroken light over an arc of the horizon of 10 points of the compass; so fixed as to throw the light from right ahead to two points abaft the beam on the starboard and port sides, respectively; and of such a character as to be visible at a distance of at least two miles.

18. What lights are they to carry when being towed at night?

The same.

19. Are the side lights required to be fitted with screens; and if so, of what length, and how?

Yes, on the inboard side; at least 3 feet in length, measuring forward from the light so as to prevent the lights from being seen across the bow.

20. What is the number of lights required by the regulations to be carried by steam-vessels when under way at night.

Three lights, and to have in readiness a white light or flare-up light to show from their stern to any vessel overtaking them.

21. Of what colour are these lights, and how are they to be placed on board the ship?

A white light on or in front of the foremast, or if a vessel without a foremast, then in the forepart of the vessel at a height above the hull of not less than 20 feet, and if the breadth of the vessel exceeds 20 feet, then at a height above the hull not less than such breadth, so, however, that the light need not be carried at a greater height than 40 feet. A green light on the starboard side, and a red one on the port side.

22. Over how many points of the compass, in what direction and how far, is the foremast-head light of a steam-vessel required to show?

Over 20 points, viz., from right ahead to two points abaft the beam on each side. It must be of such a character as to be visible at a distance of at least five miles.

23. Are the side lights required to be fitted with screens; and if so, of what length?

The green and red lights are to be fitted with screens on the inboard side, extending at least 3 feet forward from the light, so as to prevent these lights from being seen across the bow.

24. Over how many points of the compass, in what directions, and how far, are the coloured side lights of steam-vessels required to show?

The side lights must be so constructed as to show an unbroken light over an arc of the horizon of 10 points of the compass, on each side of the ship, *i.e.*, from right ahead to two points abaft the beam on the starboard and port sides, respectively, and of such a character as to be visible at a distance of at least two miles.

25. May a steam-vessel when under way carry any additional light or lights?

Yes. A steam-vessel may carry a similar white light to the masthead light. These two lights must be so placed in line with the keel, that one shall be at least 15 feet higher than the other, and the lower light shall be forward of the upper one, and that the vertical distance between them shall be less than the horizontal distance.

26. What description of lights are steam-vessels required to carry when they are not under steam, but under sail only?

Side lights only, the same as sailing-vessels.

27. What exceptional lights may small vessels carry?

Whenever, as in the case of small vessels during bad weather, the green and red side lights cannot be fixed, these lights shall be kept at hand, lighted and ready for use; and shall, on the approach of or to other vessels, be exhibited on their respective sides in sufficient time to prevent collision, in such manner as to make them most visible, and so that the green light shall not be seen on the port side, nor the red light on the starboard side; nor, if practicable, more than two points abaft the beam on their respective sides.

To make the use of these portable lights more certain and easy, the lanterns containing them shall each be painted outside with the colour of the light they respectively contain, and shall be provided with proper screens.

28. Are steam-vessels of less than 40 tons gross tonnage compelled to carry the same lights as other steam-vessels; if not, what lights may they carry instead?

No; but if they do not carry the ordinary lights they must carry in the forepart of the vessel or on or in front of the funnel where it can best be seen, and at a height above the gunwale of not less than 9 feet, a bright white light to show over the same arc as the ordinary masthead light, and to be visible at a distance of at least two miles. Also a combined lantern showing a green light and a red light from right ahead to two points abaft the beam on their respective sides, such lantern to be carried not less than 3 feet below the white light.

29 Are small steam boats, such as are carried by sea-going vessels obliged to carry the white light 9 feet above the gunwale?

No; but it must be carried above the combined lantern.

30. What lights may vessels under oars or sails of less than 20 tons gross tonnage carry?

They shall have ready at hand a lantern with a green glass on one side and a red glass on the other, which, in the approach of or to other vessels, shall be exhibited in sufficient time to prevent collision, so that the green light shall not be seen on the port side nor the red light on the starboard side.

31. What lights must rowing boats, whether under oars or sails, carry?

They must have ready at hand a lantern showing a white light which shall be temporarily exhibited in sufficient time to prevent collision.

32. What description of lights are pilot vessels required to carry when on their stations on pilotage duty?

A pilot vessel, when engaged on her station on pilotage duty shall not show the lights required for other vessels, but shall carry a white light at the masthead, visible all round the horizon and shall also exhibit a flare-up light or flare-up lights at short intervals, which shall never exceed fifteen minutes. Also on the near approach of or to other vessels they shall have their side lights lighted ready for use and shall flash or show them at short intervals, to indicate the direction in which they are heading but the green light shall not be shown on the port side nor the red light on the starboard side.

33. What lights may pilot vessels which are obliged to go alongside of a vessel to put a pilot on board, carry?

They may show the white light instead of carrying it at the masthead, and may, instead of the coloured side lights, have at hand ready for use a lantern with a green glass on the one side and a red glass on the other, to be used as prescribed for the colour side lights.

34. What description of lights are steam pilot vessels required to carry when on their stations on pilotage duty in British waters and not at anchor?

A steam pilot vessel, when engaged on her station on pilotage duty and in British waters, and not at anchor, shall, in addition to the lights required for all pilot vessels, carry at a distance of 8 feet below her white masthead light a red light visible all round the horizon for at least two miles, and also the coloured side lights required to be carried by vessels under way.

35. What description of lights are steam pilot vessels required to carry when on their stations on pilotage duty in British waters, and at anchor ?

A steam pilot vessel, when engaged on pilotage duty in British waters and atd anchor, shall carry, in addition to the lights required for all pilot vessels, the red light 8 feet below her white light, but not the coloured side lights.

36. What description of lights are pilot vessels required to carry when not on their station on pilotage duty ?

A pilot vessel, when not engaged on her station on pilotage duty, shall carry lights similar to those of other vessels of her tonnage.

37. What lights are open boats and fishing vessels of less than 20 tons net register required to carry when under way and not actually engaged in fishing ?

Open boats and fishing-vessels of less than 20 tons net registered tonnage, when under way and when not having their nets, trawls, dredgers, or lines in the water, shall not be obliged to carry the coloured side lights, but every such boat and vessel shall in lieu thereof have ready at hand a lantern with a green glass on the one side and a red glass on the other side, and on approaching to or being approached by another vessel, such lantern shall be exhibited in sufficient time to prevent collision, so that the green light shall not be seen on the port side nor the red light on the starboard side

38 What lights are fishing-vessels and fishing-boats of 20 tons net register, or upwards, required to carry when under way and not actually engaged in fishing ?

They must carry similar lights to those of other ships when under way.

39. What lights are steam trawlers of 20 tons gross register, or upwards, whilst actually engaged in trawling, and not being stationary, required to carry ?

All steam-vessels engaged in trawling must carry either one of the two following arrangements of lights .—

(*a*) The usual green and red side lights, and foremast head light, similar to those carried by other steamships, or

(*b*) They must carry on or in front of the foremast head, and in the same position as the white light which other steamships are required to carry, a lantern showing a white light ahead, a green light on the starboard side, and a red light on the port side, such lantern shall be so constructed, fitted, and arranged as to show a uniform and unbroken white light over an arc of the horizon of four points of the compass a uniform and unbroken green light over a arc of the horizon of 10 points of the compass, and an uniform and unbroken red light over an arc of the horizon of 10 points of the compass, and it shall be so fixed as to show the white light from right ahead to two points on the bow on each side of the ship, the green light from two points on the starboard bow to four points abaft the beam on the starboard side, and the red light from two points on the port bow to four points abaft the beam on the port side: and (2) a white light in a globular lantern of not less than eight inches in diameter, and so constructed as to show a clear, uniform, and unbroken light all round the horizon, the lantern containing such white light shall be carried lower than the lantern showing the green, white, and red lights as aforesaid, so, however, that the vertical distance between them shall not be less than 6 feet nor more than 12 feet

(40) What lights are sailing trawlers, whilst actully engaged in trawling. and not being stationary, required to carry ?

All sailing vessels, of whatever tonnage, whilst engaged in trawling, must carry either one of the three following arrangements of lights —

(*a*) They may carry the green and red side lights similar to those of other sailing ships, or

(*b*) They may carry on, or in front of the foremast head, a lantern having a green glass on the starboard side and a red glass on the port side, so constructed, fitted, and arranged that the red and green do not converge, and so as to show a uniform and unbroken green light over an arc of the horizon of 12 points of the compass, and an uniform and unbroken red light over an arc of the horizon of 12 points of the compass, and it shall be so fixed as to show the green light from right ahead to four points abaft the beam on the starboard side, and the red light from right ahead to four points abaft the beam on the port side; and (2) a white light in a globular lantern of not less than eight inches in diameter, and so constructed as to show a clear, uniform, and unbroken light all round the horizon, the lantern containing such white light shall be carried lower than the lantern showing the green and red lights as aforesaid, so, however, that the vertical distance between them shall not be less than 6 feet and not more than 12 feet, or

(*c*) They may carry a white light in a globular lantern of not less than eight inches in diameter, and so constructed as to show a clear uniform and unbroken light all round

the horizon, and visible on a dark night, with a clear atmosphere, for a distance of at least 2 miles; and also a sufficient supply of red pyrotechnic lights which shall each burn for at least 30 seconds, and shall, when so burning, be visible for the same distance under the same conditions as the white light. The white light shall be shown from sunset to sunrise, and one of the red pyrotechnic lights shall be shown on approaching, or on being approached by, another ship or vessel in sufficient time to prevent collision.

41. What lights are vessels whilst actually engaged in drift net fishing required to carry?

All vessels when engaged in fishing with drift nets shall exhibit two white lights from any part of the vessel where they can be best seen. Such lights shall be placed so that the vertical distance between them shall be not less than 6 feet and not more than 10 feet; so that the horizontal distance between them, measured in a line with the keel of the vessel, shall be not less than 5 feet and not more than 10 feet. The lower of these two lights shall be the more forward, and both of them shall be of such a character, and contained in lanterns of such construction, as to show all round the horizon, on a dark night, with a clear atmosphere, for a distance of not less than three miles.

42. What lights are vessels whilst actually engaged in the line fishing required to carry?

A vessel engaged in line fishing is required to carry the same lights as a vessel engaged in drift net fishing.

43. If a vessel, when fishing, becomes stationary in consequence of her gear getting fast to a rock or other obstruction, what signal must she make?

She must show the same light, and if a fog, mist, or falling snow or heavy rain storms prevail, she must make the same fog-signal as if she were at anchor.

44. What lights are fishing vessels and open boats required to exhibit when at anchor?

Between sunset and sunrise they must exhibit a white light, visible all round the horizon at a distance of at least one mile.

45. What sound signals are fishing vessels required to make whilst engaged in fishing in thick weather?

In fog, mist, or falling snow, a drift net vessel attached to her nets and a vessel when trawling, dredging, or fishing with any kind of drag net, and a vessel employed in line fishing with her lines out, shall, at intervals of not more than two minutes, make a blast with her fog-horn and ring her bell alternately.

46. May fishing vessels and open boats use flare-up lights, and if so, at what part or parts of the vessel should they be exhibited?

Yes. Fishing vessels and open boats may at any time use a flare-up in addition to the lights which they are required to carry and show. All flare-up lights exhibited by a vessel when trawling, dredging, or fishing with any kind of drag net shall be shown at the after-part of the vessel, excepting that if the vessel is hanging by the stern to her trawl, dredge, or drag net, they shall be exhibited from the bow.

47. Do these regulations referring specially to fishing vessels and boats apply in all parts of the world?

No; with the exception of the *first paragraph* of Article 10 of the Order in Council of the 11th August 1884, they apply only to fishing vessels and boats when in the sea off the coast of Europe lying north of Cape Finisterre.

48. What lights are steam-ships required to carry when towing other vessels?

A steam-vessel when towing another vessel shall in addition to her side lights carry two bright white lights in a vertical line one over the other, not less than 6 feet apart and when towing more than one vessel shall carry an additional bright white light 6 feet above or below such lights, if the length of the tow, measuring from the stern of the towing vessel to the stern of the last vessel towed, exceeds 600 feet. Each of these lights shall be of the same construction and character, and shall be carried in the same position as the white light [Article 2 (*a*)] which other steam-vessels are required to carry, except the additional light which may be carried at a height not less than 14 feet above the hull.

49. May a vessel towing carry any other light?

Yes. A small white light abaft the funnel or aftermast for the vessel towed to steer by, but such light shall not be visible forward of the beam.

50. What light is a vessel which is being overtaken by another required to show?

A vessel which is being overtaken by another shall show from her stern to the other vessel a white light or a flare-up light.

51. May the white light be fixed?

Yes. But if so, it must be so constructed and screened to show an unbroken light over an arc of the horizon of 12 points of the compass, viz., for six points from right aft on each side of the vessel so as to be visible at a distance of at least one mile. This light shall be carried as nearly as practicable on the same level as the side lights.

52. Describe the lights and to the day signals that vessels employed in laying or picking up a telegraph cable are required to carry.

A vessel employed in laying or in picking up a telegraph cable, shall at night carry in the same position as the white light which steam-vessels are required to carry, and if a steam-vessel in place of that light, three lights, in a vertical line over one another not less than 6 feet apart; the highest and lowest of these lights shall be red and the middle light shall be white, and they shall be of such a character as to be visible all round the horizon at a distance of at least two miles. By day she shall carry in a vertical line one over the other not less than 6 feet apart where they can best be seen, three shapes not less than 2 feet in diameter, of which the top and bottom shall be globular in shape and red in colour, and the middle one diamond in shape and white.

53. Describe the lights and the day signals that vessels which from any cause are not under command, are required to carry?

A vessel, which from any accident is not under command, shall at night carry at the same height as the white light which steam-vessels are required to carry, where they can best be seen, and if a steam-vessel, in place of that light, two red lights in a vertical line one over the other, not less than 6 feet apart, and of such a character as to be visible all round the horizon at a distance of at least two miles; and shall by day carry in a vertical line one over the other, not less than 6 feet apart, where they can best be seen, two black balls or shapes, each 2 feet in diameter.

54. Are the above-mentioned vessels to carry side-lights?

The above vessels, when not making any way through the water shall not carry the side-lights, but when making way shall carry them.

55. What are the shapes and lights carried by telegraph-ships and ships not under command intended to indicate to approaching vessels?

These shapes and lights are to be taken by approaching vessels as signals that the ship using them is not under command and cannot therefore get out of the way.

56 Do these rules prevent squadrons and convoys from carrying special lights, or vessels exhibiting recognition signals?

No. Nothing in these rules shall interfere with the operation of any special rules made by the Government of any nation with respect to additional station and signal lights for two or more ships of war, or for vessels sailing under convoy, or with the exhibition of recognition signals adopted by ship-owners, which have been authorized by their respective Governments, and duly registered and published.

57. May vessels exhibit any other lights in order to attract attention?

Yes. In addition to the lights which she is required to carry, she may show a flare-up light, or use any detonating signal that cannot be mistaken for a distress signal.

58. What signal must a steam-vessel proceeding under sail only, but having her funnel up, carry in the day time?

She must carry forward, where it can best be seen, one black ball or shape, 2 feet in diameter.

59. What sound signals are steam-vessels and sailing-vessels of 20 tons gross tonnage or upwards required by the regulations to be provided with?

A steam-vessel shall be provided with an efficient whistle or siren sounded by steam or some substitute for steam, so placed that the sound may not be intercepted by any obstructions and with an efficient fog horn to be sounded by mechanical means, and also with an efficient bell. A sailing-vessel of 20 tons gross tonnage or upwards shall be provided with a similar fog-horn and bell.

60. When are these signals to be used?

In fog, mist, falling snow, or heavy rain storms, whether by day or night.

61. What does a prolonged blast mean?

A blast of from 4 to 6 seconds' duration.

62. On what are the fog signals to be made by steam-vessels under way?

On the whistle or siren.

63. On what are the fog signals to be made by sailing-vessels and vessels towed?

On the fog-horn.

64. What sound signal is to be made by vessels at anchor?

Vessels at anchor shall, at intervals of not more than one minute, ring the bell rapidly for about five seconds.

65. What sound signal is required to be made by a steam-vessel having way upon her?

A steam-vessel having way upon her shall sound at intervals of not more than two minutes, a prolonged blast.

66. What sound signal is required to be made by a steam-vessel under way, but stopped, and having no way upon her?

A steam-vessel under way, but stopped, and having no way upon her, shall sound at intervals, of not more than two minutes, two prolonged blasts, with an interval of about one second between them.

67. What sound signals are required to be made by sailing-vessels when under way?

A sailing-vessel under way shall sound at intervals of not more than one minute, when on the starboard tack one blast, when on the port tack two blasts in succession, and, when with the wind abaft the beam three balsts in succession.

68. What sound signals are required to be made by a vessel when towing a vessel employed in laying or in picking up a telegraph

cable, or a vessel under way which is unable to get out of the way of an approaching vessel through not being under command or unable to manœuvre as required by the rules?

A vessel towing, or when laying or picking up a telegraph cable, or when unable to get out of the way, shall, at intervals of not more than two minutes, sound three blasts in succession, viz, one prolonged blast followed by two short blasts.

69 What sound signal may a vessel being towed make?

A vessel towed may give the same signal as a vessel towing, and she shall not give any other.

70 What sound signal must sailing vessels and boats of less than 20 tons gross tonnage make?

If they do not give the signal prescribed for other vessels, they must make some other efficient sound signal at intervals of not more than one minute.

71. Do the regulations require vessels to take any other precaution during thick weather?

Yes. Article 16 says every vessel shall, in a fog, mist, or falling snow or heavy rain-storms go at a moderate speed having careful regard to the existing circumstances and conditions.

72 What action must be taken by a steam-vessel hearing apparently forward of the beam the fog signal of another vessel the position of which is not ascertained?

She shall, so far as the circumstances of the case admit, stop her engines, and then navigate with caution until danger of collision is over.

73. How can you generally ascertain whether there is risk of collision in approaching another vessel?

By carefully watching the compass bearing of the other vessel, and if it does not appreciably change, such risk should be deemed to exist.

74. When a steam-vessel under way takes any course required by these rules, must she indicate that course to any vessel she has in sight?

Yes Article 28 provides that in taking any course authorized or required by the regulations, a steam-vessel under way may indicate that course to any other vessel which she has in sight by the following signals on her whistle or siren, viz:—

One short blast to mean "I am directing my course to starboard."

Two short blast to mean "I am directing my course to port."

Three short blasts to mean "My engines are going full speed astern."

75. What does the expression "short blast" used in the preceding Article mean?

It means a blast of about one second's duration

76. What precaution is to be taken by steam-vessels which are directed by these rules to keep out of the way when approaching another vessel?

They shall, if necessary, slacken speed, or stop and reverse.

77. If you see two white lights in a vertical line one over the other, what do they denote as regards the vessel carrying them?

They may denote the presence of a steam-vessel end on with her side-lights not within sight on account of distance, fog, &c., or a steam-vessel towing with her side-lights not within sight on account of distance, fog, &c; or a vessel end on to me engaged in drift net fishing, or in line fishing, or it may be a steam trawler end on, or within two points of being end on to me, or a vessel of 150 feet or upwards in length at anchor and end on to me.

78. If you see a green, or a red light with a white light below, what do they

They denote the presence of a steam-vessel engaged in trawling.

79 If you see both the green and red lights with a white light below them, what do they denote?

They denote the presence of a sailing trawler coming end on to me

80. If you see a white light alone, what does it denote as regards the ship carrying it?

It denotes the presence of a vessel or boat at anchor; or a pilot vessel on her station; or the masthead light of a vessel, under steam with her side-lights not within sight on account of distance, fog, &c; or a fishing vessel stationary through her gear getting fast to some obstruction, or a sailing trawler engaged in trawling, or it may be a light shown from the stern of a vessel which is being overtaken.

81 If you see a green or a red light without a white light, or both a green and a red light without a white light, is the vessel carrying the light or lights seen, a vessel under steam or a vessel under sail?

A vessel under sail.

82 How do you know?

Because there is no white mast-head light.

83 If you see a white light over a coloured light, is the vessel a vessel under sail or a vessel under steam?

A vessel under steam. The mast-head light denotes that the vessel is under steam.

[The Examiner will then take one model of a vessel, which he will place on the table, and call it A. He will then take the mast or stand with a white and red ball on it, and place it at the other end of the table, and call it B

The Examiner should be careful that the model of one vessel only is used when the questions numbered 84 to 89 are asked.

84. A is a steam-vessel going north, seeing a white light and red light right ahead at B. Are A and the vessel B showing the two lights meeting end on, or nearly end on, or is B passing A, or is B crossing the path of A, and in what direction, and how do you know ?

Passing to port, because if I see a red light ahead, I know that the head of the vessel carrying that red light must be pointing away in some direction to my own port or left hand. The vessel showing the red light has her port or left side more or less open to A.

85 If A is going north, within what points of the compass must the vessel B showing the white and red lights be steering ?

B must be going from a little W. of S. to W. N. W.

86. How do you know this ?

Because, the screens being properly fitted I could not see the red light of B at all with the vessel's head in any other direction.

87. A is a steam vessel going north, and seeing a white and green light head. Are A and B meeting, or is B passing A, or is B crossing the course of A, and in what direction ; and how do you know ?

B is passing to starboard of A, because if I see a green light ahead, I know that the head of the vessel carrying that green light must be pointing away in some direction to my starboard or right hand.

The ship showing the green light has her right or starboard side more or less open to me.

88. As A is going north, within what points of the compass must the vessel showing the white and green lights be steering ?

B must be going from a little E of South to E.N.E.

89. How do you know ?

Because, the screens being properly fitted, I cannot see the green light at all with the vessel's head in any other direction.

90. If a steam-vessel A sees the *three or four* lights of another steam-vessel B ahead or nearly ahead, are the two steam-vessels meeting, passing or crossing ?

Meeting end on, or nearly end on.

91. Do the regulations expressly require the course of a vessel to be altered to starboard in any case ; and, if so, when ?

Yes ; in the case of two steam-vessels meeting end on, or nearly end on

92. Do they expressly require the course of a vessel to be altered to starboard in any other case ; and if so, in what other ?

No, it is not in any other case expressly required by the regulations

[The Examiner should see that the Candidate places the models in the position indicated by the question 93 and following.]

93. If a steam-vessel A sees another steam-vessel's red light B, on her own starboard side, are the steam-vessels meeting, passing, or crossing, and how do you know ?

Crossing, because the red light of one is opposed to the green light of the other ; and whenever a green light is opposed to a red light, or a red light to a green light, the vessels carrying the lights are crossing vessels.

94. Is A to stand on ; and if not, why not ?

A has the other vessel B on her own starboard side. A knows she is crossing the course of B because she sees the red light of B on her (A's) own starboard side. A also knows she must get out of the way of B, because Article 19 expressly requires that the steam-vessel that has the other on her own starboard side shall keep out of the way of the other.

95. Is A to starboard or to port in such a case ?

A must do what is right so as to get herself out of the way of B ; and must, if the circumstances 'of the case permit' avoid crossing ahead of B.

96. If A gets into collision by porting, will it be because she is acting on any rule ?

No ; the rule does not require her either to port or to starboard. If she ports, and gets into collision by porting, it is not the fault of any rule.

97. If a steam-vessel A sees the green light of another steam vessel B on her own (A's own) port bow, are the two steam-vessels meeting, passing or crossing ; and how do you know ?

Crossing, because the green light of one vessel is shown to the red light of the other.

98. What is A to do, and why ?

By the rule contained in Article 21 of the regulations, A is required to keep her course and speed subject to the qualification that due regard must be had to all dangers of navigation and collision ; and that due regard must also be had to any special circumstances which may exist in any particular case rendering a departure from that rule necessary in order to avoid immediate danger. The crossing vessel B on A's port side must get out of the way of A, because A is on B's starboard side.

99. A, a steam-vessel, sees the green light of another steam vessel, B, a point on her, A's port bow. Is there any regulation requiring A to port in such a case, and if so, where is it to be found ?

There is not any.

100. Are steam-vessels to get out of the way of sailing-vessels ?

If a steam-vessel and a sailing-vessel are proceeding in such direction as to involve risk of collision, the steam vessel is to get out of the way of the sailing-vessel unless the sailing-vessel is overtaking the steam-vessel.

101. What is to be done by A, whether a steam-vessel or sailing vessel if overtaking B ?

A is to keep out of the way of B

102. When is a vessel considered to be an overtaking vessel ?

Every vessel coming up on another vessel from more than two points abaft her beam, *i.e.*, in such a position with reference to the vessel which she is overtaking that at night she would be unable to see either of that vessel's side-lights, is an overtaking vessel; and no subsequent alteration of the bearing between the two vessels can make the overtaking vessel a crossing vessel within the meaning of the rules, or relieve her of the duty of keeping clear of the overtaking vessel until she is finally passed and clear.

103. In the day time how do you know when you are an over taking vessel ?

It is often hard to judge with any degree of certainty, but if in doubt assume you are an overtaking vessel and keep out of the way.

104. Have sailing-vessel under way to keep out of the way of sailing-vessels and boats fishing ?

Yes; they have to keep out of the way of sailing-vessels or boats fishing with nets, or lines or trawls; but this rule does not give to and vessel or boat engaged in fishing the right of obstructing a fairway used by vessels other than fishing vessels or boats.

105. When by the rules one of two ships is required to keep out of the way of the other, what is the other to do ?

To keep her course and speed.

106. Is there any qualification or exception to this ?

Yes. Due regard must be had to all dangers of navigation and collision, and to any special circumstances which may exist in any particular case, and require a departure from the regulations to avoid immediate danger.

107. Is there any general direction in the steering and sailing rules, and if so, what is it ?

Yes, it is this: that nothing in the rules shall exonerate any vessel or the owner, master, or crew thereof, from the consequences of any neglect to carry lights or signals, or of any neglect to keep a proper look out, or of the neglect of any precaution which may be required by the ordinary practice of seamen, or by the special circumstances of the case.

108. Can you repeat Article (————) of the regulations ? I refer to the article containing the rule for (————).

[The Examiner will repeat this question, naming a different Article each time.]

109. What does the Act of Parliament provide as to the obligation of owners and masters in obeying the regulations respecting lights, fog-signals and steering and sailing ?

Section 419 of the Merchant Shipping Act, 1894, provides that owners and masters shall be bound to obey the regulations, and it also provides that in case of wilful default by the master or owner, he shall be deemed to be guilty of a misdemeanour for each infringement.

110. What do breaches of the regulations imply ?

If an accident happens through non-observance of the regulations, it implies wilful default on the part of the person in charge of the deck at the time, unless it is shown to the satisfaction of the court hearing the case that the special circumstances of the case rendered a departure from the rules necessary.

111. If collision ensues from a breach of the regulations, who is to be deemed in fault for the collision ?

The person by whom the regulations are infringed, unless the court hearing the case decides to the contrary.

112. Is there any special rule for steam-vessels navigating narrow channels ?

In narrow channels every steam-vessel must, when it is safe and practicable, keep to that side of the fairway or mid-channel which is on the starboard side of such vessel.

113. Do the regulations for preventing collisions at sea apply to sea going vessels in harbours and in rivers ?

Yes; unless there is any rule to the contrary made by a competent authority.

114. Do they apply to British vessels only ?

No, to foreign vessels as well, with the exception of paragraphs (*a*), (*b*), (*c*), (*d*), (*e*), (*f*) and (*g*) of Article 10 of the Order in Council of the 11th August 1884, and Orders in Council of the 30th December 1884, 24th June 1885, and 7th July 1897, which apply only to British vessels.

115. Do you know where the present regulations are to be found ?

Yes, in Article 10 of the Order in Council of the 11th August 1884 and in the Orders in Council of the 30th December 1884, 14th June 1885, 27th November 1896 and 7th July 1897.

116. Is one vessel bound to asist another in case of collision ?

Yes.

117. What is the penalty for default ?

If the master or person in charge of the vessel fails to render assistance without reasonable excuse, the collision is, in absence of proof to the contrary, to be deemed to be caused by his wrongful act, neglect or default.

118 Is there any other penalty attached to not rendering assistance ?

Yes. If it is afterwards proved that he did not render assistance, his certificate may be cancelled or suspended by the court investigating the case

119 Is it not expected that you should understand the regulations before you take charge of the deck of a vessel ?

It is.

120. Why ?

If I do not understand them and am guilty of default, the consequences will be very serious to me

121. What would be a serious offence ?

To cause a collision by porting the helm or doing anything not required by the regulations and without due consideration.

AIDS TO MEMORY in four verses, by the late Mr. THOMAS GRAY, C. B.

1. *Two Steam-ships meeting.*

When both side lights you see ahead—
Port your helm and show your RED.

2. *Two Steam-ships passing*

GREEN to GREEN—or, RED to RED—
Perfect safety—Go ahead !

3 *Two Steam ships crossing.*

Note. This is the position of greatest danger: there is nothing for it but good look-out, caution, and judgment.

If to your starboard Red appear
It is your duty to keep clear;
To act as judgment says is proper:—
To port—or Starboard Back—or, Stop her
But when upon your Port is seen.
A Steamer's Starboard Light of GREEN.
There's not so much for you to do.
For GREEN to Port keeps clear of you.

4. *All Ships must keep a good look-out and Steam-ships must stop, and go astern, if necessary*

Both in safety and in doubt.
Always keep a good look-out.
In danger, with no room to turn
Ease her, stop her, go astern.

APPENDIX F

SIGNALS TO BE MADE BY SHIPS WANTING A PILOT

In the daytime—The following signals, numbered 1 and 2, when used or displayed together or separately, shall be deemed to be signals for a pilot in the daytime, viz. :—

1 To be hoisted at the fore, the Union Jack having round it a white border, one-fifth of the breadth of the flag, or
2 The International Code pilotage signal indicated by P T
3 The International Code flag S with or without the Code pennant over it
4. The distant signal, consisting of a cone, point upwards, having above it two balls or shapes resembling balls.

At night—The following signals, numbered 1 and 2, when used or displayed together or separately, shall be deemed to be signals for a pilot at night, viz :—

1. The pyrotechnic light commonly known as a blue light every fifteen minutes; or
2 A bright white light, flashed or shown at short or frequent intervals just above the bulwarks, for about a minute at a time

If a master of a vessel uses or displays, or causes or permits any person under his authority to use or display, any of the pilot signals for any other purpose than that of summoning a pilot, or uses or causes or permits any person under his authority to use any other signal for a pilot, he shall for each offence be liable to a fine not exceeding twenty pounds. [Merchant Shipping Act, 1894, Section 618(3).]

APPENDIX G.

EXAMINATION IN CHART.

For all Grades where the Chart is used (including Home Trade Passenger Ship Certificates).

[The Candidate will be required to work out the following questions on either a "true" or "magnetic" chart,* whichever may be handed to him by the Examiner, and also determine whether the chart is a "true" or "magnetic" one, and whether it is for the northern or southern, and eastern or western hemisphere.]

---

1. Using deviation [card] [curve]† No. find the course to steer by compass from to ; also the distance

Answer.—Compass course .
Distance .
Variation .
Deviation .

2. With the ship's head on the above-named compass course, a point] [lighthouse] bore by compass [and bore by the same compass, find the ship's position.

Answer.—Latitude .
Longitude .

3 With the ship's head as above, a [point] [lighthouse] bore by compass , and after continuing on the same course mile it bore , find the position of ship and her distance from at the time of taking the second bearing.

Answer —Latitude .
Longitude .
Distance .

All the foregoing questions must be answered, but this does not preclude the Examiner from putting any other questions of a practical character or which the local circumstances of the post may require.

Additional questions for Masters, including Masters of Home Trade Passenger Ships.

4. Find the course to steer by compass from to (*see* Question 1) to counteract the effect of a current which set at the rate of miles per hour, the ship making by log miles per hour; also the distance the ship would then make good in hours towards .

Answer —Compass course .
Distance .

5. On being off took a cast of the lead; required the correction to be applied to the depth obtained by the lead line before comparing it with the depth marked on the chart

6. What do you understand the small numbers to indicate that you see placed about the chart, and at what time or tide?

7 What do the Roman numerals indicate that are occasionally seen on the chart near the coasts and in harbours?

8 How would you find, approximately, the time of high water at any place, the Admiralty tables not being at hand, nor any other special tables available?

All the foregoing questions, and those on Form Exn. 9 C., must be answered, but this does not preclude the Examiner from putting any other questions of a practical character or which the local circumstances of the port may require.

---

* The terms "true" and "magnetic" are used for the sake of brevity and convenience, to indicate charts that have compasses delineated upon them showing the "true" or "magnetic" points of the compass respectively.

† A Candidate for an Ordinary Master's Certificate is expected to use either a card of deviations, or a curve of deviations on a Napier's diagram, whichever the Examiner may put before him

APPENDIX H.

QUESTIONS RELATING TO CYCLONES OR REVOLVING STORMS COMMON IN TROPICAL SEAS.

The Candidate must answer in writing, on paper supplied by the Examiner the following questions, numbering the answers to correspond with the questions :—

Question—

1. The direction of the wind in a cyclone being* _____ state the probable bearing of its centre from the ship in the* _____ Hemisphere.
2. And suppose that the wind during the passage of the same cyclone were found to change towards the* _____, what would be the ship's position with reference to the line of progression of the centre of the cyclone, and what action would you take ?
3. Under what conditions would the change in the direction of the wind in the cyclone be the reverse of the above ?
4. What are the usual indications of a ship being on the line of progression of the centre of a cyclone ?
5. What are the usual indications that a ship is (*a*) approaching the centre of a cyclone ; (*b*) receding from it ?
6. Describe the track usually taken by cyclones in the †_____, and state the seasons of the year in which they most frequently occur in that region.

* These spaces to be filled in by the Examiners, and frequently varied.
† The Examiners to fill in whether North Atlantic, Bay of Bengal, China Seas, Indian Ocean, &c., &c.

APPENDIX I.

Questions on the deviation of the Compass used in the examination of Candidates for Certificates as Masters of Foreign-going Ships, as given on examination Form Exn 7 :—

The candidate is to answer correctly such of the following questions as are marked with a cross by the Examiner. At least 12 will be marked.

The Examiner's attention is specially called to the importance of questions, 11, 12, 13, 14, and 39, which must be marked in all cases—

1. State briefly the essentials of an efficient Compass.
2. State briefly the chief points to be considered when selecting a position for your Compass on board ship, and what should be particularly guarded against.
3. What do you mean by Deviation of the Compass, and how is it caused.
4. Describe how you would determine the deviation of your compass—(1) by reciprocal bearings ; (2) by figures on the dock walls ; (3) by bearings of a distant object ; (4) by the bearings of the sun or other celestial body.
5. Having determined the deviation with the ship's head on the various points of the compass, how do you know when it is Easterly and when Westerly ?
6. Why is it necessary, in order to ascertain the deviations, to bring the ship's head in more than one direction ?
7. For accuracy, which is the least number of points to which the ship's head should be brought for constructing a curve or table of deviations ?
8. How would you find the deviation when sailing along a well-known coast ?
9. Name some suitable objects by which you could readily obtain the deviation of the Compass when sailing along the coasts of the Channel you have been accustomed to use.
10. Supposing you have no means of ascertaining the magnetic bearing of a distant object when swinging your ship for deviations, how could you find it, approximately from bearings of the object taken with the ship's head on equi-distant Compass points ; and what distance as a rule should the object be from the ship ?
11. Example :- Having taken the following compass bearings of a distant object, find the object's magnetic bearing, and thence the deviation—

MAGNETIC BEARING REQUIRED :—

Ship's Head by Standard Compass.	Bearing of distant object by Standard Compass.	Deviation required.	Ship's Head by Standard Compass.	Bearing of distant object by Standard Compass.	Deviation required.
1	2	3	4	5.	6
North N. E. East S.E	S 4° E. South S. 4° W. S. 1° W.		South S. W. West N W.	S. 13° E. S. 2.° E. S. 21° E. S 11° E.	

12. With the deviation as above, construct a curve of deviations on a Napier's diagram and give the courses you would steer by the Standard Compass to make the following courses magnetic :—

Magnetic courses,—S S W., W N.W., N.N E., E.S.E.
Compass courses required

13. Supposing you have steered the following courses by the Standard Compass, find the magnetic courses made from the above curve of deviations :—

Compass courses,—W S.W., N N.W., E.N E., S S E.
Magnetic courses required.

14. You have t ken the following bea ings of two distant objects by your Standard Compass as above ; with the ship's head at W. ½ S , find the bearings, magnetic :—

Compass bearings -W by S and N. ½ W.
Magnetic bearings required

15. Do you expect the deviation to change ; if so, state under what circumstances ?

16 How often is it desirable to test the accuracy of your table of deviations ?

17. What is meant by variation of the Compass ; what is it caused by ; and where can you find the variation for any given position ?

18. The earth being regarded as a magnet, which is usually termed the blue, and which the red magnetic pole ?

19. Which end of a magnet (or compass needle) is usually termed the red or "marked" end, and which the blue ?

20. What effect has the pole of one magnet of either name on the pole of another magnet ?

21. What is meant by transient induced magnetism ?

22. Which is the red and which is the blue pole of a mass of soft vertical iron, by induction, and what effect would the upper and lower ends of it have on the compass needle (*a*) in the Northern hemisphere, (*b*) in the Southern hemisphere, (*c*) on the magnetic equator ?

23. Describe what is usually termed the sub-permanent * magnetism of an iron ship, and state when and how it is acquired, and which is the red and which is the blue pole, and why it is called sub-permanent magnetism ?

24. Describe the meaning of the expression co-efficient A ?

25 Describe the meaning of the exppression co efficient B: its signs and effects,

26. Describe the meaning of the expression co efficient C : its signs and effects.

27. Describe the meaning of the expression co-efficient D: its signs and effects.

28. Describe the meaning of the expression co-efficient E ; its signs and effects.

29. Would you expect any change to be caused in the error of your compass by the ship heeling over either from the effect of the wind or the cargo, &c ?

30. The compass of iron ships being more or less effected by what is termed the heeling error, on what courses is this error usually at its minimum, and on what courses at its maximum ?

31 Describe clearly the three principal causes of the heeling error on board ship

32 State to which side of the ship in the majority of cases is the north point of the compass drawn when ship heels over in the Northern hemisphere.

33. Under what conditions (that is, as regards position of ship whilst building, and the arrangement of iron in the ship) is the north point of the compass needle usually drawn to windward or the high side of the ship in the northern hemisphere, and if not allowed for, what effect has it on the assumed position of the ship when she is steering on northerly and on southerly courses in the Northern hemisphere ?

34. Under what conditions (as in question 33) is the north point of the compas needle usually drawn to leeward or the low side of the ship in the Northern hemisphere, and, if not allowed for, what effect would it have on the assumed position of the ship when she is steering on northerly, and on southerly courses in the Northern hemisphere ?

35 The effects being as you state, on what courses would you keep away, and on what courses would you keep closer to the wind in the Northern hemisphere in order to make good a given compass course (*a*) when north point of compass is drawn to windward or the high side of ship ; and (*b*) when drawn to leeward or the low side ?

36 Does the same rule hold good in both hemispheres with regard to the heeling error ?

* The term sub-permanent magnetism in these questions is used in the original sense as proposed by the late Sir G B. Airy, to denote the character of the permanent magnetism of an iron ship as distinguished from the permanent magnetism of a magnetised steel bar. The terms "sub-permanent" and "permanent" throughout these questions may, therefore, be considered as synonymous.

34. On what points of the compass will each of the co-efficients, D and E, + and −, give easterly, and on what points westerly deviation?

35. What conditions of the iron of a ship will produce + D and what − D?

36. State clearly which end of horizontal iron running athwartship (such as beams, &c.), and of horizontal iron running fore and aft of a ship, acquires *red* and which *blue* polarity, by induction, when ship's head is at N.E., S.E., S.W., and N.W., respectively.

37. Describe the nature of the deviation represented by co-efficients + A and − A, and describe the errors in the construction of the compass, and other causes, that frequently produce it.

38. What is the object of compensating the compass by magnets, &c., and what are the general advantages of a compensated compass over an uncompensated one?

39. Before adjusting the compass of an iron ship, what it is desirable to do with the view to eliminating, as far as possible, what may be termed the unstable part of the magnetism of the ship?

40. Describe clearly the tentative method of compass adjustment (that is, the compensation of co-efficients B, C, and D, with ship upright) as generally practised by compass adjusters in ships of the Mercantile Marine.

41. State at what distance, as a general rule, the magnets and soft iron correctors should be placed from the compass needles and what will be the consequence if they are placed too near the needles.

42. Is it necessary that the magnets used for compensating co-efficients B and C should be placed on deck? If not, state where they may also be placed, and the rules to be observed in placing them into position.

43. Does the B found on board ship usually arise altogether from sub-permanent magnetism, or does part of it usually arise from some other cause or causes?

44. If the part of B due to induced magnetism in vertical soft iron, as well as the part due to sub-permanent magnetism, are corrected by a magnet alone, as is generally the case, what is frequently the consequence on the ship changing her magnetic latitude and hemisphere?

45. How should each of these two parts of B, strictly speaking, be compensated?

46 Assuming, for the sake of clearness, that your steering compass is unavoidably placed very near to the head of the sternpost (and other vertical iron at the stern), thereby causing a very large—B from induced magnetism; describe briefly any method by which the approximate position for the compensating vertical iron bar (Flinder's or Rundle's) could be estimated in order to reduce the error; describe also how you would proceed, in order to improve, if not, to perfect, its position after observations have been made on the magnetic equator.

47. State if standard compasses, as well as steering compasses, are generally subject to this disturbance from induced magnetism in vertical iron; also whether the attraction in all cases is found to be towards the stern; and if not, state the conditions under which it might be towards the bow, and how the compensating soft iron bar should then be placed.

48. Generally speaking, does the magnetism induced in vertical iron usually have any effect in producing the co-efficient C, ship upright, or is it generally produced by sub-permanent magnetism alone? State also your reasons for saying so.

49. Provided the needles of your compass are not so long and powerful, and so near, as to cause the soft iron correctors to become magnetised by induction, would the co-efficient D, if properly compensated as you have described (Ans. 40), be likely to remain so in all latitudes and both hemispheres? If so, state the reason why.

50. Under what circumstances does the character of A and E so change as to render it desirable that these co-efficients should be disregarded or modified?

51. Supposing your compasses were allowed to remain uncompensated, explain clearly what would be the probable changes (ship upright) in the deviations produced separately by (1) the sub-permanent magnetism of the ship alone; (2) by the induced magnetism in vertical soft iron; (*a*) on reaching the equator; (*b*) in the southern hemisphere?

52. Assuming you were able to arrive at the proper proportions to be corrected, and were then to exactly compensate the sub-permanent magnetism of the ship by means of a permanent magnet, and the induced magnetism in vertical iron by a soft iron bar, would you expect any deviation to take place in your compass as the ship changed her latitude and hemisphere? And state your reasons for saying so.

53. Supposing the co-efficient D from horizontal soft iron were allowed to remain uncompensated, would you, or would you not, expect the D to differ in name or amount on the ship changing her magnetic latitude and hemisphere? And state the reason.

54. Describe how you would determine the deviation of your compass (1) by reciprocal bearings; (2) by figures on the dock walls; (3) by bearings of a distant object.

55. Describe, in detail, how you would determine the deviation of your compass by the bearings of the sun Also by a star or planet.

56. Describe the uses to which the Napier's diagram can be applied, and its special advantages.

57. Describe clearly how the Napier's diagram is constructed.

58. For accuracy, what is the least number of points to which the ship's head should be brought for constructing a complete curve of deviations, or a complete table of deviations?

59. Nearing land, and being anxious to check your deviations on a few courses you may probably require to steer, what is the least number of points it will be necessary to steady the ship's head upon, if making use of a Napier's diagram, in order to ascertain the deviation on each of the points, say in a quadrant of the compass and describe clearly how you would do this at sea?

60. Supposing you have no means of ascertaining the magnetic bearing of the distant object when swinging your ship for deviations, how could you find it, approximately, from bearings of the object taken with the ship's head on equi-distant compass points, and how far as a rule, should the object be from the ship when swinging or steaming round?

61. Example:—Having taken the following compass bearings of a distant object, find the object's magnetic bearings, and thence the deviations:—

(*a*) MAGNETIC BEARING REQUIRED:—

Ship's Head by Standard Compass.	Bearing of distant object by Standard Compass.	Deviation required.	Ship's Head by Standard Compass.	Bearing of distant object by Standard Compass	Deviation required.
1	2	3	4	5	6
North.	S. 75° W.		South.	S. 84° W	
N. E.	S. 64° W		S. W.	S 31° W	
East.	S. 56° W		West.	S. 49° W.	
S. E.	S. 50° W		N. W.	S. 71° W.	

(*b*) Construct a curve of deviations on a Napier's diagram with the deviations as above, and give the courses you would steer by the Standard Compass to make the following courses, magnetic:—

Magnetic courses - N.N.W., S.S.E, W.N.W., E.S.E.
Compass courses required.

(*c*) Supposing you have steered the following courses by the Standard Compass, find the magnetic courses made from the above curve of deviations:—

Compass courses—N.N.E., E.N.E., S.S.W., W.S.W.
Magnetic courses required.

(*d*) You have taken the following bearings of two distant objects by your Standard Compass as above; with the ship's head at N. E. ½ E, find the bearings, magnetic:—

Compass bearings—S. E. by S. and N. N. W.
Magnetic bearings required.

62. Assuming the deviations observed with ship's head by compass to be as follows [or as in question 61, whichever may be given], determine the value of the co-efficients A, B, C, D, and E, and from them construct a complete table of deviations (or for as many points as the Examiner may direct):—

Deviation at North	[ ]	South	[ ]
N. E.	[ ]	S. W.	[ ]
East	[ ]	West	[ ]
S. E.	[ ]	N. W.	[ ]

63. When swinging your ship, if it be required to construct deviation tables for two or more compasses situated in different parts of the vessel, describe the process, and how you would employ the Napier's diagram for this purpose.

64. State your rule for determining whether deviation is easterly or westerly.

65. Is a knowledge of the value of the various co-efficients of any advantage? If so, state why?

66 Describe (*a*) what is commonly known by the term "retentive" or "retained" magnetism, and how the ship acquires it when in port and at sea; (*b*) its effect on the compass needle whilst ship's head continues in the same direction; (*c*) the immediate consequence when the direction of the ship's head is altered, and (*d*) the special precautions to be invariably observed at sea on the alteration of the ship's course.

67. Describe a "Dumb-card" or "Pelorus" and its use (*a*) in compensating a compass, (*b*) in determining the deviation.

68. If you determine the deviation by an azimuth or an amplitude of a heavenly body, it is then combined with variation which together is sometimes called the *correction* for the compass State when the deviation is the difference between the variation

and the *correction*, and when the sum; and when it is of the same name as that of the *correction*, and when of the contrary name.

69. In observing azimuths of heavenly bodies, the best method is by "time azimuths," since these can be observed without an altitude when the ship is in port, or when the horizon cannot be defined from any cause. Given the sun's declination, the hour of the day, and the latitude, to find the true bearing of the sun.*

70. By night, if it be desirable to observe the *correction* of the compass. Given the day of the year, and time at ship, also the latitude of the place, to determine what stars will be in good position for this purpose.

71. If your correcting magnets are so mounted that their positions can be altered, describe the process by which on open sea you can place the ship's head magnetic N. (or S.), and magnetic E. (or W.), and can make the correction perfect.

72. Given the name of a star, the time, the place of ship, the variation of the compass, and the bearing of the star by compass. Determine the deviation, and name it east or west.

73. Would you expect any change to be caused in the error of your compass by the ship heeling over either from the effect of the wind or the cargo?

74. Describe clearly the three principal causes of the heeling error on board an iron ship.

75. Towards which side of the ship would that part of magnetism induced in continuous transverse iron (which was horizontal while ship was upright) help to draw the north point of the needle when ship heels over (*a*) in the Northern hemisphere, (*b*) in the Southern hemisphere?

76. Supposing the compass were placed between the two parts of a divided beam or other athwartship iron, towards which side of the ship would iron so situated help to draw the north point of the needle when ship heels over (*a*) in the Northern hemisphere, (*b*) in the Southern hemisphere?

77. Would you expect that part of the magnetism induced in iron exactly perpendicular to the ship's deck, such as stanchions, bulkhead, &c., if below the compass, to cause any part of the heeling error when ship heels over, and if so, towards which side of the ship (*a*) in the Northern hemisphere, (*b*) in the Southern hemisphere?

78. If an ordinary standard compass placed higher than the iron top sides be compensated whilst the ship is upright, what co-efficient will be effected by heeling?

79. Under what conditions (that is, as regards position whilst building and the arrangement of iron in the ship) is the north point of the compass needle usually drawn to windward, or the high side of the ship, in the Northern hemisphere?

80. Under what conditions, as a rule, is the north point of the compass needle usually drawn to leeward, or the low side of the ship, in the Northern hemisphere?

81. State to which side of the ship, in the majority of cases, is the north point of the compass drawn when ship heels over in the Northern hemisphere; and when this is the case, and it is not allowed for, what effect has it on the assumed position of the ship when she is steering on northerly and also on southerly courses?

82. On what courses would you keep away, and on what courses would you keep closer to the wind in both the Northern and Southern hemispheres, in order to make good a given compass course (*a*) when north point of compass is drawn to windward, or the high side of ship, and (*b*) when drawn to leeward or the low side?

83. If a ship is beating to windward, when she tacks, under what circumstances will the heeling error retain the same name, and under what circumstances will it take the contrary name?

84. If a ship is placed on the opposite tack by the change of wind, the ship's course being the same by compass, will the heeling error change its name?

85. In which direction of the ship's head does the heeling error attain its maximum value, and in which direction does it generally vanish?

86. Explain clearly how that part of the heeling error due to the permanent part of the magnetism of the ship varies as the ship changes her geographical position, and what is the reason of this?

87. Explain clearly how that part of the heeling error due to the induction in transverse iron (which was horizontal when ship was upright), and iron vertical to the ship's deck, varies as the ship changes her geographical position.

88. What, then, would be the probable nature of the heeling error, that is, whether to high or low side of the ship, and whether the error would be equal to the sum or difference, &c., of the forces given (1) in high north latitudes, (2) on magnetic equator, (3) in high south latitudes? Assuming the polarity of the sub-permanent magnetism of the ship under, and affecting, the compass, to be as given below; the vertical induction in soft iron, of course, obeying the ordinary laws in the above geographical positions (1), (2), (3)—

(*a*) In cases where the effect of *red* vertical sub-permanent magnetism is equal to that of the vertical induction in the soft iron of the ship.

* The process of finding time azimuths by the ordinary formulæ of spherical trigonometry is tedious, and since on board an iron ship these observations should be often repeated, the Candidate will be allowed to use any table or graphic or linear method that will solve the problem within a half of a degree, the altitude of the heavenly body not being given.

(*b*) Where the effect of *red* vertical sub-permanent magnetism is greater than that of the vertical induction in the soft iron.
(*c*) Where the effect of *red* vertical sub-permanent magnetism is less than that of the vertical induction in the soft iron.
(*d*) Where the effect of *blue* vertical sub-permanent magnetism is equal to that of the vertical induction in the soft iron,
(*e*) Where the effect of *blue* vertical sub-permanent magnetism is greater than that of the vertical induction in the soft iron.
(*f*) Where the effect of *blue* vertical sub permanent magnetism is less than that of the vertical induction in the soft iron.

89. Can the heeling error be compensated? If so, state the means to be employed, and how the compensation may be effected?

90. Can the compensation of the heeling error be depended on in every latitude? If not, state the reason?

91. Do the soft iron correctors used for compensating the coefficient + D have any effect on the compass needle when the ship heels over, and if so, do they draw the needle towards the low or the high side of the ship, and do they counteract, or otherwise, the effect produced by the vertical induction in the soft iron; (*a*) in the Northern hemisphere, (*b*) in the Southern hemisphere; and what is the reason of this?

92. Given the heel, the direction of the ship's head by compass, and the heeling error observed, to find the approximate heeling error, with a greater or less given heel, and with the ship's head on some other named point of the compass, the ship's magnetic latitude being in both cases the same.

93. Describe any instrument to show the ship's heel (generally called a clinometer), and state how and where it should be fixed.

94. Should the clinometer be observed when the ship is swung to determine the deviation when the ship is upright? If so, state the reason why?

95. Would you expect the table of deviation supplied by the compass adjuster from observations made in swinging the ship to remain good during the voyage, or would you expect the deviations to change? If so, state under what circumstances?

96. Is it desirable that a record of your observations for deviations should be kept as a guide for any subsequent voyage in case the ship should be in the same locality, or for further correction of the compass? If so, describe some suitable form for keeping such record.

97. Would you under any circumstances consider it a safe and proper procedure to place implicit confidence in your compasses however skilfully they may have been adjusted? If not, what precautions is it your duty to take at all times?

APPENDIX L.

DEVIATION OF THE COMPASS.

For Masters' Certificates for Home Trade Passenger Ships.

The applicant must answer in writing, on paper given him by the Examiner, all the following questions, numbering his answers to correspond with the numbers of the questions.

1. When taking a meridian altitude, how do you know when the sun is on the meridian; or, in other words, when it is noon?
2. How does the sun bear (*true* and magnetic) when on the meridian of an observer in these latitudes (Home Trade Limits)?
3. What do you mean by deviation of the compass, and how is it caused?
4. Having determined the deviation, how do you know when it is easterly, and when westerly?
5. Supposing the sun when on the meridian bore by your compass _____, what would be the deviation of that compass for the direction of the ship's head at the time, the variation given on the chart being _____?
6. How could you find the deviation of your compass when in port, or when sailing along a coast?
7. Name some suitable objects by which you could readily obtain the deviation of your compass, when sailing along the coasts of the channel you have been accustomed to use.
8. The bearing of two objects when in a line with each other was found on the chart to be _____ magnetic; but when brought in a line on board they bore _____ by your compass; required the deviation of your compass for the direction of the ship's head at the time.
9. What means are there for checking the deviation of your compass by night?
10. Supposing the North Star (*Polaris*) bore _____ by your compass, what would be the deviation (approximately) of that compass for the direction of the ship's head at the time, supposing the variation given on the chart to be _____?
11. Do you expect the deviation to change? If so, state under what circumstances.
12. What is meant by the variation of the compass, and what is the cause of it?

APPENDIX M.

COMPASS ADJUSTMENT.

It is of the utmost importance that Masters of ships should thoroughly understand the tentative method of compass adjustment as generally practised in merchant ships, and Examiners are, therefore, directed to fully satisfy themselves that all Candidates for Masters' Certificates have this particular knowledge. It should be tested in connection with the Form Exn. 7 with the aid of Captain Beall's Deviascope, and Candidates will be required to prove —(1) their knowledge of the laws of deviation, and the tentative method of compass adjustment; (2) that they understand the practical application of the answers given by them to any of the other questions on Form Exn. 7 that the Examiner may ask.

A concise statement of the present method of tentative compass adjustment is appended for the use of Examiners It is, however, distinctly to be understood that the Board of Trade are not in any way advocating the correction of that part of co-efficient B which arises from vertical induction in soft iron by a permanent magnet instead of by a soft iron bar. The Board have no authority to interfere with the methods in use amongst compass adjusters for the adjustment of compasses in iron ships, but the Examiners must satisfy themselves that Masters are acquainted with the ordinary method as at present practised.

The TENTATIVE METHOD of COMPASS ADJUSTMENT as generally practised by COMPASS ADJUSTERS in SHIPS of the MERCANTILE MARINE.

Before describing the practice, it will be as well to briefly state the co-efficients used to express the different magnetic forces:—

Co-efficient	A	represents a	constant quantity.
,,	B	,,	semicircular deviation due to fore and aft magnetic forces.
,,	C	,,	semicircular deviation due to transverse magnetic forces.
,,	D	,,	quadrantal deviation due to horizontal induction in soft iron.
,,	E	,,	quadrantal deviation due to horizontal induction in soft iron unsymmetrically distributed.

SIGNS AND EFFECTS OF CO-EFFICIENTS A, B, C, D and E.

Co-efficient A represents a constant deviation of the same nature and amount on all points of the compass; + A signifying easterly, and — A, westerly deviation.

Co-efficient + B represents an attraction towards the ship's head, and causes easterly deviations with ship's head in the eastern semicircle of the compass, and westerly deviations in the western semicircle, attaining a maximum value on the east and west points, decreasing to zero on north and south points, by compass.

Co-efficient — B represents an attraction towards the ship's stern, and causes easterly deviations with ship's head in the western semicircle, and westerly deviations with the ship's head in the eastern semicircle, with a maximum value on the east and west points, decreasing to zero on the north and south points, by compass.

Co-efficient + C represents an attraction towards the starboard side of the ship, and causes easterly deviations with ship's head in the northern semicircle, and westerly deviations in the southern semicircle, attaining a maximum value on the north and south points, decreasing to zero on the east and west points by compass.

Co-efficient — C represents an attraction towards the port side of the ship, and causes westerly deviations with ship's head in the northern semicircle, and easterly in the southern semicircle, attaining a maximum value on the north and south points, decreasing to zero on the east and west points, by compass.

Co-efficient + D gives easterly deviations with ship's head between N. and E. and S. W.; and westerly deviations between S. and E. and N. and W.

Co-efficient — D gives results exactly the reverse to + D.

Note.—Both + D and — D have a maximum value on the four quadrantal points, and become zero on the cardinal points by compass.

Co-efficient + E gives easterly deviations with ship's head between N. E. and N. W. and S. E. and S. W.; and westerly deviations between N. E. and S. E. and N. W. and S. W.

Co-efficient—E gives results exactly the reverse to + E.

Note.—Both + E and — E have a maximum value on the cardinal points, and become zero on the four quadrantal points, but are usually very small in amount in compasses placed in the middle line of the ship.

Heeling Error.—The heeling error arises partly from vertical induction in transverse iron, and iron vertical to the ship's deck,

and partly from the vertical component of the sub-permanent magnetism of the ship In the Northern hemisphere in the majority of cases the N. point of the compass needle is drawn to windward or the high side of the ship, with, as a rule, a maximum heeling error on N and S. points, and zero on E. and W. points by compass. If the compass is not properly placed in the ship, there may be a sensible heeling deviation on E. and W. courses.

TENTATIVE CORRECTIONS.

To correct co-efficient C.—With ship's head north or south magnetic place a bar magnet (or more than one if necessary) horizontally and exactly athwartship, either on the deck or on any convenient platform with its centre on the fore and aft line passing through the centre of the compass card, placing its red or marked end to starboard if the N. point of the needle deviates to the starboad side, or to port if it deviates to the port side of the ship, moving the magnet to or from the compass until it points correctly

Note—The deviation represented by co-efficient C varies inversely as the earth's horizontal force, providing the iron, is symmetrically arranged on each side of the compass

To correct co-efficient B.—With ship's head east or west magnetic place a bar magnet (or more than one if necessary) horizontally and exactly parallel to the fore and aft midship line of the ship, either on the deck or on any convenient platform, with its centre on the athwartship line passing through the centre of the compass, the red or marked end of the magnet being directed aft if the N. point of the compass needle deviates towards the stern, or forward if it deviates towards the bow, moving the magnet to or from the compass until it points correctly.

Note.—The co-efficient B consists of two parts, one is due to the permanent magnetism of the ship, which varies inversely as the earth's horizontal force; the other to vertical induction in soft iron, which varies as the tangent of the dip. As ships in the merchant service are rarely built with a view of providing a satisfactory posit on for the standard compasses, it is very difficult in many ships to find a position for it where it will not be affected by vertical iron. It follows, therefore, that if this deviation be compensated, as is customary, by a fore and aft permanent magnet instead of by a vertical soft iron bar, the poles of the magnet may in some cases require to be reversed in high southern latitudes.

To correct co-efficient + D.—With ship's head on one of the quadrantal points magnetic the + D is generally corrected by boxes of small chain, cylinders of soft iron, or soft iron globes, placed athwartships on the same level, and at equal distances, on the port and starboard sides of the compass, with the centre of their mass on a level with the compass needle, move them to or from the compass till the needle points correctly.

To correct co-efficient — D.—Co-efficient — D, which is of very rare occurrence is corrected by placing the above correctors on the fore and aft sides of the compass

Note.—When once the co-effcient D is properly corrected by soft iron, it is correct for all magnetic latitudes, provided the distribution of the iron in the ship is not materially changed, and provided the magnetism of the soft iron has not been affected by the compass needles. With short needles having small magnetic power, such, for instance, as Sir Wm. Thomson's there will probably be no change; but when a compass with long and powerful needles is employed, soft iron correctors placed very near it become magnetised by induction according to the power of the needles, and the resulting correction will not remain strictly perfect in all latitudes.

To correct Heeling Error.—The heeling error is corrected for any given magnetic latitude by placing a vertical magnet exactly under the centre of the compass card, with its N. or red pole uppermost if the heeling error is to windward or to the high side of ship, or its S. or blue end uppermost if to leeward or to the low side of ship, moving the magnet to or from the compass until the heeling error is corrected

Note.—The heeling error due to the permanent part of the magnetism, varies inversely as the earth's horizontal force, and consequently is greatest in high latitudes, diminishes as the ship approaches the magnetic equator and increases again, still retaining the same name as the ship recedes from the magnetic equator in the Southern hemisphere. The heeling error due to transverse and vertical soft iron decreases as the ship approaches the magnetic equator, where it is zero, and is of a contrary name in the Southern hemisphere. It is probable that the poles of the vertical magnet may require to be reversed in high southern latitudes.

A divided scale should be marked or fitted outside the tube or some other convenient place so as to show the proper position for the correcting magnet as found in any given magnetic latitude, and the same recorded as a guide for approximately placing the magnet in position on any subsequent voyage in the same locality, and especially on the return of the ship to the United Kingdom.

Candidates should understand that the object of tentative adjustment is to bring the deviations within manageable limits and also to equalise the directive force of the needle so far as is practicable on all courses; but no system of adjustment whatever, is sufficiently reliable in character to absolve the navigator from the necessity of using every precaution, and especially of ascertaining the deviation on every available opportunity by observations of the sun by day and the other heavenly bodies by night.

APPENDIX N.

EXAMINATION OF A MASTER OR MATE IN STEAM.

The regulations under which these examinations are conducted are printed at pages 27 to 29.

A Candidate for this examination is required to have a thorough grasp of the construction of the steam-engine and boiler, to enable him to understand the nature and importance of any defect which may be reported to him by the engineer, and work in harmony with the engineer, in affording time and facilities for disconnexions, inspections, adjustments, and repairs.

To have a knowledge of what the principal repairs are which are needed in engines and boilers and pipes, and how these repairs are usually accomplished.

To be able to form an independent opinion as to a breakdown and the consequent propriety or impropriety of proceeding under reduced steam with temporarily repaired or defective machinery. To understand how to estimate approximately the reduction of fuel required for reduced speed, and consequently to sanction such reduction of speed as may seem to him to be warranted by the report of the engineer, and to satisfy himself before leaving port that there is sufficient coal for the voyage.

To have an intelligent grasp of the general run of pipes and connexions in the engine-room, the marking of cocks, the opening and closing of cocks and valves, how mistakes of importance may be made in the confusion of an accident, and how best to guard against such mistakes.

To be capable of being left in charge of the feeding of a set of boilers, to understand the working of the water-gauge, and to be able to guard against being misled by false indications of the gauge-glass.

To understand about blowing down and surfacing, the reasons for doing so, and the danger which may result from the neglect of these under certain circumstances. A Master or Mate presenting himself for examination in steam must be understood to have made up for his want of practical experience by reading up about the steam-engine. He ought, therefore, to show that he has given his mind to intelligently understanding the *rationale* of the action of the steam-engine. Under this head he should, therefore, be able to state approximately the quantity of heat required in the formation of steam, the remarkable relation of "latent" heat to "sensible" heat, how much steam can be raised by the combustion of one pound of coal, what horse-power measure is, what indicated horse-power is, what is the action of the slide-valve, the course of the steam through the engine, and the advantage of working expansively, and how the expansive action is shown by the indicator diagram. To know the uses of various parts of the engines and dynamos used for electric lighting, and how they and the cables are fitted in the hull; how wires are jointed, insulated and cased; why it is desirable that they should be led along places which are dry and accessible; what is "sparking" and what are the causes which produce it; what is its danger in coal bunkers and petroleum-carrying steamers; what are the uses of switches and cutouts, and why is it so important to prevent short circuiting taking place.

The Candidate has to answer in writing 16 out of 20 questions selected from the book of Elementary Questions.* Selections for this examination are given on the alphabetic sheet for "Steam." Generally, these answers are given by Candidates as learned by rote from a book; the Candidate should, therefore, be asked such *viva voce* questions as will necessitate his giving his answers in different words, so as to discover whether he has the root of the matter in him.

The principal part of the *viva voce* is the examination on board a steamer, preferably one with which he is unacquainted. He is told to look about and try to find out the run of the machinery without the assistance of any one; the Examiner to be in the engine-room to see that this independent examination is properly carried out. When the Candidate reports that he thinks he knows the whole arrangement of

---

*Printed at end of the Regulations relating to the Examinations of Engineers Extra 1A.

the machinery, the Examiner will then question him on the uses of the parts, get him to point out the different cylinders, pumps, valves, condenser, &c., also the dynamo, its field magnets, armature commutators, brushes, cables, &c. He must show that he understands the run of the pipes in the bilges, not necessarily that he has gone over every one of them, but he ought to be directed to trace, at least, one important range of pipes, and to thoroughly satisfy the Examiner that he could be safely trusted to manipulate the valve or cocks in connection therewith. It will not often be practicable for the Candidate to be asked to actually work engines under steam, but he must satisfy the Examiner that he knows how to do so, and that he is aware what precautions have to be taken in regard to water in the cylinder, &c. It is most important that a Candidate should show that, in the event of an accident depriving him of the assistance of engineers, he knows what to do to safely take his vessel to an anchorage, or to stop the engines and proceed under sail alone.

The examination of a Mate in steam is the same as that of a Master. The knowledge required has no reference to the Mate's position A Mate may be examined, but such examination implies that the Mate will one day be a Master, when the possession of the knowledge will be an advantage to him in the discharge of his duties as Master.

APPENDIX O

THE SIGHT TESTS.

1.—Form Vision Test

(1) The test for Form Vision in the first test which the candidate is required to undergo, and until he has passed this test, he cannot be allowed to proceed further with the examination. (*See* paragraph 10, page 3) — Test for Form Vision to be passed first.

(2) The test to be used are Snellen's Letter Test for Candidates who can read, and the " Dot " tests for those who cannot read. — Tests to be used.

The sets of tests, which have been supplied to the Examiners consist, respectively, of eight sheets of Snellen's letters and two sheets of dots.

(3) The chief object of the tests for Form Vision is to show whether the Candidate possesses eyesight of sufficient strength and range, or, in other words, they are means of discovering whether the Candidate has good or bad sight. — Object of the tests.

They also afford a means of detecting whether a Candidate is suffering from that form of colour-blindness which is caused by the excessive use of tobacco, and by illness of similar affections. All candidates who are suffering from colour-blindness arising from causes of that nature, will be found to be incapable of passing the test for Form Vision.

(4) Candidates may use both eyes or either eye when being tested, but they must not be allowed to use spectacles or glasses of any kind. — General conduct of the tests.

The set of tests is to be hung on the wall, *in a good light*, at a height of about five or six feet from the ground.

(5) If the Candidate can read, he should be placed at the distance of 16 feet from the Letter Test sheets, and exactly opposite them. The distance which should never be varied should be carefully measured, and the Candidate should not be allowed to approach within 16 feet of the test sheets. — Conduct of the Letter Test.

One of the eight sheets of letters should then be exposed, and the Candidate should be asked to read the letters, beginning at the top and going downwards. If he can read correctly three of the five letters in the fifth line from the top (third from the bottom), or four of the letters in either of the two lines below, he may be considered to have passed the test. If he cannot do so, he should be treated as having failed. Candidates should be tested with at least two of the sheets of letters, and the same two sheets should not be used for all Candidates.

(6) The number printed over each row of letters only shows the distance in feet at which a person possessing ordinary or normal sight to be able to read the letters in the row and does not apply to the distance at which a Candidate under examination should be tested. — Meaning of the numbers on the Letter Test sheets.

(7) If the Candidate cannot read, he must be tested with the sheets of dots. For this test he is to be placed at a distance of precisely eight feet from the test sheets, and exactly opposite them. One of the sheets of dots is then to be exposed, and the Candidate should be asked to name the number of dots in one or two of the lines of groups. Lines and groups of dots can be formed by holding a piece of white paper over part of the sheet, but care must be taken that when this is being done, the Candidate's view is not obstructed, or the light on the test sheet in any way obscured. — Conduct of the Dot Test.

The Examiner must make sure that the Candidate understands what he is required to do.

If the Candidate answers the questions put to him by the Examiner with complete or very nearly complete accuracy, he should be treated as having passed. If he does not answer with very nearly complete accuracy, he should be treated as having failed.

Tests to be varied.

(8) The Examiner must take care, by varying the tests in Form Vision, and by every other means, to guard against the possibility of any deception on the part of the Candidates. The distance at which the Candidate must stand, and the standard of the vision required, should, however, never be varied.

Pellet Test.

(9) Every Candidate who fails to pass the Form Vision test is to be examined with the pellet test as follows:—

The pellets should be placed on a white plate, and the first test pellet (which is of the same colour as the first wool test skein) should then be placed at a little distance on another white plate. The Candidate should be required to pick out and lay by the side of the test pellet, all pellets of the same colour The same should be done with the second and third test pellets, and the examination should proceed in the same way as the wool test.

(10) Should the Candidate pass the pellet test, the Form Exn. 17B together with the remarks of the Examiner, is to be forwarded to the Principal Examiner, for his instructions as to whether the Candidate is or is not be regarded as having failed in Form Vision.

(11) Should, however, the Candidate fail in the pellet test, thus indicating that the defective form sense is due to disease, &c., it will not be necessary to submit the case to the Port Officer, but the Examiner should report the Candidate as having failed in Form Vision, and in forwarding the usual papers, a description of the colours of the pellets incorrectly selected as matches in the respective tests, with any remarks, should be given on the Form Exn. 17C, in the space allotted for the incorrect wools.

Result of test, to be reported.

(12) The result of every test in Form Vision is to be reported to the Government, on the Form Exn. 2, and to the Port Officer on the Form Exn. 14, when the Candidate is up for examination for a certificate and to the Government on the Form Exn. 2*a*, when the Candidate is up for examination in colours only.

All cases of failure to pass the test are also to be reported to the Port Officer on Form Exn. 17B.

2.—*Colour Vision Test.*

Nature of the tests.

(1) The Colour Vision of Candidates is to be tested by means of Holmgren's wools.

The wools are always to be kept in the tins provided for the purpose, except when in use at an examination, in order that they may not become faded or dirty. Each set contains about 135 skeins of wool.

General instructions.

(2) Before the examination commences, the skeins should be separated from one another, but each separate skein should be kept tied up as when first received.

The three test skeins are labelled respectively I (light green), II*a* (pink)] and II*b* (red), and they are always to be used in the order mentioned.

Care must be taken that the labels do not get detached.

The Colour Vision Test should be held only by daylight. If a good natural light is not obtainable, and artificial light has to be used, the test must be postponed. When the weather is dark or foggy, and a Candidate cannot be examined in colours before his examination in Navigation commences, he may be allowed to proceed with the examination in Navigation, provided he is examined in colours on the first available opportunity.*

Full instructions as to the conduct of the examination will be fund on pages 97 to 104.

Course to be followed if incorrect selections are made by Candidates.

(3) The Examiner, as the examination proceeds, should carefully place on one side the skeins, the selection of which by the Candidate seems to indicate a defect in Colour Vision, taking care to discriminate between those selected as matching the first test skein, those selected as matching the second test skein, and those selected as matching the third test skein.

The skeins which have been correctly selected, should be returned to the general heap on the completion of each of the three tests.

Pieces of the wools incorrectly selected by a Candidate who fails are to be sent to the Principal Examiner of Masters and Mates.

(4) In every case in which the Examiner rejects a Candidate, or is in doubt as to whether he should reject him or not, he is, when the examination is finished, to cut a small piece (say, an inch) off *every one of the actual skeins incorrectly selected by the Candidate*, and to stitch the pieces cut off on to Form Exn. 17*c*, keeping the pieces cut off the skeins selected as matches to the first test skein in one line, the pieces cut off the skeins selected as matches to the second test skein in another line, and the pieces cut off the skeins selected as matches to the third test skein in a third line on the Form. The Form (Form Exn. 17*c*), with the pieces of wool attached to it, is then to be forwarded to the Port Officer, with the Examiner's report, on Form Exn. 17B.

The greatest care must be taken that the pieces forwarded are cut off the actual skeins selected by the Candidate, in order that there may be a reliable record of the actual selections made by the Candidate if any question should subsequently arise.

Pieces need not be cut off the test skeins, but only off the skeins incorrectly selected by the Candidate.

* When the examination in Navigation precedes the Colour Tests, the Candidates should be informed that the examination in Navigation will count for nothing if they should fail to pass the Colour Test.

(5) In cases in which the Candidate passes the test, pieces need not be cut off the skeins he has selected. *If the Candidate passes, pieces of the wools need not be cut*

(6) When the Candidate makes incorrect matches, the Examiner should, after each of the three tests, hold up the skeins selected, and ask the Candidate if he is satisfied that they all match the test skein. If he is not satisfied, he may be allowed to withdraw any of the skeins he pleases. *Candidates should be given the opportunity of correcting their mistakes.*

(7) During the test for colour-blindness the Examiner should avoid naming the colours of any of the wools, and should explain to the Candidate that he does not require them to be named to him. *Candidates are not required to name the colours of the wools.*

In the test for colour ignorance the Candidate has to name three colours. (*See* page 68.)

(8) As soon as any skein becomes discoloured, or unduly reduced in size (say, by one-third), owing to pieces having been cut off it, the matter should be reported to the Government. *Courses to be taken when the skeins of wool become reduced in size or discoloured.*

(9) In the remarks which follow, reference is made to different kinds of colour-blindness (red-blindness and green-blindness), but the Examiner is not required to form any conclusion as to the kind of colour-blindness from which the Candidate suffers, and should not offer the Candidate any opinion on this point. *Examiners are not required to decide from what form of colour-blindness an unsuccessful Candidate is suffering.*

All that is required is that the Examiner shall conduct the examination according to the rules laid down, and from the wools selected judge whether the Candidate is or is not colour-blind, the nature of his colour-blindness being immaterial.

(10) The result of every test should be reported to the Government on the Form Exn. 2, and to the Port Officer on the Form Exn. 14, when the Candidate is up for examination for a Certificate of Competency, and to the Government on the Form Exn. 2*a*, when the Candidate is up for examination in colours only. *Result of tests to be reported.*

All cases of failure should also be reported to the Port Officer on Form Exn. 17*b*, to which should be attached Form Exn. 17*c*, containing the pieces of the wools incorrectly selected by the Candidate. (*See* paragraph 4, page 62.)

HOLMGREN'S METHOD OF TESTING FOR COLOUR.

The method of testing consists in asking the Candidate to select from variously coloured objects those which appear of the same colour as one which the Examiner selects. The most suitable objects and at the same time the most readily obtainable are skeins of wool, which can be procured of almost every desired hue and tone. An advantage of skeins of wool, besides their portability, is that, owing to their want of gloss, they appear of approximately the same tone from whichever side they are viewed. The colours of the skeins to be selected include reds, oranges, yellows, yellowish greens, pure greens, blue-greens, blues, violets, purples, pinks, browns and greys. Several shades of each colour, with at least five gradations of each tint, are provided, from the deepest to the lightest greens and greys. Varieties of pinks, blues, and violets, and of light grey, together with shades of brown, yellow, red, and pink, are well represented. The test skeins with which the examinees are to compare the other skeins are three in number:—(1) a light green; (2) a pink; and (3) a bright red. Those three colours will suffice to indicate approximately the amount and kind of colour-blindness which may exist. The light green skein, which is a tolerably pure green mixed with a large proportion of white, is chosen as the colour which closely matches the spectrum colour which the red and green-blind distinguish as white or grey. It is chosen of a pale tint, as it then becomes puzzling to the colour-blind to distinguish its colour by luminosity. A light grey or drab skein will present the same brightness to him that this pale colour does, and, although he may be trained to distinguish bright colours by their relative luminosities, in the case of these pale varieties he will be unable to do so. The pink is chosen for similar reasons, and in fact it is nearly a complementary colour to the green. The pink is, according to the Young-Helmholtz theory, a mixture of two fundamental colours, the blue and the red, and, as in the green-blind it excites both the blue and red sensations, it may be confused with grey or with a green. In the red colour-blind it excites in excess the blue sensations mixed with what they call whites. A blue or violet may, therefore, be matched with it.

The method of examination is as follows:—

Method of Examination and Diagnosis.

The wools are placed in a heap on a large table covered by a white cloth or white paper, and in broad daylight. The first test skein is taken from the pile, and laid far enough away from the others not to be confounded with them during the examination. The person examined is requested to look carefully at the test skein and then to select other skeins from the pile most nearly resembling it in colour, and to place them by the side of the sample. At the outset, it is necessary that he should thoroughly understand that he is required to search the heap for the skeins which make an impression on his chromatic sense, or sense of

colour, similar to that made by the test-skein, and quite independently of any name he may give the colour. The Examiner should explain that resemblance in every respect is not necessary; that there are no two specimens exactly alike; that the only question is the resemblance of the *colour*; and that, consequently, the Candidate must endeavour to find something similar in shade and something lighter and something darker of the same colour. If the person examined cannot succeed in understanding this by a verbal examination, resort must be had to action. The Examiner should himself pick out the skeins, thereby showing in a practical manner what is meant by a shade, and then restore the whole to the pile, except the sample skein. As it would require too much time to examine every individual in this way, it is advisable, when examining large numbers, to instruct them all at once, and to ask them to attentively observe the examination of those preceding them so as to become more familiar themselves with the process. This saves time, and there is no loss of security, for no one with a defective chromatic sense will be able to find the correct skeins in the heap the more easily from having a moment before seen others looking for and arranging them. He will make the some characteristic mistakes; but the normal observer, on the other hand, will generally accomplish his task much better and more quickly after having seen how it has to be done.

The coloured plate shows the test colours and some of the mistakes likely to be made by colour-blind people. The colours in the plate are of two characters:—

1st.—The *colours for samples* (*test colours*); that is, those which the Examiner presents to the persons examined; and

2nd The "*confusion colours*"; that is to say, those which the colour-blind may select as matches with the sample.

The first are shown on the plate as horizontal bands, and are distinguished by Roman numerals (I, II*a*, and II*b*), the second as vertical bands, under the test colours, and are distinguished by Arabic figures (1, 2, 3 etc.)

As to the similarity between the confusion colours of the plate and the wools which the colour-blind take from the heap, reliance must be placed simply on the hue, and not their brightness or degree of colour saturation. The confusion colours shown in the plate are only to illustrate the mistakes which the colour-blind may make, and for this purpose they survey perfectly. Having made this explanation, we can pass directly to the test itself. The following are the direction for conducting it, and for making a diagnosis from the results:—

TEST I.—The *green* test skein which is labelled Test No. I in the bundle is exhibited to the Candidate. This sample is the palest shade (the lightest) of very pure green, which is neither a yellow-green nor a blue-green to the normal eye, but fairly intermediate between the two, or at least not verging upon yellowish-green.

Rule.—The examination must continue until the examinee has placed near the test skein several other skeins of the same colour, or else, with these or separately one or more skeins of the class of "confusion colours" such as 1 to 5 in the plate, or until he has sufficiently proved that he can easily and unerringly distinguish the confusion colours, or else has given unmistakeable proof of a difficulty in accomplishing it.

Diagnosis.—An examinee who places with the test skein "confusion colours" such as 1 to 5—that is to say, finds that they resemble the "test colour"—is *colour-blind*, whilst if he evinces a manifest disposition to do so, though he does not absolutely do so, he has a *feeble chromatic sense*, or sense of colour.

Remark.—We might have taken more than five colours for "confusion"; but we must remember that we are not taking into consideration *every* kind of defective colour sense

TEST II.—The pink or light-purple skein, which is labelled No. II*a*, is shown to the examinee. The colour is midway between the lightest and darkest. It only approaches that given as II*a* of the plate, as the colour of the wool is much more brilliant and saturated and bluer.

Rule—The trial must be continued until the examinee has placed all of the greater part of skeins of the same colour near the test skeins, or else, together or separately, several skeins of the "confusion colours," such as 6—9. If he is colour-blind, he will probably select either the light or deep shades of blue and violet, especially the deep (6 and 7), or the light or deep shades of one kind of green or grey inclining to blue (8 and 9).

TEST III.—The *red* skein labelled No II*b* is presented to the examinee. It is necessary to have a vivid red colour, like the red flags used as signals on Railways. The colour should be that of II*b* of the plate, rather towards yellowish-red.

Rule. This test should be continued until the person examined has placed beside the test skein the greater part of the skeins belonging to this hue, or else several "confusion colours" (10—18).

Remark.—Every case of comparatively complete colour-blindness does not always give precisely the same mistakes. Instances occur of persons who are not completely colour-blind, or of completely colour-blind persons who have been practised in the colours of signals and who endeavour not to be discovered. They usually confound at least green and brown, but even this does not always happen.

Mono-chromatic Vision.—The absence of every colour sensation, except one, will be recognised by the confusion of all the hues, which will appear to be of the same intensity of light or brightness.

Dr. Joy Jeffries, in his book on colour-blindness, gives a translation of Holmgren's special directions for conducting the examinations. The examinations to which Holmgren refers were for employés on the Swedish railways, but the remarks which follow are applicable to examinations for officers and seamen in the Mercantile Marine.

Special Directions for Conducting the Test.

The method plays an important part in an examination of this kind, not only from the principles upon which it rests, but also from the manner in which it is used. The best plan for directing how to proceed is by oral instructions and *de visu*, but here we are obliged to accomplish this by description. Now, this is always defective in some respects, especially if we wish to be brief. What has been said would evidently suffice for an intelligent and experienced physician; but it may not be superfluous to enter still further into detail to provide against any possible difficulties and loss of time. The object of the examination is to discover the nature of a person's chromatic sense, or sense of colour. Now, as the fate of the Candidate and that of others depend upon the correctness of the judgment pronounced by the Examiner, and, as this judgment should be based upon the manner in which the Candidate stands the trial, it is of importance that this trial should be truly what it ought to be a trial of the nature of the chromatic sense, and nothing else; an end that will be gained if our directions are strictly followed. It is not only necessary that the Examiner should be carefully observe them—which does not seem to us difficult—but that he also should take care that the individual examined does thoroughly what is required of him. This is not always as easy as one might suppose. If it were only required to examine people familiar with practical occupations and especially with colours, and with no other interest connected with the issue of the examination than to know whether they are colour-blind or not, the examination would be uniform and mechanical; but it is required to examine people of various degrees of culture, all of whom, besides, have a personal interest in the issue of the examination. Different people act very differently during the examination for many reasons. Some submit to it without the least suspicion of their defect; others are convinced that they possess a normal sense. A few only have a consciousness, or at least some suspicion, of their defect. These last can often be recognized before examination. They will keep behind the others, and attentively follow the progress of the trial, and, if allowed, will willingly remain to the last. Some are quick, others slow. The former approach unconcernedly and boldly, the latter with over anxiety and a certain dread. Some have been, perhaps, already tested and have practised in preparations for the trial; others have never been familiar with colours. Among those already tested, some may be colour-blind. Some of these latter are uncertain about their Colour Vision and act with great care, whilst others again, having been practised in distinguishing signals, conclude that their colour sense is perfect. They make the trial quickly and without thought, of course, regularly making the mistakes characteristic of their special form of colour-blidness.

The majority, however, desire to perform their task as well as possible, that is, to do what the normal eye does. This, of course, assists in testing them, provided it does not lead to too great care, as then the testing is more difficult, the trouble being that much time is wasted.

Only a very small part have a contrary desire, namely, to pass for colour-blind, though normal-eyed. We will speak of these later, and now only concern ourselves with those who stand the test in good faith with the desire to appear normal, though perhaps they are colour-blind.

The trial generally goes on rapidly and regularly. We will only mention those hindrances and peculiarities which most frequently occur. The Examiner must watch that no mistake is made from not understanding. The names of the colour need never be used, except to ascertain if the name hides the subjective colour sensation, or to find the relation between the name the colour-blind employs and his colour preception.

The person examined who thinks more of names than the test itself (this being generally a sign of school-learning) selects not only the wools of the same hues—that is, those of the same colour to his eye—but all which generally have the name of this colour; for instance in the first test I, not only the green like the sample, but all that are green; and with the second test, not only the pink (and what are generally called red), but all which *look* reddish, scarlet, cinnabar, or sealing-wax red. This is of no importance, for those who only do this have scarcely such defective chromatic sense as that with which we are concerned.

Under any circumstances it is better to correct the mistakes just mentioned, when arising from misunderstanding, and it is even necessary, in reference to the mistake we explained might occur with the first rest. It might be said that it was sufficient if the examinee

confounded the test colour with green only; that it was indifferent whether he distinguishes carefully between the various kinds of green. But, in fact, this is not so unimportant. We must give full weight as to whether the confusion arises from misunderstanding, or lack of practice with colours, or, finally, from a true chromatic defect. To include all that is green would render the test tedious and unpractical. In fact, no little judgment has been exercised in the selection of the very lightest shade of the green proposed as a test colour, for it is exactly what the colour-blind most readily confounds with the colours (1-5) of the plate. If the examinee were allowed to depart from the narrow limits, every shade of green could be included, the result of which would be that he would prefer to select all the vivid shades, and thus avoid the dangerous ground where his defect would certainly be discovered. This is why it is necessary to oblige him to keep within certain limits, confining him to pure green specimens, and, for greater security, to recommend him to select especially the lightest shades; for, if he keeps to the darker shades, as many try to do, he readily passes to other tone, and loses himself on foreign ground, to the great loss of time and of the certainty of the test. What we have just said of green applies also, of course, to pink. (Test II*a*.)

The principle of our method is to force the examinee to reveal, by an act of his own, the nature of his chromatic sense.

Now, as this act must be kept within certain limits, it is evident that the Examiner must direct him to some extent. This may present in certain cases, some difficulty, as he will not always be guided, and does either too much or too little. In both cases the Examiner should use his influence, in order to save time and gain certainty, and this is usually very easily done. This intervention is, of course, intended to put the examinee in the true path, and is accomplished in many ways according to the case in point.

We will here mention some of the expedients we have found useful:—

(A) *Interfering when the Candidate selects too many Colours.*

It is not always easy to confine the Candidate within the proper limits. In the first test he easily slips a yellow-green or blue green skein among the others, and as soon as there is *one*, others follow usually; and it thus happens that in a few moments he has a whole handful of yellow-green, a second of blue green, a third of both these shades, at the same time. Our procedure has assisted us in more than one case of this kind.

(*a*) When the person examined has begun to select shades of one or several other colours than those of the sample, his ardour is arrested by taking from him the handful of skeins he has collected and asking him whether his eye does not tell him there are some which do not match the others, in which case he is told he may restore them to the pile. He then generally proceeds in one of the following manners:—

1. He rejects, one after the other, the incorrect skeins, so that only the correct remain, which is often only the sample skein. He is shown what mistake he has made, and he is told only to select skeins of the same hue as the specimen, although they may be lighter or darker. If his first error arose only from a misconception or want of practice in handling colours, he begins generally to understand what he has to do, and to do properly what is required of him.

2. Or else he selects and rejects immediately the test skein itself. This proves that he sees the difference of colour. He is then shown the test skein as the only correct one, and is asked to repeat the trial in a more correct manner. He is again put on the right track as just before, and the trial proceeds rightly, unless the error arose from a defect in colour sense. Many seem, however, to experience a natural difficulty in distinguishing between yellow-green and blue-green, or the dull shades of green and blue. This difficulty is, however, more apparent than real, and is corrected usually by direct comparison. If the method requiring the name of the colour to be given is used, a number of mistakes may be the result If a skein of light green and light blue alone are presented to him, and he is asked to name them, he will often call blue green and green blue. But, if in the first case a blue skein is immediately shown him, he corrects his mistake by saying "this is blue" and "that green." In the last case the same thing happens *mutatis mutandis*. This is not the place for an explanation. It must suffice to say that the error is corrected by a direct comparison between the two colours.

(*b*) *Another Process.*—If the Candidate place by the side of the sample a shade, for instance, of yellow-green, the Examiner places near this another shade, in which there is more yellow, or even a pure yellow, remarking at the same time that if the first suit the last must also. The Candidate usually dissents from this He is then shown, by selecting and classing the intermediate shades, that there is a gradation, which will diverge widely if logically carried out as he has begun. The same course is followed with colours of the blue shades, if the blue-green were first selected. He sees the successive gradations, and goes through with this test perfectly if this chromatic sense is correct.

To ascertain further whether he notices the tints of yellow and blue in the green, we can ourselves take the yellow-green and blue-green

and ask him if he sees any difference in colour between them. We can judge by his answer of his sense with regard to these shades, and the object of this investigation is accomplished.

It results from all this that many who are finally considered to have a normal chromatic sense may occasionally cause embarrassment. In the main, the normal observer of this kind causes greater loss of time than the colour-blind. It is astonishing to see with what rapidity the colour-blind betray their defect. At least it is found, in the majority of the cases examined by us, that the first skein of wool selected from the pile by the colour-blind in the first test was one of the "colours of confusion."

(B) *Interfering when the Candidate selects too few wools.*

Those who evince too great slowness also require the interference of the Examiner in another manner. We can lay aside here those cases in which, at the sight of the complex colours of the heap of wool, the Candidate finds it difficult to select a skein resembling the sample in a collection where all the particular colours seem to differ from each other, and in consequence declares immediately that he can find none resembling the specimen. He is then told that an absolute resemblance is not demanded, and that no one asks impossibilities; that time is limited, many are waiting, etc. But there are people who—from natural slowness, from being unaccustomed to such business, from fear of making mistakes, especially if they have been previously examined and been suspected of colour-blindness, or from many other motives—proceed with the greatest caution. They do not even wish to touch the wool; or they search, select and replace with the greatest care all the possible skeins without finding one corresponding with the sample, or that they wish to place beside it. Here, then, are two cases: on one hand, too much action with the fingers, without result; on the other, too little action. The Examiner is forced to interfere in both cases:—

(*a*) In the case of too much manual action, without corresponding practical result, the Examiner must be careful that the eye and hand of the Candidate act simultaneously for the accomplishment of the desired end.

Some people forget that the hands should be subservient to the eye in this trial, and not act independently. Thus they are often seen to fix their eyes on one side, while their hands are engaged on the other. This should be corrected, so as to save time and avoid further labour. The candidate should be told to cross his hands behind is back, to step back apace, and quietly consider all the skeins, and, as soon as his eye has met one of those for which he is looking, to extend his hand and take it. The best plan is to advise him to look first at the sample, and then at the pile, and to repeat this manœuvre until his eyes find what he is looking for.

This plan generally succeeds when nervousness from over anxiety causes his hands to tremble; but it is not always easy to induce him to keep his hands behind his back until the moment for taking the skein in question.

(*b*) In cases of great caution, the trial is hastened, if the Examiner come to the assistance of the Candidate, by holding above the pile one skein after the other, and requesting him to say whether it resembles the colour of the sample or not.

In cases where any one suspected of colour-blindness has remained some time to see the trial of others, and where, as often happens, he has remarked the skeins belonging to a required shade, he may, of course, profit by it in his own trail. But this can be prevented by shuffling the skeins.

It may be regarded as an advantage of this method that it has at command a great variety of resources We have by no means mentioned all; and yet many who have only read this description will probably reproach us with having devoted ourselves too much to details which seems to them puerile. But we believe that those who have examined the colour sense of a great number of persons, and acquired thereby considerable experience, will think differently.

We are convinced that time is saved by the means we have described and a more certain result obtained; whilst a practised surgeon, who has become to a certain decree a *virtuoso*, will accomplish his object quicker and surer by such means than one who neglects them. Recent experience fully confirms this. All those who have familarized themselves with this method, and have had experience with colour-blindness, and of whose competence there can be no doubt, report, without exception, that it is to be fully depended on—the most practical and the best.

An advantage of the method was shown to be that those who were to be examined could be present and see each individual tested, without this interfering in the least with the certainty of the result. The individual test is even hastened thereby. The colour-blind, and even the moral-eyed who are not familiar with colours, are generally rather shy about being tested, in whatever way it is done. As the method, however, is carried out, they have more confidence. The majority are even amused The old adage holds true here, that it is easier to find fault than to do it yourself. The Surgeon, who watches not only the examined, but also those around, can often see from their faces how closely the latter observe the person being tested, when he takes out the wrong colours, as also when he neglects

the right ones under his eye. This gives those looking on confidence and assurance, till their turn comes, when they appear as uncertained as before they were confident. There is something attractive in the process, stimulating the interest, and not without benefit.

From this we see that our judgment of a person's colour sense is made, not only by the material result of the examination—the character of the wools selected—but often also by the way the examined acts during the test. We should mention a very common manner of persons on trial, which, in many cases, is of great value in diagnosis. Often, in searching for the right colour, they suddenly seize a skein to lay it with the sample, but then notice it does not correspond, and put it back in the heap. This is characteristic; and if an Examiner has often seen it, he can readily recognize and be assured that it is an expression of difficulty in distinguishing the differences in the colours. We frequently see this in the first test, with shades of greenish-blue and bluish-green. Here it means nothing important; but it is quite the reverse, however, when it concerns the grey or one of the confusion colours (1-6). Uncertainty and hesitation as to these colours, which the colour-blind do not distinguish from the test colour, even when directly comparing them, is positive proof of mistake, implying defective chromatic vision of the complete colour-blind type. No doubt the form of chromatic defect which we have called *incomplete* colour-blindness exists in several kinds and degrees This is not the place to further discuss our experience on this point; and, for the practial purpose we have in view, it is not necessary. As we have explained, there are among this class, forms of colour blindness gradually approaching normal colour sense. How they are distinguished has been described. We designated them as possessing *feeble colour sense*.

Is is, perhaps, not easy to detect these special forms by any other method, or even by our own; we, therefore, give the following as a means of so doing. The only way of getting at it is by determining at what distance the Candidate can distinguish a small coloured surface. We have to dtal, in fact with a feeble colour sense, which does not *prevent* the colours from being distinguished, but only renders it difficult We may suppose, in comparison to the normal that the *feeble* colour sense is due either to a weaker response to the stimulation of the colour-perceptive organs of the retina, or else to a stimulation of a relatively smaller number of these organs. In either case this method would give us the same result, judging from our experience in testing the eccentric portions of the field of vision with the perimeter.

The method we here speak of shows us also the effect of habit and practice on the colour perception, and it is worth while to dwell on this point. It not unfrequently happens that a person who by test No. I has been noted "incompletely colour-blind," after they know of their mistake and have practised themselves in distinguishing colours will so comfort themselves at a second trial that we have to simply mark them as of "feeble colour sense" The same will sometimes happen with test No II, and it is explainable by what we have said, namely, that between the complete lack of some one colour sense and the incomplete there is a series of gradations, and that in such cases practice would affect the result of examinations.

All the examples given prove that many seeming trifles and plans are of value in making the examination—amongst others the keeping the sample a little way off from the heap of worsteds, as also the removal of everything which can cause the examined doubt and uncertainty. We must not, therefore, let them do what many want to do, namely, hold a number of the worsteds in the hand at once. We must make the person being examined place each skein, as he takes it up, either with the sample or else back on the heap. Many who are not clear whether the skein is like the sample or not, instinctively put the shades most resembling the test sample at the side of the heap towards it, and thus gradually form a little bridge, but which for correctness they will not vouch for. No such half measures must, however, be allowed.

3.—Colour Ignorance Test.

Object of test for colour ignorance.

1. The object of this test is simply to ascertain whether the Candidate knows the names of the three colours—red, green, and white—which it is important of every seaman to be acquainted with, and the test is to be confined to naming those colours.

Manner in which the test is to be conducted.

2. One or two of the purest red and green skeins should be selected from the set of wools, and the Candidate should be required to name their colours. He should also be required to name the colour of any white object, such as a piece of white paper

Grounds in which Candidates should be treated as having passed or failed.

3. If he answers correctly, he could be considered to have passed the test. If he makes any mistake, he should be tried with the lantern which was formerly used for colour tests, the plain glass and the standard red and the green glasses being employed for the purpose. If he does not name these glasses correctly, he should be reported as having failed to pass the test.

Result of test to be reported.

4. The result of every test should be reported to the Government on Form Exn. 2, and to the Port Officer on the Form Exn 14, when the Candidate is up for examination for a Certificate of Competency, and to the Government on the Form Exn. 2*a*, when the Candidate is up for examination in colours only.

All cases of failure should be reported to the Port Officer on Form Exn. 17B.

APPENDIX P

TABLE SHOWING THE REQUIREMENTS AS TO SEA SERVICE NECESSARY TO QUALIFY FOR EXAMINATION FOR CERTIFICATES OF COMPETENCY.

NOTE.

A Candidate for an Ordinary Certificate of any grade who has not previously held an Ordinary Certificate of a lower grade, must prove that he has served twelve months in the Foreign Trade or eighteen months in the Home or Coasting Trade in a square-rigged Sailing Vessel. Service in square-rigged Sailing Vessel.

Where Foreign-going Certificates are required to be held to qualify Candidates for examination, they may be either the Ordinary Certificates or those for Fore and Aft-rigged Vessels or for Foreign-going Steamships. Nature of Certificates.

Rank.	Minimum Age.	Total Sea Service (Years)	Officer's Service in Merchant Vessels.		
			Years.	Lowest Capacity.	Lowest Certificate required.
1	2	3	4	5	6
ORDINARY CERTIFICATES FOR "FOREIGN-GOING SHIPS."					
2nd Mate ..	17	4	...	No Officer's service required	None.
Only Mate	19	5	...	No Officer's service required	None.
1st Mate	19	5	1	3rd or 4th Mate in Foreign Trade *in charge of Watch.*	2nd Mate Foreign-going.
				Or	
			1½	Only Mate in Home or Coasting Trade.	2nd Mate Foreign-going, or Home Trade Mate.
				Or	
			1	Pilot with 1st Class Pilot's Certificate.	None.
Master	1	6	1	Only Mate in Foreign Trade...	Only Mate Foreign-going.
				Or	
			1½	Only Mate in Home or Coasting Trade. *And in addition, unless the above service was performed with a first Mate's Foreign-going Certificate, he will also be required to prove one of the following services prescribed for that grade.*	Only Mate Foreign-going.
			1	3rd or 4th Mate in Foreign Trade *in charge of Watch.*	2nd Mate Foreign-going.
				Or	
			1½	Only Mate in Home or Coasting Trade.	2nd Mate Foreign going. or Home Trade Mate.
				Or	
			1	Pilot with 1st Class Pilot's Certificate. OR HE MUST HAVE SERVED.	None.
		6½	1	2nd Mate in Foreign Trade... *(Provided that if this service as 2nd Mate was performed under an additional or Auxiliary 1st Mate it will only be accepted if a 3rd and 4th Mate were also carried.)*	1st Mate Foreign-going.
				And in addition.	
			1½	3rd or 4th Mate in Foreign Trade *in charge of Watch.* OR HE MUST HAVE SERVED.	2nd Mate Foreign-going.
			3	Master in Home or Coasting Trade.	2nd Mate Foreign-going or Master Home Trade for one year of such service.
				Or	
			1	Master in Home or Coasting Trade.	Do.
				And in addition.	
			3	Mate in Home or Coasting Trade.	
Extra Master.	...	...	...	Same as Master	

CERTIFICATES FOR "FORRIGN-GOING" FORE AND AFT-RIGGED VESSELS.

2nd Mate . Only Mate 1st Mate .. Master ...	Same as for Ordinary Certificates, except that no service in *square rigged Sailing Vessels* is required.

* If all the services was in Home or Coasting Trade.

CERTIFICATE FOR "FOREIGN-GOING" STEAMSHIP.

2nd Mate... Only Mate 1st Mate .. Master ... Extra Master.	Same as for Foreign-going Ships, except that the service as *Officer* must have been performed in a *Steamship*, and that no Service in *square-rigged Sailing Vessels* is required.

Rank.	Minimum Age.	Total Sea Service (Years).	Officer's Service in Merchant Vessels.		
			Years.	Lowest Capacity.	Lowest Certificate required.
1	2	3	4	5	6

CERTIFICATE FOR HOME TRADE PASSENGER SHIPS.

Mate .	19	4	...	No Officer's service required .	None.
Master .	20	5	1	Only Mate	Mate Home Trade or 2nd Mate Foreign-going.
			2½	Or 2nd Mate in *charge of Watch*.	Mate Home Trade or 2nd Mate Foreign-going.
			1	Or As Pilot with 1st Class Pilot's Certificate.	None.

APPENDIX Q.

LIST OF MARKS OBTAINABLE IN THE EXTRA EXAMINATIONS.

(*a*) Marks will be awarded according to the degree of precision with which a Candidate does his work, no marks being given for any problem or work, in which the Candidate is wrong in principle.

(*b*) An incorrect figure or incorrect formula will involve the loss of one-third of the marks allotted for the problem in question.

(*c*) Marks, at the discretion of the Examiner, but not in any case to exceed 50, will be given for orderly working and general method, &c.

(*d*) Marks, at the discretion of the Examiner, but not in any case to exceed 50, will be given for the supplementary *viva voce* test on problems and written answers.

(*e*) Thirty marks are allotted to each of the following "Ordinary" problems. Only four will be set :—

Multiplication by logarithms.
Division by logarithms.
Day's work.
Latitude by meridian altitude of sun.
Parallel sailing.
Mercator's sailing.
Time of high water.
Amplitude by sun.
Longitude by chronometer and altitude azimuth by sun.
Time azimuth by sun.
Finding meridian passage of star.
Tables for finding stars' meridian passage.

Meridian passage and attitude of planets.
Where meridian passage of planets can be found.
Finding name of stars near the meridian.
Maps, &c., for finding stars.
Computing approximate meridian altitude of star.
Latitude by meridian altitude of star.
Longitude by chronometer by a star.
Time azimuth by a star.
Latitude by ex-meridian altitude of sun or star.
Sumner problem by sun.
Latitude by altitude of Polar star.
Latitude by meridian altitude of moon.
Chart paper Exn. 9C.
Chart paper Exn. 9D.

(*f*) The numbers opposite the following problems represent the full marks obtainable :—

Lunar problem by sun, star or planet ...	60
Latitude by double altitudes, sun or star ...	30
Finding position, &c., by simultaneous altitudes of two stars	40
Error of chronometer with artificial horizon, &c.	25
Explanation in writing *re* great circle sailing ..	20
Showing great circle track, &c., by globe ...	40
Problem in great circle sailing	50
Drawing figure and giving trigonometrical ratios	25
Right-angled plane trigonometry (problem) ...	20
Oblique-angled plane trigonometry (problem) ...	25
Napier's rules for circular parts	20
Right-angled spherical trigonometry (15 marks for each problem)	30
Compass syllabus (5 marks for each written answer and 10 for each problem)	235
Constructing a Mercator's chart	30
Law of storms	20
Orderly working and general method, &c. ...	50
Supplementary *viva voce* test on problems and written answers	50

APPENDIX R.

TEXT-BOOKS TO BE USED IN THE EXAMINATIONS.

FOR BAROMETER, THERMOMETER, AND HYDROMETER.—"A Barometer Manual for the use of seamen with an appendix on the Thermometer, Hygrometer, and Hydrometer," issued by the authority of the Meteorological Council, and to be purchased either directly or through any bookseller, from Eyre and Spottiswoode, East Harding Street, Fleet Street, E. C.; or Oliver and Boyd, Edinburgh, or Edward Ponsonby, 116, Grafton Street, Dublin.—Price three pence.

FOR PREVAILING WINDS AND CURRENTS OF THE GLOBE.—"The Principal Winds and Currents of the Globe, &c." compiled from the various Admiralty, Sailing Directions, Weather Charts, &c., by Captain Robert Jackson, R. N., and to be purchased either directly or through any bookseller, from Simpkin, Marshall & Co., Paternoster Row, London, or Henry Lewis, 114, High Street, Portsmouth.—Price one shilling.

FOR TRADE ROUTES.—"Ocean Passages" compiled from the various Admiralty Sailing Directions, by Captain Robert Jackson, R. N., and to be purchased, either directly or through any bookseller, from Simpkin, Marshall and Company, Paternoster Row, London; or Henry Lewis, 114, High Street, Portsmouth.—Price one shilling.

FOR TIDES.—"Tide Tables for the British and Irish Ports," published annually by the Admiralty, and to be purchased, either directly or through any bookseller, from J. D Potter, 31, Poultry, E. C., and 11, King Street, Tower Hill, E. C.—Price one shilling and six pence.

[Intending candidates are advised to procure a copy of these books to take to sea with them, so that they may study them during their leisure hours.]

INSTRUMENTS.—The Barometer (Kew pattern Marine Barometer), Thermometer, and Hydrometer used in the examinations will be precisely similar to those supplied to shipmasters by the Meteorological Office for making observations on board ship.

APPENDIX S

TABLE SHOWING the RIVER OR SMOOTH WATER, the PARTIALLY SMOOTH WATER, and the EXCURSION LIMITS of the various PORTS.

Name of Port.	Smooth Water Limits.	Partially Smooth Water Limits.	Excursion Limits.
DISTRICT of the EASTERN COAST of SCOTLAND.			
Aberdeen	Inside the Harbour	Nil	Peterhead or Montrose.
Banff	Nil	Nil	Peterhead or Lossiemouth.
Dundee	Within a line from Dundee and Newport Ferries.	Within a line from Broughty Castle to Tayport.	Montrose or Leith.
Inverness	With a line from Fort George to Chanonry Point to Fort William	Nil	Lossiemouth or Dunrobin.
Leith	Nil	Within a line drawn from Kirkcaldy to Portobello.	Berwick-on-Tweed or Dundee.
Montrose	Nil	Nil	Dundee or Aberdeen.
Peterhead	Nil	Nil	Aberdeen or Banff
Queensferry	Above the Forth Bridge	Within a line from Kirkcaldy to Portobello.	Berwick-on-Tweed or Dundee.
DISTRICT of the NORTH-EASTERN COAST OF ENGLAND.			
Amble	Amble Bar	Nil	St Abb's Head or Middlesbro'.
Berwick-on-Tweed	Spittal Point	Nil	North Berwick or Newcastle
Blyth	Inside the Pier Heads.	Nil	Berwick-on-Tweed or Whitby.
Hartlepool, West	Nil	Nil	Amble or Bridlington.
Hartlepool, East	Hartlepool Bar	Nil	Amble or Bridlington.
Newcastle, North and South Shields	Inside the Tyne Pier Heads.	Nil	Berwick-on-Tweed or Scarborough.
Sunderland	Inside the Sunderland Pier Heads	Nil	Berwick-on-Tweed or Scarborough.
Stockton	Fourth Buoy.	Nil	Amble or Bridlington.
Seaham	Nil	Nil	Berwick-on-Tweed or Scarborough
Whitby	Inside the Whitby Pier Heads	Nil	Bridlington or New Castle
DISTRICT of the EASTERN COAST of ENGLAND.			
Boston	Inside the new cut	Nil	Cromer or Hull.
Grimsby	Nil	In winter, nil. In summer within a line from Cleethorpes Pier to Patrington Church	Lynn or Scarborough
Goole	In winter, within line from Whitten Ness to Brough. In summer, above Hull and New Holland.	Within a line from New Holland to Paull (in winter). In summer within a line from Cleethorpes Pier to Patrington Church	Lynn or Scarborough.
Hull	Same as Goole	Within a line from New Holland to Paull (in winter). In summer within a line from Cleethorpes Pier to Patrington Church.	Lynn or Scarborough.
Gainsborough, Lincoln, Nottingham, York.	Same as Goole	Within a line from New Holland to Paull (in winter). In summer within a line from Cleethorpes Pier to Patrington Church.	Spurn Point or Donna Nook.
Scarborough	Nil	Nil	Newcastle or Hull

Name of Port.	Smooth Water limits.	Partially Smooth Water limits.	Excursion limits
LONDON DISTRICT.			
Burnham-on-the Crouch.	Within a line from Hollywell Point to Foulness Point	Within a line form Clacton Pier to Herne Bay Pier.	Dover or Harwic .
Dover .	Nil	Nil	New haven or Sheer ness.
Folkestone .	Nil	Nil	Newhaven or Sheer-ness.
Harwich or Ipswich	Inside Languard Fort	Within a line from Walton-on-the-Naze to Languard Fort.	London or Yarmouth
K ng's Lynn .	Inside Lynn Cut .	Nil . . .	Cromer or Hull.
Littlehampton .	Above Littlehampton Pier	Nil . . .	Poole or Rye.
London . .	Gravesend . .	Within a line from Clacton Pier to Herne Bay Pier.	Dover or Harwich.
Lowestoft . .	* Inside Lowestoft Pier to Norwich.	Within a line from the S. W Barnard Buoy to the North Cockle Buoy inside the Banks.	Cromer or Walton-on-the-Naze
Norwich or Yarmouth	* Inside the Piers	Within a line from the S. W. Barnard Buoy to the North Cockle Buoy inside the Banks.	Cromer or Walton on-the-Naze.
Newhaven . .	Nil . .	Nil	Portsmouth or Dover.
Poole . .	Inside the Harbour	Nil	Weymouth or the Nab.
Portsmouth. .	Inside Portsmouth Harbour.	St. Helen's and the Needles within the Isle of Wight and to Langston Harbour. *For small launches not carrying boats.* In summer, a line from Ryde to Langston Harbour inside the Isle of Wight to Hurst Castle; in winter, Spithead.	Newhaven or Weymouth.
Rochester . .	Sheerness and Whitstable inside Sheppey.	Within a line from Clacton Pier to Herne Bay Pier.	Dover or Harwich.
Southampton .	Calshot Castle .	Same as Portsmouth .	Newhaven or Wey mouth.
Weymouth . .	Nil	Portland Harbour .	Portsmouth or the Start.
Wisbeach . .	Inside Wisbeach Cut.	Nil	Cromer or Hull
SOUTH and SOUTH-WEST of ENGLAND DISTRICT.			
Barnstaple . .	Inside the Bar .	Nil	Padstow or Brid water.
Dartmouth . .	River Dart . .	Nil	Plymouth or Weymouth.
Exeter . .	Inside the Bar .	Nil	Weymouth or plymouth.
Falmouth . .	A line from Zoze Point to Pendennis Point.	Nil	Start Point or Penzance.
Fowey . . .	Inside the Harbour	Nil	Falmouth or Plymouth.
Padstow . .	Padstow Harbour above a line from Gun Point to Brae Hill.	Within a line from Stepper Point to Trebetherick Point.	St Ives or Barnstaple.
Par . .	Nil	Nil . . .	Falmouth or Plymouth.
Penzance . .	Nil . . .	Nil . . .	Falmouth or St. Ives.
Plymouth .	Within a line from the inside of Drake's I land to Mount Batten Pier.	Within a line from Cawsand to Breakwater and Breakwater to Staddon Pier	Exeter or the Lizard.
St. Ives .	Nil	Nil	Padstow or Penzance.
Teignmouth .	Within the Harbour	Nil	Weymouth or Plymouth
Torquay . .	Nil	Nil	Weymouth or Plymouth.

* On all the Inland navigation from Norwich to inside the Piers at Yarmouth or Lowestoft.

Name of Port.	Smooth Water limits.	Partially Smooth Water limits.	Excursion limits.
SOUTH WALES DISTRICT.			
Barmouth . .	Inside Barmouth Ferry.	Nil	Cardigan or Bardsey Island.
Barry Docks .	Inside Dock . .	Nil	Milford or Ilfracombe.
Bridgewater .	Inside Start Point	Within the Bar .	Ilfracombe or Swansea.
Bristol . .	Within a line from Avonmouth Pier to Wharf Point.	In winter, nil. In summer, within a line from Lavernock Point to the Flatholm, thence to the Steepholm, thence to Bream Down.	Ilfracombe or Swansea.
Cardiff . .	Within a line from Lowwater Pier Head to the Lifeboat House near Penarth Dock entrance.	In winter, nil. In summer, within a line from Lavernock Point to the Flatholm, thence to the Steepholm, thence to Bream Down.	Tenby or Ilfracombe.
Cardigan . .	Inside the Bar ...	Nil	Portmadoc or Milford.
Gloucester . .	River Severn or Avon to Sharpness Point and Gloucester Canal.	In winter, nil. In summer within a line from Lavernock Point to the Flatholm, thence to the Steepholm, thence to Bream Down.	Watchet or Barry Docks.
Milford . .	Within a line from Hubberston Heach to Angle Point.	Within a line from South Hook Point to Thorn Island.	Swansea or Cardigan.
Neath . .	Inside the Bar .	Nil	Barnstaple or Milford.
Swansea . .	Nil	Nil	Barnstaple or Milford.
LIVERPOOL DISTRICT.			
Barrow . .	Inside Walney Island.	Nil	Liverpool or Whitehaven.
Bowness . .	Anywhere on the Lakes.	Nil	Nil.
Carlisle . .	Above Port Carlisle	Within a line from Southerness to Silloth.	Whitehaven or Port Whithorn.
Carnarvon . .	Menai Straits to Aber Menai or Beaumaris.	Menai Straits, from Carnarvon Bar to Puffin Island.	Liverpool or Portmadoc or round the Island of Anglesea.
Chester . .	River Dee, not below Connah's Quay.	Inside the West Hoyle Bank.	Barrow, Holyhead, or Carnarvon.
Conway . .	Within a line from Mussel Hill to Trevlyd Point.	Nil	Liverpool or Portmadoc or round the Island of Anglesea.
Douglas . .	From Battery Pier to Victoria Pier.	Nil	Round the Island.
Fleetwood . .	Within a line from Low Light to Knotend Pier. Within Fleetwood Harbour for tugs plying as tenders to Belfast and Isle of Man steamers.	Nil	Whitehaven or Liverpool.
Holyhead . .	Inside the Breakwater.	Nil	Liverpool or Portmadoc or round the Island of Anglesea.
Lancaster . .	Within a line from Sunderland Point to Chapel Point.	Nil	Whitehaven or Liverpool.
Liverpool . .	The Rock Light House.	In winter, nil. In summer, within a line from Formby Point to Hilbro' Point. Special limit for tenders to ocean-going steamers—within a radius of 3½ miles of Formby Lightship—during fine weather only. The Bell Buoy and Bar Lightship for tugs taking passengers from ships outside the Bar.	Barrow, Holyhead, or Carnarvon.
Morecambe .	In winter, nil. In summer, within a radius of two miles of the Midland Railway Dock and to Grange.	Nil	Same as Barrow.
Portmadoc .	Inside the Bar Buoy.	Nil	Cardigan or Carnarvon.
Preston . .	Lytham . .	Within a from Southport or Blackpool inside the Banks.	Llandudno or Barrow.
Whitehaven .	Nil	Nil	Barrow or Carlisle.

Name of Port.	Smooth Water limits.	Partially Smooth Water limits.	Excursion limits.
DISTRICT OF THE WESTERN COAST OF SCOTLAND.			
Ardrossan	Nil	Nil	Stranraer or Glasgow.
Ayr	Inside the Bar	Nil	Stranraer or Glasgow.
Campbelton	Inside the Harbour but not outside Davaar Island.	Nil	Glasgow only.
Dumfries	Inside Aird Point and Glenhowen Point.	Within a line from Southerness to Siloth.	Wigtown or Whitehaven.
Fort William	On the Canal to Inverness.	Nil	Crinan or Tobermory
Glasgow	Within a line from Clock Lighthouse to Duncon Pier (in winter) In summer, within a line from Bogany Point, Isle of Bute to Skelmorlie Castle and Ardlamont Point inside the Kyles of Bute	Within a line from Skirness to Fairlie Head round the Island of Bute.	Stranraer or Campbeltown
Oban	Nil	Inside the Island of Kerrera to Dunstaffnage Point	Crinan, Tobermory, or Fort William
Stranraer	Inside Cairn Ryan	Loch Ryan, within a line from Kinnard Point and Milleur Point.	Wigtown or Greenock
Wigtown	Nil	Nil	Stranraer or Dumfries.
IRELAND.			
Bantry Bay	Inside Bear Island, inside Whiddy Island, Glengariff Harbour, inside Corrid Point.	Nil	Galley Head or Valencia Harbour
Belfast	Within a line from Holywood to Macedon Point.	In summer, within a line from Carrickfergus to Bangor; in winter, nil A special limit for tenders to ocean steamers only, within a radius of 3 miles from Carrickfergus during fine weather.	Rathlin Island or Killough
Cork	Within a line from Camden to Carlisle Forts.	Nil A special limit for tenders to ocean steamers only, within a radius of 3 miles from Roches Point during fine weather.	Dungarvon or Galley Head.
Donegal	Inside the Bar	Nil	Sligo or Kathlin O'Birne Island
Drogheda	Within a line from Crook Point to Burrow Point.	Nil	Dublin or Warren Point Carlingford Lough.
Dublin	Inside the Pier Heads	In summer, with a line from Dalkey Island to Bailey Point, in winter, nil	Drogheda or Arklow.
Enniskillen	Lough Erne	Nil	Nil.
Galway	Lough Corrib	Within a line from Black Rock Beacon to Kilcolgan Point.	Kilkieran or Liscano Bays inside the Arran Isles.
Limerick	Foynes	Within a line from Scattery Lighthouse to Carrig Island.	Loop Head or Kilmore Head.
Londonderry	Within a line from Magilligan Point to Greencastle.	Nil A special limit for tenders to ocean steamers only, within a radius of 3 miles from Innishowen Lighthouse during fine weather.	Buncrana in Lough Swilly or Rathlin Island.

NOTIFICATION

Examination of Compounders at the Orissa Medical School, Cuttack.

IN accordance with the Government of Bengal Notifications Nos. 4042Medl., dated 2nd November 1896, and 337T.—M., dated 9th June 1897, notice is hereby given that the next half-yearly examination of compounders will begin at 10 A.M., on Wednesday, the 25th April 1906, at the Medical School, Cuttack.

2. Every candidate must produce a certificate of training and a certificate of age and previous education, as required by Rule 9 (*vide* Government of Bengal Notification No. 4042Medl, dated 2nd November 1896, published in the *Calcutta Gazette* of the 4th November 1896, and circulated by the Inspector-General of Civil Hospitals, Bengal, to all Civil Surgeons, Superintendents of Medical Schools, Lunatic Asylums and Calcutta Hospitals with his Circular No. 60, dated 5th December 1896).

3. Male candidates must forward to the Superintendent of the Medical School, Cuttack, an examination fee of Rs. 5 at least one week before the 25th April 1906. Female candidates will be examined free of charge. No certificate or fee will be received on Sundays or public holidays.

4. Should any candidate fail to pass the examination, he will forfeit his fee.

NOTE.—The attention of candidates is drawn to Rules 9, 10 and 12 (a) and (b), and of persons granting the certificates to Rules 11 and 14 (3) and (4) and to the certificate, Forms C and D, in the schedule of the Government of Bengal's aforesaid Notification No. 4042Medl, dated 2nd November 1896.

CUTTACK,
The 7th March 1906.

C. R. STEVENS, M.D., F.R.C.S., MAJOR, I.M.S.,
Superintendent, Medical School, Cuttack.

(5) Commercial History and Geography.

The admission fee is Rs. 3, and the fee for the classes is Rs. 3 per mensem.

A. PEDLER,
The 17th March 1906. *Director of Public Instruction, Bengal.*

PRESIDENCY COLLEGE.

Rules for the Evening Classes in Type-writing.

1. There shall be two evening classes in Type-writing.
2. The first course shall be on the Keyboard, Fingering, and the manipulation of a machine, and shall begin annually on the 1st of July and terminate on the 30th of September.
3. The second course shall be devoted to speed practice, and shall begin annually on the 1st of November and terminate on the 15th of April. The speed to be aimed at shall be 60 words a minute.
4. The fee for each course shall be Rs. 10.
5. Candidates who have attended the lectures on Type-writing of the day course shall be eligible for admission to the evening classes. For such candidates it shall be optional to study only the second course.
6. Candidates who have attended the lectures of the day course, but not the lectures on Type-writing, shall be eligible for admission to the evening classes. Such candidates shall begin with the first course.
7. Other candidates shall be admitted provided they satisfy the Education Department, by passing a preliminary test-examination, that they have sufficient knowledge of English. Such candidates shall begin with the first course.
8. Students of the day course shall not be eligible for admission to the evening classes in Type-writing until they have completed the day course.
9. The number of candidates to be admitted annually to the evening classes in Type-writing shall be limited, for the present, to 20. A preference shall be given to students who have completed the day course.

10. Students must attend 75 per cent. of the classes held; and no student who fails to do so shall be allowed to appear at the examination, unless he can show that his failure to attend the required number has been unavoidable.

11. A special examination shall be held annually after the conclusion of the second course. Students of the evening classes shall pass a test-examination before appearing at the special examination. Other candidates shall be allowed to appear at the special examination, provided they satisfy the Education Department, by passing a preliminary test-examination, that they have a reasonable prospect of success. The admission fee shall be Rs. 5.

12. The certificate awarded on the result of the special examination shall show whether the candidate has acquired a speed of 60, 45 or 35 words a minute, the last being the minimum speed recognised.

A. PEDLER,

The 17th March 1906. *Director of Public Instruction, Bengal.*

9. The number of candidates to be admitted annually to the evening classes in Book-keeping shall be limited, for the present, to 20. A preference shall be given to students who have completed the day course.

10. Students must attend 75 per cent. of the classes held; and no student who fails to do so shall be allowed to appear at the examination, unless he can show that his failure to attend the required number has been unavoidable.

11. A special examination shall be held annually after the conclusion of the second course. Students of the evening classes shall pass a test-examination before appearing at the special examination. Other candidates shall be allowed to appear at the special examination, provided they satisfy the Education Department, by passing a preliminary test-examination, that they have a reasonable prospect of success. The admission fee shall be Rs. 5.

A. PEDLER,

The 17th March 1906. *Director of Public Instruction, Bengal.*

NOTIFICATION.

THE Final Commercial Class examination will be held in the Presidency College, Calcutta, on the 5th April 1906 and subsequent dates.

There shall be separate papers in (*1*) (*a*) English, including Grammar and Composition; (*b*) English Correspondence, including Commercial Correspondence, and (*c*) Letter-drafting and Précis-writing; (*2*) Bengali; (*3*) (*a*) Arithmetic, including Commercial Arithmetic and (*b*) Mental Arithmetic; (*4*) (*a*) Commercial History, (*b*) Commercial Geography.

Candidates are required to pass in all the above papers.

Candidates shall also be examined, and shall be required to pass, in either Shorthand-writing, or Type-writing, or Book-keeping. A candidate may offer two of these subjects, and failure to pass in one of them will not disqualify him.

Candidates are warned that if the answer-papers are not legibly and neatly written or prepared, they will not be examined, and examiners are requested to reject papers which show carelessness, or slovenliness, or really bad work.

The examination will be held on the dates and hours and in the order noted below :—

5th April	11—1-30	...	Shorthand or Book-keeping
	2- 4-30	...	Type-writing.
6th April	11—1-30	...	English.
	2—4-30	...	Commercial Correspondence.
9th April	11—1-30	...	Précis-writing.
	2—4-30	...	Bengali.
10th April	11—1-30	...	Arithmetic.
	2—4-30	...	Mental Arithmetic.
11th April	11—1-30	...	Commercial History.
	2—4-30	...	Commercial Geography.

A. PEDLER,

The 7th March 1906. *Director of Public Instruction, Bengal.*

NOTIFICATION.

It is hereby notified that for the ensuing Half-yearly Departmental Examination of Assistant Magistrates and others to be held at 11 A.M. on the 2nd May 1906 and the two following days, a local Examination Committee will be convened in the office of the Commissioner of the Presidency Division at No. 3 Charnock Place, Calcutta, to conduct the examination of candidates employed in the Presidency and Burdwan Divisions.

E. W. COLLIN, *Commissioner.*

COMMR.'S OFFICE, PRESY. DIVN, CALCUTTA, *the 13th March 1906.*

CALCUTTA,
The 20th March 1905.

V. H. JACKSON,
Assistant Director of Public Instruction, Bengal.

HIGH COURT NOTICE.

IT is ordered that the following Rules be read and passed as Rules and Orders of the High Court of Judicature at Fort William in Bengal, to take effect from the 20th day of March 1906:—

It is ordered—

That Rule 16 be repealed, and that the following Rule be substituted therefor:

"*Rule 16.*—When office copies of depositions of witnesses examined in any suit or proceeding before the Court or a Judge are required for the purposes of an appeal, a fair copy of every such deposition shall be settled by the officer by whom the same may have been taken down, and all office copies shall be made from the fair copy so settled."

That Rule 530, Belchambers' Rules and Orders, be amended by adding thereto after the words "shall be done by the Registrar" the words "or by the Master".

FRANCIS W. MACLEAN.

ASUTOSH MOOKERJEE.

NOTIFICATIONS OF THE BOARD OF REVENUE.

NOTICE No. 1779B.

THE HON'BLE MR. F. A. SLACKE, I.C.S., *Member in charge.*

IN supersession of the notice No. 8089B., dated the 8th November 1905, issued by the Board, the following revised notice is published for general information:—

It is hereby notified, for the information of Salt Merchants and dealers in salt, that His Honour the Lieutenant-Governor having been pleased to direct that the Salt Rowana system, which is now in force under Act VII (B.C.) of 1864, will cease to exist from the 1st April 1906. No rowana will be issued by the Board after the 31st March 1906.

2. The abolition of the rowana system will not affect the validity of rowanas issued on or before the 31st of March 1906, the periods of which have not expired, and such pending rowanas will be treated as certificates granted by the Collector of Customs, Calcutta, in respect of the salt covered by such rowanas.

By order of the Board of Revenue, L. P.,
S. M. NASIRUDDIN, *Offg. Secretary.*

MIS. REV. DEPT., SALT (ROWANA) BRANCH, CALCUTTA, *the 17th March 1906.*

NOTIFICATION No. 1827B.

THE HON'BLE MR. F. A. SLACKE, I.C.S.

THE Central Distillery at Berhampur, in the district of Murshidabad, will be abolished with effect from the 1st April 1906. It is hereby notified, under the provisions of the Bengal Excise Act, VII of 1878, that from and after that date, within the following limits of the district of Murshidabad, no spirituous liquor manufactured after the native process shall be sold withou

a license from the Collector of Murshidabad, and no still shall be constructed or worked or spirituous liquors be manufactured:—

Northern boundary—The Sonthal Parganas, Malda and Rajshahi districts.
Western boundary—Birbhum and the Sonthal Parganas districts.
Southern boundary—Burdwan district
Eastern boundary—Nadia and Rajshahi districts.

This cancels notification, dated the 26th February 1890, published at page 198, Part I of the *Calcutta Gazette* of the 12th March 1890.

By order of the Board of Revenue, L. P.,
S. M. NASIRUDDIN, *Offg. Secretary.*

MISC. REV. DEPT., EXCISE BRANCH, CALCUTTA, *the 20th March 1906.*

NOTIFICATION NO. 1780B.

THE HON'BLE MR. F. A. SLACKE, I.C.S., *Member in charge.*

IT is hereby notified for general information that, in consequence of the abolition of the Salt Rowana system in Bengal, the Board are pleased to cancel, with effect from the 1st April 1906, the following returns and rules contained in their Salt Manual, 1903:—

I.—Returns VS, VIIS, XIVS and XVIIIS in Section VII, Rule 1, pages 75—77, and references to returns VS and VIIS in Rule 2 of the section at page 78 of the Salt Manual.

Rules 1 and 6 in Section XIII, pages 93-94 of the Salt Manual

II.—The following notifications issued by the Board are also hereby cancelled with effect from the 1st April 1906:—

NOTIFICATION.	Published in the *Calcutta Gazette*, Part I.		Extent of rescission	Subject of notifications.
	Date	Page		
I.—Notification dated the 20th June 1893.	June 21st, 1893	548	The whole	Authorising the Collector of Tipperah and the Subdivisional Officer of Chandpur to issue special rowanas for transport of salt to Nankhali.
II.—Notification No. 1170R., dated the 14th October 1897.	October 20th, 1897.	1811	Ditto ...	Grant of special rowanas for clearing salt in Backergunge

By order of the Board of Revenue, L. P.,
S. M. NASIRUDDIN, *Offg. Secretary.*

MISCELLANEOUS REVENUE DEPARTMENT, SALT BRANCH, CALCUTTA, *the 17th March 1906.*

NOTIFICATION No. 1828B.

THE HON'BLE MR. F. A. SLACKE, I.C.S.

THE Central Distillery at Mahangunj, in kismat Bejpara, in the district of Jessore, will be abolished with effect from the 1st April 1906. No. 1207L.S.-G.—The 19th March 1906 —It is hereby notified that, under section 15 of the Bengal Local Self-Government Act, III of 1885, the Lieutenant-Governor is pleased to appoint the following gentlemen to be members of the Madhubani Local Board, in the district of Darbhanga:—

Darbhanga.

Mr. R. S King
„ C. R. C. Daubney.
„ R. B. Summers.
„ R. Birch.
Babu Dhan Kumar Aikat.
Babu Tarak Nath Deb.
„ Atul Gopal Roy.
„ Srimohan Jha.
„ Kashi Pershad Narayan.
„ Lachmi Narain Singh.

NOTIFICATION.

No. 1209L.R, dated the 17th February 1906.—The following rules relating to money-orders other than revenue money-orders in favour of officers of Government and local bodies entitled to bank at treasuries or sub-treasuries have been approved by the Lieutenant-Governor in supersession of those published under notification No. 3528L.S.-G., dated the 11th November 1893, at pages 187–195, Part IB of the *Calcutta Gazette* of the 15th idem, and are published for general information. The rules shall come into operation on the 1st April 1906.*

RULES RELATING TO MONEY-ORDERS, OTHER THAN REVENUE MONEY-ORDERS, IN FAVOUR OF GOVERNMENT AND LOCAL BODIES ENTITLED TO BANK AT TREASURIES OR SUB-TREASURIES.

PART I.

Procedure in the Office of Issue.

1. Whenever a money-order presented for issue is drawn in favour of any officer of Government or of a local body in his official capacity, it will be the duty of the money-order clerk or sub or branch postmaster to see that the proper form of money-order is used.

2. If the remittance is for land revenue, road cess, public works cess or zamindari dâk cess, the appropriate revenue money-order form must be used, and the rules relating to revenue money orders must be observed. If the remittance is for rent due on Government land, the rent money-order form must be used, and the rules relating to rent money-orders must be observed.

3. If the remittance is for any other purpose, the ordinary inland money-order form must be used.

4. The rule prohibiting the inclusion of pies (fractions of an anna) is not applicable to money-orders in favour of any officer of Government or local body in his official capacity. Such money-orders may contain any fraction of an anna not less than one pie. Remittances of amounts, including fractions of pies are not allowed. The limit of the amount of a single money order is the same as of any other ordinary money order.

5. If a remitter of land revenue, road cess, public works cess, or zamindari dâk cess desires to remit at the same time any sum due to Government on any other accounts, he must use the appropriate revenue money-order form for the remittance of land revenue, road cess, public works cess, or zamindari dâk cess, or for so many of these dues as he wishes to remit, a rent money-order form for the remittance of rent due on Government land, and a separate ordinary inland money-order form for each of the other remittances.

6. A separate money-order form must be used for each Government due remitted by the ordinary inland money-order, and remittances on two accounts may not be included in one ordinary money-order.

7. (*a*) If the remittance is on account of income-tax, the remitter must be furnished with one of the special income-tax coupons (Form I—G. M. O.), and must fill up all the particulars indicated thereon.* The remitter is responsible for the correctness of the entries, but it is the duty of the money-order clerk or sub-postmaster or branch postmaster to refuse any money-order in which all the particulars are not entered.

(*b*) If the remitter is illiterate, the money-order clerk or sub or branch postmaster should give him any aid he may require to fill up the entries. The money-order clerk or sub or branch postmaster must give this aid freely, and may not demand or accept any gratification in return on pain of dismissal.

(*c*) The income-tax coupon should then be carefully and strongly pasted by the money-order clerk or sub or branch postmaster to the blank space provided on the coupon of the money-order form. Care must be taken that the coupon is not pasted over any part of the acknowledgment.

* It may happen that a remitter does not know, and cannot conveniently ascertain, the number of list K, or has not received or has lost the notice L. In such a case the remitter should be asked to enter "Not known," or words to that effect, against item 5 on the coupon, and on his doing so the money-order should be accepted, provided all the other particulars are given. Whenever it is practicable for him to do so, the remitter should, however, be required to fill in item 5 as well as the other items.

8. When an ordinary inland money-order form is used for remittance on any account other than income-tax, the money-order clerk or sub or branch postmaster must see that particulars of the object of the remittance are entered clearly on the ordinary coupon of the form. If the object of the remittance is not clearly stated on the coupon, the money-order clerk or sub or branch postmaster should not accept the order until the omission is rectified and the object clearly stated. The money-order clerk or sub or branch postmaster should give any aid that the remitter may require to fill up the coupon, and may not demand or accept any gratification in return on pain of dismissal. In the case of a telegraphic money-order the remitter should be requested to advise the nature of the remittance by a separate telegram to the payee.

9. After the money-order has been properly filled up, it should be received and dealt with in the same way as any other ordinary inland money-order.

10. Every remitter of a money-order, other than a rent or revenue money-order, in favour of an officer of Government or of a local body, should be informed that, instead of the usual money-order acknowledgment signed by the payee, he will ordinarily receive the usual departmental receipt, which will be forwarded to him direct by post, and that he should address the payee regarding it if he do not receive it in due course. He should also be advised to keep the carbonic receipt carefully until he receives either the formal departmental receipt from the payee or the usual money-order acknowldgement.

PART II.

Procedure in the Post-office of payment.

N.B.—The rules in Part II apply only to Post Offices (head or sub) at the head-quarters of districts and subdivisions.

11. Money-orders will be paid by book transfer—

(1) *for rent*, if in favour of a District Officer, Subdivisional Officer, Certificate Officer or other gazetted officer, excepting the Khas Tahsildars, Tahsildars and managers who are Deputy or Sub-Deputy Collectors.

(2) *on other account than rent*, if in favour of the Magistrate or Collector (or Deputy Commissioner) or in favour of the Deputy Collector or other officer in charge of any Department under the Magistrate or Collector (or Deputy Commissioner), or in favour of the Subdivisional Officer, or any officer in charge of any Department under the Subdivisional Officer;

(3) upon a written requisition received by the Post-Office from the Treasury or Sub-Treasury Officer, if in favour of any other Government officer in his official capacity;

(4) if in favour of any local body (other than a Cantonment Committee) entitled to bank at the Treasury or Sub-Treasury.

12. When the rent and other money orders to be paid by book transfer under rule 11 are in all respects ready* to be handed over to the postman, they should be examined with reference to the name of the audit office stamped on them, and a separate list in triplicate† (Form 2—G. M. O.) should be made out by the money-order clerk for each audit office, the name of the audit office being noted in red ink at the head of the list. ‡The entries in the money column of the list should be carefully totalled. The original copy

---

* Only the total number and amount of official money-orders received for payment need be entered in the register of money-orders received. In order, however, that the record may be complete, it will be necessary to make a note in the last column of the register whenever all the official money-orders received in one day are not included in the list of that date. For example, if in the register of money-orders received on the 5th July there are shown 500 official money-orders for Rs. 10,000, but 300 of these orders for Rs. 7,000 were received too late for inclusion in the list sent to the Treasury on the 5th, there should be an entry in the last column of the register in this form—

200 for Rs. 3,000 included in the list of 5th.
300 ,, 7,000 ,, ,, 6th

of the list will take the place of the journal of money-orders paid, the duplicate of the list will be sent to the Treasury under the procedure described below, and the triplicate of the list will be the list for the audit office. No money-order which is not a telegraphic money-order should be included in the list, unless the object of the remittance is entered on the coupon.

NOTE.—When it is necessary to prepare one or more separate lists in addition to the list for the Home audit office, the total of each other list should be entered below the total of the list for the Home audit office, and a grand total made both in words and figures. In that case too, after the words "detailed above" in the printed entry to be signed by the Postmaster at the foot of the original and duplicate of the list for the Home audit office, should be inserted in manuscript the words "and in the accompanying list" or "and in the accompanying two lists" as the case may require.

13. The postmaster should then check the entries† in the list or lists with those on the money-orders, and also check the total of the money column. He will then give the postman the duplicate of the list or lists, the money-orders, and a Treasury or Sub-Treasury voucher representing the total value of the money-orders, as entered at the foot of the list for the Home audit office as directed in note to rule 12 above. The amount represented by the Treasury or Sub-Treasury voucher will not be charged against the letter of credit, and will be paid quite independently of the balance of any letters of credit held by the Treasury in favour of the postoffice.

14. The postman will take the duplicate list or lists, the money-orders and the Treasury or Sub-Treasury voucher to the accountant, and will recieve back from him the money-orders without the coupons and the acknowldgments, except in the case of "*rent*" money-orders paid by book transfer, from which the coupons only will be detached by the accountant and not the acknowledgments. The postman will be careful to see that he receives back all the money-orders, and that they are all duly receipted by the accountant, and in the case of money-orders for amounts exceeding Rs. 500 by the Treasury or Sub-Treasury Officer also.

15. The paid money-orders received back from the Treasury or Sub-Treasury will be examined by the money-order clerk in the same way as other ordinary money-orders, and the total amount of the money-orders will be entered in the journal of money-orders paid by a single entry, thus:—As per G. M. O list Rs. A. P. and the money-order will be disposed of in the usual way. As the payees of official money-orders other than rent money-orders will furnish the remitters with departmental receipts, the acknowledgments other than those pertaining to rent money-orders, will not be returned by the accountant for transmission to the remitters. The original and the triplicate lists will be kept with the journal of money-orders paid until the next list of ordinary money-orders paid is sent to the audit office when the corresponding (triplicate) list of official money-orders paid will also be sent, the paid money-orders being arranged in order and attached to the appropriate lists. The original lists will then be filed, a separate file of original lists being kept with each journal of money-orders paid, so that the dates of the journal and file of official money-order lists correspond.

16. The amount of the Treasury or Sub-Treasury voucher will be entered in the Post-office accounts on the receipt side as drawn from the District or Sub-Treasury, as the case may be, and will be included in the sum entered on the payment side under the head "Amount of money-orders paid." In the case of a head office the amount will also appear in column 11 of the head office pass-book (A/c 8). All these entries must be made on the same date.

17. If it should happen that a money-order for any officer or local body named or indicated in rule 11 is received at the office of payment without the object of the remittance being entered on the coupon, the money-order will, as stated in rule 12, not be included in the day's list. The postmaster will retain the money-order in deposit and make a reference to the office of issue to assertain the object of the remittance. On the receipt of a reply he will attach it to the coupon, and the reply will be considered as part of the coupon. The money-order will then be included in the next list sent to the Treasury or Sub-Treasury. If, notwith-

† The duplicate and triplicate will be prepared by carbonic paper, and a hard pencil must be used in writing the list.

‡ If on any date official money-orders stamped with the names of all three audit offices are received for payment, it will be necessary to prepare three separate lists, each in triplicate.

standing a reference to the office of issue, the object of the money-order cannot be ascertained, the post-master of the office of payment will treat the money-order as refused, and return it, under the usual procedure, to the office of issue, noting across the coupon the words "Refused, as object of remittance not stated." Every case in which a money-order is received without the object being entered on the coupon should be reported by the office of payment to the superintendent of the division in which the office of issue is situated.

18. On the 1st of every month the money-order clerk or sub-postmaster of the head-quarters or subdivisional postoffice will prepare a return (Form 3—G. M. O.) of official money-orders, other than revenue and rent money-orders, received during the previous month. The returns of postmasters at subdivisional stations will be submitted to the postmaster of the district head-quarters on the 1st of the month, and the return of the head-quarters postoffice will be submitted to the head of the circle on the 5th of the month, together with the returns of any offices at subdivisional stations in the district.

PART III.

Procedure to be followed in the Treasury or Sub Treasury.

19. When any officer of Government, not specified in rule 11, requests that money-orders in his favour may be paid by book transfer, a written requisition to that effect will be addressed by the Treasury or Sub-Treasury Officer to the postmaster at the Treasury or Sub-Treasury station.

20. On receipt of the list or lists of money-orders and treasury or sub-treasury voucher (see rule 14), the accountant will check and compare the documents. If there is any error, he will return all the documents to the postoffice with a note of the error or errors. When the documents are correct, the accountant will at once cut off from the money-order form the coupon in the case of rent money-orders and the strip containing the coupon and acknowledgment in the case of all other orders; he will sign and date the money-orders as payee and return them to the postman. In the case of money-orders for amounts exceeding Rs. 500, the Treasury or Sub-Treasury Officer also should sign and date the money-orders as payee. The accountant will retain the coupons of rent money-orders, the coupons and acknowledgments of all other money-orders, the duplicate list or lists of money-orders (Form 2—G. M. O.) and the treasury or sub-treasury voucher.

NOTE.—In the case of rent money-orders the acknowledgments should not be cut off by the accountant, but should be returned to the postman duly signed.

21. The Treasury or Sub-Treasury Officer will on the same day adjust the amount of the treasury or sub-treasury voucher by transfer, debiting the amount to the postoffice and crediting the amounts of the several money-orders as shown in the list or lists and on the coupons to the appropriate departments or local bodies. If the amount of any money-order cannot for any reason be credited at once to the proper head of account, it should be entered in the body of the cash-book with such particulars as are available, and a reference should be at once made through the department concerned for further particulars, on receipt of which credit to the proper head should be effected in communication with the Accountant-General. In the case of telegraphic money-orders the reference should be made direct by post from the Treasury or Sub-Treasury.

In the case of Sub-Treasuries a note should be made in the "Remarks" column of the duplicate list showing on what account each money-order was sent as indicated on the coupon. This column will be blank when received from the postoffice. The duplicate list or lists will be forwarded to the District Treasury with the Sub-Treasury "daily sheet."

22. To each department or local body in favour of which any money-order or money-orders have been received and credited, the Treasury or Sub-Treasury Officer will on the same day send an advice-list in the form (4—G.M.O.), together with the corresponding strips, consisting of the coupons, and acknowledgments, or if

rent money-orders are concerned, together with the corresponding coupons. In the case of officers and local bodies to whom daily advice-lists are sent of other receipts on their accounts, the total amount of each money-order advice-list will be entered (with a reference to the money-order advice-list) in the daily advice list.

The Treasury or Sub-Treasury Officer will be responsible that the total of the amounts of the money-order advice-lists is equal to the amount of the Treasury or Sub-Treasury voucher received from the postoffice and debited to the Postal Department.

23. No money-order received from the postoffice may be refused.

PART IV.

Procedure in the Offices of the Payees of the Money-orders.

24. When any officer of Government, not separately specified in rule 11, desires that money-orders in his favour be paid by book transfer, he will make a written request to that effect to the Treasury or Sub-Treasury Officer for communication to the postmaster.

25. On receipt of an advice-list (see rule 22) with the corresponding coupons or strips of coupons and acknowldgments, the usual entries will be made in the prescribed registers, and in the case of all orders other than rent money-orders the prescribed receipts will be sent to the remitters by post, the postage being prepaid by service or ordinary stamps, according as the department or local body is or is not entitled to use service stamps.

26. The prescribed form of receipt should be sent to each remitter at latest on the first open day after the receipt of the advice-list from the Treasury or Sub-Treasury.

27. If the amount of a money-order is more than is due from the remitter, the excess should be entered as an advance on account of future dues, or be dealt with in such other way as the rules of the department or local body may prescribe; if the amount is less than is due, it should be credited as a payment in part; if the period on account of which the remittance is made is specified, the amount should be credited on account of the period; if the period is not specified, the remittance should be set off against those dues which have been longest outstanding.

List of forms appertaining to money-orders, other than revenue money-orders, in favour of Government and local bodies.

No. 820M.—The 22nd February 1906.—Under the provisions of section 308 of the Bengal Municipal Act, III of 1884, the following plan, which has been submitted by the Commissioners of the Cossipore-Chitpur Municipality for lighting with gas the following roads in the said Municipality and 100 feet from their edges, is published for general information—

24-Parganas.

(1) the whole of the Cossipore Road, commencing from the Bagbazar Canal Bridge and ending in Baranagar Bazar situate within the Municipality.

(2) The portion of the Barrackpore Trunk Road from the Talla Canal Bridge to its junction with the Gun Foundry Road.

2. An agreement has been entered into between the Commissioners of the Cossipore-Chitpur Municipality and the Oriental Gas Company for the supply and lighting of lamps at the rate of Rs. 63-1 per lamp per year. The expenditure for lighting 98 lamps in the above roads is estimated at Rs. 6,180, including charges for repair of lamps according to the existing arrangements with the Oriental Gas Company.

3. The Municipal Commissioners propose to meet the charge to be incurred on account of lighting the aforesaid areas by imposing a lighting rate of 3 per cent. on the annual value of holdings situated in the areas referred to. The income to be realized from the lighting-tax in the aforesaid areas is estmated at Rs. 5,716 a year.

Muzaffarpur Collectorate, the 10th February 1906

D. N. Da, *for* Offg. Collector.

Advertisement of Sale.

NOTICE is hereby given that the proprietary right of Government, as specified in the conditions of sale below, to the undermentioned estates, situated in the district of Hooghly, will be put up to sale at the Hooghly Collectorate on the 26th March 1906, corresponding to 12th Chait 1312 (B S.).

The purchasers will be subject to the following conditions of sale:—

Conditions of Sale.

1st.—The estate to be sold to the highest bidder above the upset price, which will be fixed by the Collector at the time of sale. The purchaser of this estate will be considered as the proprietor of the estate, and the entire proprietary right of Government in such estate will be transferred to him, subject to the revenue fixed in perpetuity.

2nd.—The sale to be subject to existing leases and to the rights conferred by the settlement proceedings and by the laws in force, and purchasers to be bound to respect the rights of resident cultivators who have signed the schedule of assessment prepared by the revenue authorities.

3rd.—If the amount of purchase-money do not exceed Rs. 100, the whole amount to be paid down at once.

4th.—If the amount of purchase-money exceed Rs. 100, one-fourth of the amount bid to be immediately deposited. If the balance be not paid by noon of the fifteenth day after the sale, reckoning the day of sale as one, or, if that day be a close holiday, then by noon of the first succeeding office day, the sale is to be cancelled (the sum deposited being forfeited to Government), and the estate to be again put up to sale at the risk of the defaulting purchaser after issue of the advertisement as in the case of original sale.

GANGA GOVINDA GUPTA, for Collector.

Advertisement of Sale.

NOTICE is hereby given that the proprietary right of Government, as specified in the conditions of sale below, to the undermentioned estates, situate in the district of Burdwan, will be put up to sale at the Burdwan Collectorate on the 27th March 1906, corresponding to 13th Chaitra 1312 (B.S.)

Conditions of Sale.

1st.—The estates to be sold to the highest bidder above the upset price which will be fixed by the Collector at the time of sale The purchasers of these estates will be considered as the proprietors of the estates, and the entire proprietary right of Government in such estates will be transferred to them with effect from 1st April 1906 as revenue free or subject to the revenue fixed in perpetuity.

2nd.—The sale to be subject to existing leases and to the rights conferred by the settlement proceedings and by the laws in force, and purchasers to be bound to respect the rights of resident cultivators who have signed the schedule of assessment prepared by the Revenue authorities.

3rd.—If the amount of purchase-money does not exceed Rs. 100, the whole amount to be paid at once

4th.—If the amount of purchase-money exceed Rs 100, one-fourth of the amount bid to be immediately deposited. If the balance be not paid by noon of the fifteenth day after the sale, reckoning the day of sale as one, or if that day be a close holiday, then by noon of the first succeeding office day, the sale will be cancelled (the sum deposited being forfeited to Government), and the estate will be again put up to sale at the risk of the defaulting purchaser, after issue of advertisement as in the case of original sale.

Advertisement of Sale.

NOTICE is hereby given that the proprietary right of Government, as specified in the conditions of sale below, to the undermentioned estates situate in the district of Hooghly, will be put up to sale at the Hooghly Collectorate on the 26th March 1906, corresponding with 12th Chait 1312 (B S.).

The purchaser will be subject to the following conditions of sale :—

Conditions of Sale.

1st.—The estate to be sold to the highest bidder above the upset price, which will be fixed by the Collector at the time of sale. The purchaser of this estate will be considered as the proprietor of the estate, and the entire proprietary right of Government in such estate will be transferred to him, subject to the revenue fixed in perpetuity.

2nd.—The sale to be subject to existing leases and to the rights conferred by the settlement proceedings and by the laws in force ; and purchasers to be bound to respect the rights of resident cultivators who have signed the schedule of assessment prepared by the revenue authorities.

3rd.—If the amount of purchase-money does not exceed Rs. 100, the whole amount to be paid down at once.

4th.—If the amount of purchase-money exceed Rs 100, one-fourth of the amount bid to be immediately deposited. If the balance be not paid by noon of the fifteenth day after the sale, reckoning the day of sale as one, or if that day be a close holiday, then by the noon of the first succeeding office day, the sale is to be cancelled (the sum deposited being forfeited to Government), and the estate to be again put up to sale at the risk of the defaulting purchaser, after issue of advertisement, as in the case of original sale.

Number on the district Roll.	Name of estate and pargana or thana.	Approximate area in acres.	Government revenue assessed.	REMARKS.

Advertisement of Sale.

NOTICE is hereby given that the undermentioned plots of land, no longer required by Government, situated along the Eastern Branch, Tirhut State Railway, in the district of Darbhanga, will be put up to sale at 12 o'clock (noon) on the 26th day of April 1906, corresponding with the 17th Baisakh 1313 Fusli, at the Collectorate of Darbhanga.

The purchasers of the several plots of land will be subject to the following conditions:—

1st.—The purchasers will have no power to make any excavations on the land nearer than 15 feet from the railway fencing, or plough the lands closer than 3 feet from its foundation.

2nd.—If the amount of purchase-money does not exceed Rs. 100, the whole amount must be paid down at once.

3rd.—If the amount of purchase-money exceed Rs. 100, one-fourth of the amount must be immediately deposited. If the balance be not paid by noon of the fifteenth day after the sale, reckoning the day of sale as one, or if that day be a close holiday, then by noon of the first succeeding office day, the sale shall be cancelled, the sum deposited being forfeited to Government, and the lot again put up for sale at the risk of the defaulting purchaser, after issue of advertisement, as in the case of original sale.

4th.—The plots of land will be sold revenue-free to the highest bidders.

5th.—The purchasers shall be put in possession on receipt by the Collector of the orders of the Board confirming the sale

Chinsura, the 1st March 1906.

B. DE, *for* Collector.

Advertisement of Sale.

NOTICE is hereby given that the undermentioned plots of land, no longer required by Government, situated along the Eastern Branch, Tirhoot State Railway, in the district of Darbhanga, will be put up to sale at 12 o'clock noon, on 26th day of April 1906, corresponding to the 17th Baisakh 1313 Fusli, at the Collectorate of Darbhanga.

The purchasers of the several plots of land will be subject to the following conditions:—

1st.—The purchasers will have no power to make any excavations on the land nearer than 15 feet from the railway fencing, or plough the lands closer than three feet from its foundation.

2nd.—If the amount of purchase-money does not exceed Rs. 100, the whole amount must be paid down at once.

3rd.—If the amount of purchase-money exceed Rs 100, one-fourth of the amount must be immediately deposited If the balance be not paid by noon of the fifteenth day after the sale, reckoning the day of sale as one, or if that day be a close holiday, then by noon of the first succeeding office day, the sale shall be cancelled, the sum deposited being forfeited to Government, and the lot again put up for sale at the risk of the defaulting purchaser, after issue of advertisement, as in the case of original sale.

4th.—The plots of land will be sold revenue-free to the highest bidders.

5th.—The purchasers shall be put in possession on receipt by the District Collector of the orders of the Board confirming the sale.

NOTICE.

THE next annual stock-taking of the Indian Law Reports kept at the Bengal Secretariat Book Depôt will commence on the 1st April and will last till the 21st April 1906, inclusive. The public are hereby informed that all issues of the said Reports from the said Depôt to subscribers and officials will be suspended during the period.

L. C. ADAMI,
Offg. Secy. to the Bengal Council, and Asst. Secy. to the Govt. of Bengal, Legislative Dept.

LEGISLATIVE DEPT.,
BOOK DEPÔT BRANCH,
The 9th January 1906.

THE INDIAN LAW REPORTS.

Published in FOUR SERIES, viz.

CALCUTTA, MADRAS, BOMBAY AND ALLAHABAD.

THE Indian Law Reports, published under the authority of the Governor General in Council, are printed in monthly Parts, which are issued, as soon as possible after the first of each month, at Calcutta, Madras, Bombay and Allahabad respectively.

The Reports comprise four Series—one for the Calcutta High Court, a second for the Madras High Court a third for the Bombay High Court, and a fourth for the Allahabad High Court

The cases heard by the Privy Council on appeal from each High Court are reported in the Series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat Book Depôt: and the Madras, Bombay and Allahabad Series are distributed direct from Madras, Bombay and Allahabad, respectively.

Persons desiring to subscribe for or purchase the Reports should apply to—

the Officer in charge, Bengal Secretariat Book Depôt, Calcutta,
or
the Superintendent, Government Press, Madras, or
the Superintendent, Government Central Press, Bombay, or
the Curator of Government Books, United Provinces of Agra and Oudh, Allahabad.

Records of the Geological Survey of India, Volume XXXIII, Part I. By Director, Geological Survey of India, Re. 1.

APPENDIX TO

The Calcutta Gazette.

WEDNESDAY, MARCH 21, 1906.

NOTICES TO MARINERS.

THE following Notices are published for general information.

W. A. INGLIS,
Secretary, Marine Department.

CALCUTTA, *the 16th March 1906.*

BAY OF BENGAL—ORISSA COAST.

Dhamra river.—Changes in buoys.

No. 95 (first publication.)—The Port Officer, Cuttack and Balasore ports, has given notice, dated 10th March 1906 that the "B" buoy has been removed from its old position in the Dharma river and placed higher up. It is now a starboard hand buoy, painted red and will in future be called the "A" buoy, and the old "A" buoy will now be called the "B" buoy. The bearings of the "A" buoy in its new position is given below :—

Chandipal mark N. N W. ½ W.
Kalibhanj mark W. ⅛ N.
The bearings are magnetic.

EASTERN ARCHIPELAGO—FLORES SEA.

Flores, Komodo, and Tanah Jampea Islands—Existence and Non-existence of shoals.

No. 96 (first publication).—The British Admiralty has given notice (No. 148 of 1906) of the existence of the undermentioned shoals off the north-west coast of Flores island:—

(*a*) A shoal, with a least depth of 1¾ fathoms over it, situated at a distance of 3½ miles South from the summit of Sabolan Besar.

Approximate position, lat. 8° 27¼′ S., long. 119° 48′ E.

(*b*) A shoal, with a least depth of 1½ fathoms, situated in approximately lat. 8° 22½′ S., long. 119° 53½′ E.

Also, that investigation shows that the breakers shown on the chart at a distance of 4 miles S. 15° W. from Sabolan Besar, and the shoal in lat. 8° 19′ S., long. 119° 51½′ E., do not exist; they have therefore been expunged from the chart.

KOMODO ISLAND. A small shoal composed of coral and rock, with a least depth of 1¼ fathoms over it, exists to the northward of this island in approximately lat. 8° 25¾′ S., long. 119° 34′ E.

TANAH JAMPEA. A pinnacle rock, with a least depth of 1½ fathoms over it, exists on the western side of this island, situated in a position from which the western extremity of Sambio island bears N. 22° W., distant 8 cables, and the eastern extremity of Guru N. 47° E.

Approximate position, lat. 7° 3¼′ S, long. 120° 36¼′ E.

NOTE.—The latitude given on plan of Sungi Menasa road on chart No. 2466 should be 7° 3′ 40″ S., not 7° 35′ 40″ S.

(*Variation 2° Easterly in 1906.*)

This notice affects the following Admiralty Charts:—Lombok to Flores, No. 1696; plans of Molo strait, and Sungi Menasa road on chart No. 2466: and Eastern Archipelago, part II., 1904, page 222, 217, 256.

EASTERN ARCHIPELAGO—SUMATRA, WEST COAST.

Tabekat and Silugui bays and Sipora island shoals.

No. 97 (first publication).—The British Admiralty has given notice (No. 152 of 1906) of the existence of the following shoals in the undermentioned localities off the west coast of Sumatra:—

SIBERUT ISLAND.

(*a*) Tabekat bay. A reef on which there is a depth of 7 feet extends in a N. 10° W. direction for a distance of 2½ cables from the north-western point of Carolina island.

Approximate position on chart 2284, lat. 1° 2¼′ S., long. 98° 57′ E.

(*b*) Silugui bay. A reef, with a least depth of 1¾ fathoms over it, exists in a position from which the south-eastern point of Togga Tesebukau bears S. 47° W., distant 6¾ cables, and the nothern point of the bay N. 4° E.

Approximate position, lat. 1° 23′ S., long. 99° 6¾′ E.

SIPORA ISLAND.

A shoal, with a depth of 5 fathoms over it, exists off the east coast of Sipora island in approximately lat. 2° 10′ S., long. 99° 42¾′ E.

(*Variation Nil in 1906.*)

This Notice affects the following Admiralty Charts:—Tyingkok bay to straits of Sunda, No. 2761; plans of Tabekat and Silugui bay on chart No. 2284: Also China Sea Directory, Vol. I., 1896, pages 328, 326, 329: and Supplement, 1899, page 33.

AUSTRALIA, SOUTH—HOBART APPROACH.

Tasman island light—Date of exhibition.

No. 98 (first publication).—With reference to Notice to Mariners No. 338, dated 1st September 1905, issued by this office, the British Admiralty has given further notice (No. 162 of 1906) that, on 2nd April, a *white flashing light every five seconds*, thus:—*flash*, half a second; *eclipse*, four and-a-half seconds. It will be elevated 907 feet above high water, and visible in clear weather from a distance of 36 miles, and will be established in a lighthouse constructed on the south-eastern part of Tasman island, in the approach to Hobart. The light will be of the 1st order.

Approximate position, lat. 43° 14½′ S., long. 148° 2′ E.

This notice affects the following Admiralty Charts:—Pacific, No. 788; Australia, No. 2759b; Tasmania, No. 1079; Also, List of Lights, part VI, 1906, No. 1565a; and Australia Directory, vol. I., 1897, page 727.

JAPAN—North-west coast.

Shiro se, Wakamiya, Okai no shima—Lights established.

No. 99 (first publication).—The British Admiralty has given notice (No. 169 of 1906) that, on 1st January 1906, the undermentioned lights would be established on the north-west coast of Japan :—

1. Shiro se. A *fixed* light, elevated 115 feet above high water and visible in clear weather from a distance of 11 miles, would be exhibited in a square white wooden lighthouse, about 15 feet high, erected on Shiro se, Goto islands ; it would show the following sectors :—*red* from the bearing of N. 45° E. to N. 67° E., *white* from N. 67° E., through east and south, to S. 75° W., *red* from S. 75° W. to S. 88° W., and *white* from S. 88° W., through west and north, to N. 45° E., the light power being 140 candles.

   Approximate position, lat. 33° 11′ N., long. 128° 48′ E.

2. Wakamiya. A *red fixed* light, elevated 351 feet above high water, and visible in clear weather from a distance of 6 miles from the bearing of S. 67° E., through south and west, to N. 4° E., would be exhibited from a white staff about 35 feet high erected on Wakamiya, Iki shima.

   Approximate position on chart No. 359, lat. 33° 52′ N., long. 129° 40¾′ E.

3. Oki no Shima. A *white fixed* light, elevated 816 feet above high water, and visible in clear weather from a distance of 8 miles, would be exhibited from a white staff about 35 feet high, erected on Oki no (Kotsu) shima, Tsu shima straits.

   Approximate position, lat. 34° 14½′ N., long. 130° 6′ E.

(*Variation 4 Westerly in 1906.*)

This Notice affects the following Admiralty Charts :—Shantung promontory to Nagasaki, No 3480; China sea, No. 1263 ; Nipon, &c., No. 2347 ; Hirado no seto to Shimono seki, No. 127 ; Korean archipelago, No. 104 ; Iki shima, No. 3224 ; Kiusiu, &c., No. 358 ; Nagasaki to Karasut, No. 359 : Also List of Lights, part VI., 1906, page 161 ; and Sailing Directions for Japan, &c., 1904, pages 569, 605, 510.

BAY OF BENGAL—Chittagong coast.

Kurnafuli river—Depth of water in the channels

No. 100 (first publication).—The Officiating Port Officer, Chittagong, has given notice that the following depth of water, reduced to Indian spring low water mark, was found in the channels on the 12th March 1906 :—

	Ft.	in.
Track No. 1—Outer bar—		
Disc on diamond	13	0
Track No. 2—Inner bar—		
Disc on diamond	11	9
Batten beacon on pillar	12	6
Track No. 3—		
Triangle on cross and ball	18	0
Track No. 4—Guptakhally crossing—		
Tripod on diamond	19	0
Cross and ball on diamond	20	0

AFRICA, SOUTH-EAST COAST—Natal.

Port Shepstone light-house to be removed.

No. 101 (first publication).—The following Notice to Mariners, dated January 1906, is republished :—

The Government of Natal gives notice that on the 1st March 1906, the existing light at Port Shepstone will be removed and replaced by a 4th Order Occulting Light, showing a flash of 9 seconds with an eclipse of 1 second.

The focal plane of the new Light will be 78 feet above H. W. O. S. T.

The elevation of the base on which the tower stands is 53 feet above H. W. O. S. T.

The position of the new tower is 30 deg. 44 min. 45 sec. South latitude, 30 deg. 27 min. 45 sec. East longitude.

The iron tower will be painted in black and white, chequered, with the lantern painted white.

The new light will be visible between the true bearings North, 35½ degrees East to South, 28 degrees West, or assuming the magnetic variation to be 23 degrees West; between the magnetic bearings North, 58½ degrees East to South, 51 degrees West.

The new Light should be visible from the distance of about 15 nautical miles in clear weather.

BAY OF BENGAL—Burma coast.

Rangoon river—Lower Hastings black buoy in a sinking condition.

No. 90 (second publication).—The Bombay Government has given notice (No. 19 of 1906) that the Lower Hastings black buoy is in a sinking condition, and will be replaced as early as possible.

This Notice affects Admiralty Chart No. 833, Rangoon River and approaches (plan, Port of Rangoon); also Bay of Bengal Pilot, 3rd edition, 1901, page 353.

BAY OF BENGAL—Burma coast.

Rangoon river—Spit Light-vessel replaced.

No. 91 (second publication).—The Bombay Government has given notice (No. 20 of 1906) that the Spit Light-vessel will be brought up to town on the 7th or 8th instant, and the Light-vessel *Martaban* put approximately in the place of the Spit Light-vessel as on former occasions, *i.e.*, the line of the two lights in one will be on the same bearing as before. The temporary light consists of two mast-head lights back to back.

This Notice affects the Admiralty Chart Nos. 823, Koronge Island to White Point, 833, Rangoon river and approaches, and Bay of Bengal Pilot, 3rd edition, 1901, page 348; also List of Lights, part VI, 1905, No. 369.

INDIA, WEST—Sind coast.

A derelict off Kori creek.

No. 92 (second publication).—The Bombay Government has given notice (No. 23 of 1906), that the Commander of S.S. *Lama* reports that he passed a bugalow floating on her side yesterday at 0-20 P.M. (Standard time), with no one on board of her, off Kori creek in latitude 23° 20′ 45″ N., longitude 68° 3′ E., tide half flood.

This affects Admiralty Charts Nos. 826, Karachi to Vengurla, 42, Coasts of Sind and Kutch, and 118, Kediwari Mouth to Nirani Creek; also West Coast of Hindustan Pilot, 4th edition, 1898, page 297.

AFRICA, NORTH-EAST—Red Sea, Western shore.

Shab Shanks—Feux Eclaires light established.

No. 93 (second publication).—With reference to Notice to Mariners No. 149, dated 7th May 1904, issued by this office, the Bombay Government has given notice (No. 24 of 1906) that the new light Feux Eclaires will be exhibited on the extremity of the Shab Shank reef from the 15th February 1906, and will be visible, in clear weather, for a distance of 18 miles.

Approximate position :—Latitude 14° 40′ N.; longitude 41° 06′ E.

This Notice affects the following Admiralty Charts :—Red Sea, Sheets IV and V, Nos. 8d and 8e, Jebel Tur to Perim Island, No. 143; also Admiralty List of Lights, Part VI, 1906, page 23, No. 152; also Red Sea and Gulf of Aden Pilot, fifth edition, 1900, page 197, and Supplement 1904, page 20.

AUSTRALIA, SOUTH—Gulf of St. Vincent.

Entrance to Port Wakefield—White and red lights placed.

No. 94 (second publication).—The President, Marine Board, Port Adelade, has given notice (No. 2 of 1906) that a White light, eight feet high, has been fixed on the south end of the wharf; also a red light, twenty feet high, has been placed on the wharf 360 feet north of the white light

The above lights in line lead up to the outer red beacon, but do not show Mid Channel inside of that.

CEYLON COAST—Colombo harbour.

Caution—A rocky ridge on the northern approaches.

No. 79 (third publication).—The Master Attendant, Colombo, has given notice of the existence of a rocky ridge in the northern approaches of Colombo harbour with a least depth of 21 feet over it. A buoy has been placed N. 14° W. two miles from head of south-west breakwater. Mariners are accordingly warned.

AFRICA, SOUTH—Cape Colony.

Whale rock—Bell buoy withdrawn.

No. 80 (third publication).—With reference to Notice to Mariners No. 227, dated 27th June 1903, issued by this office, the British Admiralty has given further notice (No. 97 of 1906) that the bell buoy formerly marking Whale rock, and situated in a position from which Robben island lighthouse bore N. 37° E., distant 1¼ miles, has been withdrawn.

Approximate position, lat. 33° 50′ S., long. 18° 22¼′ E.

(Variation 29° Westerly in 1903.)

This Notice affects the following Admiralty Charts:—Table bay to Cape Agulhas, No 2082; Table bay to Donkin bay, No. 2091; Cape of Good Hope and False bay, No. 656; Table bay, No. 1920. Also, Africa Pilot, part II, 1901, page 324; Supplement, 1905, page 19, and part III, 1897, page 55.

PACIFIC OCEAN—The Philippine islands—Mindoro strait.

Apo island light—Alteration in—.

No. 81 (third publication).—With reference to Notice to Mariners No. 362, dated 20th October 1904, issued by this office, the British Admiralty has given further notice (No. 105 of 1906) that, on or about 20th December 1905, the character of the light on Apo island, Mindoro strait, would be altered from white fixed to a *group flashing* light about *every ten seconds*, thus:—*white* flash, eclipse *five seconds*. *red* flash, eclipse *five seconds*; it would be elevated 123 feet above high water, and visible in clear weather from a distance of 15 miles, the light being of the 3rd order. The exact time occupied by the flashes and eclipses is not stated.

Approximate position, lat. 12° 40′ N., long. 120° 24′ E.

This Notice affects the following Admiralty Charts:—Molucca passage to Manila, No. 943; China sea, No. 2661b; St. Bernardino and Mindoro straits, No. 2577: Also, List of Lights, part VI, 1905, No. 621a; China Sea Directory, vol. II, 1899, page 297; and Eastern Archipelago, part I, 1902, page 77.

CHINA, NORTH—Manchuria—Pechili strait—Kwang Tung peninsula.

Ta lien hwan—Mines removed in approach.

No. 82 (third publication).—With reference to Notice to Mariners No. 151, dated 8th May 1905, issued by this office, the British Admiralty has given further notice (No. 106 of 1906) that the mines in the approach to Ta lien hwan have been cleared away, and that the Kwang tung peninsula may now be approached on the southern side, eastward of a line joining South Entry point and Cap island, and running in a S. 41° W. direction for a distance of 10 miles from Cap island, with reasonable security.

Approximate position, Cap island, lat. 38° 47¼ N., long. 121° 36½ E.

The cautionary note respecting mines will, however, be retained on the Charts until it is known that the whole of the coast in this locality is free from these dangers.

(*Variation 3° Westerly in 1906.*)

This Notice affects the following Admiralty Charts:—Gulfs of Pechili and Liau tung, No. 1256; Kwang tung peninsula, No. 1798: Also, China Sea Directory, vol. III, 1904, pages 585, 589, 633, 634.

PACIFIC OCEAN—THE PHILIPPINE ISLANDS—LUZON—SAN BERNARDINO STRAIT—TEKLNI STRAIT.

Cabezas shoal—Amended position.

No. 83 (third publication).—With reference to Notice to Mariners No. 194, dated 20th October 1894, issued by this Office, the British Admiralty has given further notice (No. 111 of 1906) that Cabezas shoal, with a depth of one fathom over it is situated at a distance of 13 cables No. 20° W., and not one-third of a mile N. 20° W. from Kalantas bank as reviously stated. It is a shoal head on Hamorauan bank.

Approximate position, lat. 12° 31¾′ N., long. 124° 4′ E.

(*Variation Nil in 1906.*)

This Notice affects the following Admiralty Charts:—San Bernardino and Mindoro straits' No. 2577; San Bernardino strait, No. 3370; plan of Matnog bay on Chart No. 3475; Also Eastern Archipelago, Part I, 1902, page 349.

EASTERN ARCHIPELAGO—MALACCA STRAIT—PULO PENANG.

Pulo Rimau light—Character altered.

No. 84 (third publication).—The British Admiralty has given notice (No. 112 of 1906) that on 15th January 1906, the character of Pulo Rimau light would be altered from fixed to a *red occulting* light *every twenty seconds*, thus:—light, *seventeen and a half seconds;* eclipse, *two and a half seconds;* it would be elevated 129 feet above high water, visible in clear weather from a distance of about 13 miles, and shown from an iron tower, 57 feet high, erected on a masonry base, situated on the eastern side of the island at a distance of 1¾ cables N. 12° E. from its southern point.

The light is of the 3rd order.

Approximate position, lat. 5° 11′ N., long. 100° 16¼′ E.

(*Variation 2° Easterly in 1906.*)

This Notice affects the following Admiralty Charts:—Acheh head to Tyingkok bay, No. 2760; Butang group to Pulo Berhala, No. 793; Penang Harbour, No. 1366; Malacca strait, No. 1355: Also, List of Lights, part VI, 1906, No. 408; and China Sea Directory, Vol. I, 1896, page 147.

JAPAN—HONSHU, NORTH-WEST COAST—WAKARA BAY.

Tsunegami zaki—Rock awash of Chi shima—Amended height.

No. 85 (third publication).—The British Admiralty has given notice (No. 113 of 1906) of the existence of a rock awash, situated at a distance of about 3¼ cables S. 55° W. from the extremity of Tsunegami zaki.

Approximate position, lat. 35° 38⅛′ N., long. 135° 48¼′ E.

Also, that the height of Chi shima, situated 2¾ miles S. 30° W. from Tsunegami zaki, is 103 feet, and not 38 feet above high water as at present shown on the Charts.

(*Variation 5° Westerly in 1906.*)

This Notice affects the following Admiralty Charts:—Aburatani bay to Ando zaki, No 1495; Amarube zaki to Ando zaki, No. 2174: Also, Sailing Directions for Japan, etc., 1904, page 650.

JAPAN—Naikai—Bingo nada.

Sanagi shima—Wreck to the southward.

No. 86 (third publication).—The British Admiralty has given notice (No. 114 of 1906) that the wreck of a sailing vessel, with a mast showing 6 feet above high water, is reported to be sunk in Bingo nada, in a position from which Sanagi shima summit (812 feet) bears N. 33° E, distant $1\frac{6}{10}$ miles, and Mushima summit S. 83° W.

Approximate position, lat. 34° 19′ N., long. 133° 36½′ E.

(*Variation 4° Westerly in 1906.*)

This Notice affects the following Admiralty Charts :—Naikai, No. 2875; Bingo nada to Ozuchi shima, No. 128 : Also, Sailing Directions for Japan, etc., 1904, page 450.

CHINA, EAST COAST—Port Shelter.

Rocks.

No. 87 (third publication).—The British Admiralty has given notice of the existence of the undermentioned rocks in port Shelter, in the following positions:—

(*a*) A rock, with a depth of 3 fathoms over it at low-water springs, situated in a position from which the north-western point of Shelter island bears N. 66° E., distant 4 cables, and the southern extremity of the same island S. 56° E.

Approximate position, lat. 22° 20′ N., long. 114° 17½′ E

(*b*) A rock, with a depth of 3¾ fathoms over it at low-water springs, situated in a position from which the north-western point of Shelter island bears N. 20° E., distant 4⅛ cables, and the southern extremity of the same island S. 68° E.

(*c*) A rock, with a depth of 2⅛ fathoms over it at low-water springs, situated in a position from which the eastern summit of Sharp island bears S. 24° W., distant $2\frac{3}{10}$ cables, and Keui island summit (725 feet) S. 31° E.

(*d*) A rock, with a depth of 1¾ fathoms over it at low-water springs, situated in a position from which the northernmost summit of Sharp island bears S. 7° W., distant $3\frac{1}{10}$ cables, and the northern extremity of Nga ju tau N. 82° W.

Approximate position, lat. 22° 23′ N. long. 114° 17½′ E.

(*e*) The channel between Peaked rock and Jin island is foul.

Approximate position, Peaked rock, lat. 22° 19¾ N., long. 114° 19½′ E.

(*Variation Nil in 1906.*)

This Notice affects the following Admiralty Charts :—Approaches to Hongkong, No. 1180; Mirs bay, No. 1964 : Also, China Sea Directory, Vol. III, 1904, page 128.

CHINA SEA.—Banka strait.

Amelia bank—Light buoy established. Banju Asin river.—Buoy replaced by light buoy.

No. 88 (third publication).—With reference to Notice to Mariners No. 468, dated 30th November 1905, issued by this office, the British Admiralty has given further notice (No. 117 of 1906) that a light buoy, painted in red and black horizontal bands, and exhibiting a *white occulting* light *every twenty seconds* (light, *ten seconds;* eclipse, *ten seconds*), has been established near the south-eastern edge of Amelia bank, Banka strait, in approximately lat 2° 13¾′ S., long. 105° 17′ E.

Also, that the black can buoy formerly situated 1½ miles north-eastward from Tanjong Sereh, Banju Asin river, has been replaced by a light buoy, painted black, from which a *white occulting* light *every twenty seconds* (light, *ten seconds;* eclipse, *ten seconds*) is exhibited.

Approximate position, lat. 2° 22′ 25″ S., long. 104° 45′ 10″ E.

This Notice affects the following Admiralty Charts :—Banka strait to Singapore, No. 2757; Gaspar and Banka straits, No. 2149; Banka strait, Nos. 2597 and 3471 : Also, China Sea Directory, vol. I, 1896, pages 413, 400; and Supplement, 1899, page 35.

INDIA, WEST—Sind coast.

Karachi harbour—Light buoy established.

No. 89 (third publication).—The British Admiralty has given notice (No. 118 of 1906) that a light buoy, painted red, exhibiting a *red fixed* light, has been established to mark the 20-foot patch in Karachi harbour; it is moored in a position from which Manora point light-house bears S. 85° W., distant $3\frac{3}{10}$ cables, and the breakwater light S. 8° W.

Approximate position, lat. 24° 47¾′ N., long. 66° 59′ E.

(*Variation 1° Easterly in 1906.*)

This Notice affects the following Admiralty Chart:—Karachi harbour, No. 40: Also, Hindustan Pilot, 1898, page 304; and Supplement, 1903, page 19.

REPORT ON THE ADMINISTRATION OF THE OPIUM DEPARTMENT DURING THE SEASON 1904-1905.

NOTIFICATION.

No. 391-O.—The 17th March 1906.—The following extracts from the Report of the Board of Revenue, on the Administration of the Opium Department during the year 1904-1905, are published for general information.

L. P. SHIRRES,
Secretary to the Govt. of Bengal.

No. 1236B., dated Calcutta, the 21st February 1906.

From—KHAN BAHADUR S. M. NASIRUDDIN, Offg. Secretary to the Board of Revenue, L. P.,

To—The Secretary to the Government of Bengal, Financial Department.

5. *Check-measurements by Gazetted Officers of the Department.*—* * * * In the Bihar Agency, although the number of villages inspected has fallen from 9,609 to 8,962, the decrease has been more than counterbalanced by an increase in the area test-measured, which was about 6 per cent. on the net cultivation. Similarly, a marked increase will be observed in the measurements * * * * over those effected * * * * in the previous year. This increase is satisfactory, resulting as it did in a corresponding increase in the efficiency of the check exercised over the work of the ministerial staff.

In the Benares Agency, in all 20,130 villages were inspected as against 19,050 in the previous year: a good outturn of work, taken altogether. In this respect the work of Mr. C. A. Levett-Yeats has again been unfavourably noticed. Mr. House reports that about 400 villages may be taken as representing a fair season's work in most charges.

Those licensees who are a little out of the way often escape inspection for many years together, and officers have been requested to pay particular attention to such persons during the current cold weather.

The returns of test-measurements exhibits 48,877 bighas test-measured, out of a total of 623,132 or 7·85 per cent. The percentage for 1903-04 was 6·87. Here again there are marked variations in the returns of work. The amount of work that has to be done to make up the full tale of bighas varies very much in different subdivisions. Mr. Godfrey, for instance, in Kanauj was able to test-measure 1,941 bighas with 3,135 sets of measurements, while the late Mr. Ricker in Basti test measured very nearly as many plots before he could make up 1,005 bighas. The heaviest work was done by Mr. McBrien in Bansi, 5,581 plots having been measured by him to make up 1,066 bighas—an average of more than 5 plots going to the bigha. The test-measurements work of Mr. Power in Utraula and of Saiyid Raza Ali in Salempur were remarkably good.

Generally in both Agencies the officers concerned did not confine their operations to particular parts of their charges and endeavoured to carry out as much of this work as possible.

In Bihar, there were two cases of fraudulent mis-measurement which resulted in the dismissal of two muharrirs. In Benares, no such instances occurred.

Most of the Sub-Deputy Agents in the Benares Agency made short tours during the cold weather within the charges of their Assistants. Owing, however, to the paucity of officers available for duty at weighments and settlements, it is extremely difficult for Sub-Deputy Agents to make such inspections at the most desirable times.

6. *Settlements.*—In the Bihar Agency, 340,149 bighas were settled, as compared with 344,730 in the previous year, showing a further decrease of 4,581 bighas in the year under review, due in a great measure to the relinquishment of unproductive lands, a policy which the Board fully support. Except in the Sub-Agencies of Gaya, Tehta and Monghyr (where the increase over the previous year was 161, 2,890 and 433 bighas, respectively), there has been a general decrease in the remaining eight Sub-Agencies, the most noticeable being in those of Motihari (—2,593 bighas) and Bettiah (—3,402 bighas).

Experiments in poppy cultivation by certain European gentlemen were continued during the year under review with fair results. * * * *

In the Benares Agency, the area engaged for amounted to 611,527 bighas, as against 693,033 bighas in 1903-04, showing a decrease of 81,506 bighas. The settlements of 1903 were exceptional, and the figures for 1904 represent a return to somewhat normal conditions, the decrease being to some extent the result of the exclusion of everything in the shape of nominal cultivation.

* * * * In the Tirhut Sub-Agency, which approximates to the Benares standard, the percentage of personal attendance varied from 61 per cent. in the Sitamarhi subdivision to 93 per cent. in the Muzaffarpur, Jasowli and Samastipur *kothis*. The fall in Sitamarhi is ascribed to Mr. W. S. Dawe "taking little or no interest in dealing with cultivators personally."

In the Hazaribagh Sub-Agency, which is worked purely on the *asamiwar* lines as in Benares, the percentage of attendance is much below the standard. The main reason assigned by the Sub-Deputy Opium Agent is that, as the cultivators are engaged at this period with important agricultural operations, that is, transplanting paddy, etc., they cannot spare the time to attend, and therefore authorise the *khatadar* to receive their advances and *chukties*. The real reasons appear to be two—

(1) That the Sub-Deputy Opium Agent has not taken sufficient personal interest in the matter.

(2) That the cultivation is extraordinarily scattered.

As regards the other Sub-Agencies, the results are generally unsatisfactory. * * * *

The utility to the Department of an officer who for want of sufficient energy or personal interest in his work cannot personally handle his raiyat efficiently is much impaired and the Board look to the Agent to bring to their notice the names of those officers who demonstrate their unfitness in this respect

7. *Measurements and actual cultivation.*—Although there was a further decrease of 4,581 bighas in the settlements in the Bihar Agency, the total cultivation of 333,068 bighas by actual measurements shows an increase of 1,060 bighas over the measurements of 1903-1904.

The cultivation over an area of 8,040 bighas, as against 10,551 in the preceding year, is reported to have failed owing to climatic causes, while the non-fulfilment of engagements accounts for the decrease of 1,992 bighas in the total area settled.

In the Benares Agency, the measurements gave an area of 623,132 bighas (including 16,794 bighas on which the crop failed, owing to climatic causes), or 11,605 bighas in excess of the area engaged for. This excess was mostly in the Rae Bareli Division (2,080 bighas) where, the Agent reports, it has been customary to sow in excess, and also in the Fatehgarh Division (3,186 bighas) where sowings without advances were as usual authorized. The general absence of short sowings of any moment testifies to the care with which settlements were made during the year under review. The area wilfully left unsown in this Agency was only 644 bighas, or a little over ·1 per cent., of the area engaged for, as against 4,981 bighas in 1903-1904. With regard to the loss of 3,618 bighas, owing to non-fulfilment of engagements in the Sub-Agency of Tirhut noticed in paragraph 7 of last year's report, Mr. Bright has reported that, in consequence of the insufficient rainfall in July, September and October 1903, the soil for sowings was left without any moisture, and, in spite of frequent efforts on the part of the raiyats, the seed failed to germinate altogether in large tracts of unirrigated lands. These lands had to be left bare. They were not included in the *kothi* measurements, and the short area appeared in consequence, as due to non-fulfilment of engagements, although such was not actually the case.

8. *Weather and general results.*—The year was an abnormal one in the Bihar Agency, and the conditions varied greatly from district to district. Owing to the *Hathiya* rain in October, there was ample moisture for early sowings, and the seed germinated well. But in the middle of November occurred a sharp shower of rain, which rendered a considerable amount of re-sowing necessary, especially in Tirhut, Motihari and Bettiah. During December and January the weather was very unsettled, and towards the end of January hail fell in many places doing considerable damage, and at the end of that month and in the beginning of February an unprecedented frost occurred which caused much loss, especially in Hazaribagh and the south of Gaya. The extent of the damage from hail is always difficult to estimate, and luckily the storms were mostly confined to small areas; but still it was considerable. It was estimated that in Tirhut, the loss from cold and hail was 100 maunds, and in Motihari, 50 maunds. Gaya was particularly unfortunate in respect of hail, as there were no less than four storms—the last on the 8th March. In Tehta, the loss from hail was estimated at 250 maunds, and 46 villages in Hazaribagh were devastated. When lancings commenced, the juice was very watery; but owing to the absence of west winds the number of lancings was exceptionally large, and in the end in several districts the outturn was much above the average. In Gaya, considerable damage was done by grubs.

In Benares, the monsoon rains were good, and appeared to end in the third week of September; but, after about a month of clear dry weather, there was a final heavy fall of rain over a large part of the Agency. In November, which was unusually warm, there were some showers of rain. In December and the early part of January more rain fell. The early sowings as a rule failed, and the later sowings were kept back a good deal by the damp weather. But for this backwardness the great frost, which occurred on three nights at the end of January and the beginning of February 1905, would have caused much more

damage to the opium crop than it did. The western districts suffered the most, but in the eastern also considerable loss was sustained. Fortunately in February fairly heavy rain fell in many districts, and the crop revived wonderfully. Notwithstanding occasional rain and hail in March, the weather on the whole was favourable and the mild weather in the early part of April was highly beneficial.

10. *Outturn of opium.*— * * * * The *damdeta* produce at 70° consistence in the two Agencies which showed a decrease of 12,745 maunds in the year 1903-04 has further declined by 7,585 maunds in the year under review. In Bihar the general average gross produce per bigha (excluding failures) was 4 seers 2 chitaks 2 kachas during the year under report, or 4 chitaks more than in the previous year and 11 chitaks 3 kachas more than the average of the past seven years. The marked increase in the average outturn in the North Gangetic districts over that produced in the preceding year is attributable to the surrender of unproductive lands and to the generally favourable weather which prevailed over the unirrigated tracts during the whole of the year.

In Benares the average produce (4 seers 10 chitaks) was slightly higher than that of 1903-04 (4 seers 9 chitaks), the former being equal to the average of the last seven years. The best divisional average was that of Bara Banki (5 seers 13 chitaks) and the worst being again that of Cawnpore (3 seers 4 chitaks).

15 *Consistence of the season's opium.*—The average consistence of the outturn of the Bihar Agency was 72·77° as compared with 74·68° of the preceding year, thus showing a decrease of 1·91°. This fall in consistence is due to the effect produced upon the drug by the unfavourable weather towards the close of the collection season.

The average consistence of the opium supplied from the Benares Agency was 68·79° as compared with 69·71° of last year, or a decrease of ·92°.

The average of both Bihar and Benares opium taken together worked out to 71 46°, as compared with 72·52° last year. The average consistence for Benares was again low this year, being 68·68° as compared with 67·98° in 1903-04, and 70·33°, the average of the previous ten years. The lowest consistence (65·24°) was that of the Etawah Division.

The variation in consistence depends greatly upon the distribution of the rainfall, but there are many other factors that have to be taken into consideration.

22. *Advances for wells.*—The advances made for the construction of wells in both Agencies show a further decline as compared with those of the preceding year. The outstanding balances fell in consequence from Rs. 35,814 to Rs. 20,526 in Bihar, and from Rs. 1,36,897 to Rs. 1,08,511 in the Benares Agency. Mr. Bright reports that in Gaya the landlords of a number of villages came forward and took large advances for the construction of wells; that in Monghyr the sinking of fresh wells is slowly but gradually on the increase, and in the Sub-Agency of Patna 214 *kutcha* wells were sunk during the year under report. In Bettiah and Muzaffarpur, however, no adequate idea can be formed from this year's figures as to the reluctance or otherwise on the part of the cultivator to take such advances, since the rainfall throughout the season was both frequent and plentiful. But in Motihari the opposition is due to the raiyats maintaining that the water from the wells is so heavily impregnated with salts that the poppy crop suffers rather than derives any benefit from such irrigation. This question must therefore remain an open one until such time as expert opinion is obtained, and also until the opposition is overcome by experimental cultivation carried on locally under reliable supervision. The Opium Agent has directed the Sub-Deputy to carefully watch a convenient plot irrigated by well-water during the present season, and to report upon its outturn as compared with an adjoining plot irrigated by other means.

In the Benares Agency also the year was not one in which any great demand for well advances would be likely to arise, and the amount advanced was only Rs. 38,137 as compared with Rs. 73,360 in the previous year.

30. *Cost of a chest of Provision Opium and net revenue.*—During the calendar year 1905, 48,000 chests of provision opium were sold in equal proportions from Bihar and Benares, the average prices realized for a chest from each Agency were Rs. 1,530 and Rs. 1,466, or Rs. 1,498 for both combined, and the total sale-proceeds amounted to Rs. 7,19,17,010. The total cost of manufacture of the produce sold (including Presidency charges, &c.) amounted to Rs. 1,18,81,714 in Bihar and to Rs. 1,18,51,581 in Benares, or a total of Rs. 2,37,32,895, giving an average cost per chest of Rs. 494. The net revenue derived from opium during the two calendar years 1904 and 1905 amounted to Rs. 5,39,59,613 and Rs. 4,81,84,115, respectively.

31. *Sales.*—The opium sales during the 12 months from November 1904 to October 1905 comprised 39,762 chests manufactured in 1902-1903 and 8,238 chests manufactured in 1903-1904,—in all 48,000 chests, of which half was taken from each Agency in monthly lots of 4,000 chests. The number of chests sold during the twelve months was the same as that sold during the previous corresponding period.

* * * * As compared with 1903-1904, the average prices of Bihar and Benares opium for the twelve months under notice showed a decrease of Rs. 67 and Rs. 88 per chest, respectively. This is mainly due to the cessation of hostilities in Korea and Manchuria, where the political disturbances for a time impeded the cultivation and transport of the native drug.

32. The total outturn of provision opium during the year 1904-1905 was 55,501 chests, and the balance of the previous year's crop amounted to 33,762. The number of chests available for sale during 1906 is therefore 89,263. In accordance with the orders of the Government of India communicated with the Bengal Government order No. 242 O. P., dated the 10th July 1905, 52,800 chests or 4,400 chests monthly, made up of 2,200 chests each of Bihar and Benares opium, will be sold during the year, and there will therefore be left on the 1st January 1907 a reserve of 36,463 chests, viz., 20,868 of Bihar and 15,595 of Benares opium.

33. *Breaches of the Opium Laws.*—The number of prosecutions in the Bihar Agency under Act XIII. of 1857 was 179, as against 8 in the preceding year; that in Benares decreased from 208 in 1903-1904 to 98 during the year under review. Under Act I of 1878 the number of cases showed a decrease of 41 in Bihar and 10 in Benares. The percentage of fines realized in Bihar, viz., 61, is the same as in the previous year. At the same time the amount paid in rewards was in excess of the fines imposed. In Benares the realizations decreased from 86 to 77 per cent.

35. *Miscellaneous.*—* * * * * (*b*) *Position and prospects of the Gazetted Officers of the Department.*—With reference to the remarks recorded in paragraph 36 (*c*) of last year's Opium Report, the orders of the Government of India sanctioning the revised rules for regulating the strength, position and promotion of the Gazetted Officers of the Opium Department in accordance with the orders of the Secretary of State have now been received. The question of the adequacy of the staff is still under consideration.

* * * * *

(*e*) *Abolition of the Cawnpur Sub-Agency.*—For the reasons stated in their letter to Government, No. 5179B., dated the 31st July 1905, the Board have approved of the Benares Agent's proposal to abolish Cawnpur as a separate Sub-Agency and to convert it into a subdivision of the Fatehgarh Sub-Agency.

* * * * *

(*h*) *Renewal of the Opium Convention with the French Government.*—With reference to the remarks recorded in the concluding portion of paragraph 36(*f*) of last year's report, the sanction of Government has been accorded to a further renewal of the Convention for a period of two years with effect from the 1st January 1905.

(*i*) *Revision of the Departmental Manuals.*—The following volumes of the revised Bihar and Benares Opium Manuals have been completed and published:—

Volume *I.*—The Laws relating to Opium, &c. (Bihar).
" *IV.*—Factory Procedure Rules (do.).
" *V.*— Ditto Forms (do.).
" *XI.*—Tables (Bihar and Benares).

The publication of Volumes II, III (District Procedure Rules and Forms, Bihar), and Volumes VII and VIII (District Procedure Rules and Forms, Benares) has been delayed pending discussion of certain rules with the Opium Agent, Benares, on the occasion of the Member's next visit to the Benares Agency. Volumes VI, IX and X, which relate, respectively, to Opium Laws and Factory Procedure, Rules and Forms (Benares), will shortly be published.

37. *Merits of Officers.*—The thanks of the Board are due to Messrs. Bright and House for the efficient manner in which they have administered their respective charges.

At the instance of the Agents the Board desire to bring to the notice of Government the good work done by the following officers:—

Messrs. J. Christian, A. T. Christian, Field, Reed, J. C. Roy, Powell, M. N. Bhattacharjee and Mackertich in Bihar, and Messrs. G. A. Levett-Yeats, Kennedy, Delmerick, Graham and Cartland in Benares.

LIBERALITY OF BABU RAM CHANDRA THIRANI IN CONNECTION WITH THE NEW HOSPITAL AT KISHANGANJ IN THE DISTRICT OF PURNEA.

No. 1108Medl., dated Calcutta, the 15th March 1906.

From—L. P. SHIRRES, Esq., I.C.S., Secy. to the Govt. of Bengal, Municipal Dept.,
To—The Commissioner of the Bhagalpur Division

I AM directed to acknowledge the receipt of your letter No. 207Jet., dated the 24th February 1906, in which you report that Babu Ram Chandra Thirani, a merchant of Kishanganj, in the district of Purnea, has defrayed the entire cost, amounting to Rs. 9,300, of acquiring land for a new hospital at Kishanganj and constructing a hospital building thereon.

2. In reply I am to request that you will be so good as to convey to the donor an expression of the Lieutenant-Governor's appreciation of his liberality and public spirit.

LIBERALITY OF MESSRS. LAL MOHAN SHAHA & CO. IN CONNECTION WITH THE DARJEELING CHARITABLE HOSPITAL.

No. 1122Medl., dated Calcutta, the 13th March 1906.

From—L. P. SHIRRES, Esq., I.C.S., Secy. to the Govt. of Bengal, Municipal Dept.,
To—The Inspector-General of Civil Hospitals, Bengal.

I AM directed to acknowledge the receipt of your letter No. 1653 of the 20th February 1906, in which you report that the entire cost of building a Cottage Ward in the compound of the Darjeeling Charitable Hospital amounting to Rs. 2,159-3 was contributed by Messrs. Lal Mohan Shaha & Co., the late Babu Lal Mohan Shaha who was formerly a member of that firm having previously promised to construct the building at his own expense.

2. In reply I am to request that you will be so good as to convey to the donors an expression of the Lieutenant-Governor's appreciation of their liberality and public spirit.

	Srs.	ch.	
Sadar	11	8	per rupee.
Khunti	13	0	
Gumla	14	0	

Palamau.—Rainfall at Sadar 0·36. Weather seasonable. Harvesting of *rabi* going on. Cattle-disease exists. Fodder and water sufficient. Common rice sells at 12½ seers a rupee at Sadar.

Manbhum.—Rainfall at Sadar 0·68, Gobindpur 0·99 Weather seasonable. Prospect of crops fair. Outturn of winter rice and *til* in Gobindpur is estimated at 75 per cent. Fodder and water sufficient. Cattle-disease not reported. Common rice sells as follows:—

	Srs.	ch.	
Sadar	13	0	per rupee.
Gobindpur	10	0	

Singhbhum.—Rainfall at Sadar 2·01. Prospects of crops fair. Fodder and water sufficient. Common rice sells at 12 seers a rupee.

General Summary.—Rain was fairly general, the fall being moderate in the Presidency, Burdwan and Orissa Divisions and light in the rest of the Province. Harvesting of the *rabi* crops and the collection of opium are going on. Some damage to the standing crops by hail is reported from the Sonthal Parganas and Angul. Prospects are on the whole satisfactory. There is cattle-disease in five districts. Fodder is reported to be insufficient in parts of Darbhanga and the Sonthal Parganas. Water supply is sufficient. The price of common rice has risen in one and has fallen in five districts. It continues still high in most of the districts of the Presidency Division and also in Hooghly, Howrah, Muzaffarpur, Monghyr, Purnea and Darjeeling.

C. E. A. W. OLDHAM,

	Inches.
The mean pressure of the seven days	29·919
The average pressure of the corresponding period for 24 years, Surveyor-General's Office	29·833
	Hours.
The total number of hours of bright sunshine	31·8
The maximum possible number of hours of sunshine	83·6
	°
The mean temperature of the seven days	76·4
The average temperature of the corresponding period for 24 years, Surveyor-General's Office	80·0
The extreme variation of temperature	20·4
The maximum temperature	86·9
	Miles.
The highest velocity of the wind in one hour	12
	%
The mean relative humidity	83
The average relative humidity of the corresponding period for 24 years, Surveyor-General's Office	66
	Inches.
The total fall of rain from 11th to 17th March 1906	1·42
The average fall of the corresponding period for 24 years, Surveyor-General's Office	0·15
The total fall from 1st January to 17th March 1906	11·16
The average fall of the corresponding period for 24 years, Surveyor-General's Office	2 39

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from eye observations.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground. Rainfall reported on any day is for 24 hours preceding 8 A.M. of that day.

o, overcast; t, thunder; ∠, lightning; d, drizzling rain; p, passing temporary showers; ≏, dew.

METEOROLOGICAL OFFICE, GOVT. OF INDIA;
Alipore (Calcutta), the 19th March 1906.

J. A. CUNNINGHAM,
for *Offg. Meteorological Reporter to the Govt. of India and Director-General of Indian Observatories.*
